## Graduate School

With Announcements for the Year 1938-39

Vol. XXXIII, Series I No. 1 January 1, 1938

Published monthly by the University of Florida, Gainesville, Florida Entered in the post office in Gainesville, Florida, as second-class matter, under Act of Congress, August 24, 1912

Office of Publication, Gainesville, Florida

The Record comprises:

The Reports of the President to the Board of Control, the Bulletins of Information, announcements of special courses of instruction, and reports of the University Officers.

These bulletins will be sent gratuitously to all persons who apply for them. The applicant should specifically state which bulletin or what information is desired. Address

THE REGISTRAR, University of Florida

Gainesville, Florida

Research Publications.—Research publications will contain results of research work. Papers are published as separate monographs numbered in several series.

There is no free mailing list of these publications. Exchanges with institutions are arranged by the University Library. Correspondence concerning such exchanges should be addressed to the University Librarian, University of Florida, Gainesville, Florida. The issue and sale of all these publications is under the control of the Committee on Publications. Requests for individual copies, or for any other copies not included in institutional exchanges, should be addressed to the University Library, University of Florida, Gainesville, Florida.

#### GRADUATE SCHOOL CALENDAR

#### SECOND TERM, 1937-38

February 7, Monday, 5 P. M	Registration for second term.	
February 12, Saturday, 12 noon	Last day for registration for second term.	
February 26, Saturday, 12 noon	Last day for making application for a degree to be awarded at the end of the second term.	
March 14, Monday	Last day for resident students to satisfy the language requirements if they wish to be candidates for the Master's degree at the end of the First Summer Term.	
April 18, Monday	Last day for resident students to satisfy the language requirements if they wish to be candidates for the Master's degree at the end of the Second Summer Term.	
May 2, Monday	Last day for students graduating at the end of the term to submit theses to the Dean.	
May 28-30, Saturday-Monday	Commencement Exercises.	
SUMMER	R SESSION, 1938	
FIRST	SUMMER TERM	
June 13, Monday	Registration.	
June 20, Monday, 12 noon	Last day for registration for the First Summer Term, and for adding courses.	
June 25, Saturday, 12 noon	Last day for making application for a degree to be awarded at the end of the First Summer Term.	
July 2, Saturday	Last day for students graduating at the end of the First Summer Term to submit theses to the Dean.	
July 22, Friday, 12 noon	First Summer Term ends.	
July 23, Saturday, 10 A. M.	Conferring of degrees.	
SECOND SUMMER TERM		
July 25, Monday	Registration.	
July 27, Wednesday	Last day for registration for the Second Summer Term, and for adding courses.	
July 30, Saturday, 12 noon	Last day for making application for a degree to be awarded at the end of the Second Sum-	

mer Term.

August 6, Saturday, 12 noon	Last day for students graduating at the end of
	the Second Summer Term to submit theses to
	the Dean.
August 26, Friday, 12 noon	Second Summer Term ends.
August 26, Friday, 12 noon	Second Summer Term ends.

#### REGULAR SESSION, 1938-39

August 27, Saturday, 10 A. M..... Commencement Convocation.

FIRST TERM
September 17, Saturday, 8-12 A. M Registration.
October 1, Saturday, 12 noon Last day for registration for the first term, and for adding courses.
October 15, Saturday, 12 noon Last day for making application for a degree to be awarded at the end of the first term.
November 23, Wednesday, 5 P. M Thanksgiving recess begins.
November 28, Monday, 8 A. M Thanksgiving recess ends.
December 17, Saturday, 12 noon Christmas recess begins.
1939—
January 2, Monday, 8 A. M
January 30, Monday, 10 A. M First term ends. Conferring of degrees.

#### INSTRUCTIONS FOR GRADUATE STUDENTS

- 1. Correspond with the Dean and if necessary with the head of the department in which you propose to take your major work.
- 2. If you are found eligible and decide to come to the University of Florida, have the Registrar of your school send a transcript of your work to the Dean of the Graduate School. This should be in the hands of the Dean at least a month before the date for registration.
- 3. At the proper time, register with the Dean. He will give you blank form No. 1 to take to your department head. Either the head of the department or some other professor in this department will become the professor of your major subject and will suggest courses for which you should register for the session. Take this blank to the Dean and complete your registration.
  - 4. See that the language requirements are satisfied at the proper time.
- 5. Early in your last term before graduation, notify the Registrar that you are a candidate for a degree. See calendar for "Last day for making application for a degree".
- 6. When you are ready to put the thesis in final form, get instructions at the Dean's office. Watch your time. Consult the calendar.
- Look to the professor of your major subject and your special supervisory committee for guidance.
- 8. Always feel free to seek information at the Dean's office if you are not certain as to the interpretation of any requirement.

#### ADMINISTRATIVE OFFICERS

JOHN JAMES TIGERT, M.A. (Oxon.), Ed.D., D.C.L., LL.D., D.Litt., L.H.D., President of the University

JAMES NESBITT ANDERSON, Ph.D., Dean of the Graduate School

HARLEY WILLARD CHANDLER, M.S., Registrar

PENELOPE GRIFFIN, B.A., Secretary

#### THE GRADUATE COUNCIL

THE DEAN

WALTER HERMAN BEISLER, D.Sc., Professor of Chemical Engineering

TRUMAN C. BIGHAM, Ph.D., Professor of Economics

LEONARD WILLIAM GADDUM, Ph.D., Bio-chemist, Experiment Station

H. HAROLD HUME, M.S., Assistant Dean of the College of Agriculture and Director of Research of the Experiment Station

TOWNES RANDOLPH LEICH, Ph.D., Head Professor of Chemistry and Dean of the College of Arts and Sciences

WINSTON WOODARD LITTLE, M.A., Professor of Secondary Education and High School Visitor, Dean of the General College

James William Norman, Ph.D., Head Professor of Education and Dean of the College of Education

#### TEACHING FACULTY

Those Offering Courses Listed in This Bulletin

CHARLES ELLIOTT ABBOTT, M.S., Assistant Professor of Horticulture

ROBERT VERRILL ALLISON, Ph.D., Head Professor of Agronomy; Agronomist, Experiment Station

James Nesbitt Anderson, Ph.D., Head Professor of Ancient Languages and Dean of the Graduate School

MONTGOMERY DRUMMOND ANDERSON, Ph.D., Professor of Business Statistics and Economics Ernest George Atkin, Ph.D., Head Professor of French

ROLLIN SALISBURY ATWOOD, Ph.D., Professor of Economic Geography

ROBERT MARLIN BARNETTE, Ph.D., Chemist, Experiment Station

RAYMOND BROWN BECKER, Ph.D., Professor of Dairy Husbandry and Dairy Husbandman, Experiment Station

WALTER HERMAN BEISLER, D.Sc., Professor of Chemical Engineering

EDWARD W. BERGER, Ph.D., Entomologist, Florida State Plant Board

TRUMAN C. BIGHAM, Ph.D., Professor of Economics

ALVIN PERCY BLACK, Ph.D., Professor of Agricultural Chemistry

ARTHUR AARON BLESS, Ph.D., Professor of Physics

LUCIUS MOODY BRISTOL, Ph.D., Head Professor of Sociology

ARTHUR C. BROWN, M.S., Florida State Plant Board, Special Lecturer, Plant Quarantine and Inspection

JOSEPH BRUNET, Ph.D., Associate Professor of French

CHARLES FRANCIS BYERS, Ph.D., Assistant Professor of Biology

HENRY HOLLAND CALDWELL, M.A., Associate Professor of English

ARCHIE FAIRLY CARR, JR., Ph.D., Instructor in Biology

WILLIAM RICHARD CARROLL, Ph.D., Associate Professor of Botany and Bacteriology

James Edward Chace, Jr., M.B.A., Assistant Professor of Economics and Realty Management

Bernard Victor Christensen, Ph.D., Head Professor of Pharmacognosy and Pharmacology, and Director of the School of Pharmacy

MADISON DERRELL CODY, M.A., Head Professor of Botany and Bacteriology

ALFRED CRACO, Ph.D., Professor of Educational Psychology and Measurements

JOHN THOMAS CREICHTON, Ph.D., Head Professor of Entomology and Plant Pathology

MANNING JULIAN DAUER, Ph.D., Assistant Professor of Political Science

SICISMOND DE RHUDESHEIM DIETTRICH, D.Sc., Assistant Professor of Economic Geography

HARWOOD BURROWS DOLBEARE, B.A., Associate Professor of Economics

WARREN FORD DOOLITTLE JR., B.F.A., Instructor in Drawing and Painting

Newton Cromwell Ebauch, B.E. in M. and E.E., M.E., M.S., Head Professor of Mechanical Engineering

JOHN GRADY ELDRIDGE, M.A., Professor of Economics

MARK WIRTH EMMEL, D.V.M., M.S., Professor of Veterinary Science and Veterinarian, Experiment Station

ELMER JACOB EMIC, M.A., Head Professor of Journalism

HASSE OCTAVIUS ENWALL, Ph.D., Head Professor of Philosophy

ROLAND BYERLY EUTSLER, Ph.D., Professor of Economics and Insurance

LESTER COLLINS FARRIS, M.A., Associate Professor of English

WILLIAM WARRICK FINEREN, M.E., Professor of Mechanical Engineering

WILBUR LEONIDAS FLOYD, M.S., Head Professor of Horticulture and Assistant Dean of the College of Agriculture

PERRY ALBERT FOOTE, Ph.D., Professor of Pharmacy

ROWLAND BARNES FRENCH, Ph.D., Associate Chemist, Experiment Station

LEONARD WILLIAM GADDUM, Ph.D., Bio-chemist, Experiment Station

EDWARD WALTER GARRIS, Ph.D., Professor of Agricultural Education

HALLETT HUNT GERMOND, Ph.D., Associate Professor of Mathematics

JAMES DAVID GLUNT, Ph.D., Professor of History

J. C. Goodwin, M.S., Florida State Plant Board, Special Lecturer Plant Quarantine and Inspection

JOHN LOUIS ROCHON GRAND, M.A., Assistant Professor of Architecture

HENRY GLENN HAMILTON, Ph.D., Professor of Marketing Agricultural Products

FREDERICK T. HANNAFORD, B.A., Assistant Professor of Architecture

OLIVER HOWARD HAUPTMANN, Ph.D., Assistant Professor and Acting Head of the Department of Spanish and German

JOHN ERSKINE HAWKINS, Ph.D., Associate Professor of Chemistry

FRED HARVEY HEATH, Ph.D., Professor of Chemistry

OSCAR E. HESKIN, Ph.D., Assistant Professor of Economics and Marketing

ELMER DUMOND HINCKLEY, Ph.D., Head Professor of Psychology

THEODORE HUNTINGTON HUBBELL, Ph.D., Professor of Biology and Geology

HUBER CHRISTIAN HURST, M.A., LLB., Associate Professor of Business Law and Economics

WILLIAM JOHN HUSA, Ph.D., Head Professor of Pharmacy

EDWARD JOSEPH IRELAND, Ph.D., Instructor in Pharmacognosy and Pharmacology

VESTUS TWICGS JACKSON, Ph.D., Professor of Chemistry

FRANK STOVER JAMISON, Ph.D., Truck Horticulturist, Experiment Station

WILLIAM GORDON KIRK, Ph.D., Assistant Professor of Animal Husbandry and Assistant Animal Husbandman, Experiment Station

HAROLD LORAINE KNOWLES, Ph.D., Assistant Professor of Physics

Franklin Wesley Kokomoor, Ph.D., Professor of Mathematics

Joseph Harrison Kusner, Ph.D., Associate Professor of Mathematics

JAMES MILLER LEAKE, Ph.D., Head Professor of History and Political Science

Townes Randolph Leich, Ph.D., Head Professor of Chemistry and Dean of the College of Arts and Sciences

WALTER ANTHONY LEUKEL, Ph.D., Agronomist, Experiment Station

WINSTON WOODARD LITTLE, M.A., Professor of Secondary Education and High School Visitor, Dean of the General College

THOMAS MARVEL LOWE, S.B., M.S., Associate Professor of Civil Engineering

CLIFFORD PIERSON LYONS, Ph.D., Head Professor of English

JESSE WILFORD MASON, Ph.D., Assistant Professor of Chemical Engineering

Walter Jeffries Matherly, M.A., Head Professor of Economics and Dean of the College of Business Administration

ARTHUR RAYMOND MEAD, Ph.D., Professor of Supervised Teaching and Director of Educational Research

NORMAN RIPLEY MEHRHOF, M.S., Professor of Poultry Husbandry and Poultry Husbandman, Experiment Station

J. H. MONTGOMERY, M.D., Assistant Plant Commissioner, Florida State Plant Board, Special Lecturer, Plant Quarantine and Inspection

CHARLES I. MOSIER, Ph.D., Assistant Professor of Psychology

WAYNE MILLER NEAL, Ph.D., Associate Professor of Animal Nutrition and Associate in Nutrition, Experiment Station

CLARENCE VERNON NOBLE, Ph.D., Head Professor of Agricultural Economics

James William Norman, Ph.D., Head Professor of Education and Dean of the College of Education

ANCIL NEWTON PAYNE, Ph.D., Assistant Professor of History and Political Science

WILLIAM SANFORD PERRY, M.S., Associate Professor of Physics

GEORGE OSBORN PHELPS, M.S. in Engr., Instructor in Industrial Engineering

CECIL GLENN PHIPPS, Ph.D., Associate Professor of Mathematics

ZAREH M. PIRENIAN, M.S., Associate Professor of Mathematics

CASH BLAIR POLLARD, Ph.D., Professor of Chemistry

EDWARD S. QUADE, Ph.D., Instructor in Mathematics

KEITH GRAHAM REEVE, M.A. Arch., Associate Professor of Architecture

JULIUS WAYNE REITZ, M.S., Professor of Agricultural Economics

CHARLES ARCHIBALD ROBERTSON, M.A., Professor of English

Frazier Rocers, M.S.A., Head Professor of Agricultural Engineering

JAMES SPEED ROCERS, Ph.D., Head Professor of Biology and Geology

LOUIS LEON RUSOFF, M.S., Assistant Professor of Animal Husbandry and Assistant in Animal Nutrition, Experiment Station

ELLIS BENTON SALT, Ed.D., Professor of Health and Physical Education

STEPHEN PENCHEFF SASHOFF, M.S., Associate Professor of Electrical Engineering

WILLIAM LINCOLN SAWYER, M.S. in Engr., Assistant Professor of Civil Engineering

PETTUS HOLMES SENN, Ph.D., Associate Professor of Farm Crops and Genetics

ARTHUR LISTON SHEALY, B.S., D.V.M., Head Professor of Animal Husbandry and Animal Husbandman, Experiment Station

HARLEY BAKWEL SHERMAN, Ph.D., Professor of Biology

GLENN BALLARD SIMMONS, Ph.D., Professor of Education and Assistant Dean in Charge of Laboratory School

THOMAS MARSHALL SIMPSON, Ph.D., Head Professor of Mathematics

FREDERICK B. SMITH, Ph.D., Professor of Agronomy

HERMAN EVERETTE SPIVEY, Ph.D., Assistant Professor of English

ARTHUR LOUIS STAHL, Ph.D., Associate Horticulturist, Experiment Station

ROBERT ALDEN THOMPSON, M.S. in Engr., Instructor in Mechanical Engineering

LLOYD MASSENA THURSTON, Ph.D., Professor of Dairy Husbandry and Dairy Technologist Archie Newton Tissot, Ph.D., Associate Entomologist, Experiment Station

FRANK WALDO TUTTLE, Ph.D., Assistant Professor of Economics

HOWARD KEEFER WALLACE, M.S., Instructor in Biology

JOSEPH RALPH WATSON, M.A., Entomologist, Experiment Station

RUDOLPH WEAVER, B.S., F.A.I.A., Head Professor of Architecture and Director of the School of Architecture and Allied Arts

JOSEPH WEIL, B.S.E.E., M.S., Head Professor of Electrical Engineering, Head of Engineering Division, State Radio Station WRUF, Acting Dean of the College of Engineering

FRANCIS DUDLEY WILLIAMS, Ph.D., Instructor in Physics

OSBORNE WILLIAMS, Ph.D., Assistant Professor of Psychology

ROBERT CROZIER WILLIAMSON, Ph.D., Head Professor of Physics

CLAUDE HOUSTON WILLOUGHBY, M.S., Professor of Animal Husbandry JACOB HOOPER WISE, Ph.D., Professor of Education

PHILIP OSBORNE YEATON, B.S., S.B., Head Professor of Industrial Engineering

#### GENERAL INFORMATION

#### ADMINISTRATION

The affairs of the Graduate School are administered by the Graduate Council, which consists of the Dean as *ex-officio* chairman, and certain members of the faculty, who are appointed annually by the President.

#### ADMISSION

To be admitted to the Graduate School an applicant must be a graduate of a standard college or university and have a foundation in the major subject sufficient in quantity and quality to be satisfactory to the department in which the student proposes to major. Each department offering graduate work shall file with the Dean of the Graduate School a statement of its requirements for publication in the *Graduate Bulletin* or for other use by him.

If the student cannot meet these two requirements, he may nevertheless be permitted to register provisionally, and demonstrate by a qualifying examination and a semester's work, his preparation for and his ability to do graduate work. Such students often will be required to spend longer than the prescribed time in completing the requirements for the degree. It is permissible for well-qualified students to take courses in the Graduate School without becoming candidates for an advanced degree.

#### REGISTRATION

All graduate students, old or new, are required to register in the Office of the Dean on the regular registration days as indicated in the bulletin. The student should consult in advance the Dean and the head of the department in which he proposes to major, and inquire if he is eligible to register for this work. A complete transcript of all undergraduate and graduate work should be transmitted to the Dean of the Graduate School by the Registrar of the institution in which the credits have been earned.

This transcript should be in the Dean's hands at least one month before the beginning of the session. If the student seems eligible, he will be referred by the Dean to the head of the department concerned. Either the head of the department or some professor in that department will become the professor of the major subject for the student, and will plan the courses for which he is to register. A blank form is furnished at the Dean's Office.

#### FEES

A registration fee of \$15 for each semester is required of all students; for the summer session this fee is \$15 for each term. All students pay a diploma fee of \$5 before graduation. At the time when the diploma fee is paid, the student will also have to pay \$4 for binding two copies of the thesis or the dissertation.

Students from other states or countries who have not established residence in the State of Florida are required to pay an additional fee of \$50 for each semester of the regular session and an additional fee of \$10 for each term of the summer session.

Holders of graduate assistantships and graduate scholarships are exempt from the fee for non-Florida students, but not from breakage fees.

Some fees are optional: for instance, the student activity fee and the infirmary fee. If a student wishes the privileges that go with these fees, he must pay the fees in advance.

#### GRADUATE ASSISTANTSHIPS AND GRADUATE SCHOLARSHIPS

#### With the Annual Stipend

AGRICULTURE:
Agricultural Economics-One Graduate Assistant in Farm Management\$ 450
Agronomy—
One Graduate Assistant at \$450
Botany and Bacteriology
One Graduate Assistant in Bacteriology at \$450
One Graduate Assistant in Botany at \$450
Entomology and Plant Pathology
One Graduate Assistant at \$450
One Graduate Fellow at \$600
One Graduate Assistant in Pest Control at \$540
One Graduate Assistant in Pest Control at \$420
Horticulture—One Graduate Assistant
(Agricultural Chemistry is included in Chemistry)
Architecture:
One Graduate Assistant
BIOLOGY AND GEOLOGY:
Three Graduate Assistants at \$450 each
Three Graduate Assistants at \$450 each
CHEMISTRY:
One Graduate Assistant in Agricultural Chemistry
One Graduate Assistant in Chemical Engineering
Three Graduate Assistants in Chemistry at \$450 each
Four Research Assistants in Naval Stores at \$600 each
Engineering:
Civil Engineering—One Graduate Assistant
Mechanical Engineering—One Graduate Assistant
(Chemical Engineering is included in Chemistry)
PHARMACOGNOSY AND PHARMACOLOGY:
Two Graduate Assistants at \$450 each
PHARMACY:
Two Graduate Assistants at \$450 each
Two Graduate Assistants at \$450 each
Physics:
Three Graduate Assistants at \$450 each1,350
Psychology:
One Graduate Assistant at \$450
General:
Ten Graduate Scholarships at \$300 each
Ten Graduate Scholarships at 4000 tach
(The Graduate Scholarships may be in any department that offers major work for a
Master's degree. Application must be filed not later than March 15. Students accepting

these scholarships are not permitted to take other remunerative positions.)

#### REQUIREMENTS FOR THE MASTER'S DEGREE

Degrees Offered.—Master of Arts; Master of Arts in Architecture; Master of Arts in Education; Master of Science; Master of Science in Agriculture; Master of Science in Engineering; and Master of Science in Pharmacy.

Residence Requirement.—The student must spend at least one entire academic year at the University as a graduate student devoting his full time to the pursuit of his studies. If there is a break in the student's work, his whole course must be included within a period of seven years, unless the Supervisory Committee recommends otherwise.

Transfer of Credits.—Under certain conditions transfer of a limited number of credits to the University will be allowed; but the final acceptance of credits from other institutions is subject to the approval of the student's Supervisory Committee. Transferred credits may reduce the course requirement but not the residence, and work they represent shall be included in the final examination.

Work Required.—The work for the master's degree shall be a unified program with a definite objective, consisting of twenty-four semester hours or the equivalent, at least half of which shall be in a single field of study and the remainder in related subject matter as determined by the student's Supervisory Committee. The principal part of the course work for the master's degree shall be designated strictly for graduates. However, in the case of related subject matter, courses numbered 300 and above may be offered upon the approval of the Supervisory Committee.

In addition to the course work, the student will be required to prepare and present a thesis (or equivalent in creative work) acceptable to the Supervisory Committee. The thesis shall be submitted to the Dean or the Graduate Council for approval. The student should consult the Dean's office for instructions concerning the form of the thesis. Two copies of this thesis shall be in the hands of the Dean not later than May 1. If the student expects to graduate at the end of the first term the thesis must be submitted by January 3. These copies are deposited in the Library if the thesis is accepted.

Grades.—To obtain credit for a graduate course the student must attain a grade not lower than B in both major and minor work. Re-examinations are not permitted.

#### LANGUAGE REQUIREMENT .---

- 1. Foreign Language.—A reading knowledge of a foreign language is left to the discretion of the student's Supervisory Committee. When a foreign language is required the examination will be conducted by the language department concerned. The requirement must be satisfied before the beginning of the last semester. A student in the regular session must pass the language examination by March 15 if he expects to graduate at the end of the first summer term of that year, and by April 20 if he expects to graduate at the end of the second summer term. In case the student is completing all his work in the summer terms, the foreign language requirement must be satisfied before the beginning of the fourth short summer term. If the student is majoring in a foreign language, that language cannot be used to satisfy this requirement.
- 2. English Language.—The effective use of the English language of an order suitable to the master's level, as determined by the student's Supervisory Committee, is required of all candidates for the master's degree.

Admission to Candidacy.—Whether an applicant has been provisionally admitted or regularly admitted, his Supervisory Committee shall review his entire academic record at the end of his first semester or summer session of residence work. Upon recommendation of the committee a formal vote of the principal department concerned will be neces-

sary to admit the applicant to candidacy, to fix definitely the additional residence and course requirements, and to approve the program the applicant has submitted.

Supervisory Committee.—The Dean shall appoint a special Supervisory Committee for each student consisting of not less than three members. The professor of the principal subject will be chairman of this committee. The Dean is an ex-officio member of all Supervisory Committees. The many important duties of the Supervisory Committee will be given under several of the items relating to the requirements for the master's degree.

General Examination.—It will be the duty of the Special Supervisory Committee, when all work is complete or practically complete, including the regular courses and the thesis, to conduct a general examination, either written or oral, or both, to embrace: first, the thesis; second, the major subject; third, the minor or minors; fourth, questions of a general nature pertaining to the student's field of study. The Committee shall report in writing to the Dean not later than one week before the time for the conferring of the degree if all work has been completed in a satisfactory manner and the student is recommended for the degree.

Work Done in Absentia.—Credit is not given for work done in absentia. No courses may be taken for credit by extension or correspondence. Under the following conditions, however, the Graduate Council may vote to allow the student to finish and submit his thesis when not in residence:

- (1) If he has completed his residence requirement.
- (2) If he has completed his course requirements.
- (3) If he has submitted while in residence a draft of his thesis and obtained the approval of his Supervisory Committee as to the substance of his thesis.
- (4) If the Supervisory Committee recommends to the Graduate Council that the student be given the privilege of finishing the thesis in absentia and submitting it later.

In case this privilege is granted and the final draft of the thesis is approved, it will be necessary for the student to appear and stand the final examination. His presence will also be necessary at Commencement if the degree is conferred.

Training for Government Service.—In view of the increasing importance of training for the public service at the present time, the University of Florida offers the following program for the University of Florida students who are interested in pursuing graduate work in public administration:

- (1) Training in public administration should be accompanied by specific work in public offices under recognized supervision. Accordingly, the University of Florida has arranged a program which will enable the student to avail himself of facilities and specialized courses offered by approved institutions in Washington, D. C., which give such training. The procedure necessary is that the student make application by February 1, if he intends to pursue such graduate training the following fall. In February the Graduate Council of the University of Florida will consider his application. If the application is viewed favorably, the student may be permitted to register for the following year at the University of Florida, although he will pursue his scholastic work at Washington in absentia from the University of Florida. The Graduate Council should approve both the studies he undertakes in Washington and the topic for his thesis. The student will be encouraged to take courses in public administration in Washington, and to avail himself of the use of facilities which are offered for the pursual of training in government departments. The credit earned by the student during this year's work may not exceed one-half of a full year's graduate work.
- (2) The student upon his return to the University of Florida will be required to complete the remaining one-half of the credit necessary for earning the Master's degree. Likewise, he will be required to write his thesis under the supervision of his major professor at the University of Florida. Finally, he will remain in residence at the University of Florida for a period of at least nine months. During these nine months, however, he may take as little as one-half of a full graduate load; the rest of his time may be devoted to work on the campus, as a graduate assistant, teaching fellow, etc., if he has secured such an award.

At the time the student is preparing to make application to the Graduate Council, he is urged to secure information about the programs of the institutions at Washington, and to make application with them for such fellowships as may be available. These fellowships are entirely under the control of the institutions in question. The program of the National Institute of Public Affairs in Washington, while limited to fifty students selected by the Institute each year, offers particular advantages to students who contemplate graduate training in public administration.

Summer Terms.—Three complete summer sessions, or six short summer terms, devoted entirely to graduate work, will satisfy the time requirement. The terms need not be consecutive, but the work must be completed within seven years. The thesis must be completed and submitted to the Dean not later than three weeks before the end of the summer term in which the student expects to receive his degree.

#### REQUIREMENTS FOR THE DEGREE OF DOCTOR OF PHILOSOPHY

The degree of Doctor of Philosophy is offered only in the departments of Biology (Zoology), Chemistry, Pharmacy, and Pharmacognosy and Pharmacology. It is expected that other departments will be added from year to year as facilities are increased.

Time and Residence.—A minimum of three academic years of resident graduate work, of which at least the last year must be spent at the University of Florida, is required of all candidates for the Doctor's degree. In many cases, it will be necessary to remain longer than three years, and necessarily so when the student is not putting in his full time in graduate work.

Distribution of Work.—Two-thirds of the student's time is expected to be spent upon his major subject and the dissertation, and about one-third on his minor or minors. The student will be guided by the professor of his major subject and by his special committee in regard to his whole course of study. The Graduate Council does not specify just what courses or how many courses will be required. The work is now mainly research, and the student will be thrown largely upon his own responsibility. He is expected to familiarize himself thoroughly with his field of study, and as a result of his studies and investigations, to produce a work which will add something to human knowledge.

Minors.—The student must take one minor and may not take more than two minors. In general, if two minors are taken, the second minor will require at least one year. The first minor will require twice as much work as the second, and if only one minor is taken it will require as much work as two minors.

Special Committee.—When the student has advanced sufficiently towards his degree, a special committee will be appointed by the Dean, of which committee the professor of the major subject will be chairman. This committee will direct, advise, and examine the student. The Dean is an ex-officio member of all supervisory committees.

Language Requirement.—A reading knowledge of both French and German is required of all candidates for the Ph.D. degree. The examinations in the languages are held by the language departments concerned. These requirements should be removed as early as possible in the student's career, and must be satisfied before the applicant can be admitted to the qualifying examination.

Qualifying Examination.—A qualifying examination is required of all candidates for the degree of Doctor of Philosophy. This examination may be held during the second term of the second year of residence. The examination is both written and oral and covers both major and minor subjects. It will be conducted by his Special Supervisory Committee. After passing the qualifying examination the student must put in one full academic year of residence before he appears for the degree. If the student fails in his qualifying examination, he will not be given another opportunity unless for special

reasons a re-examination is recommended by his special committee and approved by the Graduate Council.

Dissertation.—A satisfactory dissertation showing independent investigation and research is required of all candidates. Two typewritten copies of this dissertation must be presented to the Dean not later than May 1 of the year in which the candidate expects to receive his degree. If the student should be a candidate for the degree in a summer term, the thesis must be completed and submitted to the Dean not later than three weeks before the end of the term in which the student expects to receive his degree.

Printing of Dissertation.—One hundred printed copies of the dissertation must be presented to the University within one year after the conferring of the degree. After the dissertation has been accepted, the candidate must deposit with the Business Manager, not later than one week before the degree is conferred, the sum of \$50 as a pledge that the dissertation will be published within the prescribed time. This sum will be returned if the printed copies are received within the year.

Final Examination.—After the acceptance of the dissertation and the completion of all the work of the candidate, he will be given a final examination, oral or written, or both, by his Special Supervisory Committee.

Recommendation.—If the final examination is passed, the Special Committee will report to the Dean in writing not later than one week before the time for conferring the degree that the student has met all requirements for the degree, and that he is presented to the Graduate Council for recommendation to the Board of Control for the degree of Doctor of Philosophy.

#### DEPARTMENTS OF INSTRUCTION

Graduate Courses.—Only strictly graduate courses are listed in this bulletin. For other courses in the various departments, see the Bulletin of Information for the Colleges and Professional Schools of the Upper Division.

The courses are arranged alphabetically. Not all the courses will be given in 1938-39. In some cases the courses not offered for that year are indicated. In other cases the courses actually given will be determined by the demand.

#### GRADUATE COURSES

#### AGRICULTURAL ECONOMICS

Prerequisites: The student as a rule will have received his B.S. degree in agriculture from a college of recognized standing. The student must next satisfy one or more professors in each subject which he has chosen for major and minor study that he has the necessary preparation to pursue graduate work in that subject.

As. 501-502.—Agricultural Economics Seminar. 2 hours. 4 credits. Noble and the Agricultural Economics STAFF.

A study of recent literature and research work in agricultural economics. (An entire change of subject matter will be made.)

As. 505-506.—Research Problems.—Farm Management. Hours to be arranged by the Head of the Department. NOBLE, REITZ.

As. 508.—Land Economics. 2 hours and 2 hours laboratory. 3 credits. Hamilton.

Rural taxation, colonization, and adjustment of rural lands to their best uses.

As. 509.—Citrus Grove Organization and Management. 1 hour and 2 hours laboratory. 2 credits. Reitz.

The organization and management of successful citrus properties in Florida.

As. 510.—Organization and Management of Truck Farms. 1 hour and 2 hours mory. 2 credits. Noble.

economic organization and management of successful truck farms in Florida.

. 511-512.—Research Problems—Marketing Agricultural Products. Hours redit to be arranged and approved by the Head of the Department. HAM-

As. 514.—Advanced Marketing of Agricultural Products. 2 hours and 2 hours laboratory. 3 credits. Hamilton.

Study of private and cooperative agencies marketing agricultural products and commodities.

#### AGRICULTURAL ENGINEERING

Prerequisites: Bachelor's degree in Agriculture. A vinimum of ten semester hours in Agricultural Engineering.

Ag. 501-502.—Seminar. 2 hours. 4 credits. Rogers.

Discussion of agricultural engineering problems and review of literature. Required of all graduate students registered in the department.

Ag. 503-504.—Research. 3 to 6 hours. 6 to 12 credits. ROGERS. Special problems in agricultural engineering.

#### AGRONOMY

Prerequisites: A student who expects to pursue graduate work in Agronomy should present the Bachelor's degree from a recognized College of Agriculture, with a major in Agronomy, or the equivalent in other sciences. This would ordinarily mean at least eighteen hours, or its equivalent, of undergraduate work in the department. The student will be held responsible for such basic undergraduate courses as are deemed necessary for the pursuit of his special project.

Ay. 500.—Advanced Soil Fertility. 1 hour and 4 hours laboratory. 3 credits. ALLISON.

Soil and plant relationships especially from the standpoint of normal growth under field conditions; inter-relationships of chemistry, physics and microbiology; mineral and organic balance; the role of trace elements; deficiency symptoms; quality production; fertilizer materials, placement and cultural relationships.

Ay. 502.—Soil Chemistry. 1 hour and 4 hours laboratory. 3 credits. GADDUM.

Analysis of soils and related materials in terms of common and trace elements and in relation to various conditions; related composition of plants; composition of fertilizers and fertilizer materials; chemical behavior of soil components; methods of analysis and study.

Ay. 503.—Soil Microbiology. 1 hour and 4 hours laboratory. 3 credits. SMITH.

Qualitative, quantitative and functional studies of the soil microflora under field and laboratory conditions on both mineral and organic soils, including virgin soils, in relation to type, conditions of cultivation and fertility; elemental metabolism of the more important organisms, especially in terms of trace elements; climatic influences.

Ay. 505.—Advanced Soils. 1 hour and 4 hours laboratory. 3 credits. BARNETTE.

Soil genesis, morphology and classification including mapping; physical and chemical composition and reactivity of the important soils of Florida and the United States in relation to their proper development as land surface units.

Ay. 520.—Advanced Plant Genetics. 3 hours. 3 credits. SENN.

Variation and inheritance in plants and the application of genetic principles to plant improvement. Sterility, hybrid vigor, inbreeding, pure lines, disease resistance, chromosomal variations, and the newer cytological approach to genetical investigations.

Ay. 526.—Special Problems in Crop Production. 2 to 5 credits. SENN.

Ay. 528.—Methods of Crop Investigations. 2 hours. 2 credits. SENN.

Field plot technic, statistical analysis of data based on biometrical methods; environmental factors influencing experimental results.

Ay. 601-602.—Soils Research. 1 to 12 credits each semester.

A. Soil Fertility. C. Soil Chemistry. D. Soil Microbiology. F. Land Use.

Ay. 603-604.—Conferences, 1 hour. 2 credits.

A. Soil Fertility. C. Soil Chemistry. D. Soil Microbiology. F. Land Use.

#### ANIMAL HUSBANDRY

(Including Dairying, Poultry Husbandry and Veterinary Science)

Prerequisites: Twenty-four hours or equivalent of approved undergraduate work in Animal Husbandry.

#### ANIMAL PRODUCTION AND NUTRITION

Al. 501-502.—Animal Production, 3 hours, 6 credits. Willoughby.

Problems in the production of domestic animals; development of types and breeds; management of herds; research on selected topics.

Al. 503-504.—Animal Nutrition. 3 hours. 6 credits. BECKER and RUSOFF. Prerequisites: Al. 311 (Elementary Nutrition) and Al. 312 (Feeds and Feeding).

Relative composition of feed; digestion in ruminants; development of feeding standards; protein, energy, vitamins, and mineral elements in nutrition.

Al. 505-506.—Live Stock Records. 2 hours, 4 credits, Willoughby.

History of live stock in the South; methods of breed associations; research on selected topics.

Al. 508.—Methods in Animal Research. 2 hours. 2 credits. Becker.

Methods employed in nutritional, feeding and management investigations with farm animals.

- Al. 509-510.—Problems in Animal Nutrition. 2 to 5 credits. Becker, Neal, Rusoff.
- Al. 511-512.—Problems in Swine Production. 2 to 5 credits. Kirk and Shealy.
- Al. 513-514.—Problems in Beef Production. 2 to 5 credits. KIRK and SHEALY.

#### DAIRYING

Dy. 520.—Advanced Dairy Technology. 1 hour and 6 hours laboratory. 3 credits. Thurston.

Advanced laboratory methods and their application in chemical and bacteriological control of milk and milk products; also assigned references.

Dy. 521-522.—Problems in Milk and Milk Products. 2 to 5 credits. Thurston.

Dy. 523-524.—Problems in Dairy Production. 2 to 5 credits. BECKER.

#### POULTRY

Py. 531-532.—Advanced Poultry Management. 3 hours. 6 credits. Mehrhof. The economic organization and management of poultry farms in Florida; a study and analysis of poultry farm records.

Py. 533-534.—Poultry Research Problems. 2 to 5 hours credit. MEHRHOF.

#### VETERINARY

Vy. 543-544.—Problems in Animal Pathology. 2 to 5 credits. EMMEL.

#### ARCHITECTURE

Prerequisite: Bachelor's degree in Architecture.

Ae. 501-502.—Architectural Design. 18 hours design and research. 12 credits. WEAVER, REEVE. Prerequisite: Ae. 21 B (Architectural Design).

Research on a special phase of architectural design, selected by the student with approval of the Director.

Ae. 521-522.—Advanced Freehand Drawing. 6 hours studio. 4 credits. DOOLITTLE. Prerequisite: Ae. 31 B (Freehand Drawing and Water Color).

Ae. 525-526.—Advanced Water Color. 6 hours studio. 4 credits. GRAND. Prerequisite: Ae. 31 B (Freehand Drawing and Water Color).

Outdoor sketching from nature. Advanced architectural rendering.

Ae. 531-532.—Historical Research. 2 hours. 4 credits. REEVE, GRAND. Prerequisite: Ae. 41 C (Decorative Arts).

Research on some historical phase or phases of architecture and allied arts, determined by the student in consultation with his advisers.

Ae. 551-552.—Building Construction. 2 or 3 hours. 4 or 6 credits. HANNA-FORD. Prerequisite: Ae. 51 A (Materials and Methods of Construction). Corequisite: Ae. 501-502 (Architectural Design).

Research on various types of building materials, their methods of and fitness for use in various parts of the country, with advancement of some original theories in connection with such subjects.

Ae. 553-554.—Structural Design of Buildings. 2 or 3 hours. 4 or 6 credits. HANNAFORD. Prerequisite: Ae. 61 B (Structural Design of Buildings). Corequisite: Ae. 501-502 (Architectural Design).

Research on a special phase of reinforced concrete or steel design and construction of buildings, with advancement of some original theories in connection with such subjects.

#### **BIOLOGY**

Prerequisites: Approximately thirty hours of approved undergraduate courses in Animal Biology, including at least a one-semester course in each of the following: General or Invertebrate Zoology, Comparative Vertebrate Morphology, Embryology and Genetics. Students not meeting the above requirements will be required to make up any deficiency early in their graduate work.

In addition, it is strongly advised that the student have completed at least three semester courses in two of the following fields: Botany, Chemistry, Forestry, Geology, Physics, Psychology and Soil Science.

The Department of Biology plans to retain the foreign language requirements for all graduate degrees.

Bly. 505.—History of Biology. 2 hours. 2 credits. ROGERS. Prerequisite: An undergraduate major in biology. Required of all graduate majors in the department.

Bly. 506.—Biological Literature and Institutions. 2 hours. 2 credits. STAFF. Required of all graduate majors. Prerequisite: Bly. 505 (History of Biology).

A review of the compendia, journals, and bibliographic sources in the various fields of biology and a survey of the workers, collections, and special fields of research of some of the more important laboratories and museums of zoology. Considerable emphasis will be placed upon the preparation of reports and digests and the use of bibliographic sources.

Bly. 507-508.—Taxonomic Studies. 1 hour and 6 or 12 hours laboratory. 3 or 5 credits per term. ROGERS, HUBBELL, SHERMAN, BYERS, WALLACE, or CARR.

The detailed classification of a selected group of animals, well represented in the local fauna.

Bly, 509.—Zoogeography. 2 hours. 2 credits. Hubbell.

Bly. 510.—Animal Ecology. 2 hours and 1 or 2 half days of field or laboratory. 3 or 4 credits. ROGERS. Ordinarily Bly. 509 and 510 should be taken in sequence.

Lectures and discussions on the principles and methods of ecology with special reference to animals; field and laboratory work on the ecological measurements of the physical factors and observations on the biota of representative Florida habitats.

Bly. 513-514.—Vertebrate Morphology. 1 hour and 6 or 12 hours laboratory. 3 or 5 credits each term. Sherman. Prerequisite: An undergraduate major in biology, including Bly. 210 (Vertebrate Embryology).

Bly. 515-516.—Invertebrate Morphology. 1 hour and 6 or 12 hours laboratory. 3 or 5 credits each term. Hubbell or Byers. Prerequisite: An undergraduate major in biology, including a course in Invertebrate Zoology.

Bly. 519-520.—Individual Problems in Animal Biology. Hours to be arranged. Thesis required. ROGERS, HUBBELL, SHERMAN, or BYERS. Prerequisite: an approved major in biology.

All applicants for the Master's degree are required to undertake an approved individual problem in biology, the results of which will be embodied in a Master's thesis. Such problems will be carried out under direction of a member of the staff. Problems may be chosen from one of the following fields: vertebrate or invertebrate morphology or embryology; classification or taxonomy of certain approved groups; natural history or distribution of a selected group of local animals; investigations of animal habitats in the Gainesville area.

Bly. 521-522.—Natural History of Selected Animals. 1 hour and 6 or 12 hours laboratory or field work. 3 or 5 credits. Rogers, Hubbell, Sherman, or Byers. Prerequisite or co-requisite: Bly. 510 (Animal Ecology).

A detailed study of the life history or life histories and ecological relationships of some species or natural group of local animals.

Bly. 523-524.—Natural History of Selected Animals. A second year continuation of Bly. 521-522. Hours and credits to be arranged.

Bly. 533-534.—Problems and Concepts of Taxonomy and Nomenclature. 2 hours. 2 credits per term. STAFF. Prerequisites: Bly. 325 (Genetics and Evolution) and Bly. 507-508 (Taxonomic Studies).

A critical study of selected taxonomic synopses, revision and monographs with special reference to the bearing of the principles and concepts of distribution, genetics, and ecology on taxonomic problems.

Bly. 539-540.—Graduate Seminar. 1 hour. 1 credit per term. STAFF.

Bly. 651-652.—Research. No credit in hours. ROGERS, HUBBELL, SHER-MAN, or BYERS.

Open to students who have completed the equivalent of the Master's work and are prepared to carry on partially independent work on approved phases of animal ecology, ecological or geographical distribution, life history studies, or morphological investigations on the local fauna. Required of all applicants for the Ph.D. in Animal Biology.

#### BOTANY AND BACTERIOLOGY

#### BOTANY

Prerequisites:

- 1. Bachelor's degree.
- 2. At least twenty semester hours in botany.

Bty. 500-0500.—Seminar. 1 hour. 2 credits. CODY, CARROLL.

Review and discussion of current literature on problems of botany and bacteriology. Required of all graduate students majoring in botany or bacteriology.

Bty. 501-502.—Problems in Taxonomy. 8 hours field or laboratory. 8 credits. Copy. Prerequisite: Bty. 308 (Taxonomy), or its equivalent; desirable prerequisite: Bty. 401 (Plant Ecology).

An assignment to a special problem, or a critical study of a specific plant family or genus; plant surveys with special emphasis on predominating flora of a community.

Bty. 503-504.—Problems in Plant Physiology. 2 hours and 4 hours laboratory. 8 credits. Cody. Prerequisites: Bty. 311 (Plant Physiology), Cy. 0262 (Organic Chemistry), or equivalent.

Special physiological processes of plants; principles and methods of nutrition, respiration, etc.

Bty. 505.—Problems in Plant Histology. 1 hour and 6 hours laboratory. 4 credits. Copy. Prerequisite: Bty. 431 (Plant Histology), or its equivalent.

Comparative methods in histological technique.

Bty. 506.—Research in Plant Histology. 8 hours laboratory. 4 credits. Copy. Prerequisites: Bty. 431 (Plant Histology), Bty. 505 (Problems in Plant Histology), or equivalents.

Bty. 507.—Advanced Plant Anatomy. 1 hour and 6 hours laboratory. 4 credits. Copy. Prerequisites: Bty. 431 (Plant Histology), 432 (Plant Anatomy), or equivalents.

Special problems in plant anatomy. A prerequisite to Bty. 508.

Bty. 508.—Problems in Plant Anatomy. 1 hour and 6 hours laboratory. 4 credits. Copy. Prerequisite: Bty. 507 (Advanced Plant Anatomy).

Research or a critical study of certain plant tissues and organs.

Bty. 509-510.—Research. Hours to be arranged. No credit in hours. Thesis required. Cody. Prerequisites: An approved major in botany or bacteriology.

Applicants for a Master's degree with a major in botany are required to undertake an approved problem, the results of which are to be included in a thesis. The problem may be elected in morphology, physiology, histology, anatomy or taxonomy.

#### BACTERIOLOGY

#### Prerequisites:

- 1. Bachelor's degree.
- 2. At least twenty semester hours in bacteriology.
- 3. The student should have a reading knowledge of French or German.

Bcy. 500-0500.—Seminar. See Botany 500.

Bcy. 501-502.—Problems in Soil Bacteriology. 8 hours laboratory or its equivalent. 8 credits. CARROLL. Prerequisite: Bcy. 301 (General Bacteriology); desirable prerequisite: Cy. 0262 (Organic Chemistry), or its equivalent.

Special problems on isolation, cultivation and identification of certain micro-organisms of the soil.

Bcy. 503-504.—Problems in Dairy Bacteriology. 6 to 8 hours laboratory, or its equivalent. 6 or 8 credits. CARROLL. Prerequisites: Bcy. 301-302 (General and Agricultural Bacteriology) or 304 (Pathogenic Bacteriology); desirable antecedent: Cy. 0262, or its equivalent.

Assignment to a special phase of research pertaining to dairy problems involving activities of micro-organisms; sanitation of dairy products, etc.

Bcy. 505-506.—Problems in Pathogenic Bacteriology. 6 to 8 hours laboratory or its equivalent. 6 or 8 credits. CARROLL. Prerequisites: Bcy. 301 (General Bacteriology), 304 (Pathogenic Bacteriology), or equivalents.

Research.

Bcy. 507-508.—Problems in Water Bacteriology. 6 to 8 hours laboratory, or its equivalent. 6 to 8 credits. CARROLL. Prerequisite: Bcy. 301 (General Bacteriology), or its equivalent.

Research.

Bcy. 509-510.—Problems in Industrial Bacteriology. 2 hours laboratory work a week for each semester hour credit desired. A minimum of 4 credits allowed. CARROLL.

Note: In the above courses a graduate student requiring more than 2 terms to complete a major or minor in an elected field will use the letters, a, b, c, for respective additional terms.

Bcy. 519-520.—Research. Hours to be arranged. No credit in hours. Thesis required. CARROLL. Prerequisites: An approved major or minor in bacteriology.

Applicants for the Master's degree with a major in bacteriology are required to undertake an approved problem, the results of which are to be included in a thesis. Problems may be elected in (1) Soil, (2) Dairy, (3) Food, (4) Industrial, (5) Sanitary and (6) Pathogenic Bacteriology, and may be pursued year after year in accordance with the need of each candidate.

#### CHEMISTRY

Prerequisites: The following courses or their equivalents: General chemistry—eight semester hours; Analytical chemistry—eight semester hours; Organic chemistry—eight semester hours; Physical chemistry—four to eight semester hours; Chemical literature—one semester hour.

Each graduate student, registering for the first time, must take comprehensive written examinations over the fields of inorganic, analytical, organic and physical chemistry. These examinations are given during registration week. The results of these examinations are utilized by the Special Supervisory Committees in arranging the student's study program.

\*\*Cy. 501.—Organic Preparations. 9 hours laboratory or its equivalent. 3 credits. POLLARD.

The preparation of some typical compounds, with discussion of principles and theories. A reading knowledge of French and German is desirable.

Cy. 504.—Inorganic Preparations. 9 hours laboratory or its equivalent. 3 credits. Leigh.

Laboratory work involving preparation of a number of typical inorganic compounds in addition to collateral reading and discussion. A reading knowledge of French and German is desirable.

\*\*Cy. 0505.—Organic Nitrogen Compounds. 3 hours or its equivalent. 3 credits. POLLARD.

Special lectures and collateral reading relative to the electronic and other theoretical conceptions of organic compounds containing nitrogen. Explosives, pseudo-acids, certain dyes, alkaloids, proteins, etc.

\*Cy. 506.—Special Chapters in Organic Chemistry. 3 hours. 3 credits. POLLARD. Lectures and collateral reading. In general, topics to be studied will be chosen from the following list: stereochemistry, tautomerism, acetoacetic ester syntheses, malonic ester syntheses, the Grignard reaction, benzene theories, diazo compounds, and indicators.

\*Cy. 0508.—Synthesis and Structure of Organic Compounds. 3 hours. 3 credits. POLLARD.

Study of fundamental reactions for synthesizing organic compounds and proving their structures.

\*Cy. 0509.—Electrochemistry. 3 hours or its equivalent. 3 credits. JACKSON. A theoretical and laboratory study of the applications of electrochemical principles.

\*\*Cy. 510.—The Phase Rule. 3 hours. 3 credits. JACKSON.

A study of the application of the phase rule to heterogeneous equilibria.

Cy. 512.—Applications of Physical Chemistry. 3 hours. 3 credits. HAWKINS. A study of ideal and real gases, conductance, reaction rates, equilibrium, and distillation.

\*\*Cy. 0513.—Colloid Chemistry. 2 hours and 3 hours laboratory. 3 credits. Beisler.

The theories, practice, and applications of colloid chemistry.

\*\*Cy. 515.—Advanced Inorganic Chemistry. 3 hours. 3 credits. Heath. This course covers recent theories and progress in inorganic chemistry.

\*Cy. 0516.—Chemistry of the Rare Elements. 3 hours. 3 credits. HEATH.

Deals with the mineral occurrences, preparation, properties, and uses of the rarer elements and their compounds. Relations to the more common elements will be clearly shown as well as methods for separation and purification.

\*\*Cy. 525.—Chemistry of the Terpenes. 3 hours or its equivalent. 3 credits.

A study of hydroaromatic compounds, including the terpenes and their derivatives.

\*\*Cy. 526.—Chemistry of the Terpenes. 3 hours or its equivalent. 3 credits. HAWKINS.

A continuation of Cy. 525.

<sup>\*</sup>Not offered in 1939-40.

<sup>\*\*</sup>Not offered in 1938-39.

\*\*Cy. 0531.—Advanced Qualitative Analysis. 3 hours laboratory or its equivalent. 3 credits.

Systematic laboratory study of the qualitative reactions for the detection and confirmation of rare and precious metals. Use of the spectroscope as a means of qualitative tests is stressed.

Cy. 533.—Advanced Quantitative Analysis. 2 hours and 3 hours laboratory. 3 credits. Black.

Application of physico-chemical methods to quantitative analysis. Electrometric titrations. Colorimetry. Nephelometry.

\*Cy. 534.—Advanced Sanitary Chemistry. 3 hours. 3 credits. BLACK.

A study of the applications of physico-chemical principles to water and sewage treatment.

Cy. 537.—Qualitative Organic Chemistry. 1 hour and 6 hours laboratory. 3 credits. POLLARD.

Methods of identifying organic compounds.

Cy. 538.—Quantitative Organic Chemistry. 9 hours laboratory or its equivalent. 3 credits. Pollard.

Ultimate analysis of organic compounds.

\*Cy. 542.—Catalysis. 3 hours. 3 credits. Beisler.

Theories and applications of catalysis with special reference to use of catalytic agents in industry.

\*Cy. 545.—Chemical Thermodynamics. 3 hours. 3 credits. HAWKINS.

The fundamental principles of thermodynamics which are particularly applicable to chemistry.

\*Cy. 561.—Bio-Chemistry. 2 hours and 3 hours laboratory. 3 credits. FRENCH. A general course in Bio-Chemistry.

\*\*Cy. 563.—Plant Bio-Chemistry. 2 hours and 3 hours laboratory. 3 credits. Leukel.

The chemistry of plant growth and metabolism.

\*Cy. 581.—Chemical Technology. 3 hours or its equivalent. 3 credits. MASON. Special problems and topics in industrial chemistry.

\*\*Cy. 583.—Distillation. 3 hours. 3 credits. Beisler.

Theory and practice of distillation processes.

\*Cy 586.—Chemical Engineering Processes. 3 hours or its equivalent. 3 credits. MASON.

An advanced course in certain of the unit operations of chemical engineering.

\*\*Cy. 588.—Heat Transmission. 3 hours. 3 credits. MASON.

Chemical Engineering applications of flow of heat.

Cy. 601-602.—Chemical Research. No credit in hours. The STAFF.

Required of all students majoring in chemistry or chemical engineering.

#### **ECONOMICS**

Prerequisites: See the prerequisites for the various courses offered.

Es. 501-502.—Seminar in Economic Principles and Problems. 3 hours. 6 credits. STAFF. Prerequisite: Es. 407-408 (Economic Principles and Problems), or equivalent.

Es. 505.—The Development of Economic Thought. 3 hours. 3 credits. ELDRIDGE. Prerequisite: Es. 407-408 (Economic Principles and Problems), or equivalent.

Development of Economic Thought; analysis of theories of various schools of economic thought; a study of the Physiocrats, Mercantilism, the Classical Economists; the leading economists of the Austrian School, and a brief survey of the beginning of Socialism; the development of theoretical background for research and graduate work of an advanced nature. Required of all candidates for the Master's degree in this department.

<sup>\*</sup>Not offered in 1939-40.

<sup>\*\*</sup>Not offered in 1938-39.

Es. 506.—The Development of Economic Thought, continued. 3 hours. 3 credits. ELDRIDGE. Prerequisite: Es. 407-408 (Economic Principles and Problems), or equivalent.

Analysis of the thought of the followers and defenders on the one hand and of the abler critics on the other hand of the Classical Economists; appraisals of recent contributions of the various schools in formulating a system of economic analysis. Required of all candidates for the Master's degree in this department.

Es. 509.—The Development of Economic Institutions. 3 hours. 3 credits. Tuttle. Prerequisite: Es. 305 (Development of Modern Capitalism), or equivalent.

An intensive study of the development of the fundamental institutions of the existing economic order, including the price system—money, credit, and banking; business enterprise—types of industrial organization, industrial combination, the business cycle; machine technique—the machine and its effects, mining, agriculture, manufacturing and transportation.

Es. 522.—The Law of Corporation Finance. 3 hours. 3 credits. Hurst. Prerequisite: Es. 407-408 (Economic Principles and Problems), or equivalent.

Es. 524.—Corporation Finance and Investments. 3 hours. 3 credits. Eutsler. Prerequisite: Es. 321-322 (Financial Organization of Society), or equivalent.

A study and analysis of the corporation as an institution making use of society's savings; the processes, practices, and institutions involved in the acquisition of capital funds, with an evaluation of corporation practices and problems; the social responsibilities of the corporation; the nature of the capital market and the sources of capital funds; factors influencing the accumulation and distribution of capital funds; and the international flow of capital.

Es. 528.—Problems in Money and Banking. 3 hours. 3 credits. Dolbeare. Prerequisite: Es. 321-322 (Financial Organization of Society), or equivalent.

Critical analysis of monetary standards and central banking control of credit, especially as they are related to price and business fluctuations.

Es. 530.—Problems in Taxation. 3 hours. 3 credits. Bigham. Prerequisite: Es. 327 (Public Finance), or equivalent.

An intensive study of the problems of taxation primarily related to the following taxes: general property, income, business, inheritance, and commodity.

Es. 531.—The Economic Functions of Middlemen. 3 hours. 3 credits. HES-KIN. Prerequisite: Es. 335 (Economics of Marketing), or equivalent.

The significance of middlemen and of the functions performed by them in the economic organization of society will be covered, with chief emphasis upon the social viewpoint. Attention will be given to some of the social problems arising to the consumer, and to the role played by middlemen in the functional distribution of income.

Es. 556.—Problems in Public Service Industries. 3 hours. 3 credits. BIGHAM. Prerequisite: Es. 351 (Transportation Principles), or equivalent.

An intensive study of the more important problems raised in the introductory courses in transportation and public utilities,

Es. 565.—Problems in Social Security. 3 hours. 3 credits. Eutsler. Prerequisite: Es. 407-408 (Economic Principles and Problems), or equivalent.

An analysis of the meaning and nature of social security, especially as related to economic security; the distinctions between social and private insurance; the hazards of low income groups; an evaluation of projects and methods for eliminating, reducing, or indemnifying these hazards; the problems of social security in the United States, especially concerning experiences with relief measures, the development of legislation, the problems of financing and administering security programs, and the relationship between economic planning and security.

Es. 569-570.—Problems in Statistics and Business Forecasting. 3 hours. 6 credits. Anderson. Prerequisite: Es. 469-470 (Business Forecasting), or equivalent.

Critical study of special, problems in statistics and business forecasting.

Es. 572.—Problems in Labor Relations. 3 hours. 3 credits. CHACE. Prerequisite: Es. 372 (Labor Economics), or equivalent.

Insecurity, wages and income, sub-standard workers, the strike, graft vs. industrial unionism; labor and government, wage legislation, hours legislation, protective legislation.

Es. 585.—International Economic Relations. 3 hours. 3 credits. ATW00D. Prerequisite: Es. 407-408 (Economic Principles and Problems), or equivalent.

An historical study of the development of international economic policies; geographic, economic, social, and political factors underlying contemporary international problems; economic and political methods employed by the leading commercial nations to expand their economic interests.

Es. 589.—Problems in Economic Geography. 3 hours. 3 credits. ATWOOD, DIETTRICH. Prerequisite: Es. 381 (Economic Geography of North America), or equivalent; Es. 385 (Economic Geography of South America), or equivalent.

A lecture and research course analyzing the geographic and economic factors affecting the industrial and commercial development of the leading countries of the world. Students will be required to make intensive individual studies of selected subjects.

#### **EDUCATION**

Prerequisite: A student who expects to pursue graduate work in Education should present a Bachelor's degree with a minor in Education or the equivalent. The equivalent must be approved by the Department of Education upon recommendation of the student's Supervisory Committee. (See Admission to Candidacy, page 13.)

En.-Sa.—Graduate Seminar for Administrators. 3 hours. No credit. SIM-MONS.

Recommended for students majoring in administration.

En.-Srt.—Graduate Seminar for Minor Research and Thesis Work. 3 hours. No credit. MEAD.

Introduction to investigations, consideration of possible thesis problems, minor researches and actual thesis work. Recommended for those preparing to teach.

En. 500.—An Introduction to Educational Research. 2 hours. 2 credits. NORMAN.

Designed primarily to help graduate students in Education in writing their theses. Required of all students majoring in Education; open to all graduate students.

En. 501.—The Elementary School Curriculum. 3 hours. 3 credits. MEAD. Intensive study of the development and present content of the elementary school curriculum, including the kindergarten; selection and evaluation of material.

En. 503.—Seminar in Educational Measurements. 3 hours. 3 credits. CRAGO. Students will be guided in the investigation of educational problems involving measurement, diagnostic and remedial measures. This course is primarily for graduate students with experience in residence or in the field. Prerequisite: En. 317, or permission of instructor.

En. 504.—The School Survey. 3 hours. 3 credits. CRAGO, SIMMONS.

En. 506.—Methods of Teaching Farm-Shop Work. 2 hours. 2 credits. Garris. Selection and organization of subject matter, selection of equipment, and methods of teaching farm-shop jobs. Offered as demands arise and during the summer session.

En. 507.—Seminar in Educational Psychology. 3 hours. 3 credits. CRAGO. Students will be guided in the investigation of problems in directed learning, individual differences, and adjustment of problem children. Primarily for graduate students with experience in residence or in the field.

En. 508.—Democracy and Education Seminar. 3 hours. 3 credits. Norman. The nature of experience, the nature of institutions, the social inheritance, the individual, society, socialization, social control, dynamic and static societies, education its own end.

En. 509.—Problems in the Administration of a School System. 3 hours. 3 credits. SIMMONS. Prerequisite: En. 401 or its equivalent, or administrative experience.

Problems selected to meet individual needs; each student selects some problem for special study and presents the results of his study in the form of a thesis.

En. 510.—The Foundations of Modern Education. 3 hours. 3 credits. LITTLE. An attempt to evaluate present-day education by tracing its dominant factors—teacher, student, curriculum, and educational plant, control and support—back to their beginnings; and to point out present tendencies and possible developments.

En. 511.—Methods and Materials in Vocational Agriculture. 3 hours. 3 credits. Garris.

Selection and organization of subject matter from the vocational point of view. Offered when demand arises and during the summer session.

En. 512.—Methods and Materials in Vocational Agriculture. 3 hours. 3 credits. Garris.

A continuation of Education 511.

En. 514.—Problems in Adolescence. 3 hours. 3 credits. CRAGO. Prerequisite: En. 319 (Child and Adolescent Psychology), or equivalent.

Students will be guided in the investigation of problems peculiar to the period of adolescence.

En. 516.—Character and Personality Development. 3 hours. 3 credits. CRAGO. A study of methods used in development of character and personality, together with an evaluation of them for use in public schools.

En. 517.—Educational Statistics. 2 hours. 2 credits.

To acquaint students with statistical methods as applied to Education. It is recommended that this course be taken before En. 503.

En. 518.—Special Problems in High School Organization and Administration. 3 hours. 3 credits. LITTLE. Prerequisite: En. 408 (High School Administration).

This course will consist of an intensive study of specific problems in organizing and administering the modern high school. Special reference will be made to Florida.

En. 519.—High School Curriculum. 3 hours. 3 credits. MEAD.

Problems of the curriculum of the high school in its organization; standards for selection of the curriculum; factors to be considered—age of pupils, social standing, probable school life, probable vocation; traditional subjects and their possible variations; new subjects and their values, systems of organization, election, and prescription; problems of articulation with the elementary school, the college, the vocational school, and the community.

En. 521.—Business Administration of a School System. 3 hours. 3 credits. Prerequisite: Wide administrative experience.

Problems concerned with the procuring and spending of revenue; a thesis on a special problem.

En. 528.—Supervision of Instruction. 3 hours. 3 credits. MEAD.

A course dealing with objectives, procedures, and means of evaluation of supervision in elementary and secondary schools, and in preparation of teachers. Each student completes a minor research.

En. 531-532.—Guided Professional Development in Health and Physical Education, 3 hours, 6 credits, SALT.

Designed to give teachers, supervisors, and administrators a broad understanding of the field of health and physical education. At the beginning of the course the student and instructor will outline a program of professional development in keeping with the needs and interests of the student. Credit will depend upon evidence of professional growth on the part of the student in accord with his program. This will be tested in any manner which the instructor deems valid.

En. 533-534.—Problems of Physical Education. 3 hours. 6 credits. SALT. Designed to give the student an understanding of the contemporary problems in physical education. It forms the basis for the organization of research projects together with an analysis of the techniques used in problem solving.

#### En. 541.—Control and Support of Public Education. 3 hours. 3 credits.

State, federal and other agencies of control and support of education in the United States; world-history background; present tendencies and possible developments. Saturday class; planned primarily for teachers in service.

#### En. 542.—The Curriculum and the Educational Plant. 3 hours. 3 credits.

Present status of curriculum and plant and their relation in all types of schools, viewed in the light of their historical development; a world view with emphasis on present tendencies in the United States.

#### En. 543.—The Teacher and the Educand. 3 hours. 3 credits.

Some outstanding teachers, including educational theorists, philosophers, reformers, statesmen, and administrators, and their students; the training and professionalizing of the teacher; the spread, compulsion, and extension of education and its relation to world revolutions.

## En. 544.—Constitutional and Legal Basis of Public School Administration. 2 hours. 2 credits. SIMMONS.

Special emphasis will be given to Florida conditions, school laws, constitutional provisions, judicial decisions, Attorney General's rulings, and regulations of the State Board of Education. Students will be required to prepare a term report dealing with some special field of school law. Only graduate students with experience in administration and supervision will be admitted.

#### En. 562.—Guidance and Counseling. 2 hours. 2 credits. GARRIS.

Study of guidance and counseling of high school students. Educational and vocational guidance and problems of personality adjustment. Offered only in the summer session.

## En. 565-566.—Problems in Agricultural Education. Seminar. 3 hours. 6 credits. GARRIS.

Designed for graduate students who are qualified to select and pursue advanced problems. Problems will be selected to suit individual needs and the results of the study will be reported in the form of term papers. The class will meet for three hours every other Saturday during both semesters.

En. 567-568.—Problems in Agricultural Education. Seminar. 3 hours. 6 credits. GARRIS.

Similar to En. 565-566 in organization and offered in alternate years with it.

## En. 569.—Problems in Organizing Part-time and Evening Classes. 6 hours. 3 credits. Garris.

The class will organize and teach a part-time or evening class in vocational agriculture in the Alachua community. Offered only in the summer session.

## En. 581.—The Reorganization of Secondary School English. 2 hours. 2 credits. WISE.

A study of the objectives, methods and materials of secondary school English organized in the light of the findings of research and with a view to assisting pupils to make a satisfactory adjustment to a desirable social order.

#### En. 603 .- Foundations of Method. 3 hours. 3 credits. NORMAN.

Improvement of college and high school teaching. Open to graduate students and members of the University faculty who care to enroll.

En. 605-606.—Seminar in Public School Administration. 3 hours. 6 credits. SIMMONS. Prerequisites: En. 504 or 521 and En. 509 or 518, or permission of instructor. Each term's work is a complete course and gives 3 credits.

#### En. 619.—Child Growth and Development. 3 hours. 3 credits. MEAD.

Research studies which have been made showing changes in child growth and development in their physical, mental, emotional and social status, together with the study of the means of measuring or evaluating such changes. It is also concerned with the development of new tools for evaluation. Open to graduate students with background training in education and others with the consent of the instructor in charge.

#### ENGINEERING

## AGRICULTURAL ENGINEERING Listed under that name.

#### CHEMICAL ENGINEERING

Requirements for admission to graduate work for those students holding the degree of B.S. in Chemical Engineering, or its equivalent, who desire to major in chemical engineering:

- 1. Such students may become candidates for the degree of \*Master of Science or the degree of Master of Science in Engineering.
- 2. The following courses, or their equivalents, are required for unconditional entrance to graduate work in chemical engineering: Courses in each of the four fundamental branches of chemistry (inorganic, analytical, organic and physical); one hour of chemical literature; six hours of industrial chemistry; six hours of unit operations, including laboratory work.
- 3. Each graduate student, registering for the first time, must take comprehensive written examinations over the fields of chemistry and chemical engineering. These examinations are given during registration week. The results of these examinations are utilized by the Special Supervisory Committee in arranging the student's study program.

## CIVIL ENGINEERING

Prerequisites: See the prerequisites for the various courses offered.

Cl. 621-622.—Advanced Work in Steel Structures. 3 hours and 6 hours laboratory. 6 credits. SAWYER. Prerequisite: Cl. 535-536 (Structural Engineering).

Advanced work in the theory, design, and drawing of steel structures, particularly in connection with bridges and buildings.

Cl. 623-624.—Advanced Work in Concrete Structures. 3 hours and 6 hours laboratory. 6 credits. Lowe. Prerequisite: Cl. 532-535-536 (Concrete Design and Structural Engineering).

Advanced work in the theory, design, and drawing of concrete structures, particularly in connection with bridges and buildings.

Cl. 627-628.—Advanced Work in Municipal Engineering. 3 hours and 6 hours laboratory. 6 credits. Lowe. Prerequisite: Cl. 525-526 (Water and Sewerage).

Study of action and operation of Imhoff sewage disposal plant of the University. Physical, biological, bacteriological, and chemical observations to determine efficiency and economy of various methods of operation and improvements in operation to increase the same.

Cl. 629-630.—Advanced Work in Municipal Engineering. 3 hours and 6 hours laboratory. 6 credits. Lowe. Prerequisite: Cl. 627-628.

Supplementing Cl. 627-628 and covering similar investigations in connection with other types of sewage disposal plants.

Cl. 633-634.—Similarity and Model Applications to Beach and Shore Erosions Problems. 3 hours and 6 hours laboratory. 6 credits. LOWE. Prerequisite: Cl. 431 (Hydrology).

A study of laws of similarity, use of Reynolds Number, effects of density, viscosity, friction and actual model studies with practical applications.

## ELECTRICAL ENGINEERING

Radio courses in the Department of Electrical Engineering are given in co-operation with State Radio Station WRUF. Students can secure practical experience in radio station operation.

<sup>\*</sup>For the M.S. requirements see Chemistry.

Prerequisites: A college course in Physics, Differential and Integral Calculus, and a minimum of thirty-six credits, or the equivalent, in courses in the general field of electrical engineering, together with special prerequisites stated for individual courses.

El. 601-602.—Advanced Experimental Electrical Engineering. Variable credit. Well, and Staff.

Experimental investigation on electrical apparatus.

El. 603.—Advanced Electrical Theory. 3 hours. 3 credits. WEIL.

Laws of the electric and magnetic circuit; transient phenomena.

El. 605-606.—Advanced Course in Communication Engineering. 3 hours. 6 credits. Well and Sashoff.

High frequency circuits and apparatus.

El. 607-608.—Radio Engineering Laboratory. 4 hours laboratory. 4 credits. Weil and Sashoff.

Laboratory work to accompany El, 605-606.

El. 609.—Electric Power Plant Design. 3 hours. 3 credits. Weil. Prerequisites.

The relation of various machines in the power plant to one another, switch-gear, control apparatus, selection of types of units, construction problem. A part of this course includes the design of the electrical end of a power plant.

El. 610.—Symmetrical Components. 3 hours. 3 credits. SASHOFF.

The theory of Symmetrical Components applicable to unbalanced electric currents and voltages.

El. 611-612.—Electrical Research. Variable credit. Weil, Sashoff.

## INDUSTRIAL ENGINEERING

Prerequisites: Thorough foundation work in Differential and Integral Calculus, Applied Mechanics, Thermodynamics, Plant Layout and Design, Human Engineering, Engineering Practice, and Business Administration, or equivalent foundation course work of about forty semester credits including experience in industry.

Ig. 661-662.—Advanced Shop Layout and Design. 6 credits. YEATON. Prerequisites: Ig. 469-470 (Plant, Shop, Layout, and Design).

Ig. 663-664.—Management Training. 6 credits. YEATON and PHELPS. Prerequisites: Ig. 472 (Human Engineering), Ig. 560 (Engineering Practice).

## MECHANICAL ENGINEERING

Prerequisites: See the prerequisites for the various courses offered.

Ml. 680.—Thesis Research. No credit in hours. EBAUGH and STAFF.

Arranged for graduate students majoring in Mechanical Engineering.

Ml. 681-682.—Advanced Mechanical Design. 6 credits. EBAUGH or FINEREN. Prerequisite: Ml. 491 (Machine Design).

This course is arranged to permit advanced students to pursue design projects in the Mechanical Engineering field.

Ml. 683-684.—Mechanical Research. 6 credits. EBAUGH and STAFF. Prerequisite: Ml. 583-584 (Mechanical Laboratory).

This course is arranged to permit advanced students to pursue research projects in the Mechanical Engineering field.

Ml. 685.—Advanced Air Conditioning. 3 credits. EBAUGH. Prerequisite: Ml. 582 (Refrigeration and Air Conditioning).

A continuation of Ml. 582 with emphasis on design and estimation of systems.

Ml. 686.—Advanced Engineering Thermodynamics. 3 credits. EBAUGH. Prerequisite: Ml. 485 (Thermodynamics).

A study of the general equations of thermodynamics and their applications and advanced study of combustion processes.

Ml. 689-690.—Advanced Mechanical Laboratory. 6 credits. EBAUGH or STAFF. Prerequisites: Ml. 583-584 (Mechanical Laboratory).

This course is arranged to permit advanced students to pursue experimental projects in the Mechanical Engineering field.

#### **ENGLISH**

Prerequisites: A University of Florida undergraduate major in English or its equivalent. Such a major requires at least twenty-four semester hours of English in the Upper Division and includes courses in important periods of English literary history, American literature, and the history of the English language. Such a major presupposes, furthermore, adequate preparation in such important related fields as History, Philosophy, and foreign language.

Eh. 509-510.—Chaucer. 3 hours. 6 credits. Lyons.

A thorough study of the Canterbury Tales; collateral readings (in translation) of important medieval writings.

Eh. 511-512.—Old and Middle English. 3 hours. 6 credits. ELIASON.

Old English is studied the first semester. In the second, Middle English language and literature as well as the history of the English language are studied.

Eh. 513-514.—The Renaissance in England. 3 hours. 6 credits. CALDWELL. A study of the sixteenth and seventeenth century literature as directly and indirectly influenced by the Renaissance.

Eh. 519-520.—English Drama. 3 hours. 6 credits. ROBERTSON.

Studies in particular phases. Medieval and classical elements in sixteenth-century drama will be studied.

Eh. 521-522.—English Classicism. 3 hours. 6 credits. Spivey.

Neo-classicism in the literature of the late seventeenth, and eighteenth centuries.

Eh. 523-524.—The Romantic Movement. 3 hours. 6 credits. FARRIS.

The roots of the Romantic Revival; the work of Wordsworth, Coleridge, Byron, Shelley, and Keats.

Eh. 525-526.—Studies in American Literature. 3 hours. 6 credits. SPIVEY. The particular field varies from year to year.

Eh. 527-528.—Imaginative Writing. 2 hours. 4 credits. FARRIS, LYONS.

Group conferences and individual conferences. Well-known writers will participate. Taken only with permission of instructors.

Eh. 529.—Introduction to the Problems and Methods of Graduate Study. No credit in hours., LYONS.

Required of all majors.

Eh. 530.—Individual Work. Credit arranged. STAFF.

Provision will be made for students who desire to supplement the regular courses by individual reading or investigation under guidance. Students will be helped to plan a definite program, and will meet a member of the departmental staff in frequent conference.

Eh. 531-532.—The English Conference. No credit in hours.

A monthly meeting of members of the staff and the graduate students to discuss problems of current interest in the field of English and American language and literature. The presentation of papers and reviews is followed by open discussion.

Eh. 541.—Beowulf. 3 hours. 3 credits. ELIASON.

Linguistic and historical study of the poem. Prerequisite, Eh. 511.

Note: All of these courses may not be offered in any one year. Advanced undergraduate courses may, under certain conditions, be taken for graduate credit. See *Bulletin of Information for the Upper Division*.

## **ENTOMOLOGY**

Prerequisites: A Bachelor of Science degree or its equivalent. The student should have thirty semester hours in the biological sciences, with twelve or more hours in the field of Entomology or Plant Pathology. Should he be deficient in this respect the student will

be expected to fulfill these requirements during the time that he is pursuing work that will lead to the Master of Science degree. This work will be taken as foundation work with no graduate credit.

\*\*Ey. 501-502.—Methods of Research in Entomology. 3 hours. 6 credits. CREIGHTON, WATSON, BERGER.

Special laboratory, insectary, and field methods. A survey of the leading problems and methods in certain laboratories; practice in the more complicated methods of research will be undertaken.

Ey. 503-504.—Problems in Entomology. 3 hours. 6 credits. CREIGHTON, WATSON, TISSOT, MONTGOMERY.

Problems in the various phases of entomology, as selected on approval of the instructor. Required of graduate students registered for degrees in the department.

- \*\*Ey. 506.—Advanced Insect Histology. 6 hours. 3 credits. CREIGHTON. The outstanding histological methods used in the handling of insect tissues.
  - Ey. 507-508.—Advanced Insect Taxonomy. 3 hours. 6 credits. TISSOT.
- \*\*Ey. 509-510.—Advanced Insect Embryology. 3 hours. 6 credits. CREIGHTON. Ey. 511-512.—Thesis Research. No credit in hours. CREIGHTON and STAFF. Required of all students majoring in Entomology.
  - \*Ey. 513.—Advanced Insect Morphology. 6 hours. 3 credits. CREIGHTON.
  - \*Ey. 515.—Biological Control. 4 hours. 3 credits. CREIGHTON.
  - \*Ey. 516.—Insect Ecology. 4 hours. 3 credits. CREIGHTON.

## FRENCH

Prerequisites: Twenty-four hours, or the equivalent, of undergraduate work in French. This must include a year-course in French composition and one in French literature. The student should also have a reading knowledge of one foreign language other than French.

Fh. 505-506.—The French Novel. 3 hours. 6 credits. ATKIN.

Fh. 507-508.—Special Study in French. 3 hours. 6 credits. ATKIN, BRUNET. Individual reading and reports under supervision of the instructor, on selected topics in the field of French literature and language.

Fh. 517-518.—Old French. 3 hours. 6 credits. Brunet.

A study of the phonology, morphology, and syntax of Old French; reading of selected texts.

### GREEK

Prerequisite: An undergraduate major of not less than twenty-four hours or equivalent of approved college courses in Greek, including a course in prose composition and grammar.

Gk. 501-502.—Homer—Iliad and Odyssey. 3 hours. 6 credits. ANDERSON. All the *Iliad* and *Odyssey* and selections from allied poets.

Gk. 503-504.—Historians, Herodotus and Thucydides. 3 hours. 6 credits. Anderson.

#### HISTORY

Prerequisites: An undergraduate major of twenty-four semester hours or equivalent. It is very desirable that the student should begin his graduate work with a reading knowledge of one foreign language, preferably French or German, especially if he intends to go on to the work for the Ph.D. degree.

\*\*Hy. 501-502.—American History, 1492-1830. 3 hours. 6 credits. LEAKE.

<sup>\*</sup>Given alternate years, not offered in 1939-40.

<sup>\*\*</sup>Not offered in 1938-39.

- \*Hy. 503-504.—American History—1830 to the Present. 3 hours. 6 credits. Leake.
  - \*Hy. 505-506.—English History to 1688. 3 hours. 6 credits. PAYNE.
- \*\*Hy. 507-508.—The Renaissance and the Reformation. 3 hours. 6 credits. Leake.
  - Hy. 509-510.—Seminar in American History. 6 credits. LEAKE.
- \*\*Hy. 511-512.—English History—1688 to the Present. 3 hours. 6 credits. PAYNE.
  - \*\*Hy. 515-516.-Latin American History to 1850. 3 hours. 6 credits. GLUNT.
- \*Hy. 517-518.—Latin American History—1850 to the Present. 3 hours. 6 credits. Glunt.
  - \*Hy. 601-602.—Ancient Civilizations. 3 hours. 6 credits. PAYNE.
  - \*Hy. 603-604.—History of Europe, 1648-1789. 3 hours. 6 credits. PAYNE.

### HORTICULTURE

Prerequisites: Eighteen hours of satisfactory work in horticulture and six hours of satisfactory work in botany.

He. 503-504.—Horticulture Seminar. 1 hour. 2 credits. FLOYD, ABBOTT.

A study of current horticultural literature and practice; assigned topics and discussion.

He. 505-506.—Horticultural Problems. 2 hours. 4 credits. Abbott.

A critical study of advanced problems in horticulture as given in recent literature; methods used in experimental horticulture; results of experiments and their application.

He. 507-508.—Problems in Subtropical Fruits and Flowers. 3 hours. 6 credits. FLOYD and ABBOTT.

He. 509-510.—Research in Fruit and Vegetable Refrigeration. 3 hours. 6 credits. A. L. STAHL.

He. 511-512.—Research in Vegetable Production. 3 hours. 6 credits. F. S. JAMISON.

## **JOURNALISM**

Prerequisites: Eighteen hours of approved undergraduate courses in Journalism.

Jm. 503-504.—Special Studies in Newspaper Production. 3 hours. 6 credits. No credit toward a degree allowed until entire 6 credits are earned. EMIG.

Jm. 505-506.—Special Studies in Public Opinion. 3 hours. 6 credits. No credit toward a degree allowed until entire 6 credits are earned. EMIG.

## LATIN

Prerequisite: An undergraduate major of not less than twenty-four hours or equivalent of approved college courses in Latin, including a course in prose composition and grammar.

Ln. 501-502.—Cicero and the Ciceronian Age. 3 hours. 6 credits. ANDERSON. Based mainly on the Ciceronian Correspondence.

Ln. 505.—Virgil. 3 hours. 3 credits. Anderson.

Mainly the Bucolics and Georgics.

<sup>\*</sup>Given alternate years. Not offered in 1939-40.

<sup>\*\*</sup>Not offered in 1938-39.

Ln. 507.—Ovid. 3 hours. 3 credits. ANDERSON. Mainly Heroides and Fasti.

Ln. 508.—The Roman Satire. 3 hours. 3 credits. Anderson. Mainly Horace and Juvenal.

## MATHEMATICS

Prerequisites: A student must have an undergraduate major in Mathematics or its equivalent as determined by the department.

Not all courses are given each year. Prerequisites to the courses should be determined by consultation with the instructor.

Ms. 502.—Vector Analysis. 3 hours. 3 credits. GERMOND.

The algebra and calculus of vectors in two and three dimensions. Applications to problems in Physics and Engineering.

- Ms. 511-512.—Introduction to Higher Algebra. 3 hours. 6 credits. SIMPSON. An introduction to the theory of matrices, linear dependence, linear transformations, bilinear and quadratic forms.
- Ms. 518.—Theory of Groups of Finite Order. 3 hours. 3 credits. PIRENIAN. Introduction to the group concept, a treatment of the pure group-theory, and numerous examples and applications.
- Ms. 521.—Empirical Analysis and Curve Fitting. 3 hours. 3 credits. GERMOND. Derivation of equation to suit data. "Best fit" under given conditions. Use of various graphical methods of analysis. Illustrated with problems from fields of botany, physics, chemistry.
- Ms. 522.—Method of Least Squares, and Statistics. 3 hours. 3 credits. GERMOND. Probability; method of least squares; application; normal frequency curves; correlation factors; handling of data.
- Ms. 524.—Synthetic Projective Geometry. 3 hours. 3 credits. KOKOMOOR. Pure geometry dealing primarily with properties unaltered by the processes of projection and section; principal theorems involved; theory of poles, polars, involution, and kindred topics.
  - Ms. 525-526.—Econometrics. 3 hours. 6 credits. Germond.

The mathematical interpretation of economic hypotheses. Conclusions reached by mathematical treatment and procedure. Mechanism for the comparison of conclusions with observations. This course is concerned with the method of dealing mathematically with the material of economics, rather than with the validity of the hypotheses and laws involved.

Ms. 534-535.—General Projective Geometry. 3 hours. 6 credits. KUSNER. Development, from a simple set of very general postulates, of the properties of geometric configurations which remain invariant under the transformations of projection and section. The treatment is abstract, and serves as an introduction, both to modern geometry and to the postulational methods of modern mathematics.

Ms. 536.—Foundations of Geometry. 3 hours. 3 credits. Kokomoor.

An investigation of the assumptions of geometry; the parallel postulate; steps leading to non-Euclidean geometrics; consequent development of modern branches of the subject; elements of non-Euclidean plane geometry.

Ms. 551-552.—Advanced Topics in Calculus. 3 hours. 6 credits. QUADE. Topics of advanced nature selected from the calculus, including partial differentiation, Taylor's theorem, infinite series, continuation of simple multiple integrals, line and surface integrals, Green's theorem, etc.

Ms. 555-556.—Functions of a Complex Variable. 3 hours. 6 credits. SIMPSON. Fundamental operations with complex numbers; differentiation and integration theorems; mapping; transformations; series.

Ms. 559-560.—Functions of Real Variables. 3 hours. 6 credits. Phipps.

The real number system; theory of point sets; rigorous investigation of many questions arising in the calculus; Lebesque integral; infinite series.

Ms. 568.—History of Elementary Mathematics. 3 hours. 3 credits. Kokomoor. A survey of the development of mathematics through the calculus, with special emphasis on the changes of the processes of operations and methods of teaching. No specific text is followed, but numerous works are used as references.

Ms. 575.—Fundamental Concepts of Modern Mathematics. 3 hours. 3 credits. SIMPSON.

An introduction to such topics as the number system of algebra, sets of points, group theory, theories of integration, postulational systems, and non-Euclidean geometry. No textbook is used, but many references are assigned.

## PAINTING

At present no Master's degree is offered in this department.

Pg. 501-502.—Pictorial Composition. 9 to 18 hours studio. 6 to 12 credits. DOOLITTLE. Prerequisite: Pg. 61 A (Thesis).

Designed for students who are qualified to select and pursue advanced problems in pictorial composition.

Pg. 523-524.—Oil Painting. 9 to 18 hours studio. 6 to 12 credits. Doolittle. Prerequisite: Pg. 61 A (Thesis).

Designed for students who are qualified for advanced work in oil painting.

## PHARMACOGNOSY AND PHARMACOLOGY

## Prerequisites:

## PHARMACOGNOSY

- 1. Graduation from a standard College of Pharmacy.
- 2. A minimum of four hours of foundation work in General Botany or equivalent.
- 3. A minimum of six hours of foundation work in Practical Pharmacognosy or equivalent.
- An additional minimum of four hours of foundation work in any or all of the following or equivalents: Plant Histology; Plant Microscopy; Plant Physiology; Plant Classification.

Pgy. 501.—Advanced Histology and Microscopy of Vegetable Drugs. 2 hours and 4 hours laboratory and field work. 4 credits. IRELAND.

Plant tissues and cell inclusions of importance as diagnostic characters. Detection of adulterations and substitutions and pharmacognostical description of new plants.

Pgy. 521-522.—Special Problems in Pharmacognosy. 4 hours laboratory or field work. 2 to 4 credits. Either term may be taken for credit without the other. IRELAND.

Identification, classification, and qualitative determination of constituents and properties of drug plants; special experiments in the propagation, cultivation, harvesting and curing of native and exotic plants; field work in the collecting of drug plants native to Florida.

Pgy. 525-526.—Drug Plant Analysis. 2 hours and 4 hours laboratory and field work. 4 to 8 credits. Either term may be taken for credit without the other. Christensen.

Special problems in drug culture and in the isolation and identification of plant constituents. The effect of climatic and soil features on plant constituents. Pharmacognostical characteristics of new plants.

Pgy. 533-534.—Seminar in Pharmacognosy. No credit in hours. CHRISTEN-SEN.

Required of all majors in Pharmacognosy.

Pgy. 551-552.—Pharmacognosy Research. No credit in hours. CHRISTENSEN. Required of those majoring in Pharmacognosy.

#### PHARMACOLOGY

## Prerequisites:

- 1. Graduation from a standard College of Pharmacy.
- 2. A minimum of four hours of foundation work in each of the following or equivalents: Biology; Bacteriology.
- 3. A minimum of five hours of foundation work in Pharmacology or equivalent.
- 4. An additional minimum of four hours of foundation work in any or all of the following or equivalents: Biologicals; Gland Products; Physiology; Anatomy.

Ply. 512.—Advanced Pharmacology. 2 hours and 4 hours laboratory. 4 credits. Christensen.

Theories of drug action. A comparison of methods of physiological assaying with applications to evaluation of drugs and medicines.

Ply. 517.—Clinical Methods. 2 hours and 3 hours laboratory. 3 credits. IRELAND.

Modern methods employed in clinical procedure. A detailed study of normal and abnormal metabolism with emphasis on blood and urine analysis.

Ply. 535-536.—Seminar in Pharmacology. No credit in hours. CHRISTEN-SEN.

Required of all majors in Pharmacology.

Ply. 551-552.—Special Problems in Pharmacology. 2 hours and 4 hours laboratory. 4 to 8 credits. Either term may be taken for credit without the other. Christensen.

A comparison of methods of biological assaying. Special lectures and collateral reading, laboratory experiments, oral and written reports.

Ply. 571-572.—Pharmacology Research. No credit in hours. CHRISTENSEN. Required of those majoring in pharmacology.

### PHARMACY

Prerequisite: Graduation from a standard College of Pharmacy with the degree of B.S. in Pharmacy or its equivalent.

Phy. 502.—Selected Topics in Pharmacy. 2 hours. 2 credits. HUSA.

A general study of the newer types of pharmaceuticals, such as vitamin preparations, newer solvents, etc., with assigned readings on selected problems of current interest.

Phy. 503.—Advanced Pharmacy. 2 hours. 2 credits. HUSA.

Lectures and assigned readings on important pharmaceutical preparations, particularly those involving chemical changes.

Phy. 504.—Advanced Galenical Pharmacy. 2 hours. 2 credits. HUSA.

A detailed study of the fundamental research work on which formulas for various galenicals are based.

Phy. 541.—Manufacturing Pharmacy. 2 hours. 2 credits. HUSA.

A general study of the apparatus and processes used in the manufacture of pharmaceuticals on a factory scale. A detailed study of selected technical problems of current interest to those engaged in pharmaceutical manufacturing.

Phy. 553.—Synthetic Pharmaceuticals. 2 hours. 2 credits. FOOTE. Prerequisite: Phy. 354.

The preparation and chemotherapy of the more complex synthetic remedies.

Phy. 554.—Advanced Pharmacy. 2 hours. 2 credits. FOOTE.

Lectures and assigned reading on the pharmacy and chemistry of vegetable drugs.

## PHILOSOPHY

Prerequisites: Twenty-four hours in philosophy and related fields, of which at least twelve semester hours must be in philosophy.

\*\*Ppy. 501-502.—Advanced Logic Seminar. 2 hours. 6 credits. ENWALL. Prerequisites: Ppy. 409-410 (History of Philosophy).

Theories of thought and knowledge. Readings from the original sources. Papers for discussion.

Ppy. 503-504.—Advanced History of Philosophy. 3 hours. 6 credits. ENWALL. Prerequisites: Ppy. 301 (Ethics), 302 (Philosophy of Religion).

The problems of philosophy in their historical development. Special readings from the original sources.

Ppy. 505-506.—Philosophy of Nature Seminar. 2 hours. 6 credits. ENWALL. Prerequisites: Ppy. 409-410 (History of Philosophy).

Readings from the original sources. Papers for discussion. Man's relation to nature; the various philosophical doctrines; animism, pantheism, materialism, realism, agnosticism, humanism, idealism, etc.

Ppy. 507-508.—Hume and Kant Seminar. 2 hours. 6 credits. ENWALL. Prerequisites: Ppy. 301 (Ethics), 302 (Philosophy of Religion), 409-410 (History of Philosophy).

## PHYSICS

Prerequisites: A candidate showing proper aptitude and adequate preparation (ordinarily equivalent to an undergraduate major) will be admitted as a candidate for the Master's degree.

A knowledge of the differential and integral calculus is prerequisite to all the following courses, together with Physics 321-322 or the equivalent.

Upon entering graduate study in Physics, the student should possess a reading knowledge of German and French.

Ps. 503.—Kinetic Theory of Gases. 3 hours. 3 credits. WILLIAMSON.

The elements of the kinetic theory, the application of the theory to gases and liquids, the electrical and magnetic properties of the molecules from the standpoint of the theory.

Ps. 505.—Theoretical Mechanics. 3 hours. 3 credits. Bless.

Statics of systems of rigid bodies. Motions of particles and of rigid bodies under constant and variable forces. Assigned reading, problems, and reports.

Ps. 506.—Advanced Theoretical Mechanics. 3 hours. 3 credits. BLESS.

A continuation of Ps. 505. Introduction to vector analysis and generalized coördinates.

Ps. 508.—Thermodynamics. 3 hours. 3 credits. Bless.

The laws of Thermodynamics, chemical reactions from the thermodynamical standpoint, Electrochemistry, and the Nernst Heat Theorem.

Ps. 510.—Physical Optics. 3 hours. 3 credits. WILLIAMSON.

Prerequisite: Ps. 309 or equivalent.

The electro-magnetic theory of light applied to reflection, refraction, dispersion, and polarization.

Ps. 513-514.—Advanced Experimental Physics. 6 or 8 hours laboratory. 6 or 8 credits. WILLIAMSON, BLESS, PERRY, KNOWLES, WILLIAMS.

A series of experiments on a particular topic of physics, a review of classical experiments, or the development of an assigned experimental problem. The work will be assigned to meet the needs and interests of the particular student.

Ps. 517-518.—Modern Physics. 3 hours. 6 credits. WILLIAMSON.

The electronic theory of atomic structure, the interpretation of the properties of matter and radiation from the standpoint of this theory, and spectroscopy.

<sup>\*\*</sup>Not offered in 1938-39.

Ps. 521-522.—X-Rays. 3 hours. 6 credits. BLESS.

The first semester is devoted to classroom discussion of the theoretical aspects of X-rays. The following topics are treated: The passage of electricity through evacuated tubes, the photoelectric effect, the Bohr Theory, the production and properties of X-rays, and the applications of X-rays to physics, chemistry and biology. The second semester's work is chiefly experimental. The laboratory work is designed to suit the interests of the individual student.

Ps. 523-524.—Seminar in Modern Theory. 2 or 3 hours. 4 or 6 credits. STAFF.

Some particular phase of the most recent developments in theoretical physics is taken up in detail.

Ps. 527-528.—Colloquium. No credit. STAFF.

The most interesting papers are selected from the current literature in physics, and these papers are reported upon by the students.

Ps. 551-552.—Thesis. No credit in hours. WILLIAMSON, BLESS, PERRY, KNOWLES, WILLIAMS.

## POLITICAL SCIENCE

Prerequisites: An undergraduate major of twenty-four semester hours or equivalent. It is very desirable that the student should begin his graduate work with a reading knowledge of one foreign language, preferably French or German, especially if he intends to go on to the work for the Ph.D. degree.

\*Pcl. 501-502.—American Constitutional Law. 3 hours. 6 credits. LEAKE

\*\*Pcl. 503-504.—International Law. 3 hours. 6 credits. DAUER.

Pcl. 505-506.—Political Theories. 3 hours. 6 credits. DAUER.

\*Pcl. 507-508.—Comparative Government. 3 hours. 6 credits. DAUER.

\*Pcl. 509-510.—International Relations. 3 hours. 6 credits. DAUER.

Pcl. 511-512.—American State and Municipal Administration. 3 hours. 6 credits.

\*Pcl. 513-514.—Political Science Seminar. 2 hours. 6 credits. DAUER.

## **PSYCHOLOGY**

Prerequisites: Twenty-four semester hours in psychology and related fields, of which at least twelve semester hours must be in psychology.

Psy. 501-502.—Readings in Experimental Psychology. 3 hours. 6 credits. HINCKLEY.

Lectures and assigned readings in some of the more important fields of psychological research.

Psy. 505.—Advanced Statistical Methods in Psychology. 3 hours. 3 credits. HINCKLEY and MOSIER.

Studies in correlation, regression, and prediction, as applied to psychological measurement.

Psy. 506.—Psycho-physical Theory in the Construction of Tests. 3 hours. 3 credits. HINCKLEY and MOSIER.

Application of psycho-physical theory in the measurement of psychological and social values. Critical discussion of Weber's Law, Fechner's Law, and the Law of Comparative Judgment. Special attention is given to the problems of psychological scale construction and attitude measurement.

Psy. 508.—Advanced Comparative Psychology. 3 hours. 3 credits. WILLIAMS. A study of the intelligence and learning capacity of animals, with an attempt to formulate and explain the psychological concepts of reflex, conditioned reflex, instinct, learning, memory, intelligence, thinking, and motivation as problems primarily in nerve physiology.

<sup>\*</sup>Given alternate years, not offered in 1939-40.

<sup>\*\*</sup>Not offered in 1938-39.

Psy. 509.—Studies in Personality. 3 hours. 3 credits. HINCKLEY.

Lectures and readings in experimental studies of personality. Special attention will be given to the clinical work of the personnel bureau.

Psy. 510.—Readings in Abnormal Psychology. 3 hours. 3 credits. HINCKLEY. Lectures and readings on the various forms of mental disease, with special attention to diagnosis and treatment.

Psy. 514.—History and Systems of Psychology. 3 hours. 3 credits. WILLIAMS. A critical survey of the historical development of psychology, with special emphasis on representative writers and the more recent systems and programs.

## SOCIOLOGY

Prerequisites (or co-requisites, in part): Eighteen hours in Sociology in addition to the work of the Freshman year in C-1. These eighteen hours include Sociological Foundations of Modern Life (C-Sy. 13) or equivalent, Principles of Sociology (Sy. 441), and eleven hours of approved electives. Students are recommended to have Political Foundations and Economic Foundations of Modern Life, or equivalent, and General Psychology.

Sy. 521.—Rural Sociology. 3 hours. 3 credits.

To be taken in part in connection with Sy. 321.

Sy. 523.—Social Disorganization. 3 hours. 3 credits. BRISTOL. To be taken in part in connection with Sy. 323.

Sy. 524.—Criminology. 3 hours. 3 credits. BRISTOL. To be taken in part in connection with Sy. 324.

Sy. 526.—Urban Sociology. 3 hours. 3 credits.

To be taken in part in connection with Sy. 326.

\*\*Sy. 531-532.—Development of Social Thought. 3 hours. 6 credits. BRISTOL.

Sy. 541.—Advanced Social Theory. 3 hours. 3 credits. BRISTOL.

Sy. 542.—Applied Sociology. 3 hours. 3 credits. BRISTOL. To be taken in part in connection with Sy. 442.

Sy. 544.—Marriage and the Family. 3 hours. 3 credits. BRISTOL.

To be taken in part in connection with Sy. 444.

\*\*Sy. 551.—Social Progress. 3 hours. 3 credits. BRISTOL.

To be taken in part in connection with Sy. 351.

\*\*Sy. 571-572.-Social Trends. 21/2 hour seminar. 6 credits. BRISTOL.

## SPANISH

Prerequisites: Twenty-four hours, or equivalent, of undergraduate work in Spanish. This must include a year-course in composition and one in Spanish literature.

Sh. 501-502.—Old Spanish. 3 hours. 6 credits. HAUPTMANN. Prerequisite: A reading knowledge of Latin.

Spanish Historical Grammar. Readings from 12th, 13th, and 14th centuries.

Sh. 503-504.—Golden Age. 3 hours. 6 credits. HAUPTMANN. Prerequisite: Consent of instructor.

Lectures, readings, reports.

Sh. 505-506.—Contemporary Spanish Literature. 3 hours. 6 credits. HAUPTMANN. Prerequisite: Consent of instructor.

A study of the generation of '98 and their predecessors. Lectures, readings, reports.

<sup>\*\*</sup>Not offered in 1938-39.

## GRADUATE ASSISTANTS, 1937-1938

JOSEPH PAUL BAIN, B.S., University of Florida, 1935 Graduate Assistant in Chemistry
FITZ JAMES BARTLETT, B.S., University of Maryland, 1936 Graduate Assistant in Pest Control
CHARLES HENRY BECKER, B.S. in Pharmacy University of Illinois, 1937
LEWIS BERNER, B.S., University of Florida, 1937
HAMLIN L. BROWN, JR., B.S. in Agriculture University of Florida, 1936
JOHN MILTON BROWNLEE, B.S. in Agriculture University of Florida, 1935
WALTER HAYDEN BYERS, B.S., University of Florida, 1936 Graduate Assistant in Physics
CHARLES KITTREDGE CLARK, B.A., 1928; Engineer in Chemistry, 1929; Stanford University
ARNOLD WALKER DEAN, B.S., 1929; M.S., 1930; University of Florida
ROBERT STANLEY DYAL, B.S. in Agriculture University of Florida, 1937
FRED WILSON ELLIS, B.S. in Pharmacy The University of South Carolina, 1936
KENNETH ALFREY FREEMAN, B.S., Stetson University, 1934 Research Assistant in Naval Stores
ROBERT EUGENE FUGATE, B.S., University of Florida, 1937 Graduate Assistant in Chemistry
JOHN HOWARD GIRARDEAU, B.S. Clemson Agricultural College, 1937
SAM PAUL GOETHE, B.S. in Mechanical Engineering University of Florida, 1936
LOVELL DAVID HINER, B.S., South Dakota State College, 1929; M.S. in Pharmacy University of Florida, 1931
University of Piorita, 1991
ERNEST MATELLE HODNETT, B.S., University of Florida, 1936 Graduate Assistant in Chemistry
ERNEST MATELLE HODNETT, B.S., University of Florida, 1936 Graduate Assistant in Chemistry Charles Milton Jones, B.S.
ERNEST MATELLE HODNETT, B.S., University of Florida, 1936
ERNEST MATELLE HODNETT, B.S., University of Florida, 1936
ERNEST MATELLE HODNETT, B.S., University of Florida, 1936
CHARLES MILTON JONES, B.S., University of Florida, 1936
CHARLES MILTON JONES, B.S., University of Florida, 1936
CHARLES MILTON JONES, B.S., University of Florida, 1936
CHARLES MILTON JONES, B.S., University of Florida, 1936
CHARLES MILTON JONES, B.S.  University of Florida, 1937
ERNEST MATELLE HODNETT, B.S., University of Florida, 1936
CHARLES MILTON JONES, B.S.  University of Florida, 1937
ERNEST MATELLE HODNETT, B.S., University of Florida, 1936

## GRADUATE SCHOLARS, 1937-1938

OKINDONIE BESTOLIKIE, 1701-1700
GEORGE ROBERT BENTLEY, B.A. in Education University of Florida, 1937
TED EVERETT CALMES, B.S., University of Florida, 1937 Graduate Scholar in Chemistry
LEA GENE GRAMLING, B.S. in Pharmacy, 1935; M.S. in Pharmacy, 1936 University of Florida
PATTERSON BIDDLE LAND, B.A. in Education University of Florida, 1936
EDWARD FRANCIS NOLAN, B.A. in Education University of Florida, 1937
HAZEN EDWARD NUTTER, B.A., University of Florida, 1937 Graduate Scholar in Economics
CHARLES AXEL POEKEL, B.S. in Electrical Engineering University of Florida, 1937
ROBERT B. SMITH, Jr., B.S. in Pharmacy
Medical College of Virginia, 1937
RECIPIENTS OF GRADUATE DEGREES
February 1, 1937
MASTER OF SCIENCE IN ENGINEERING
ROBERT MILTON JOHNSON, B.S. in Civil Engineering, 1929; Civil Engineer, 1981  University of Florida
Civil Engineering THESIS: "The Design of Experimental Equipment and Apparatus for a Hydraulic Research Laboratory at the University of Florida"
ROBERT ALDEN THOMPSON, B.S. in Mechanical Engineering, University of Florida, 1932 Gainesville Mechanical Engineering
THESIS: "Investigation of the Centrifugal Force and the Resulting Radial Movement of Air in Aircraft Propellers and of Some of the Aerodynamic Questions Involved"
MASTER OF SCIENCE
T. WESLEY STEARNS, B.S., University of Florida, 1934
Thesis: "Refinements in Methods for the Determination of Fluorides in Water"
. MASTER OF ARTS IN EDUCATION
PAUL T. DELAVAN, Bachelor of Civil Engineering, University of Michigan, 1912 Dade City Education
Thesis: "The Status of Principals in the Standard Public High Schools of Florida"
DOCTOR OF PHILOSOPHY
PAUL FEHDER, B.S., Columbia University, 1932; M.S. in Pharmacy University of Florida, 1934
Pharmacy DISSERTATION: "Drug Extraction. A Study of the Official Resins"
June 7, 1937
MASTER OF SCIENCE IN ENGINEERING
CHESTERFIELD HOWELL JANES, B.S. in Mechanical Engineering
University of Florida, 1930
Mechanical Engineering THESIS: "The Engineering and Curricula Requirements for Shop Courses as Taught to
Engineering Students'

WILLIAM LINCOLN SAWYER, B.S., University of Illinois, 1928
and Shortleaf Southern Pine and Tidewater Red Cypress"
MASTER OF SCIENCE IN AGRICULTURE
P. T. DIX ARNOLD, B.S., Cornell University, 1924
Animal Husbandry  THESIS: "Microscopic Observations of Smears from the Genitalia of Cows in Relation to the  Oestrus Cycle"
MASTER OF SCIENCE
RICHARD A. BARDWELL, B.S. in Chemical Engineering, University of Florida, 1936
Chemistry THESIS: "Studies in the Use of Sodium Aluminate as a Coagulant"
BURTON WELLINGTON GRAHAM, B.S., University of Florida, 1935
Chemistry
Thesis: "Studies in the Use of Sodium Zincate as a Coagulant"
MASTER OF ARTS IN EDUCATION
J. Broward Culpepper, B.A., University of Florida, 1930
Education THESIS: "The Administration of the P. K. Yonge Laboratory School"
Broward Miller, B.A. in Education, University of Florida, 1930
Education THESIS: "The Academic and Professional Qualifications of the County Superintendents of Florida"
ROGER CLIFFORD MONROE, B.A., Bradley Polytechnic Institute, 1934
THESIS: "Federal Participation in the Equalization of Elementary and Secondary Public Education"
BURT W. WETHERBEE, B.S. in Chemistry, Tufts College, 1929
Education THESIS: "A Diagnostic Study of the Gifted Children in the P. K. Yonge School"
MASTER OF ARTS IN ARCHITECTURE
ARTHUR D. McVoy, B.S. in Architecture, University of Florida, 1933
Architecture THESIS: "Study of an Ideal Non-Ritualistic Church Group for an Urban Community"
Thesis. Stady of an Ideal 140n-litilatistic Charen Group for an Oroan Community
MASTER OF ARTS
ELMER BANKS CLARK, Jr., B.A. in Education, University of Florida, 1935
THESIS: "English Words in 'L'Illustration' 1930 and 1935"
BOYD H. OVERPECK, Jr., B.A., University of Florida, 1935
BENJAMIN REMINGTON WELD, B.A., Princeton University, 1898
Sociology THESIS: "Conditions in the Colonial Period Favoring Religious Individualism"
DOCTOR OF PHILOSOPHY
CLEMENT LEE HUYCK, B.S. in Pharmacy, University of Buffalo, 1932; M.S. in Pharmacy University of Florida, 1934
Pharmacy DISSERTATION: "Drug Extraction. A Study of Repercolation"

VINCENT EVANS STEWART, B.S., University of Florida, 1934 St. Petersburg Chemistry DISSERTATION: "Derivatives of Piperazine and Morpholine. I. Addition to Alpha, Beta Unsaturated Ketones" July 24, 1937 MASTER OF ARTS IN EDUCATION LOUIS PIPER SHANNON, Bachelor of Education Southern Illinois State Normal University, 1929 Dwight, Ill. Education Thesis: "Reorganization of Freshman High School Mathematics for General Education Purposes" MASTER OF ARTS Thesis: "Philosophic Ideas in the Poetry of A. E." GERTRUDE FLORENCE JACOBI, B.A. in Education, University of Florida, 1930 ........ Jacksonville THESIS: "Minor Poets of South Carolina" Sociology Thesis: "Slavia: A Culture Pocket in Florida" EDGAR C. McVoy, B.A. in Education, University of Florida, 1934 Gainesville Sociology Thesis: "A Sociological Study of Gainesville, Florida" DOCTOR OF PHILOSOPHY Biology DISSERTATION: "The Geographic and Ecological Distribution of the Reptiles and Amphibians of Florida" August 28, 1937 MASTER OF SCIENCE Erben Cook, B.S. in Education, University of Florida, 1933 Mathematics Thesis: "The Geometry of the Triangle as Developed by John S. Mackay" MASTER OF ARTS IN EDUCATION CLAUDE F. BRIDGES, B.S. in Education, University of Florida, 1933 Education Thesis: "A Study of the Reliability of Orally Presented Objective Tests" ESTHER MARY CHASE, B.S. in Education, Florida State College for Women, 1931 Jacksonville THESIS: "A Study of the Reading Difficulties of a Group of High School Seniors" Education THESIS: "A Comparative Study of the Trenton Junior-Senior High School and Recommendations for Improvement" THEODORE REYNOLD JONES, B.S. State Teachers College, Johnson City, Tennessee, 1932 Madison Education Thesis: "Rules and Regulations Adopted by Boards of Public Instruction in Counties of

Florida"

DANA TEMPLE LEITCH, B.S. in Education, University of Florida, 1934 Lynn Education	Haven
THESIS: "Factors Causing Irregular School Attendance Among Poor White Families i Haven, Florida"	n Lynn
HEYBURN DALE SMITH, B.S. in Education, University of Florida, 1927	Springs
Thesis: "A Guide to the Identification and Study of the Florida Snakes"	
FRED KELSEY STEWART, B.A., Bethany College, 1922 St. Pet Education	
THESIS: "An Analysis, with Suggested Improvement, of the Rules and Regulations Go State High School Interscholastic Athletic Contests with Special Application to I	
ALBERTA FLORENCE THALGOTT, B.S., Florida State College for Women, 1927 Di Education	
Thesis: "A Study of the Mental, Educational, and Problem Behavior Status of a G Third Grade Pupils"	roup of
LIDA TULANE, B.A. in Education, University of Florida, 1928	
Thesis: "An Analysis of Social Science Teaching in the St. Petersburg High School"	,
MASTER OF ARTS	
Roe Millege Martin, B.A. in Education, University of Florida, 1930	inesville
THESIS: "Panama Canal Tolls Controversy"	
Addison Lee Messer, B.S., University of Florida, 1936	nanassee
Thesis: "A Study of the Relationship Between Suggestibility and Certain Personality	Traits"
DOCTOR OF PHILOSOPHY	
BURT LAURENT HAMPTON, B.S., University of Florida, 1934	inesville
DISSERTATION: "Derivatives of Piperazine. VII. Alpha Amino Ketones and Derivati	ives''

# The University Summer School

1938

First Term-June 13 to July 22 Second Term-July 25 to August 26

### IMPORTANT

It is possible to avoid the tedious waiting in long lines on registration day if you carefully read this bulletin and follow the directions for preliminary registration as given on page 112.

Vol. XXXIII, Series I No. 3 March 1, 1938

Published monthly by the University of Florida, Gainesville, Florida Entered in the post office in Gainesville, Florida, as second-class matter, under Act of Congress, August 24, 1912

Office of Publication, Gainesville, Florida

The Record comprises:

The Reports of the President to the Board of Control, the Bulletins of Information, announcements of special courses of instruction, and reports of the University Officers.

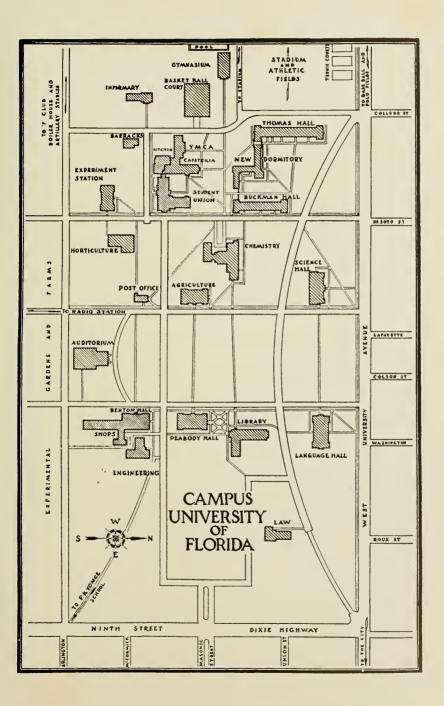

These bulletins will be sent gratuitously to all persons who apply for them. The applicant should specifically state which bulletin or what information is desired. Address

THE REGISTRAR, University of Florida
Gainesville, Florida

Research Publications.—Research publications contain results of research work. Papers are published as separate monographs numbered in several series.

There is no free mailing list of these publications. Exchanges with institutions are arranged by the University Library. Correspondence concerning such exchanges should be addressed to the University Librarian, University of Florida, Gainesville, Florida. The issue and sale of all these publications is under the control of the Committee on Publications. Requests for individual copies, or for any other copies not included in institutional exchanges, should be addressed to the University Library, University of Florida, Gainesville, Florida.

## IMPORTANT NOTICE TO SUMMER SESSION STUDENTS

All who expect to attend the 1938 Summer Session at the University of Florida must fill out the Application Blank on page 115 and mail it to the Registrar, University of Florida, Gainesville. Previous attendance at the University of Florida does not waive this requirement.

Upon receipt of this questionnaire, the Registrar will send registration blanks for the 1938 Summer Session if the application is received before June 1. In order to save time and confusion during registration, each person who expects to register should mail in this questionnaire before June 1, 1938.

Upon request, blank questionnaires will be supplied by the Registrar.

READ QUESTIONS AND ANSWERS ON PAGES 109-110.

## IMPORTANT DIRECTIONS

## TO STUDENTS

After arriving at the University:

- If dormitory room assignment has been made, secure keys from the Head Janitor's Office in Thomas Hall near the archway joining the latter to the New Dormitory. If no reservation has been made, call at Office of the Business Manager, 102 Language Hall.
- For outside rooming accommodations, see Dean of Students, 105 Language Hall, or Dean of Women, 144 New Dormitory.
- Cafeteria meal tickets may be purchased from the Cashier, 102 Language Hall, or at the cigar counter, Cafeteria.
- 4. For information concerning social activities among women students, or any matter of interest to women, see the Dean of Women, 105 Language Hall or 144 New Dormitory.

## **ADMISSION**

Students who give evidence of being able to profit by college work will be admitted to the University of Florida Summer Session. It should be noted, however, that NO CREDIT will be allowed unless our specific admission requirements are satisfied. These requirements are:

- For students who are entering college for the first time.
   See Admission to the General College.
- 2. For students who are transferring from another institution and who expect to receive a degree or diploma from the University of Florida.

Official transcripts sent directly to the Registrar from all institutions previously attended. (Teachers' certificates or transcripts presented by students will not suffice.)

For students who regularly attend another college or university and who are attending the University of Florida Summer Session only for the purpose of securing credits to be transferred to the institution regularly attended.

A statement of Honorable Dismissal from the institution last attended. (Blanks for this purpose may be secured from the Office of the Registrar, 110 Language Hall.)

4. For students who wish to enter the College of Law. See Admission to the College of Law.

It is the student's responsibility to supply the proper credentials as outlined in numbers 1, 2, 3, or 4 above. NO TRANSCRIPTS FOR COLLEGE CREDIT WILL BE ISSUED FOR ANY PERSON FAILING TO COMPLY WITH THE ABOVE.

Students who have previously attended the University of Florida may continue in the college in which they were registered. Transfer students with at least 64 acceptable semester hours credit of advanced standing may be admitted to one of the colleges or professional schools of the University.

Women students transferring from other institutions of higher learning have the option of entering the General College or one of the colleges or professional schools of the University. Teachers in active service at the present time desiring to take professional courses for the purpose of certification may enter the College of Education.

All other students register regularly in the General College.

## ADMISSION TO THE GENERAL COLLEGE

The following items will be considered in the admission of students to the General College:

- 1. Graduation from high school. Graduation from high school is required, although no specific high school units are required.
- 2. Consistency of the high school record.
- 3. Achievement in high school.
- 4. Personal qualities.
- 5. Recommendation of high school principal.
- 6. Standing on Placement Tests.

All applicants should submit the Application Blank at the back of this bulletin, and in addition should have an Application for Admission blank sent to the Registrar. The latter may be secured from high school principals of the State. Applicants for admission from other states may secure an Application for Admission blank by writing the Registrar.

The Placement Tests will be given at 1 P.M., Saturday, June 11, in 106 Agriculture Building. All applicants for admission to the General College are required to take these tests before registration.

## ADMISSION TO THE COLLEGE OF LAW

Applicants for admission to the College of Law must be eighteen years of age and must have received a bachelor's degree in a college or university of approved standing, or must have fully satisfied the academic requirements for a degree in a combined course at the University of Florida. The College of Arts and Sciences and the College of Business Administration offer such a course. Evidence of this work must be presented to the Registrar of the University on or before the date on which the applicant wishes to register.

During the summer session, students in good standing in any member school of the Association of American Law Schools will be admitted as students but not as candidates for degrees unless our entrance requirements are met.

## **GENERAL INFORMATION**

## TWO TERMS

The Summer Session of 1938 will consist of two terms. The first term will extend from June 13 to July 22 and classes will meet five days a week. The second term will begin July 25 and end August 26. Classes will meet six days a week during the second term.

## LECTURE SERIES

The University Summer Session is providing this year a series of lectures to be given at such times as will be convenient for students to attend without interfering with their class schedules. The lecturers to be invited to participate will be the very best available. A bulletin giving 'detailed announcement of the name of the lecturer, time, place and subject will be available upon registration. The administration would like to emphasize the importance of all students taking advantage of the opportunity to attend these lectures.

## ENTERTAINMENTS AND PLAYS

Adequate facilities for entertainments and plays are provided in the University Auditorium, which has a seating capacity of approximately 1800. In addition to the main University Auditorium, the auditoriums in Florida Union and in the P. K. Yonge Laboratory School will be available. Stress is placed upon performances by the students in plays and musical entertainments being produced from time to time by the staffs of the departments of Speech and Music.

#### RELIGIOUS AND SOCIAL LIFE

The moral and religious atmosphere of the Summer Session is wholesome. The leading religious denominations have attractive places of worship, and students are welcomed at every service. Transportation to and from church is provided for students who will

attend. Frequent devotional services are held in the University Auditorium in connection with the Student Assembly.

## THE FLORIDA UNION BUILDING

The Florida Union is operated as an official social center for the campus. Director D. R. Matthews will be in charge and will take pleasure in doing everything possible to make the student's stay pleasant. Reading, recreation, and lounging rooms will supply adequate facilities for social activities and for comfortable relaxation.

## THE CENERAL ASSEMBLY

All students and faculty members are expected to attend the General Assembly, which will be held in the University Auditorium at hours scheduled below. Important announcements will be made at the General Assembly, for the observance of which students will be held responsible.

8:30 A.M. Wednesday, June 15 10:00 A.M. Thursday, July 7 8:30 A.M. Wednesday, July 27 10:00 A.M. Friday, August 12

### SOCIETIES AND CLUBS

#### PHI KAPPA PHI

A chapter of the Honor Society of Phi Kappa Phi was established at the University in 1912. To be eligible for membership, a student must previously have earned at the University at least thirty semester hours credit, must have been guilty of no serious breaches of discipline, and must stand among the upper tenth of all candidates for degrees. Candidates for election to Phi Kappa Phi must have attained an honor point average of at least 2.00 on all scholastic work. If a student comes within the quota for his college, an average of 2.00 assures his eligibility, but if he does not come within the quota, it is necessary that he have an average of 2.30 or higher.

#### KAPPA DELTA PI

Kappa Delta Pi is an honorary education fraternity, in which only juniors and seniors in the College of Education are eligible for membership.

## KAPPA PHI KAPPA

Kappa Phi Kappa is an honorary professional education fraternity for men. Students enrolled in the College of Education with an honor point average of 1.5 are eligible for membership.

## PEABODY CLUB

All students of the College of Education are eligible for membership in Peabody Club. This organization meets weekly in Peabody auditorium, where instructive programs are given.

## ANNOUNCEMENTS

Important announcements will be made on the bulletin boards in Florida Union, Peabody Hall and Language Hall. Students should read these daily. Students are responsible for all announcements made in the General Assembly, on the official bulletin boards, and in the Orange and Blue Bulletin.

#### ORANGE AND BLUE BULLETIN

An official mimeographed bulletin is published each day during the Summer Session. It appears on all bulletin boards and carries notices of changes in schedule, meetings, lost and found articles, etc. Students and faculty members should read the Bulletin daily.

## THE EMPLOYMENT BUREAU

The Employment Bureau of the College of Education attempts to render a public service. This is not mere mechanical routine of finding teaching positions for graduates; the Bureau considers the welfare of the school concerned, and tries to get the right person in the right teaching position.

There is no service fee for University graduates. Students who wish the help of the Bureau may arrange an interview with the Director and submit complete credentials. On request this information is sent to school officials of the State.

Many specific requests are received from district trustees and county school boards. Every effort is made to furnish these officials with information that will enable them to select the teachers most likely to succeed in the schools concerned.

Communications in regard to teaching positions should be addressed to the Director of the Teachers' Employment Bureau, College of Education, University of Florida, Gainesville.

## LABORATORY SCHOOL

The P. K. Yonge Laboratory School will conduct a few demonstration classes in the elementary grades and the kindergarten, during the first term of the Summer Session. Provision will be made for four groups: kindergarten, combined first and second grades, combined third and fourth grades, combined fifth and sixth grades. Application for enrollment should be sent to the Director of the Laboratory School as soon as possible, since the number who may be accommodated is limited.

Registration of pupils will be held in Room 120 Yonge Building, Monday, June 13. Classes will begin Tuesday, June 14, at 9 o'clock.

There are no fees charged for registration.

## P. K. YONGE SCHOOL LIBRARY

The P. K. Yonge Laboratory School library will be open both terms for use of teachers attending the Summer Session. This library contains about 3500 books for boys and girls from the kindergarten through the twelfth grade.

In the room adjoining the library is a collection of books known as the Library, Florida State Department of Public Instruction. These books have been donated by publishers and include texts, professional books, and library books. Many new and useful books are available to teachers for examination.

The materials from both collections may be examined at the following hours:

8 to 11 A.M., 2 to 5 P.M. daily except Saturday

9 to 12 A.M. Saturday

7 to 9 P.M. Monday through Friday

The librarian will be available for conferences on individual library problems. Hours will be posted. Teachers and principals are invited to ask for whatever help they may need.

## STUDENTS' DEPOSITORY

For the convenience and protection of students while in residence at the University, funds may be deposited with the Cashier. A service charge of twenty-five cents is made on each account, per term.

## LOAN FUNDS

By means of the Florida State Scholarship Fund, the College Girls' Club Scholarship Loan Fund, the Elizabeth Skinner Jackson Loan Fund, and the R. A. Gray Loan Fund, the Summer Session is able to make small loans to a limited number of women students to help defray expenses in the current term. These loans are governed by the following regulations:

- (1) Applicant must be a teacher in the State of Florida.
- (2) Applicant must have a position for the succeeding term of school.
- (3) Applicant must be in need of aid.
- (4) Applicant must apply for Scholarship Loan at least two weeks before opening of a Summer Term.
- (5) Application must be made directly to the Director of the Summer Session.
- (6) Applicant must be recommended by two school officials of the county in which she is teaching at the time of application.
- (7) Loans are to be used for atten ance at a University of Florida Summer Term.
- (8) Loans will be for a period not to exceed nine months from the day on which a Summer Term begins.
- (9) Loans will bear interest at the rate of 6%, which will be added to the principal fund.

Upon application to the Director of the Summer Session, blank forms for application for a scholarship loan will be furnished.

#### CERTIFICATES

### GRADUATE STATE CERTIFICATES

Graduates of the University are granted Graduate State Certificates without further examination, provided that three-twentieths of their work has been devoted to professional training and provided that they have satisfied the requirement of the law as to familiarity with the Constitution of the United States. It is well for the student to note that a Graduate State Certificate permits him to teach only those subjects that are listed on such certificate, and that only those subjects will be placed on his certificate in which he has specialized in his college course. This will ordinarily mean that a subject must have been pursued for at least three years in college, in addition to credit for all high school courses offered in that subject by a standard high school, before a certificate to teach such subject will be granted. The student who expects to meet the requirements for specialization should familiarize himself with the regulations regarding specialization as printed in the Handbook for Teachers, Section 1, latest edition, published by the State Department of Public Instruction. Applicants for the Graduate State Certificate must apply to Superintendent Colin English, Tallahassee, for application blanks and further information.

Graduate State Certificates may be converted into Life Certificates by "presenting satisfactory evidence of having taught successfully for a period of twenty-four months under a Graduate State Certificate, and presenting endorsement of three holders of Life State, Life Graduate State, or Life Professional Certificates." Application for a Life Graduate State Certificate must be filed before the expiration of the Graduate State Certificate.

#### REGULATIONS GOVERNING EXTENSION OF CERTIFICATES

The following more important items govern the granting of extension of certificates:

- 1. The certificate must be valid at the close of the Summer Term attended and at the time formal application for extension is made.
- The applicant must pass at least six semester hours in which no grade is below a "C". At least one-third of this work must be in professional subjects.
- Courses in Education and all other courses which definitely apply toward
  meeting the requirements for a diploma or a degree are counted as professional subjects.
- 4. No student will be granted an extension of certificate who does not apply for the same on the student Registration Card. In case the student fails to apply on the Registration Card at time of registration, request may be made to the Registrar, Room 110, Language Hall, to have his application for extension properly recorded. A list of those who have applied will be posted on the bulletin boards in Language Hall and Peabody Hall not later than July 1 for the First Term and August 10 for the Second Term. In case of error in this list, students should report to the Registrar. No student will be recommended for extension whose name does not appear on this list by July 13 for the First Term or August 17 for the Second Term. Students should indicate exactly the name that appears on the certificate which they wish to have extended.
- Certificates to be extended must be sent by registered mail to Colin English, State Superintendent of Public Instruction, Tallahassee, Florida, within a year after the close of the Summer Term. Otherwise extension will not be granted.

# COURSES IN TRADE AND INDUSTRIAL EDUCATION DAYTONA BEACH, FLORIDA

Under the joint sponsorship of the University of Florida and the State Department of Public Instruction of Florida, a group of courses in Trade and Industrial Education will be offered, as an integral part of the Summer Session, at the Seabreeze High School, Daytona Beach, Florida.

These courses will be conducted in two terms of three weeks each: June 13 to July 1, and July 5 to July 22. Classes will meet six days a week, two hours a day. The maximum load a student will be permitted to carry is four semester hours.

This service is offered primarily for Trade and Industrial Education teachers and only the following classes of students will be admitted:

- Those actually engaged in teaching Trade and Industrial Education or vocational courses subsidized from Smith-Hughes or George-Deen funds;
- Novice or apprentice teachers meeting all requirements of the State Plan for Trade and Industrial teachers with the exception of the required amount of teacher training;
- County superintendents or school administrators exercising control over a subsidized Trade and Industrial program;
- Directors, supervisors, and coordinators of vocational programs subsidized from Smith-Hughes and George-Deen funds.

No courses other than those technical subjects of value to Trade and Industrial Education teachers will be offered and persons not falling in one of the above groups will not be admitted.

To receive credit for these courses the regular admission requirements of the University must be met and the approval of the State Supervisor of Trades and Industrial Education secured.

Persons interested should request the Bulletin of the School of Trade and Industrial Education.

Address-

THE REGISTRAR, University of Florida, Gainesville, Florida,

# **EXPENSES**

#### GENERAL FEES

TuitionNo	ne
Registration fees, each term:	
Infirmary fee (Required of all students)	3 1
Florida students	15
Non-Florida students	25
Extra hour fee-for each semester hour above normal load of six hours	1
College of Law (one term of six weeks)	25
(\$6 a semester hour for less than five hours.)	
Late registration fee	5
Breakage fee for Biology and Chemistry	5
Failure fee, per semester hour	2.50
(For any course failed during last period of attendance)	
Diploma fee	5

# FAILURE FEES AND EXAMINATION FEES FOR GENERAL COLLEGE STUDENTS

In lieu of a reexamination fee, a failure fee is charged for each failing grade a General College student has received since he last paid registration fees. This fee is assessed according to the following schedule and must be paid before the student is permitted to continue in the University:

Each failing grade in C-1,	C-2, C-3, C-41, C-42,	C-5, or C-6	\$5.00
Each semester hour failed	in all other courses		2.50

A non-refundable fee of \$1, payable on the day of application, is charged for each application for a comprehensive examination. Applications are necessary only in case the student is not currently registered in the course concerned.

These fees were assessed for the first time beginning with the 1937 Summer Session and will be assessed at all subsequent registrations.

#### REFUND OF FEES

Fees paid in advance for room reservations will be refunded up to and including, but not after June 1, for first term reservations, or July 1 for second term reservations.

If by Wednesday of the first week of each term students for any reason wish to withdraw from the University, the fees paid, less a flat fee of \$3, will be refunded. No refunds will be made after this date.

# ROOMING FACILITIES

#### UNIVERSITY DORMITORIES

The University dormitories are reserved for women students during the Summer Session. Rooms are rented for the term or session, payable in advance. The dormitories will be open from June 11 to noon August 27.

Rooms may be reserved at any time by application to the Business Manager. A deposit of \$5 is required with each reservation, payable on or before May 1 for reservations for the first term, and on or before June 4 for the second term. This deposit is held as a breakage fee, to be returned at the close of the term if no damage to the room has been reported.

All bedrooms are furnished with single beds and mattresses, chifforobes or dressers, study tables and chairs. Students must furnish linen and other things they may require for their own special comfort and convenience. Easy chairs may be secured at a rental charge of 50c per term.

Students are not permitted to cook in the dormitories.

Students who are assigned rooms in the dormitories may secure special rates, listed below, if they purchase at least one cafeteria meal ticket per term. These tickets carry a monetary value of \$15.00 and are sold for \$14.25. A student is permitted to use them as he sees fit. Under ordinary circumstances these coupon books will purchase meals for a period of three to four weeks. The cafeteria rates are the same as those of last summer notwithstanding the increase in cost of food stuffs.

A description of accommodations in the several dormitories, with rates per student, follows.

#### NEW DORMITORY

The New Dormitory is of strictly fireproof construction. Rooms are arranged in suites, consisting of study and bedroom, and accommodating two students. A limited number of single rooms and several suites accommodating three students are available. All rooms are equipped with lavatories and built-in chifforobes. A bathroom with hot and cold showers, and lavatories, is located on each floor of each section. Thus bathroom facilities are made available for every four rooms.

#### RATES

	When cafeteria book is not secured		k When cafeteria boo is secured	
	1st term	2nd term	1st term	2nd term
Single rooms -First, Second and Third floors	15.75	13.25	10.50	9.80
Single rooms -Fourth floor.	15.00	12.50	7.50	6.25
Two room suites-First, Second and Third floors	15.00	12.50	10.00	8.35
Two room suites-Fourth floor	12.75	10.75	6.50	5.50

#### THOMAS HALL

Sections A, C, D and E have been remodeled throughout. Both single and double rooms are available. All rooms in Section A, C and E and the single rooms in Section D are equipped with lavatories. The rooms in other sections are arranged in suites consisting of study and bedroom, accommodating three students. A bathroom with hot and cold showers, and lavatories, is located on each floor of each section. Thus bathroom facilities are made available for every four rooms.

#### RATES

	When cafeteria book is not secured		When cafeteria book is secured	
	1st term	2nd term	1st term	2nd term
*Single rooms, Sections C, D and E	14.25	12.00	9.50	8.00

There will be no change made in dormitory rates, under any conditions.

SEE PAGE 113 FOR APPLICATION FOR ROOM RESERVATION.

# UNIVERSITY CAFETERIA

The Cafeteria is now under the direction of Miss Dorothy Gaunt, a graduate dietitian, and offers to Summer Session students high quality food at reasonable prices. The meals are carefully planned, offering a pleasing variety of foods attractively served.

Many innovations have been made in equipment and methods, resulting in a service as complete and modern as that found in any school cafeteria in the south.

All service is cafeteria style, affording individual selections. The policy is to furnish well prepared food at actual cost. Coupon books containing tickets with a monetary value will be sold at a discount sufficient to warrant their purchase.

Meals may be obtained at the University Cafeteria at the following rates:

\$15.00	monetary	value	coupon	ticket	\$ 14.25
5.00	monetary	value	coupon	ticket	 4.75

#### OFF CAMPUS ROOMING ACCOMMODATIONS

#### ROOMING REQUIREMENTS FOR WOMEN STUDENTS

- In order to complete registration all women students must have a place of residence approved by the Dean of Students.
- All women students will live in the dormitories, with the exceptions that graduate students and others over 21 years of age who have been self-supporting may be permitted to live in approved rooming houses after making proper arrangements with the Office of the Dean of Students.
- Request to live off campus should be made to the Office of the Dean of Students, on form provided by that office, and will contain the following information: age, record

of employment for past year, address of rooming house in which student wishes to reside, and reasons why rooming off campus will be of advantage to the student.

- 4. A list of approved rooming houses will be available at the Office of the Dean of Students. In order to avoid inconvenience and possible unpleasantness students are urged to consult this list before making any definite arrangements for a place of residence off campus.
- Approved rooming houses will not be allowed to house both men and women except in the case of married couples, and for these a special list of approved places will be made.

# **GENERAL REGULATIONS**

The student is advised to procure the University bulletin entitled By-Laws and acquaint himself with all general regulations. Particular attention is invited to the following items:

#### RESIDENCE REQUIREMENTS

- 1. The minimum residence requirement for the baccalaureate degree is two regular terms, or one regular term and three summer terms, or five summer terms. New students offering advanced standing must meet this requirement after entrance to the University. Students who break their residence at the University by attending another institution for credit toward the degree must meet this requirement after re-entering the University.
- 2. For the master's degree two regular terms or six summer terms are necessary to satisfy the residence requirements.
- 3. Students are required to complete the last thirty credit hours (27 for the Normal Diploma; 28 in the College of Law) applied towards the baccalaureate degree during regular residence in the college from which the student is to be graduated. Exception to this regulation may be made only upon written petition approved by the faculty of the college concerned, but in no case may the amount of extension work permitted exceed more than twelve of the last thirty-six hours required for a baccalaureate degree.

#### AMOUNT OF EXTENSION WORK PERMITTED

No person will be allowed to take more than one-fourth of the credits toward a degree by correspondence study and extension class work. No person will be allowed to take more than 12 of the last 36 credits necessary for a bachelor's degree by correspondence study or extension class work. No person will be allowed to take more than 9 credits by correspondence during the summer vacation period. While in residence, a student will not be allowed to take work by correspondence without the consent of the dean of the college concerned. This will be granted only in exceptional cases. Candidates for the Normal Diploma may not take more than 16 credits by correspondence and extension.

#### MAXIMUM AND MINIMUM LOAD

The minimum load of any student in a summer term is four hours.

The maximum load, including work by correspondence and extension, shall be regulated according to the following schedule:

	Muxu	mum Douc
Honor Point Average for Previous Term	Sum	mer Term
Below 1	6	hours
1 or above	9	hours

For students who have not previously attended the University of Florida the maximum load is nine hours.

#### STUDENT RESPONSIBILITY

Each student must assume full responsibility for registering for the proper courses and for fulfilling all requirements for his degree. Students should confer with the dean of their college, regarding choice of courses several days before registration; in addition to this, juniors and seniors should confer with the head of the department in which they expect to earn a major. Seniors must file, in the Office of the Registrar, formal application for a degree and must pay the diploma fee very early in the term in which they expect to receive the degree; the official calendar shows the latest day on which this can be done.

Each student is responsible for every course for which he registers. Courses can be dropped or changed only with the approval of the dean of the college in which the student is registered and by presentation of the cards authorizing the change at the office of the Registrar.

#### GRADUATION WITH HONORS

# A. General Regulations:

A student successfully completing the work of the Upper Division shall, according to the character of his work, receive a diploma: (1) Of Graduation, (2) of graduation WITH HONORS, or (3) of graduation WITH HIGH HONORS. A student who has an honor point average of 2.0 for the entire four years, or of 2.5 for the work done in the Upper Division, may be graduated WITH HONORS upon recommendation of his advisory committee. A student who has fulfilled the requirements for graduation WITH HONORS, who has done independent work exceptionally well, and who has passed a final comprehensive examination with distinction, may be graduated WITH HIGH HONORS.

# B. Regulations Peculiar to the College of Education:

A student in the College of Education desiring to be graduated with honors must, upon admission to the Upper Division, submit in writing to the line faculty of the College of Education, his proposed program for completing the work of the Upper Division. This program must show:

- 1. A justification for any deviation from the curriculum as set forth in the current catalog.
- 2. A plan for independent study and work.
- 3. A plan for any necessary advisory and supervisory direction.

The line faculty of the College of Education reserves the right to accept or reject any proposed program.

If a program be rejected, a student may modify and resubmit it, or submit an entirely new program, or he may be graduated without honors by completing one of the fixed curricula as set forth in the current catalog. Moreover, the line faculty of the College of Education may recommend for graduation WITH HONORS an exceptional student who may not have applied therefor, if, in its opinion, such a student is justly entitled to such a distinction.

C. For regulations peculiar to other colleges consult the dean of the college.

# COLLEGES AND SCHOOLS

# THE GRADUATE SCHOOL

The major courses are regularly numbered above 500 and the minors between 300 and 500, but there is no objection to counting a course above 500 in one department as a minor in another. On the other hand, there are courses numbered 300 and 400 which are not acceptable as minors.

As a general practice, undergraduate students are not permitted to register for courses numbered above 500.

A number of courses have already been arranged that may count as majors. Efforts will be made to arrange still others upon request. If the major work desired is not listed, requests for it should be made at an early date.

# REQUIREMENTS FOR THE MASTER'S DEGREE

A candidate for the master's degree must be in residence for at least one scholastic year, devoting his entire time during this period to study and research. The Summer Session of eleven weeks will count as one-third of a year. One-half of this term will be one-sixth of a year.

Work Required.—The work for the master's degree shall be a unified program with a definite objective, consisting of twenty-four semester hours or the equivalent, at least half of which shall be in a single field of study and the remainder in related subject matter as determined by the student's Supervisory Committee. The principal part of the course work for the master's degree shall be designated strictly for graduates. However, in the case of related subject matter, courses numbered 300 and above may be offered upon the approval of the Supervisory Committee.

In all departments a general examination, either oral or written or both, covering the whole of the field of study of the candidate, or any part of it, is required. This may embrace not only the thesis and the courses taken but also any questions that a student majoring in that department may reasonably be expected to answer.

A thesis is required of all candidates. This thesis should be closely allied to the major subject. The title of the thesis should be submitted by the end of the first summer. The thesis itself should be completed and submitted in time to allow an interval of three full weeks between the day of submittal and the graduation day of the summer term.

The requirement of a reading knowledge of a foreign language is left to the discretion of the student's Supervisory Committee.

The passing grade for graduate students is B.

The work for the master's degree must be completed within seven years from the time of first registering for graduate work. For summer session students this means seven summers.

For requirements for the Ph.D. degree and other information in regard to graduate work see the *Bulletin of the Graduate School*.

#### COLLEGE OF AGRICULTURE

A few courses will be offered by the College of Agriculture each term. Special emphasis is placed on technical agricultural subjects. Non-agricultural subjects required for the degree of Bachelor of Science in Agriculture may be taken in departments of other colleges.

#### COLLEGE OF ARTS AND SCIENCES

The College of Arts and Sciences operates in every term. The following subject-matter fields are taught and administered by this College: Ancient Languages, Bible, Biology and Geology, Chemistry, English, French, German, History, Journalism, Mathematics, Philosophy, Physics, Political Science, Psychology, Sociology, Spanish, and Speech. Most of the departments offer basic courses in the Summer Session, and many of them offer advanced courses. In addition to work in the fields named above, students enrolled in the College may study courses in Bacteriology, Botany, Economics and Education.

Inasmuch as most of the subjects taught in the public schools are continued on the college level by departments in the College of Arts and Sciences, this college is of particular service to teachers of the State. Others who profit particularly by the operation of the College of Arts and Sciences in the Summer Session are students of the College who wish either to make up deficiencies or to hasten graduation, students of other collegiate institutions and of other colleges of the University who wish to complete basic arts and sciences requirements or electives, and men and women who spend their vacations in attendance at the University for the purpose of securing new points of view and renewed intellectual vigor.

Students who do not intend to earn degrees in this college may enroll subject to the University Admission Regulations (p. 60). Every effort will be made to cooperate with such students in arranging programs of study which will be of greatest advantage and help to them.

#### CURRICULA IN ARTS AND SCIENCES

The College of Arts and Sciences offers curricula leading to the degrees of Bachelor of Arts, Bachelor of Science, Bachelor of Arts in Journalism, and Bachelor of Science in Pharmacy. The curriculum leading to the degree of Bachelor of Science in Pharmacy is administered by the Director of the School of Pharmacy. (See School of Pharmacy below.) The other curricula are administered by the Dean of the College of Arts and Sciences. Only students who have completed the General College or its equivalent (as determined by the Board of Examiners and approved by the Dean of the College) are eligible to enter the curricula and become candidates for degrees.

#### MAJORS

The College offers two kinds of Majors in the curricula leading to the degrees of Bachelor of Arts and Bachelor of Science. All Majors include the requirement of a reading knowledge of a foreign language or 6 semester credit hours in a foreign language in courses numbered 101 and higher.

One of the two kinds of Majors is called a *Departmental Major*. A Departmental Major includes a concentration of not less than 24 and not more than 32 semester credit hours in one subject-matter field. It also includes such subsidiary courses from other subject-matter fields as are essential to thoroughness and comprehension.

The other type of Major is called a *Group Major*. A Group Major includes, in addition to the foreign language, courses from related subject-matter fields with at least 4 semesters of creditable work in one of the fields and not more than 6 semesters in any single field.

The student's Major now includes the essential related subjects, and he is not required to earn separate minors.

#### THE DEGREES OF BACHELOR OF ARTS AND BACHELOR OF SCIENCE

Every student who wishes to be a candidate for one of these degrees should read carefully the description of requirements on pages 190 and 191 of the *Bulletin of Information* for the *Upper Division*, 1937-1938.

One of the degrees, Bachelor of Arts or Bachelor of Science, will be conferred upon every student who satisfactorily fulfills the requirements. The degree of Bachelor of Arts will be conferred if the student's Major centers in one or more of the fields of Ancient Languages, Bible, English, French, German, History, Journalism, Philosophy, Political Science, Sociology, Spanish or Speech. The degree of Bachelor of Science will be conferred if his Major centers in one or more of the fields of Biology, Botany, Chemistry or Physics. Some students who major in Mathematics or in Psychology receive the degree of Bachelor of Arts while others receive the degree of Bachelor of Science, the degree being determined by the direction of the student's interests and accomplishments in his major work.

#### THE PRE-LAW COURSE

In cooperation with the College of Law, the College of Arts and Sciences offers the pre-law course. This course leads to the degree of Bachelor of Arts for to the degree of Bachelor of Science upon completion of the first full year of the law course (28 semester credit hours and 28 honor points), and to the degree of Bachelor of Laws upon completion of the law course. For students who make adequate scholastic progress it is possible to earn the academic and law degrees in six years, of which two years are spent in the General College, one in the College of Arts and Sciences, and three in the College of Law.

#### PRE-MEDICAL AND PRE-DENTAL COURSES

Students who upon graduation from the General College have not completed requirements for admission to the medical and dental schools may continue and complete their pre-professional training in the College of Arts and Sciences. The student should select courses in accordance with requirements for admission to the particular school he wishes to enter, and should correspond with the dean of that school for information and advice.

#### SCHOOL OF PHARMACY

Courses offered by the School of Pharmacy are so rotated that all courses of major interest are offered during the course of several summers. Foundation courses, such as Chemistry, English and Mathematics may also be taken during the Summer Session.

The courses offered will appeal: First, to students attending the regular session who wish to make more rapid progress toward graduation; second, to drug clerks and apprentices who are ambitious to improve their knowledge of pharmacy; third, to graduate students who wish to continue graduate study.

Graduate courses are also offered during the Summer Session. Address the Director of the School of Pharmacy for further information.

#### COLLEGE OF BUSINESS ADMINISTRATION

The College of Business Administration will operate during the Summer Session as during the regular terms. The courses offered will appeal to students attending the regular terms who wish to return during the Summer Session, and to teachers and others who wish to take courses to prepare for teaching commercial subjects in high schools or to prepare for teaching social sciences.

#### COLLEGE OF EDUCATION

#### DEGREES OFFERED

Students completing any of the prescribed four-year courses may obtain the respective degree: i. e., Bachelor of Arts in Education, Bachelor of Science in Education.

Students completing the prescribed course may obtain the Normal Diploma.

#### MAJORS AND MINORS

In the following discussion a major is defined as consisting of 18 credit hours above the elementary year-course in a subject other than Education. A minor is ordinarily defined as consisting of 9 credit hours above the elementary year-course in a subject other than Education, but in case the number of hours thus specified is not sufficient to meet the requirements necessary for certification, the student should take enough additional hours to meet these requirements.

One major and two minors or one major and a double minor are required of students in the curriculum leading to the degree of Bachelor of Arts in Education or Bachelor of Science in Education.

CURRICULUM LEADING TO THE NORMAL DIPLOMA AND TO THE DEGREE OF BACHELOR OF ARTS

IN EDUCATION OR BACHELOR OF SCIENCE IN EDUCATION

Major and minors	2034

For the curriculum in Health and Physical Education, the student is referred to the Bulletin of Information for the Colleges and Professional Schools of the Upper Division.

#### NEW CURRICULA

(Effective September 1, 1937)

CURRICULA IN THE COLLEGE OF EDUCATION LEADING TO THE DEGREES OF BACHELOR OF ARTS IN

EDUCATION AND BACHELOR OF SCIENCE IN EDUCATION

#### REQUIREMENTS FOR ADMISSION

For admission to the College of Education all students will be required to present a certificate of graduation from the General College, or its equivalent, and have the approval of the Admissions Committee of the College of Education.

#### ADDITIONAL REQUIREMENTS FOR CERTAIN GROUPS

Certain additional requirements for admission are specified for admission to the curricula in Health and Physical Education, Agricultural Education, and Industrial Arts Education. For these requirements, see page 187 of the Bulletin of Information for the General College.

#### DEGREES

Only two degrees are offered in the College of Education—Bachelor of Arts in Education and Bachelor of Science in Education.\* The former degrees of Bachelor of Arts or Bachelor of Science in Health and Physical Education, Bachelor of Science in Agricultural Education, and Bachelor of Science in Industrial Arts Education are incorporated in these two degrees.

For either degree the student is required to complete 60 semester hours, with 60 honor points, at least 18 resident hours of which must be in Education and the remaining hours of

<sup>†</sup>Students who have started this curriculum may continue it. Adult students who have teaching experience may register for this curriculum upon request.

<sup>\$</sup>Students who major or minor in natural science are not required to take Gl. 101-102. It may be taken as an elective.

<sup>\*</sup>For the degree of Bachelor of Science in Education the major must be in one of the Natural Sciences.

Credits

which will be elected by the student in conference with his advisory committee. In every case, the student must complete at least 24 semester hours in a subject or field of concentration, to be eligible for graduation.

All students except those whose fields of concentration are Health and Physical Education, Agricultural Education, or Industrial Arts Education, will be graduated upon completion of the following curriculum:

#### THE NORMAL DIPLOMA

For the Normal Diploma a student who has completed the program of the General College will be required to complete 30 semester hours in the College of Education, at least 9 resident hours of which must be in Education and the remaining hours of which will be determined by the student in conference with his advisory committee.

<sup>†</sup>Directed Observation and Teaching in the junior year to be in student's minor field.

#### COLLEGE OF LAW

Since 1909 the purpose of the College of Law has been to impart a thorough scientific and practical knowledge of law and thus to equip students to take advantage of the opportunities in this field. Since 1927 the College has operated during the Summer Session. Courses offered during the regular terms are rotated. Some courses not given during the regular terms are offered in the Summer Session. The variety of courses is sufficient to enable students of different types to carry a full load, and appeal to a wide range of students.

#### THE GENERAL COLLEGE

The General College has been organized to administer the work of the freshman and sophomore years in the University of Florida. All beginning students will register in this College.

The average student will be able to complete the work of the General College in two years, while superior students may finish the curriculum in a shorter time, and others may find it necessary to remain in the General College for a longer period.

A program of general education is worked out for all students. In this program the University recognizes that broad basic training is needed by all students alike. On this foundation that has meaning and significance to the student, he may add the special training of the colleges and professional schools of the Upper Division, or drop out of the University with something definite and helpful as he begins his adult life as a citizen. The purposes of the General College are:

- To offer an opportunity for general education and to provide the guidance needed by all students.
- 2. To broaden the base of education for students who are preparing for advanced study in the colleges and professional schools of the Upper Division.
- To satisfy the needs of those who have only a limited time to give to college training, and consequently should concern themselves with general viewpoints and major understandings.
- 4. To provide for the constant adjustments required in higher general education incident to the changing conditions of modern life.

#### NOTICE TO PUBLIC SCHOOL TEACHERS

The comprehensive courses of the General College are of special significance and value to the public school teachers. Every teacher is invited to plan for one or more of these general courses.

# DEPARTMENTS OF INSTRUCTION

#### AND SCHEDULE OF COURSES

All classes, unless otherwise indicated, meet for one hour and twenty minutes. In the first term classes scheduled to meet daily meet Monday through Friday; in the second term such classes meet Monday through Saturday. Hours indicated are A.M. unless otherwise noted. Descriptions of courses given the first term are not repeated if those courses are listed for the second term.

Some courses are indicated as being offered by the seminar method. Students taking these courses will do independent work under the supervision of the instructor, with no regular class meetings unless time of meeting is listed in the schedule.

#### GENERAL COLLEGE COURSES

Comprehensive examinations for General College students in C-1, C-2, C-3, and C-6 will not be given until the end of the second term and will cover the work of both terms. Credits are indicated for the benefit of Upper Division students who elect these courses.

#### First Term

C-11.—Man and the Social World. 4 credits. (Designated as C-1a, 1937.) Lecture Section 1: 8:30 M. W. F. S-211. STAFF.

Discussion Sections: 10 8:30 T. Th. and 2:30 W. L-201. MATHERLY,

11 8:30 T. Th. and 2:30 W. P-101. DAUER.

12 8:30 T. Th. and 2:30 W. P-4. CARLETON.

13 8:30 T. Th. and 2:30 W. P-1. LAIRD.

4 8:30 T. Th. and 2:30 W. P-11. WOODWARD.

Designed to develop and stimulate the ability to interpret the interrelated problems of the modern social world. The unequal rates of change in economic life, in government, in education, in science, and in religion are analyzed and interpreted to show the need for a more effective coordination of the factors of our evolving social organization of today. Careful scrutiny is made of the changing functions of social organizations as joint interdependent activities so that a consciousness of the significant relationships between the individual and social institutions may be developed, from which consciousness a greater degree of social adjustment may be achieved.

CEs. 13.—Economic Foundations of Modern Life (See Business Administration).

CHy. 13.—History of the Modern World (See History).

CPl. 13.—Political Foundations of Modern Life (See Political Science).

CSy. 13.—Sociological Foundations of Modern Life (See Sociology).

CBs. 14.—Elementary Accounting (See Business Administration).

CEs. 15.—Elementary Statistics (See Business Administration).

C-21.—Man and the Physical World. 4 credits. (Designated as C-2a, 1937.) Lecture Section 1: 7 T. Th. and 1 W. B-203. KUSNER.

Discussion Sections: 10 7:00 M. W. F. and 7:30 P.M. Th. B-205. KNOWLES.

11 7:00 M. W. F. and 7:30 P.M. Th. B-201. KUSNER.

12 8:30 T. Th. F. and 7:30 P.M. T. B-205. KUSNER.

3 11:30 T. Th. F. and 7:30 P.M. T. B-201. KNOWLES.

An attempt to survey the phenomena of the physical universe with particular reference to man's immediate environment; to show how these phenomena are investigated; to explain the more important principles and relations which have been found to aid in the understanding of them; and to review the present status of man's dependence upon and ability to utilize physical materials, forces, and relations. The concepts are taken mainly from the fields of physics, chemistry, astronomy, geology, and geography, and they are so integrated as to demonstrate their essential unity. The practical and cultural significance of the physical sciences is emphasized.

CMs. 23.—Basic Mathematics (See Mathematics).

C-31.—Reading, Speaking and Writing. 4 credits. (Designated as C-3a, 1937.) Lecture Section 1: 7-8 M. W. F. A-106.

Discussion Sections: 10 8:30-9:35 Daily. L-10. MORRIS.

11 10:00-11:05 Daily. L-307. CONGLETON.

12 11:30-12:35 Daily. L-307. MORRIS.

13 1:00- 2:05 Daily. L-210. CONGLETON.

Writing Laboratory: 101 8:30 M. W. F. L-209. CONGLETON, LEE.

102 10:00 M. W. F. L-209. MORRIS, A. A. MURPHREE.

103 2:30 M. W. F. L-209. A. A. MURPHREE, LEE.

Designed to furnish the training in reading, speaking, and writing necessary for the student's work in college and for his life thereafter. This training will be provided through practice and counsel in oral reading, in silent reading, in logical thinking, in fundamentals of form and style, in extension of vocabulary, and in control of the body and voice in speaking. Students will be encouraged to read widely as a means of broadening their interests and increasing their appreciation of literature.

CEh. 33.—Effective Writing. 4 credits. (Designated as C-3D, 1937.) 10 daily. L-203. SKAGGS. (Conference to be arranged.) Prerequisite: C-3, or permission of C-3 Course Chairman. Open to Upper Division students.

Designed to aid the student to present his ideas in writing which is not only accurate and clear but pleasing and attractive to the reader. Students are encouraged to do creative work.

CFh. 33.—Reading of French (See French).

CSh. 33.—Reading of Spanish (See Spanish).

CSc. 33.—Effective Speaking (See Speech).

C-42.—General Mathematics. 3 credits. (Designated as C-4B, 1937.) 10 daily. P-102. KOKOMOOR.

Designed to acquaint the student with the general nature of mathematics, the manner in which the mathematical mode of thought is used in the world of today, and the role it has occupied in the development of that world. A survey of some of the fundamental principles and methods of procedure in the main branches of elementary mathematics, with considerable attention being given to the utilization and cultural importance of the subject and its relations to other branches of knowledge.

C-51.—The Humanities. 4 credits. (Designated as C-5a, 1937.)

Lecture Section 1: 7-8 M. W. F. and 1-2 T. Th. Auditorium. STAFF.

Discussion Sections: 10 8:30 M. W. F. A-104. MILLIGAN.

11 10:00 M. W. F. A-104. MILLIGAN.

An attempt is made to help the student lay a broad foundation for cultured living. While it is possible to provide an adequate survey of the broad field, immediate help is given in attaining desirable understandings, attitudes, and dispositions. Students react every day to all culture; material is therefore presented from this and past civilizations to condition this reaction. Even though culture is thought of as timeless, ageless, and not belonging to any particular nation or people, the course concerns itself largely with the culture of the Western World.

C-61.—Man and the Biological World. 4 credits. (Designated as C-6a, 1937.) Lecture Sections: 1 7 M. T. Th. F. S-101. BYERS.

2 10 T. W. Th. F. S-101. BYERS.

\*3 10 T. W. Th. F. S-211. WALLACE.

<sup>\*</sup>To be provided if necessary for large enrollment.

Discussion Sections: 10 11:30 T. Th. S-101. HOBBS.

11 2:30 T. Th. S-101. WALLACE.

20 8:30 M. W. S-101. Hobbs.

21 2:30 M. W. S-101. Hobbs.

Designed to give the student a general knowledge and appreciation of the world of living things. The biological problems and principles that are associated with the organism's role as:
(1) a living individual, (2) a member of the race, (3) a product of evolutionary processes, and (4) a member of a socially and economically interrelated complex of living organisms, supplies the main sequence and material of the course. Especial attention is given to man's place in the organic world and to human qualities that have a biological basis.

#### Second Term

C-12.—Man and the Social World. 4 credits. (Designated as C-1b, 1937.) Lecture Section 1: 8:30 M. W. F. S-211. STAFF.

Discussion Sections: 10 8:30 T. Th. S. and 2:30 Th. L-201. ATWOOD.

11 8:30 T. Th. S. and 2:30 Th. L-314. EUTSLER.

12 8:30 T. Th. S. and 2:30 Th. L-311. WOODWARD.

CEs. 13.—Economic Foundations of Modern Life (See Business Administration).

CHy. 13.—History of the Modern World (See History),

CPl. 13.—Political Foundations of Modern Life (See Political Science).

CSy. 13.—Sociological Foundations of Modern Life (See Sociology).

CBs. 14.—Elementary Accounting (See Business Administration).

CEs. 15.—Elementary Statistics (See Business Administration).

C-22.—Man and the Physical World. 4 credits. (Designated as C-2b, 1937.) Lecture Section I: 7 T. Th. S. B-203. STAFF.

13 11:30 T. Th. S. and 7:30 P.M. T. B-201. KNOWLES.

CMs. 24.—Basic Mathematics (See Mathematics).

C-32.—Reading, Speaking and Writing. 4 credits. (Designated as C-3b, 1937.) Lecture Section I: 7-8 M. W. F. A-106. STAFF.

Discussion Sections: 10 8:30-9:30 Daily, L-10. MORRIS.

11 10:00-11:30 Daily. L-307. CONGLETON.

12 11:30-12:30 Daily. L-307. MORRIS.

Writing Laboratory: 101 10:00 M. W. F. L-209. MORRIS, CONNER.

102 2:30 M. W. F. L-209. CONGLETON, CONNER.

CEh. 34.—Reading for Leisure. 4 credits. (Designated as C-3E, 1937.) 10 daily. L-203. SKAGGS. (Conference to be arranged.) Prerequisite: C-3 or permission of C-3 Course Chairman. Open to Upper Division Students.

Designed to aid the student in planning for himself a well-rounded leisure-reading program, which will serve to keep him abreast of the best in contemporary thought and literature.

CFh. 34.—Reading of French (See French).

CSh. 34.—Reading of Spanish (See Spanish).

CSc. 33.—Effective Speaking (See Speech).

C-41.—Man and His Thinking. 3 credits. (Designated as C-4A, 1937.) 10 daily. L-201. LITTLE.

Both in private life and in vocational life man is faced with the necessity of making decisions and of solving problems. The principal aims are: (1) to develop ability to think with greater accuracy and thoroughness, and (2) to develop ability to evaluate the thinking of others. The material used applies to actual living and working conditions. The case method is used to insure practice, and numerous exercises are assigned.

C-52.—The Humanities. (Designated as C-5b, 1937.)

Lecture Section I: 7-8 M. W. F. and 1-2 T. Th. Auditorium. STAFF.

Discussion Sections: 10 8:30 M. T. W. F. A-104. MURPHREE.

11 10:00 M. T. W. F. A-104. MURPHREE.

C-62.—Man and the Biological World. 4 credits. (Designated as C-6b, 1937.)

Lecture Sections: 1 7 M. T. Th. F. S. S-101. BYERS.

2 10 T. W. Th. F. S. S-101. BYERS.

\*3 10 T. W. Th. F. S. S-211. WALLACE.

Discussion Sections: 10 11:30 T. Th. S-101. HOBBS.

11 2:30 T. Th. S-101. WALLACE.

20 8:30 M. W. S-101. Hobbs.

21 2:30 M. W. S-101. Hobbs.

#### AGRICULTURAL ECONOMICS

#### Second Term

As. 306.—Farm Management. 8:30 daily. H-215. (One extra period to be arranged.) 3 credits. REITZ.

The factors of production; systems of farming; their distribution and adaptation; problems of labor, machinery, layout of farms and rotation systems.

As. 413.—Agricultural Policy. 3 hours daily lecture. 3 hours daily laboratory or special work. H-215. 3 credits. First two weeks of second term. REITZ.

Special course designed primarily for Smith-Hughes students although open to regular students. A review of agricultural policy and legislation affecting the welfare of agriculture from the World War to date with special emphasis upon the operation of the 1938 agricultural program, and how it affects the agricultural industry and the individual farmer's program of management.

#### ANIMAL HUSBANDRY

#### First Term

Al. 312.—Feeds and Feeding. 11:30 daily. A-205. 3 credits. O. W. ANDERSON.

Composition of plants and animals; digestion, absorption and assimilation of food nutrients; feeding standards and rations for farm animals.

# BIOLOGY

#### First Term

Bly. 61.—Laboratory Exercises in Animal Biology to Supplement C-6. 1-5 daily. S-10. 3 credits. SHERMAN.

Elective for students who are taking or have taken C-6 in the General College. Satisfactory completion of Bly. 61 together with a final standing in the upper half of C-6 will be accepted as satisfactory prerequisite for second year courses in Biology.

<sup>\*</sup>To be provided if necessary for large enrollment.

\*Bly. 204.—Comparative Anatomy of Vertebrates. 7 M. T. W. Th. S-111. Laboratory 1-5 M. T. W. Th. S-104. 4 credits. SHERMAN. Prerequisite: C-6L or Bly. 101.

The morphology and classification of chordate animals.

\*Bly. 210.—Vertebrate Embryology. 7 M. T. W. Th. S-111. Laboratory 1-5 M. T. W. Th. S-104. 4 credits. Sherman. Prerequisite: Bly. 204.

The principles of general embryology, early development of chordate animals, and the special development of vertebrates.

Bly. 411.—Individual Problems in Animal Biology. To be arranged. 2, 3 or 4 credits. SHERMAN, BYERS or WALLACE. Prerequisite: Consent of the instructor.

Qualified students may choose a topic or problem for study. Possible topics or problems: the morphology, development, or life history of a selected animal; the taxonomy of an approved natural group of animals; the fauna of a local animal habitat; natural history of a vertebrate or invertebrate group.

#### BOTANY

#### First Term

Bty. 101.—General Botany. 7 M. T. Th. F. S-201. Laboratory 1-3:30 M. T. W. Th. S-1. 4 credits. CODY.

Structure and life histories of important algae, fungi, mosses and ferns. Holman and Robbins, Textbook of General Botany (3rd Ed.).

Bty. 102.—General Botany. 8:30 M. T. W. Th. S-111. Laboratory 3:45-6 M. T. W. Th. S-1. 4 credits, CODY.

Structure and environment of higher plants and principles of their identification. Holman and Robbins, Textbook of General Botany (3rd Ed.).

Bty. 308.—Taxonomy. 11:30 M. T. W. Th. Laboratory 10-11:30 and 1-5 F. S-1. 4 credits. CODY.

Methods and practice of identifying flowering plants and ferns of Gainesville region. Gray's New Manual of Botany (7th Ed.). Short field excursions for study and identification of plants included as part of laboratory practice.

#### BUSINESS ADMINISTRATION AND ECONOMICS

Note: All courses designated by the letters Es. are Economics courses.

#### First Term

CEs-131.—Economic Foundations of Modern Life. 10 daily. L-201. 3 credits.\*\* (Designated as C-1Da, 1937.) MATHERLY. Prerequisite: C-1.

Emphasis on the functioning of the economic system. Economic organization and institutions as parts of the economic order in their functional capacities. The understanding of economic principles and processes, especially those relating to value, price, cost, rent, wages, profits, and interest, insofar as such knowledge is necessary in understanding the economic situation of the present day. The evaluation of economic forces and processes in terms of their contribution to social well being. Prerequisite for advanced standing in Economics and Business Administration.

CBs-141.—Elementary Accounting. 8:30 daily. S-202. 3 credits.\*\* COGBURN. (Designated as C-1Ka, 1937.)

Designed to provide the basic training in accounting.

<sup>\*</sup>Only one of these courses will be given, contingent upon which has the greater demand.

<sup>\*\*</sup>This course is a unit. To complete it both terms of the summer session are required. Students may not take the second term without having had the first term. When the course is completed in the summer session by students in the Upper Division they may secure six semester hours credit.

CEs-15.—Elementary Statistics. 11:30 daily. L-10. 3 credits. (Designated as C-1J, 1937.) M. D. ANDERSON.

The statistical method as a tool for examining and interpreting data; acquaintance with such fundamental techniques as find application in business, economics, biology, agriculture, psychology, sociology, etc.; basic preparation for more extensive work in the field of statistics. Prerequisite for advanced standing in Economics and Business Administration.

Bs. 311.—Principles of Accounting. 7 daily. S-202. 3 credits. COGBURN. Prerequisite: CBs-14.

Lectures, discussions, and problems. A study of principles underlying the preparation of financial statements; brief consideration of the problems of valuation; analysis and interpretation of financial statements; internal check; financial budgets; and other accounting problems of interest to management.

Bs. 313.—Cost Accounting. Seminar Method. 3 credits. COGBURN. Prerequisite: Bs. 311.

A study of the methods of collection, classification, and interpretation of cost date; special problems, standard costs, cost systems, uses of cost date in business control. Lectures and problems.

Es. 321.—Financial Organization of Society. 8:30 daily. P-206. 3 credits. DOLBEARE.

An introduction to the field of finance; a study of the institutions providing monetary, banking and other financial services; interrelationships and interdependence of financial institutions; central banking; government control of finance; significance of financial organization to the economic system as a whole.

Es. 322.—Financial Organization of Society. Seminar method. 3 credits. DOLBEARE. Prerequisite: Bs. 321.

An introduction to the field of finance: a study of the institutions providing monetary, banking and other financial services; interrelationships and interdependence of financial institutions; central banking; government control of finance; significance of financial organization to the economic system as a whole.

Es. 327.—Public Finance. 7 daily. L-314. 3 credits. CAMPBELL.

Principles governing expenditures of modern government; sources of revenue; public credit; principles and methods of taxation and of financial administration as revealed in the fiscal systems of leading countries.

Es. 351.—Transportation Principles. 10 daily. P-208. 3 credits. BIGHAM.

The economics of transportation, including railroads, inland waterways, highways, airways, and pipe lines, specifically with reference to the development of facilities and service; contribution to social welfare; economic characteristics; regulation; rate principles and structures; valuation and fair return; discrimination; service; coordination.

Es. 407.—Economic Principles and Problems. 8:30 daily. P-208. 3 credits. BIGHAM.

An advanced course in economic theory with special emphasis on the causes of economic maladjustments arising from the operation of economic forces.

Bs. 422.—Investments. 11:30 daily. P-206. 3 credits. DOLBEARE. Prerequisite: Es. 321-322.

The nature of investments; investment policies and types of securities; analysis of securities; the mechanics and mathematics of security purchases; factors influencing general movements of security prices.

Bs. 423.—Commercial Banking. Seminar method. 3 credits. DOLBEARE. Prerequisite: Es. 321-322.

Banking policies, practices, and problems; the relations of the individual bank with other banks, the money market, and other classes of financial institutions.

Bs. 443.—Foreign Trade. 10 daily. L-314. 3 credits. CAMPBELL.

Methods of selling, shipping, and financing foreign sales; tariffs, commercial laws, and trade practices in foreign countries; business problems encountered by United States exporters and importers.

- Bs. 444.—Ocean Transportation. Seminar method. 3 credits. CAMPBELL. Problems in ocean transportation: types of ocean carriers; ocean routes; ocean ports; services of ocean freight carriers; ship brokerage and freight brokerage; passenger carriers; steamship combinations and conferences; ocean freight rate-making; vessel and cargo documents; regulation of shipping; government aid to shipbuilding and operation; shipping of Florida ports.
- Es. 454.—Principles of Public Utility Economics. Seminar method. 3 credits. BIGHAM.

The nature, place and development of public service corporations; types of public control, valuation and rate making; regulation of service, accounts, reports, and securities; combinations; public relations; public ownership.

Es. 467.—Economic History. Seminar method. 3 credits. ANDERSON.

A study of the development of the present economic order and its institutions. Variant forms of economic life are surveyed with emphasis placed on capitalism and its culture. Some of the problems that have arisen as a result of capitalistic economy are analysed.

Es. 469.—Business Forecasting. Seminar method. 3 credits. ANDERSON.
A survey of the problem of the reduction of business risk by forecasting general business conditions; statistical methods used by leading commercial agencies in forecasting.

Es. 470.—Business Forecasting, Continued. Seminar method. 3 credits. ANDERSON.

Techniques employed to forecast the production and price of specific commodities; intensive examination of the more important contributions to the subject in scientific journals during recent years.

#### Second Term

- CEs-132.—Economic Foundations of Modern Life. 10 daily. S-208. 3 credits.\* (Designated as C-1Db, 1937.) MCFERRIN. Prerequisite: C-1.
- CBs-142.—Elementary Accounting. 8:30 daily. S-202. 3 credits.\* COG-BURN. (Designated as C-1Kb, 1937.)
  - Bs. 312.—Accounting Principles. 7 daily. S-202. 3 credits. COGBURN.

A continuation of Bs. 311. An intensive and critical study of the valuation of balance sheet items and problems incident thereto; tangible and intangible assets, funds, reserves, capital and capital stock, dividends, and other problems.

Es. 335.—Economics of Marketing. 11:30 daily. L-204. 3 credits. EUTSLER.

The nature of exchange and the economic principles underlying trade, with particular attention given to interregional trade. The significance of comparative costs, comparative advantages, and comparative disadvantages. The institutions and methods developed by society for carrying on trading operations; retail and wholesale agencies; elements of marketing efficiency; the cost of marketing; price maintenance; unfair competition; the relation of the government to marketing.

Es. 381.—Economic Geography of North America. 7 daily. L-204. 3 credits. DIETTRICH.

The principal economic activities in each of the major regions of North America, involving analysis of these activities from the standpoint of their relation to the natural environment.

Bs. 401.—Business Law. 10 daily. P-208. 3 credits. HURST.

Contracts and agency; rights and obligations of the agent, principal, and third party; termination of the relationship of agency. Conveyances and mortgages of real property; sales and mortgages of personal property; the law of negotiable instruments; partnership.

Bs. 402.—Business Law, Continued. 7 daily. P-208. 3 credits. HURST.

<sup>\*</sup>This course is a unit. To complete it both terms of the summer session are required. Students may not take the second term without having had the first term. When the course is completed in the summer session by students in the Upper Division they may secure six semester hours credit.

Es. 404.—Government Control of Business. Seminar method. 3 credits. HURST.

A study of the control between government and business; history, theory, purposes, extent, policy and legality of government control, services and agencies which modern governments undertake to provide for business enterprises.

Es. 408.—Economic Principles and Problems. 8:30 daily. S-206. 3 credits. McFerrin.

An advanced course in economic theory with special emphasis on the causes of economic maladjustments arising from the operation of economic forces.

Bs. 414.—Income Tax Procedure. Seminar method. 3 credits, COGBURN. Prerequisite: Bs. 311.

A study of the Federal Income Tax Law and Regulations, and related accounting problems; preparation of tax returns for individuals, corporations and fiduciaries.

Bs. 426.—Banking Systems. Seminar method. 3 credits. McFerrin. Prerequisite: Es. 321-322.

An analytical history of the evolution of the banking system of the United States, and a critical study of the banking systems of Canada, England, France, Germany, etc.

Es, 446.—The Economics of Consumption. Seminar method. 3 credits. EUTSLER.

An economic analysis of the problems involved in determining the extent and trends of consumer demand and in the adjustments of productive processes to that demand.

Es. 463.—Problems in Social Security. Seminar method, 3 credits, EUTSLER.

An analysis of the meaning and nature of social security, especially as related to economic security; the distinctions between social and private insurance; the hazards of low income groups; an evaluation of projects and methods for eliminating, reducing, or indemnifying these hazards; the problems of social security in the United States, especially concerning experiences with relief measures, the development of legislation, the problems of financing and administering security programs, and the relationship between economic planning and security.

Es. 468.—Economic History in the Making. Seminar method. 3 credits. DIETTRICH.

The era of industrialism; contemporary economic organization in the leading European countries; types of economic reform; capitalism, socialism, communism, fascism; special consideration of current social and economic problems in England, France, Germany, Soviet Russia, and the United States.

Es. 487.—Economic Geography of Europe. 10 daily. L-204. 3 credits. DIETTRICH.

A study of human relationships to natural environment as presented in the economic adjustments in Europe and in its commercial connections with the other continents, especially with North America.

#### CHEMISTRY

#### First Term

Cy. 101.—General Chemistry, 10 daily, C-212, Laboratory 1-5 M, W. C-230, 4 credits, LEIGH.

Fundamental laws and theories of chemistry, and preparation and properties of the common non-metallic elements and their compounds.

Cy. 201.—Qualitative Analysis. 10 M. T. W. F. C-110. Laboratory 1-5 M. T. W. F. C-230. 4 credits, BEISLER.

Theoretical principles and laboratory technique involved in the qualitative detection of the common metals and acid radicals,

\*Cy. 262.—Organic Chemistry. 8:30 daily. C-212. Laboratory 1-5 M. T. W. F. C-230. 5 credits. LEIGH and BEISLER.

The more important aliphatic and aromatic compounds, chiefly for students in applied biological fields. Suitable for premedical students who desire only five hours of organic chemistry.

\*Cy. 301.—Organic Chemistry. 8:30 daily. C-212. Laboratory 1-5 M. W. C-230. 4 credits. LEIGH.

Preparation and properties of the various aliphatic compounds.

\*\*Cy. 504.—Inorganic Preparations. To be arranged. 3 credits. BEISLER.

\*\*Cy. 512.—Applications of Physical Chemistry. To be arranged. 3 credits. BEISLER.

A study of ideal and real gases, conductance, reaction rates, equilibrium and distillation.

\*\*Cy. 583.—Distillation. To be arranged. 3 credits. BEISLER. Theory and practice of distillation processes.

Cy. 601.—Chemical Research. No credit. LEIGH and BEISLER.

#### Second Term

Cy. 102.—General Chemistry. 10 daily. C-212. Laboratory 1-4 M. W. F. C-114. 4 credits. POLLARD.

Metallic elements and their compounds.

\*Cy. 202.—Quantitative Analysis. 10 M. T. W. F. C-110. Laboratory 1-5 M. T. W., 1-4 Th. F. C-230. 4 credits. MASON.

Theoretical principles and laboratory technique involved in the quantitative determination of the common metals and acid radicals.

\*Cy. 401.—Physical Chemistry. 10 daily. C-110. Laboratory 1-4 M. W. F. C-204. 4 credits. MASON.

Matter in the three states, elementary thermodynamics, solutions, etc.

\*\*Cy. 505.—Organic Nitrogen Compounds. To be arranged. 3 credits. POL-LARD.

Special lectures and collateral reading relative to the electronic and other theoretical conceptions of organic compounds containing nitrogen. Explosives, pseudo-acids, certain dyes, alkaloids, proteins, etc.

\*\*Cy. 506.—Special Chapters in Organic Chemistry. To be arranged. 3 credits. POLLARD.

Lectures and collateral reading. In general, topics to be studied will be chosen from the following list: stereochemistry, tautomerism, aceto-acetic ester syntheses, malonic ester syntheses, the Grignard reaction, benzene theories, diazo compounds, and indicators.

\*\*Cy. 508.—Synthesis and Structure of Organic Compounds. To be arranged. 3 credits. POLLARD,

Study of fundamental reactions for synthesizing organic compounds and proving their structure.

\*Cy. 510.—The Phase Rule. To be arranged. 3 credits. MASON.

A study of the applications of the phase rule to heterogeneous equilibria.

Cy. 601.—Chemical Research. No credit. MASON and POLLARD.

<sup>\*</sup>Only one of these courses will be offered each term, contingent upon which has the greatest demand.

<sup>\*\*</sup>Only one of these courses will be offered each term, contingent upon which has the greatest demand.

#### CIVIL ENGINEERING

#### Second Term

Cl. 229.—Higher Surveying. 7-8 M. W. F. B-104. Laboratory, B-104: 8-12 and 1-5 M. W. F., 7-12 and 1-5 T. Th., 7-11 S. 6 credits. SAWYER. Prerequisite: Cl. 226.

Field astronomy and hydrographic surveying. Field work: the making of a complete topographical survey; tests and adjustments of instruments; precise leveling; base line work; determination of time, latitude, and azimuth; triangulation and traverse; hydrographic surveying and stream gauging. Drawing room work on balancing surveys, reducing field notes, map drawing, triangulation, and computations. Students registering for this course may not register for any other course.

#### ECONOMICS

Courses in Economics are scheduled under Business Administration and are marked Es.

#### BUSINESS EDUCATION

Note: The professionalized subject matter courses in shorthand and typewriting are open only to students preparing to be commercial teachers. They are not counted as electives in Education. No one will be permitted to audit these courses.

#### First Term

En. 81.—Elementary Typewriting. 1 credit.

Section 1. 8:30 M. W. Th. F. Y-241. BENSON.

Section 2. 2:30 T. W. Th. F. Y-241. BENSON.

Introduction to touch typewriting. For those who have had no instruction in typewriting. No other course in typewriting can be taken simultaneously.

En. 83.—Advanced Typewriting. 7 daily and practice to be arranged individually. Y-241. 2 credits. BENSON.

Skill development, drills, and application of typewriting to such office projects as business letters and papers. Minimum skill for credit: 35 net words per minute with 98% accuracy. Prerequisite: En. 82.

En. 91.—Elementary Shorthand. 10 M. W. F. Y-236. 1 credit. BENSON. Gregg shorthand principles and skill introduced by the Functional Method.

En. 93.—Advanced Shorthand. 11:30 daily. Y-236. 2 credits. BENSON.

Review of shorthand principles and drills to develop shorthand skill. Minimum skill for credit: dictation rate of 60 words per minute. Prerequisite: En. 92. Corequisite: En. 83.

#### Second Term

En. 82.—Elementary Typewriting, Continued. 8:30 M. T. W. Th. F. Y-241. 1 credit. BENSON.

Development of skill and applications of typewriting to personal problems. Minimum skill for credit: 25 net words per minute with 98% accuracy. Prerequisite: En. 81.

En. 84.—Advanced Typewriting, Continued. 7 daily and practice to be arranged individually. Y-241. 2 credits. BENSON.

Development of skill in shorthand transcription upon the typewriter; methods of teaching typewriting. Minimum typewriting skill for credit: 40 net words per minute with 99% accuracy. Prerequisite: En. 83.

En. 92.—Elementary Shorthand, Continued. 10 M. W. Th. S. Y-236. 1 credit. BENSON.

Minimum skill for credit: dictation rate of 50 words per minute with 95% accuracy on transcription. Prerequisite: En. 91.

En. 94.—Advanced Shorthand, Continued. 11:30 daily. Y-236. 2 credits. BENSON.

Dictation speed building. Minimum skill for credit: dictation of 70 words per minute. Pre-requisite: En. 93. Corequisite: En. 84.

#### **EDUCATION**

#### First Term

CEn. 13.—Introduction to Education. 7 daily. S-205. 3 credits. PAUSTIAN.

An attempt is made to foreshadow the field of Education so that the student may see the whole field before he studies its detailed and technical parts.

En. 121.—Language Arts Teaching in the Elementary School. 11:30 M. T. W. Th. B-208. 2 credits. BARRY.

The teaching of written and spoken expression in the light of experimental findings and modern practice.

En. 122.—The Techniques of Teaching Reading. B-209. 3 credits.

Section 1. 10:00 daily. PEELER.

Section 2. 11:30 daily. PEELER.

Designed primarily to help teachers with reading instruction in the first three grades. The mechanics of reading will be explained. The methods of approach to reading, remedial measures, types of materials and methods of evaluation will be treated.

En. 124.—Mathematics Teaching in the Elementary Grades. 10 M. T. W. Th. B-208. 2 credits. TRUITT.

A study of the techniques of teaching those aspects of arithmetic which require more or less formal study and practice beyond the integrated program.

En. 201.—The Teaching of Social Sciences in the Intermediate Grades. 7. M. T. Th. F. L-10. 2 credits. BARRY.

A course in methods of teaching geography, history, and civics from the standpoint of human relationships.

En. 207.—Educational Psychology. 3 credits.

Section 1. 7:00 daily. E-209. HAIT.

Section 2. 2:30 daily. E-202. HAYGOOD.

Psychology applied to Education, the learning process, acquisition of skill, etc.

En. 209.—The Teaching of Sciences in the First Six Grades. Y-142. 2 credits.

Section 1. 7:00 M. T. W. Th. TRUITT.

Section 2. 8:30 M. T. W. Th. TRUITT.

A study of the content of elementary science together with its organization for use both in the integrated program and in the departmentalized school.

En. 221.—Remedial and Directed Reading. S-208. 3 credits. CRABTREE.

Section 1. 8:30 daily.

Section 2. 10:00 daily.

Designed primarily for intermediate grade teachers. A study of the techniques of remedial teaching of those pupils who have found their way into the intermediate grades without the reading adaptation. Work in directed reading for intermediate grade pupils will be outlined and discussed.

En. 253.—Observation of Teaching. Y-134. 4 credits. KING and STAFF.

Section 1. 2:30 daily and one hour between 9 and 12.

Section 2. 4:00 daily and one hour between 9 and 12.

Designed for students who desire to study the actual process of teaching an elementary class.

En. 305.—Development and Organization of Education. 11:30 daily. E-202. 3 credits. CULPEPPER.

An attempt to interpret and evaluate present-day education, and to point out possible developments.

En. 308.—The Elementary School Curriculum. 3 credits.

Section 1. 7 daily. E-211. LILLIAN STEVENS.

Section 2. 10 daily. L-10. LILLIAN STEVENS.

A laboratory course in which the construction and continuity of activity units, utilizing the projects, will be studied. Each student will be expected to organize materials about activities appropriate to his particular needs.

En. 313.—The Integrated Program in the Secondary School. 8:30 daily. E-209. 3 credits. BOUTELLE.

En. 317.—Tests and Measurements. 10 daily. E-209. 3 credits. HAIT.

An elementary course to aid the teacher in the use of tests in improvement of instruction and solution of school problems. One hour of laboratory work per week is required.

En. 319.—Child and Adolescent Psychology. 8:30 daily. S-205. 3 credits. PAUSTIAN.

The nature and development of the child from birth to adolescence with reference to Education.

En. 323.—General Methods in the Secondary School. 7 daily. E-202. 3 credits. HOWARD. Prerequisite: En. 207. Corequisite: En. 319.

Current conceptions of secondary school procedures.

En. 340.—High School Reading. 11:30 daily. E-209. 3 credits. BOUTELLE. Improvement of reading in junior and senior high schools.

En. 401.—Administration and Supervision of Village and Consolidated Schools. 8:30 daily. E-202. 3 credits. CULPEPPER.

Problems peculiar to schools in Florida; the supervising principal, qualifications, relation to superintendent, boards, teachers, pupils, patrons, and community; adapting the school to the child's needs; business practices.

En. 491.—Education and the Social Order. 10 M. T. W. Th. E-202. 2 credits. HAYGOOD.

An orientation into the relationship of society and Education. The school and its function will be studied in the light of social conditions and problems and of recent social trends. Some of the problems to be considered are propaganda and the schools; character education and business ethics; crime and the school.

En. 500.—An Introduction to Educational Research. 8:30 M. T. W. Th. S-201. 2 credits. NORMAN.

Designed primarily to help graduate students in Education in writing theses. Required of all students majoring in Education; open to all graduate students.

En. 501.—The Elementary School Curriculum, 8:30 daily. E-211. 3 credits. GRACE ADAMS STEVENS.

Intensive study of the development and present content of the elementary school curriculum, including the kindergarten; selection and evaluation of material.

En. 509.—Problems in the Administration of a School System. 7 daily. L-212. 3 credits. SIMMONS.

Problems selected to meet individual needs; each student selects some problem for special study and presents the results of his study in the form of a thesis.

En. 516.—Character and Personality Development. 11:30 daily. S-201. 3 credits. CRAGO.

A study of methods used in development of character and personality, together with an evaluation of them for use in public schools.

En. 518.—Special Problems in High School Organization and Administration. 8:30-11:30 daily. 1st three weeks. B-210. 3 credits. CAROTHERS.

This course will consist of an intensive study of specific problems in organizing and administering the modern high school. Special reference will be made to Florida.

En. 519.—High School Curriculum. 8:30-11:30 daily. 2nd three weeks. B-210. 3 credits. STONE.

Problems of the curriculum of the high school in its organization; standards for selection of the curriculum; factors to be considered—age of pupils, social standing, probable school life, probable vocation; traditional subjects and their possible variations; new subjects and their values, systems of organization, election, and prescription; problems of articulation with the elementary school, the college, the vocational school, and the community.

En. 532.—Guided Professional Development in Health and Physical Education. Hours to be arranged. Y-151. 3 credits. SALT. Prerequisite: Approval of the instructor.

Designed to give teachers, supervisors, and administrators a broad understanding of the field of health and physical education. The student and instructor will outline a program for professional development in keeping with the needs and interests of the student. Credit will depend upon evidence of professional growth on the part of the student in accord with his program.

En. 533.—Problems of Physical Education. Hours to be arranged. Y-151 3 credits. SALT. Prerequisite: Approval of the instructor.

Designed to give the student an understanding of the contemporary problems in physical education.

En. 562.—Guidance and Counseling, 2:30 daily, Y-150, 3 credits, GARRIS. Problems of guidance and personality adjustments for high school workers.

En. 581.—The Reorganization of Secondary School English. 8:30 M. T. Th. F. L-210. 2 credits. WISE.

A study of the objectives, methods and materials of secondary school English organized in the light of the findings of research and with a view to assisting pupils to make a satisfactory adjustment to a desirable social order.

En. 591.—Elementary Education. 10 daily. E-211. 3 credits. GRACE ADAMS STEVENS.

This course is required of students who are majoring in Elementary Education for the Master of Arts in Education degree. It is designed for those desiring to become master teachers and for principals of elementary schools. The course will deal primarily with the place and function of the elementary school in the total program of public education and with the programs of elementary education best adapted to meet the needs and challenges of the present and future.

En. 619.—Child Growth and Development. 10 daily. B-201. 3 credits. MEAD.

Graduate Seminar for Administrators. 4 M. W. F. P-102. No credit. CRAGO, SIMMONS and HOWARD.

Required of graduate students majoring in administration.

Graduate Seminar for Teachers. 4 M. W. F. P-112. No credit. MEAD.

Introduction to investigations, consideration of possible thesis problems, minor researches and actual thesis work. Primarily for teachers. Required.

# Second Term

CEn. 13.—Introduction to Education. 7 daily. P-1. 3 credits. PAUSTIAN. En. 121.—Language Arts Teaching in the Elementary School. 11:30 M. T. W. Th. P-206. 2 credits. CRABTREE.

The teaching of written and spoken expression in the light of experimental findings and modern practice,

En. 122.—The Techniques of Teaching Reading. 10 daily. P-206. 3 credits. Crabtree.

En. 124.—Mathematics Teaching in the Elementary Grades. 10 M. T. W. Th. S-205. 2 credits. Grace Adams Stevens.

En. 207.—Educational Psychology. 8:30 daily. L-212. 3 credits. WISE.

En. 209.—The Teaching of the Sciences in the First Six Grades. Y-142, 2 credits. GOETTE.

Section 1. 7:00 M. T. W. Th.

Section 2. 11:30 M. T. W. Th.

En. 221.—Remedial and Directed Reading. P-208. 3 credits. MELLISH.

Section 1. 8:30 daily.

Section 2. 11:30 daily.

En. 308.—The Elementary School Curriculum. 3 credits.

Section 1. 7:00 daily. P-206. KING.

Section 2. 8:30 daily. P-206. KING.

En. 317.—Tests and Measurements. 10 daily. E-209. 3 credits. HOWARD.

En. 318.—Audio-Visual Education. 2:30 M. T. Th. F. Y-142. 2 credits. GOETTE.

Designed to aid teachers and administrators in the use of the phonograph, radio, sound and silent films, prints, slides, and film slides.

En. 319.—Child and Adolescent Psychology. 8:30 daily. P-1. 3 credits. PAUSTIAN. Prerequisite: En. 207.

En. 323.—General Methods in the Secondary School. 7 daily. E-202. 3 credits. HAYGOOD. Prerequisites: En. 207 and En. 319.

En. 408.—High School Administration. 8:30 daily. E-202. 3 credits. SIAS. Prerequisites: En. 323 and one supervised teaching course.

Practical management and administration of the modern high school.

En. 492.—Educational Conceptions. 10 daily. E-202. 2 credits. HAYGOOD.

This course is designed to aid the student in clarifying and crystallizing his thinking about teaching-learning principles into broad educational conceptions on a significant and operative level. Among the concepts to be developed are the nature of experience; nature of growth; nature of subject matter,

En. 500.—An Introduction to Educational Research. 8:30 M. T. W. Th. S-201. credits. NORMAN.

En. 503.—Seminar in Educational Measurements. 11:30 daily. E-211. 3 credits. CRAGO. Prerequisite: En. 317, or permission of instructor.

Students will be guided in the investigation of educational problems involving measurements, diagnostic and remedial measures. This course is primarily for graduate students with experience in residence or in the field.

En. 504.—The School Survey. 8:30-11:30 daily. 1st two weeks. B-210. 2 credits. EDDY.

En. 507.—Seminar in Educational Psychology. 2:30 daily. S-202. 3 credits. WILSON.

Students will be guided in the investigation of problems in directed learning, individual differences, and adjustment of problem children. Primarily for graduate students with experience in residence or in the field.

En. 510.—The Foundations of Modern Education, 7 daily. L-210. 3 credits. W. W. LITTLE,

An attempt to evaluate present-day education by tracing its dominant factors—teacher, student, curriculum, and educational plant, control and support—back to their beginnings; and to point out present tendencies and possible developments.

En. 517.—Educational Statistics. 10 M. T. W. Th. S-202. 2 credits. WILSON. The purpose of the course is to acquaint students with statistical methods as applied to

Education. It is recommended that this course be taken before En. 503.

En. 521.—Business Administration of a School System. 8:30-11:30 daily. Last three weeks. B-210. 3 credits. CORNELL. Prerequisite: Wide administrative experience.

Problems concerned with the procuring and spending of revenue; a thesis on a special problem.

En. 542.—The Curriculum and the Educational Plant. 7 daily. E-211. 3 credits. SIAS.

Present status of curriculum and plant and their relation in all types of schools, viewed in the light of their historical development; a world view with emphasis on present tendencies in the United States.

En. 568.—Problems in Agricultural Education (Seminar: July 25 to August 13). 9-12 and 1-4 daily. Y-150. 3 credits. GARRIS.

Designed for agricultural teachers who are qualified to pursue advanced problems. Outlines for use in individualized study will be prepared, and advanced problems in methods of teaching considered.

En. 592.—Elementary Education. 11:30 daily. S-205. 3 credits. STEVENS. Continuation of En. 591.

Graduate Seminar for Administrators. 4 M. W. F. P-102. No credit. CRAGO, SIMMONS and HOWARD.

Required of graduate students majoring in administration.

Graduate Seminar for Teachers. 4 M. W. F. P-112. No credit. WISE.
Introduction to investigations, consideration of possible thesis problems, minor researches and actual thesis work. Primarily for teachers, Required.

#### **ENGLISH\***

#### First Term

CEh. 37.—English Literature to 1800. (Formerly Eh. 201.) 11 daily. L-201. 3 credits. Weihe.

A survey course. Stress is laid on the appreciation of representative writers.

CEh. 38.—English Literature from 1800 to 1900. (Formerly Eh. 202.) 7 daily. L-201. 3 credits. Weihe.

A continuation of CEh. 37.

CEh. 313.—Introduction to Literature. (Formerly Eh. 103.) 3 credits. Section 1. 10 daily. L-311. MOUNTS.

Section 2. 1 daily. L-203. A. A. MURPHREE.

An introduction to the masterpieces of the Western world from the beginnings of the Renaissance.

CEh. 314.—Introduction to Literature. (Formerly Eh. 104.) 1 daily. L-201. 3 credits. MOUNTS.

A continuation of CEh. 313.

Eh. 301.—Shakespeare, 8:30 daily. L-212. 3 credits. ROBERTSON. In this term Shakespeare's comedies and history plays are studied.

Eh. 305.—Introduction to the Study of the English Language. 10 daily. L-212. 3 credits. ELIASON.

The course has two objectives: (a) for the English teacher in secondary schools it provides an adequate minimum knowledge of modern English as it is taught today; (b) for the English major and beginning graduate student it serves as an introduction to further linguistic study.

<sup>\*</sup>Either term of these courses may be taken for credit, and the two terms of each course may be taken in reverse order.

Eh. 307.—English and Scottish Popular Ballads. 11:30 daily. L-210. 3 credits, HUDSON.

A study of English and Scottish popular ballads, with a brief survey of survivals in the United States.

Eh. 354.—Browning. 8:30 daily. L-311. 3 credits. FARRIS.

Intensive study of the poems of Browning.

Eh. 377.—The English Bible as Literature. 7 daily. L-203. 3 credits. SPIVEY.

A study of the Bible as a library of literary masterpieces.

Eh. 391.—Literature for Children. 11:30 daily. L-203. 3 credits. WISE. Designed to arouse and satisfy a genuine interest in children's books apart from school textbooks, to aid students to obtain a better working knowledge of this literature, and to make them more aware of degrees of excellence in content and form.

Eh. 401.—American Literature. 3 credits.

Section 1. 7:00 daily. L-311. FARRIS.

Section 2. 8:30 daily. L-203. SPIVEY.

A survey course. Stress is laid on the appreciation of representative writers.

Eh. 405.—English Drama. 11:30 daily. L-212. 3 credits. ROBERTSON. A study of the English drama from Dryden to Sheridan.

Eh. 443.—The English Romantic Period. 10 daily. L-210. 3 credits. HUDSON.

The earlier phases of the Romantic Period, with emphasis upon Burns, Blake, Coleridge, Wordsworth, and Scott.

Eh. 512.—Middle English. 7 daily. L-210. 3 credits. ELIASON.

A linguistic rather than literary course. Besides a study of the chief features of Middle English language (1100-1500), especially phonology and morphology, the course also includes a brief consideration of the history of the English language from Old English to the present.

#### Second Term

CEh. 38.—English Literature from 1600 to 1900. (Formerly Eh. 202.) 11:30 daily. L-201. 3 credits. CONGLETON.

A continuation of CEh. 37.

CEh. 314.—Introduction to Literature. (Formerly Eh. 104.) 10 daily. L-311. 3 credits. CALDWELL.

A continuation of CEh. 313.

Eh. 302.—Shakespeare. 8:30 daily. L-210. 3 credits. LYONS.

In this term the tragedies and later comedies are studied.

Eh. 308.—American Folksongs. 11:30 daily. L-210. 3 credits. HUDSON. Types of American folksongs, including English and Scottish pieces surviving in America.

Eh. 402.—American Literature. 7 daily. L-311. 3 credits. CONNER. A continuation of English 401.

Eh. 408.—Contemporary Poetry. 8:30 daily. L-203. 3 credits. RAWLINGS. Chief emphasis on Twentieth Century poets in England and America.

Eh. 409.—Chaucer. 10 daily. L-210. 3 credits. LYONS.

A thorough reading of the Canterbury Tales.

Eh. 414.—The Renaissance in England. 7 daily. L-212. 3 credits. CALD-WELL.

A study of sixteenth and seventeenth century English literature.

Eh. 427.—Imaginative Writing. 11:30 daily. L-203. 3 credits. RAWLINGS. Designed for students with marked ability in creative writing.

Eh. 444.—The English Romantic Period. 10 daily. L-212. 3 credits. HUDSON.

The latter phase of the Romantic Period-Byron, Shelley, Keats, and their contemporaries of the younger generation of romanticists,

#### FRENCH

#### First Term

\*CFh. 33.—Reading of French. 7 daily. Bu-201. 3 credits. (Designated as C-3Fa, 1937.) Brown.

A beginning course, basic for further study. The main objective is reading ability; grammar and pronunciation are subordinated. Reading of easy texts is begun at once.

\*CFh. 34.—Reading of French. 7 daily. Bu-201. 3 credits. (Designated as C-3Fb, 1937.) Brown.

A continuation of CFh. 33.

\*\*Fh. 101.—Second-Year French. 8:30 daily. Bu-201. 3 credits. BROWN. Prerequisite: CFh. 33-34, or the equivalent (one year of college French or two years of high school French).

Reading; oral and written practice.

- \*\*Fh. 102.—Second-Year French. 8:30 daily. Bu-201. 3 credits. BROWN. A continuation of Fh. 101.
- (Fh. 207.—Survey of French Literature (First Half). Not given in summer 1938.)
- †Fh. 208.—Survey of French Literature (Second Half). 7 daily. Bu-101. 3 credits. ATKIN. Prerequisite: Fh. 101-102 or permission of instructor.

A basic course in the historical development of French literature; reading of representative selections from important authors. The period covered is from the eighteenth century to the present.

†Fh. 420.—Contemporary French Civilization. 8:30 daily. Bu-101. 3 credits. ATKIN.

Land, people, institutions and culture of present-day France. Lectures, reading and reports. The course will be conducted in English, with reading in both French and English.

†Fh. 427.—French-English Word Study. 10 daily. Bu-101. 3 credits. ATKIN.

The meanings of French and English words having a similar written form in both languages—words imported into English from French and Latin, or into French from English. Comparison of such words shows how word meanings grow and are differentiated, and affords practical training in the discrimination of meanings. Should be useful to students and teachers of either language. Previous knowledge of Latin not necessary, though desirable. Lectures and individual word study assignments.

- †Fh. 509.—French Classicism. 8:30 daily. Bu-101. 3 credits. ATKIN. Reading and interpretation of representative seventeenth-century works.
- †Fh. 520.—Contemporary French Civilization. 7 daily. Bu-101. 3 credits. ATKIN.
  - †Fh. 527.—Anglo-French Word Study. 10 daily. Bu-101. 3 credits, ATKIN.

<sup>\*</sup>Only one of these courses will be given, contingent upon which has the greater demand.

<sup>\*\*</sup>Only one of these courses will be given, contingent upon which has the greater demand.

<sup>†</sup>Two of these courses will be given, depending upon the demand.

#### GEOGRAPHY

#### First Term.

Gpy. 385.—Principles of Human Geography. 10 daily. L-204. 3 credits. ATWOOD.

Basic principles underlying the study and teaching of modern geography in the elementary school; the earth as a planet; wind systems; seasons, elements of meteorology; weather and climate; land forms. How peoples have adjusted life and work to changing world environment. Correlations between geography and history are stressed. Opportunity given students who wish to carry on special studies relating to any specific part of the course.

Gpy. 387.—Principles of World Geography. 7 daily. L-204. 3 credits. ATWOOD.

Economic and cultural geography in its relations to the Social Studies. Basic principles underlying the study and teaching of modern geography from the world point of view, with special emphasis on the place and purpose of geography as a social science in junior and senior high school curricula. Special stress is given to the relations of geography to history and civics. This course may be used to satisfy the conservation certificate requirement.

NOTE: For other courses in geography see Business Administration.

#### GREEK

#### First Term

Gk. 21.—Beginners' Greek. 10 daily. L-111. 3 credits. ANDERSON.

Based on a book for beginners. Anabasis Book I with grammar and prose composition. Benner and Smyth, Beginner's Greek Book; Murray, Xenophon's Anabasis. (This course is scheduled for the same time as Latin 101. Only one of these courses will be given, depending largely on the demand.)

#### Second Term

Gk. 22.—Beginners' Greek. 10 daily. L-111. 3 credits. ANDERSON. Prerequisite: Gk. 21.

A continuation of Greek 21 with the same texts. (This course is scheduled for the same time as Latin 202. Only one of these courses will be given, depending largely on the demand.)

#### HANDWRITING

Note: A course in penmanship is required for a certificate in subjects of the Elementary School Course.

#### First Term

Hg. 101.-Handwriting. No credit.

Section 1. 8:30 daily. L-204. McClure.

Section 2. 4:00 daily. L-204. McClure.

Section 3. 7:00 P.M. daily. L-204. MCCLURE.

Students enrolling for this course will have opportunity not only to improve their own handwriting, but to learn by instruction and demonstration the correct presentation of handwriting in all grades of the elementary school. The value of measuring diagnostic and remedial teaching will be emphasized. The State-adopted text, Progressive Handwriting, will be used.

#### Second Term

Hg. 101.-Handwriting. No credit.

Section 1. 8:30 daily. L-204. McClure.

Section 2. 4:00 daily. L-204. McClure.

Section 3. 7:00 P.M. daily. L-204. MCCLURE.

#### HEALTH AND PHYSICAL EDUCATION

#### First Term

HPl. 222.—Tap Dance. 4 M. T. Th. Y-Gym. 1 credit. MORRELL. (Open to men and women.)

This course presents beginning tap and clog dance and will progress as fast as the ability of the class permits. The work is elementary in nature and no previous experience is necessary.

HPl. 261.—Football. 1 daily. Y-134. 3 credits. MCALLISTER. (Open only to men.)

A consideration of football from the viewpoint of the interscholastic soccer, presenting fundamentals in blocking, tackling, kicking, passing, individual position play, appropriate offensive formations and plays, and various defensive formations.

HPl. 263.—Basketball. 2:30 daily. Y-138. 3 credits. MCALLISTER. (Open only to men.)

Fundamentals of basketball for men; dealing with the techniques of shooting, passing, dribbling, stops, and guarding. A consideration of offensive team play, defensive team play, signals, scouting, team strategy, training, practice sessions, selection and placing of players, and other essentials of the modern court game.

HPl. 325.—The Secondary School Program of Physical Education. 7 daily. Y-150. 3 credits. SALT. (Open to men and women.)

A study of the Fall physical education program on the secondary school level. A consideration of skill drills, modified games, and team games, together with the appropriate procedure used in conducting a modern program.

HPl. 326.—The Secondary School Program of Physical Education. 8:30 daily. Y-150. 3 credits. SALT. (Open to men and women.)

A study of the Spring physical education program on the secondary school level. A consideration of skill drills, modified games, and team games; together with the appropriate procedure used in conducting a modern program.

HPl. 371.—The Physical Education Program for Grades One, Two, and Three. 1 daily. Y-142. 3 credits.

The program of physical education activities for the first three grades including small group games, large group games, mass games, directed play, and rhythms, together with a consideration of the procedure necessary to the conduct of a modern program.

HPl. 372.—The Physical Education Program for Grades Four, Five, and Six. 2:30 daily. Y-142. 3 credits.

The program of physical education activities for grades four, five, and six, including skill drills, modified games, small group games, large group games, mass games, and rhythms. The procedure used in conducting such a program will receive special emphasis.

#### HISTORY

#### First Term

CHy. 13.—History of the Modern World. 11:30 daily. P-1. 3 credits. WOODWARD. (Not open to students who have taken Hy. 201-202 or Hy. 319-320.)

The historical background of present day civilization is considered insofar as that background has been developed in the fabric of the historical movements since 1815. The political, economic, social, religious, artistic, and cultural aspects of the nineteenth and twentieth centuries are studied.

Hy. 302.—American History, 1776 to 1830. 8:30 daily. P-112. 3 credits. Leake.

Hy. 303.—American History, 1830 to 1876. 10 daily. P-112. 3 credits.

Hy. 312.—English History, 1815 to the Present. 7 daily. P-112. 3 credits. PAYNE.

Hy. 314.—Europe During the Middle Ages. (Formerly Hy. 102.) 11:30 daily. P-4. 3 credits. GLUNT.

The second half of the course on the history of Western Europe from 476 A.D. to the Renaissance and Reformation.

Hy. 316.—Latin American History to 1850. (Formerly Hy. 204.) 10 daily. P-4. 3 credits. GLUNT.

The discovery, settlement, and early development of Latin America to 1850.

Hy. 401.—Ancient Civilizations. 11:30 daily. P-112. 3 credits. PAYNE.

The first half of the course concerning the history of the Egyptian, Assyrian, Babylonian, Persian, Semitic, Hellenic, and Roman peoples.

Hy. 509.—Seminar. Hours to be arranged. 3 credits. LEAKE.

#### Second Term

CHy. 13.—History of the Modern World. 11:30 daily. P-1. 4 credits. WOOD-WARD. (Not open to students who have taken Hy. 201-202 or Hy. 319-320.)

Hy. 301.—American History, 1492-1776. 8:30 daily. P-112. 3 credits. LEAKE.

Hy. 304.—American History, 1876 to the Present. 10 daily. P-112. 3 credits. LEAKE.

Hy. 305.—English History, Early England to 1485. 7 daily. P-112. 3 credits. PAYNE.

Hy. 313.—Europe During the Middle Ages. (Formerly Hy. 101.) 11:30 daily. P-4. 3 credits. GLUNT.

The first half of the course on the history of Western Europe from 476 A.D. to the Renaissance and Reformation.

Hy. 315.—Latin American History, Period of Early Development. (Formerly Hy. 203.) 10 daily. P-4. 3 credits. GLUNT.

The discovery, settlement, and development of Latin America.

Hy. 402.—Ancient Civilizations. (Continuation of Hy. 401.) 11:30 daily. P-112. 3 credits. PAYNE.

Second half of the course on the history of the Egyptian, Assyrian, Babylonian, Persian, Semitic, Hellenic, and Roman peoples.

Hy. 510.—Seminar. To be arranged. 3 credits. LEAKE.

#### HORTICULTURE

#### First Term

**He. 412.—Deciduous Fruits.** 8:30 daily. (1 extra period to arrange.) A-206. 3 credits. FLOYD.

Varieties of persimmons, grapes, plums, peaches, pears, and other deciduous fruits; cultural methods, fertilization, and harvesting as adapted to Florida conditions.

He. 415.—Plant Materials. 10 M. W., 2:30 M. T. W. Th. A-206. 3 credits. FLOYD.

Trees, shrubs and herbaceous plants suited to Florida conditions; their characteristics; land-scape value and arrangement; field trips; planting plans.

He. 507.—Research Problems. Hours and credits to arrange. A-206. FLOYD.

#### Second Term

He. 310.—Pruning and Tree Surgery. 8:30 M. T. W. Th., 2:30 T. Th. A-206. 3 credits. FLOYD.

Principles of pruning and training; the physiological principles involved; practice in pruning and training fruit and ornamental plants.

He. 413.—Subtropical Fruits. 10 daily. (1 extra period to arrange.) A-206. 3 credits. FLOYD.

Study of the principal varieties, best cultural methods, and harvesting of the avocado, mango, guava, and other subtropical fruits grown in Florida.

He. 508.—Research Problems. Hours and credits to arrange. A-206. FLOYD.

#### INDUSTRIAL ARTS

(See also Public School Arts and Crafts)

#### Second Term

In. 212.—Industrial Arts General Shop. 8-10 daily. Y-Shop. 3 credits. BOHANNON.

Use of hand-tools and power-machines, with special emphasis on the speed-lathe; use, parts, and care of machines; shop equipment and construction. In addition to the development of manipulative skills, special emphasis is given to selecting projects, and writing the various types of instruction sheets.

In. 302.—General Shop. 10-12 daily. Y-Shop. 3 credits. Bohannon.

Units given in machine drawing, bench woodwork, advanced cabinet work, concrete work, sheet metal; in addition, several crafts activities presented.

#### LATIN

#### First Term

Ln. 101.—Ovid. 10 daily. L-111. 3 credits. ANDERSON. Prerequisite: A good high school course in Cicero or Virgil.

Selections from the various works of Ovid. Anderson, Selections from Ovid. (This course is scheduled for the same time as Greek 21. Only one of these courses will be given, depending largely on the demand.)

#### Second Term

Ln. 202.—Horace. 10 daily. L-111. 3 credits. ANDERSON. Prerequisite: Latin 101 or equivalent.

Selections from the satires, epistles, odes, and epodes, with a study of Horation metres. Bennett and Rolfe, *Horace's Complete Works*. (This course is scheduled for the same time as Greek 22. Only one of these courses will be given, depending largely on the demand.)

#### LAW

The Law Summer Session extends through the first term, six weeks, from June 13 to July 22. Each period is one hour and fifteen minutes long.

Lw. 320.—Workmen's Compensation Law. 7:45-9:00 W. S. Law-204. 1 credit. TRUSLER.

Scope, construction, beneficiaries, injuries compensated, defenses, and proceedings for adjustment of compensation, with special reference to the Florida statute. Workmen's Compensation Acts in Ruling Case Law, and the Florida Act.

Lw. 350.—Administrative Law. 11:45-1 M. Th. and 9:05-10:20 W. S. Law-204. 2 credits. SLAGLE.

Administrative orders, grant of licenses; conditions in grants; cancellation of licenses; administrative discretion; summary action; proof of official acts; relief against administrative action; jurisdictional limitations; administrative finality. Freund, Cases on Administrative Law, 2nd edition.

Lw. 411.—Florida Constitutional Law. 7:45-9 M. T. Th. F. Law-204. 2 credits. TRUSLER.

Constitutional guarantees; departments of government; homesteads and exemptions; married women's property. Constitution, Statutes, and Judicial Decisions of Florida.

Lw. 416.—Insurance. 11:45-1 T. W. F. S. Law-202. 2 credits. TESELLE. Theory, significance; insurable interest; concealment, representations, warranties; subrogation; waiver and estoppel; assignees, beneficiaries; creditors. Vance. Cascs on Insurance, 2nd edition.

Lw. 419.—Air Law. 11:45-1 M. Th. and 9:05-10:20 W. S. Law-202. 2 credits. TESELLE.

Aviation; air space rights; interstate commerce; airports; insurance; carriers; treatment of torts, contracts, and crimes in relation to aviation. Zollman, Cases on Air Law.

- Lw. 422.—Banks and Banking. 10:25-11:40 W. S. Law-204. 1 credit. DAY. Kinds of banks; deposits; checks; clearing houses; collections; loans and discounts; bank notes; banking corporations; representation of bank by officers; insolvency; national banks; savings banks. Tiffany, Banks and Banking.
- Lw. 430.—Bailments. 9:05-10:20 M. T. Th. F. Law-204. 2 credits. SLAGLE. Mandates: deposits; pledges; custody and use; delivery and redelivery; innkeepers; carriers; rights and duties of parties; termination of relation. Elliott on Bailments, 2nd elition.

Lw. 509.—Partnership. 10:25-11:40 M. T. Th. F. Law-204. 2 credits. DAY. Creation, nature, characteristics of a partnership; partner's interest, liability; powers, rights, duties; rights and remedies of creditors; termination of partnership. Mechem, Cases on Partnership, Matthews' Revision.

### MATHEMATICS

### First Term

Before registering for any course, the student should ascertain the prerequisites. Students desiring courses other than those listed below should write to the Department of Mathematics, or make inquiry immediately upon arrival at the University.

C-42.—General Mathematics. (See General College Courses.)

CMs. 23.—Basic Mathematics. 8:30 daily. P-2. 3 credits. (Designated as C-2Da, 1937.) McInnis.

In place of the traditional college algebra, trigonometry, and analytic geometry in succession, this course offers a completely new sequence of topics including the above plus a liberal amount of calculus. Teachers of high school mathematics who wish to advance in technical command of the subject matter should elect both CMs. 23 and CMs. 24. This is also designed for those who plan to major in mathematics or to elect courses above the freshman level. Milne and Davis, Introductory College Mathematics.

Ms. 215.—Introductory Course in Trigonometry. (Formerly Ms. 85.) 10 daily. P-2. 3 credits. McInnis.

Functions of angles; logarithms; solution of triangles. Simpson, Plane Trigonometry and Logarithms,

Ms. 253.—Differential and Integral Calculus. 10 daily. P-1. 3 credits. Specht.

Beginning calculus course. Differentiation, one of the most important and practical fields of mathematics, is treated in the main, but a beginning is made in integration, the inverse operation of differentiation. Granville, Smith, Longley, Differential and Integral Calculus.

Ms. 311.—Advanced College Algebra. 8:30 daily. P-102. 3 credits. PIRENIAN.

Further treatment of some of the material and processes of college algebra, and introduction to more advanced topics. Valuable to teachers of algebra and to students of actuarial science. Hall and Knight, *Higher Algebra*.

Ms. 325.—Mathematics for High School Teachers. 7 daily. P-102. 3 credits. KOKOMOOR.

Selected topics having a direct and significant bearing upon the teaching of mathematics in high school. Consideration of the subject matter itself and its relation to adequate reorganization programs, both in the light of general modern objectives and experience obtained in the teaching of mathematics in the General College. This course, Ms. 325, is concerned with the teaching of general (practical) mathematics and algebra in high schools. Ms. 326 deals with the teaching of geometry and trigonometry. Either course may be taken first.

Ms. 500.—Graduate Seminar. 11:30 daily. P-102. 3 credits. PIRENIAN. Students who wish training on a graduate level may register for Ms. 500. Topics studied will depend upon preparation and needs.

### Second Term

CMs. 24.—Basic Mathematics. 8:30 daily. P-2. 3 credits. (Designated as C-2Db. 1937.) DAVIS.

A continuation of CMs. 23.

Ms. 254.—Differential and Integral Calculus. 10 daily. P-2. 3 credits. DAVIS.

Integration, the inverse operation of differentiation, is used in the calculation of areas, volumes, moments of inertia, and many other problems. Granville, Smith, Longley, Differential and Integral Calculus.

Ms. 302.—Introductory Course in Algebraic Geometry. 10 daily. P-102. 3 credits. QUADE.

The algebraic study of the figures of geometry and the plane sections of a cone. The course deals mainly with two problems: Given an equation, to find its graph; and given a graph, to find its equation. A good knowledge of high school algebra is the best prerequisite for this course. Love, Elements of Analytic Geometry.

Ms. 326.—Mathematics for High School Teachers. 7 daily. P-102. 3 credits. PHIPPS.

See description given under Ms. 325.

Ms. 501.—Graduate Seminar. 11:30 daily. P-102. 3 credits. QUADE. See description given under Ms. 500.

Ms. 568.—History of Elementary Mathematics. 8:30 daily. P-102. 3 credits. Phipps.

### PHARMACOGNOSY

### First Term

\*Pgy. 221.—Practical Pharmacognosy. 7 daily. C-316. Laboratory 1-4 T. Th. C-316. 3 credits. CHRISTENSEN.

Sources of crude drugs and a systematic classification of the vegetable and animal drugs of the United States Pharmacopoeia and National Formulary. Youngken, Textbook of Pharmacognosy; United States Pharmacopoeia and National Formulary.

Pgy. 551.—Pharmacognosy Research. No credit in hours. CHRISTENSEN. Required of those majoring in Pharmacognosy.

### PHARMACOLOGY

### First Term

\*Ply. 351.—Pharmacology. 8:30 daily. C-316. 3 credits. CHRISTENSEN. The manner of action, dosage, therapeutic uses and toxicology of official and non-official drugs and poisons. Sollmann, A Manual of Pharmacology; United States Pharmacopoeia and National Formulary.

<sup>\*</sup>Courses of greatest and sufficient demand will be offered.

\*Ply. 451.—Principles of Biologicals. 10 daily. C-316. 3 credits. Christensen.

Advanced study of the pharmacology of drugs and pharmacological standardization with special reference to toxins, antitoxins, serums and vaccines.

\*Ply. 452.—Principles of Biologicals. 11:30 daily. C-316. 3 credits. Christensen.

A study of gland products and vitamins with reference to action, standardization and uses.

Ply. 551.—Special Problems in Pharmacology. Seminar method. 4 credits. Christensen.

A comparison of methods of biological assaying. Special lectures and collateral reading, laboratory experiments, oral and written reports.

Ply. 571.—Pharmacology Research. No credit in hours. CHRISTENSEN. Required of those majoring in Pharmacology.

### PHILOSOPHY

### First Term

Ppy. 302.—The Philosophy of Religion. 10 daily. P-209. 3 credits. ENWALL. Origin and development of theism.

Ppy. 410.—History of Modern Philosophy. 11:30 daily. P-209. 3 credits. ENWALL.

Special attention given to the work of Descartes, Spinoza, Leibnitz, Hume, and Kant.

Ppy. 504.—Advanced History of Modern Philosophy. 11:30 daily. P-209. 3 credits. ENWALL.

Readings from original sources, papers on special topics, group discussions.

NOTE: Ppy. 504 is offered at the same hour as Ppy. 410. Students attend the same class but are required to do a great deal more work in Advanced History of Philosophy.

### **PHYSICS**

Students in the College of Engineering desiring to earn credit in Physics may enroll in the courses outlined below. Additional problem work and subject matter will be assigned, and substitution will be allowed if a grade of C or higher is made.

### First Term

Ps. 101.—Elementary Theory of Mechanics, Heat and Sound. 10 daily. B-203. 3 credits. F. D. WILLIAMS.

Ps. 103.—Elementary Laboratory to Accompany Ps. 101. 1-4 M. W. F. B-306. 1 credit. F. D. WILLIAMS.

### Second Term

Ps. 102.—Elementary Physics of Magnetism, Electricity and Light. 10 daily. B-203. 3 credits, BLESS.

Ps. 104.—Elementary Laboratory to Accompany Ps. 102. 1-4 M. W. F. B-306. 1 credit. BLESS.

<sup>\*</sup>Courses of greatest and sufficient demand will be offered.

### POLITICAL SCIENCE

### First Term

CPl. 13.—Political Foundations of Modern Life. 1 daily. P-101. 3 credits. (Designated as C-1F, 1937.) CARLETON. Prerequisite: C-1. Designed for General College students. Prerequisite to advanced courses in Political Science.

An examination of the principles and practices of our political institutions; how grovernment functions in the United States; what information can be drawn from the practices of other countries.

Lectures and readings on the various forms of mental disease, with special attention to diagnosis and treatment.

### Second Term

Psy. 201.—General Psychology. 10 daily. P-10. 3 credits. WILLIAMS.

Psy. 312.—Psychology of Problem Children, 8:30 daily. P-10. 3 credits. WILLIAMS. Graduate students will register for Psy. 512.

Individual differences, intelligence, feehle-mindedness, backward and gifted children, speech disorders, physical disorders, epilepsy, delinquency, emotional disorders, and other types of exceptional and mentally peculiar children.

Psy. 314.—History and Systems of Psychology. Seminar. To be arranged. P-114. 3 credits. WILLIAMS. Graduate students will register for Psy. 514.

A critical survey of the historical development of psychology, with special emphasis on representative writers and schools and the more recent trends and systems.

### PUBLIC SCHOOL ARTS AND CRAFTS

(Men, please see Industrial Arts Education)

### First Term

### Pc. 101.-Elementary School Art. 1 credit.

Practice in the use of varied materials; methods of preparation and presentation; training in classroom practice; objectives in teaching art.

Section 1. 1-3 T. Th. P-302. LOCKWOOD.

Section 2. 3-5 M. F. P-302. MITCHELL.

Section 3. 1-3 M. F. P-302. MITCHELL.

### Pc. 104.—Interior Decorating. 1 credit.

A study of interior decoration, house-planning, furnishing, equipping, and care from the standpoint of modern materials and methods.

Section 1. 1-3 W. F. P-303. LOCKWOOD.

Section 2. 10-12 W. F. P-302. MITCHELL.

Pc. 201.—Creative Design. 3-5 W. Th. P-302. 1 credit. MITCHELL and LOCKWOOD.

Creative problems in two and three dimensional design embodying form, pattern, and color directly related to craft courses offered in public school art.

Pc. 123.—Industrial Arts for Elementary Grades. 3-5 M. T. F. Y-Shop. 2 credits. LOCKWOOD.

Pottery, weaving, bead work, hectography, book-binding. Arts of typical peoples; American colonial life. Contribution of art to elementary activity curriculum; organization of materials, equipment, etc.

### Second Term

Pc. 101.—Elementary School Art. 1-3 M, W. P-302. 1 credit. LOCKWOOD.

Pc. 102.—Frieze Development. 3-5 M. W. P-302. 1 credit. LOCKWOOD.

Pc. 104.—Interior Decoration. 1-3 T. Th. P-302. 1 credit. LOCKWOOD.

Pc. 209.—Creative Arts and Crafts. 2 credits. Y-Shop. BOHANNON.

Craft-work materials, leather work, block-printing, carving, metal etching, art-metal, basketry, projects in woodwork, etc. Contribution of this type of work to curriculum of different grades.

Section 1. 1-3 M. T. W.

Section 2. 3-5 M. W. F.

Pc. 220.—Puppetry. 3-5 T. Th. Y-230 and Y-Shop. 1 credit. BOHANNON and LOCKWOOD.

### SCHOOL MUSIC

### First Term

Msc. 103.—Materials and Methods for Grades One, Two, and Three. Auditorium, 2 credits.

Section 1. 10 daily. LAWRENCE.

Section 2. 4 daily. CARSON.

Study of the child voice; rote songs; the toy symphony; art and rhythm songs; sight singing from rote to note; appreciation work for primary grades.

Msc. 104.—Materials and Methods for Grades Four, Five, and Six. Auditorium. 2 credits. Prerequisite: Msc. 103.

Section 1. 8:30 daily. CARSON.

Section 2. 11:30 daily. LAWRENCE.

Development of sight singing; study of problems pertaining to intermediate grades; part singing; song repertoire; appreciation work suitable for intermediate grades.

Msc. 105.—Materials and Methods for Junior and Senior High School. 2:30 daily. Auditorium. 2 credits. CARSON. Prerequisite: Msc. 103 or 104.

Sight singing; study of the changing voice and voice classification; chord formation and theory work pertaining to high school work; appreciation suitable for adolescent pupils.

Msc. 112.—Advanced Sight-Singing. 4 daily. Yonge Auditorium. 2 credits. LAWRENCE. Prerequisites: Msc. 103 and 104 or 105.

This course is offered for those students who need to improve skill in reading music notation.

Msc. 110.—Music Appreciation. 1 W. F. Auditorium. 1 credit. C. MUR-PHREE.

Development of a better understanding and enjoyment of good music through listening intensively to compositions of the masters. Illustrated lectures. Collateral reading. No previous musical knowledge required.

### Second Term

Msc. 103.—Materials and Methods for Grades One, Two, and Three. 10 daily. Auditorium. 2 credits. CARSON.

Msc. 104.—Materials and Methods for Grades Four, Five, and Six. 8:30 daily. Auditorium. 2 credits. CARSON. Prerequisite: Msc. 103.

Msc. 105.—Materials and Methods for Junior and Senior High Schools. 2:30 daily. Auditorium. 2 credits. CARSON. Prerequisite: Msc. 103 or 104.

Msc. 112.—Advanced Sight-Singing. 4 daily. Auditorium. 2 credits. CARSON. Prerequisites: Msc. 103 and 104 or 105.

Msc. 110.-Music Appreciation. 1 W. F. Auditorium. 1 credit. CARSON.

### SOCIOLOGY

### First Term

CSy. 13.—Sociological Foundations of Modern Life. 8:30 daily. P-209. 3 credits. (Designated as C-1H, 1937.) BRISTOL. Prerequisite: C-1 or consent of instructor.

Meaning and scope of sociology; contrast between sociological and other foundations of modern life; consideration of persons in the totality of their social relations; of problems growing out of maladaptations in associational life; of social processes, principles and laws; of the product of living together in association called culture; of progress in the attainment of social goals. A prerequisite for most of the advanced courses in the department and for training for social work; subject matter the chief basis for comprehensive examination of those taking a higher degree involving sociology.

Sy. 315.—Social Legislation. 11:30-12:30 daily. P-10. 2 credits, BRISTOL. Prerequisite: CSy. 13 or consent of instructor.

The fields of social legislation; history of social legislation, especially in Florida since 1911; principles of social legislation; survey of social legislation in the United States; study of Guide to the Welfare Laws of Florida together with suggested changes.

Sy. 515.—Social Legislation. To be arranged. 3 credits. BRISTOL.

To be taken largely with Sy. 315, with special topics of investigation.

Sy. 517.—Seminar in Advanced Sociology. 2-4 M. T. Th. P-10. 3 credits. BRISTOL. Prerequisite: Consent of instructor.

Of special value to those teaching the social studies in high school.

### Second Term

Sv. 321.—Rural Sociology. 8:30 daily. P-11. 3 credits. MCVOY.

Nature and scope of rural sociology. Rural society; organization and structure; its people and their characteristics; its major occupation and influence on life; functions and institutions; trends and policies. Rural society and national policy.

Sy. 326.—Urban Sociology. 10 daily. P-11. 3 credits. McVoy.

Nature and scope of urban sociology. Structure of the city and relation to environment. Functions of the city. Urban personalities and groups. Social change and the impact of the urban environment. Fact-finding and city-planning. Rural-urban conflicts and adjustments.

### **SPANISH**

### First Term

CSh. 33.—The Reading of Spanish. 7 daily. Bu-205. 3 credits. (Designated as C-3Sa, 1937.) HATHAWAY.

Designed to give students an opportunity to attain, without stressing formal grammar, a moderate proficiency in the reading of Spanish.

\*CSh. 34.—The Reading of Spanish. 10 daily. Bu-205. 3 credits. (Designated as C-3Sb. 1937.) HATHAWAY.

Continuation of CSh. 33.

\*Sh. 209.—Second-Year Spanish. (Formerly Sh. 101.) 10 daily. Bu-205. 3 credits. HATHAWAY.

Review of grammar; written and oral exercises.

<sup>\*</sup>Of CSh. 34, Sh. 209, and Sh. 210 only one course will be given, choice depending upon demand.

\*Sh. 210.—Second-Year Spanish. (Formerly Sh. 102.) 10 daily. Bu-205. 3 credits. HATHAWAY. Prerequisite: Sh. 101 or 209.

Continuation of Sh. 209.

Sh. 303.—Survey of Spanish Literature. 8:30 daily. Bu-305. 3 credits. HAUPTMANN. Prerequisite: Sh. 102.

Historical outline; reading of representative selections.

Sh. 511.—Advanced Readings in Spanish Literature. Conference. 3 credits. HAUPTMANN. Prerequisite: Permission of instructor.

Subject matter to depend on needs and interests of individual student.

Sh. 514.—Phonetics. 11:30 daily. Bu-305. 3 credits. HAUPTMANN. Prerequisite: Permission of instructor.

Continuation of Sh. 513, combined with a review of teaching materials. Some students will be permitted to take this course without having had Sh. 513.

### **SPEECH**

Prerequisite: All students taking work in the Department of Speech must have completed Eh. 101-102 or C-3.

### First Term

CSc. 33.—Effective Speaking. 4 credits. (Designated as C-3H, 1937.)

Section 1. 7 daily. 1-2 T. Th. P-205. HOPKINS.

Section 2. 10 daily. 1-2 T. Th. P-205. STOVER.

Designed to aid the student through demonstration and practice to talk effectively to a group.

Sch. 303.—Argumentation and Debating. 10 daily. P-206. 3 credits. HOP-KINS. Prerequisite or corequisite: CSc. 33.

A study of the principles of argumentation and their application to issues of current public interest.

Sch. 307.—Interpretation of Literature. 8:30 daily. P-205. 3 credits. STOVER. Prerequisite or corequisite: CSc. 33.

Voice training; exercises for developing the effectiveness of the body and voice; oral reading of short stories and narrative poetry.

### Second Term

CSc. 33.—Effective Speaking. 4 credits. (Designated as C-3H, 1937.)

Section 1. 7 daily. 1-2 T. Th. P-205. TEW.

Section 2. 10 daily, 1-2 T. Th. P-205, STOVER,

Designed to aid the student through demonstration and practice to talk effectively to a group.

Sch. 301.—Advanced Public Speaking. 10 daily. P-209. 3 credits. TEW. Prerequisite: CSc. 33.

Structure, style, and delivery of speeches for formal occasions, with special emphasis on the psychology of audience persuasion. Considerable practice in speaking.

Sch. 404.—Dramatic Production. 8:30 daily. P-209. 3 credits. STOVER. Prerequisite: CSc. 33.

Consideration of voice, line reading, and the principles of character interpretation; the problem of directing, stage equipment, costuming, lighting, and make-up. Rehearsal of one-act plays.

<sup>\*</sup>Of CSh. 34, Sh. 209, and Sh. 210 only one course will be given, choice depending upon demand.

### **QUESTIONS AND ANSWERS**

1. What are the days of registration?

Answer: First Term: June 13, 8-3:30 P.M.
Second Term: July 25, 8-12 noon.

2. Will there be a late registration fee charged to students registering after the above time?

Anwser: Yes. A late registration fee of \$5 will be charged.

3. What is the last day on which a person may register by paying the late registration fee?

Answer: First Term: June 15.
Second Term: July 27.

4. What is the maximum load a student may carry?

Answer: A student who in the last term of attendance at the University of Florida made an honor point average below 1.00 (C) may take a credit hour load of six. A student who made an honor point average of 1.00 (C) or above may take a credit hour load of nine. Transfer students may take nine credit hours of work during their first term of attendance.

5. How many semester hours of credit may be earned during the summer by attendance at both terms?

Answer: 12 to 18, depending upon the student's honor point average.

6. May students who expect to receive degrees or diplomas at the end of either term of the Summer Session be given permission to carry more hours than provided for in No. 5 above?

Answer: No. Exceptions will not be made under any circumstances.

7. May a student complete a correspondence course while attending the Summer Session?

Answer: Yes, but the hours carried will count in the regular load.

8, a. What courses should a student take in place of required courses no longer offered, viz., English 101-102, Sociology 111-112, General Natural Science 101-102?

 Answer: For English 101-102
 C-3

 For Sociology 111-112
 C-1

 For General Natural Science 101-102
 C-2 or C-6

NOTE: Those who have taken one-half of any of the former courses may take either half of the comprehensive course (C-3, C-1, C-2, or C-6) indicated as a substitute.

b. Who will submit the grades for students not in the General College who take comprehensive courses?

Answer: In such cases the grades will be submitted by the instructors concerned and not by the Board of Examiners.

c. How much credit will a student in such cases be allowed for the comprehensive course?

Answer: The student will be allowed the credit assigned to such a course.

d. May students registered in the Upper Division apply to take comprehensive examinations in courses for which the student is not currently registered?

Answer: No. General College students only are permitted to take comprehensive examinations by application.

- Is there a graduation at the end of the first term?
   Answer: Yes.
- 10. May one visit the classes in the laboratory school?

Answer: Yes. Application should be made to the Principal, 120 Yonge Building. (Only kindergarten and the first six grades will be taught this summer.)

- 11. To whom should application be made for part-time work?

  Answer: Dean of Students.
- 12. To whom should application be made for Summer Session loans?

  Answer: Director of the Summer Session.
- 13. To whom should application be made for approved room lists?
  Answer: Dean of Students.
- 14. To whom should application be made for a room reservation in the dormitories?

Answer: Business Manager. (See page 113 for application blank.)

- 15. Must one rooming in the dormitories eat in the cafeteria?

  Answer: No, but see pages 67 and 68 for special rates.
- 16. May children be registered in the laboratory school and live in the dormitories when the mother is a regularly registered student of the Summer Session?

Answer: Each case will be acted upon separately. Application should be made to the Dean of Students.

17. Will there be Saturday classes?

Answer: First Term: No. (Except in the College of Law.)
Second Term: Yes.

18. May one comply with the requirements for extension of certificate during either term?

Answer: Yes.

20.

19. May one get two extensions on a certificate by attending both terms of the Summer Session?
Answer: No. Only one extension is given.

How can information regarding registration procedure be secured?

Answer: By consulting the bulletin boards in the various buildings on the morning of registration day. Also see page 112.

### SPECIAL DIRECTIONS FOR PRELIMINARY REGISTRATION

Note: If the following directions are carefully followed you will be able to complete most of your registration by mail and avoid the inconvenience of standing in long lines on registration day.

- 1. Fill out the Application Blank found on the last page of this bulletin and mail it promptly to the Office of the Registrar. If this form is received before June 1 (July 10, if you expect to attend the second term only) registration blanks will be mailed to you. These will include your registration permit and fee card. NO REGISTRATION BLANKS WILL BE MAILED AFTER JUNE 1. Persons not filing the application before that time will have to register in the usual manner.
- The registration forms should be carefully and COMPLETELY filled in. All requested information is SIGNIFICANT.
- 3. Do not register for more than the maximum load as indicated on the top of your registration blank.
- 4. Be sure to fill out the fee card as directed and send a check or money order for the amount of your fees. To determine what your fees are follow this sc\_le:\*

I	f you	are	carrying	six cr	edits or	less	your registra	ition	fee	is	\$16.00
1	f you	are	carrying	seven	credits	your	registration	fee	is		\$17.00
1	f you	are	carrying	eight	credits	your	registration	fee	is		\$18 00
1	f you	are	carrying	nine	credits	your	registration	fee	is		\$19.00

To the amount of your registration fee add the failure fee that is indicated on YOUR registration permit, and send remittance to cover the total. If you have not actually lived in Florida for the entire twelve months preceding June 1, 1938, you must add another \$10.00. NO REGISTRATION WILL BE ACCEPTED UNLESS ACCOMPANIED BY FULL REMITTANCE FOR ALL FEES DUE.

5. IF MONEY IS SENT FOR ROOM RENT OR MEAL TICKETS BE SURE TO ACCOMPANY THIS REMITTANCE WITH A LETTER EXPLAINING JUST WHAT THE ADDITIONAL REMITTANCE IS TO COVER.

THERE IS NO OBLIGATION TO ATTEND THE SUMMER SESSION AFTER THIS PRELIMINARY REGISTRATION HAS BEEN MADE, AND A FULL REFUND OF FEES WILL BE MADE IF PRELIMINARY REGISTRATION IS CANCELLED BY FRIDAY, JUNE 10.

<sup>\*</sup>For Fees for College of Law see page 66.

### DORMITORY INFORMATION

### UNIVERSITY OF FLORIDA

To be filled out by each student who is planning to live in the dormitories for the 1938 Summer Session—and mailed to the Business Office, attention Miss Baker.

- J. R. D. Eddy, State Supervisor of Trade and Industrial Education, Texas
- E. G. LUDTKE, State Supervisor of Trade and Industrial Education, Louisiana
- E. R. PLOWDEN, State Supervisor of Trade and Industrial Education, Alabama
- C. E. RAKESTRAW, Southern Regional Agent, U. S. Office of Education
- W. A. SEELY, State Supervisor of Trade and Industrial Education, Tennessee
- B. R. TURNER, State Supervisor of Trade and Industrial Education, South Carolina
- B. H. VAN Oor, State Supervisor of Trade and Industrial Education, Virginia

### FACULTY

### School of Trade and Industrial Education

- CHARLES R. ALLEN, M.A., LL.D., Former Educational Consultant, Federal Board for Vocational Education (First Term)
- ROBERTA ASHFORD, Instructor, Commercial Education, Vocational School, Jacksonville, Florida (Second Term)
- P. E. Babcock, M.A., Assistant State Supervisor of Trade and Industrial Education, Georgia (Both Terms)
- Jack Вонаnnon, M.A., Assistant Professor of Industrial Arts Education, University of Florida (Both Terms)
- W. J. Breit, M.A., State Supervisor of Trade and Industrial Education, Arkansas (Second Term)
- M. D. Broadfoot, B.A., State Supervisor of Trade and Industrial Education, Mississippi (Second Term)
- James F. Cannon, B.S., State Supervisor of Trade and Industrial Education, Georgia (Both Terms)
- Paul W. Chapman, M.S., D.Sc., Dean, Agricultural College, University of Georgia, Athens, Georgia (Second Term)
- L. Keith Covelle, M.A., State Supervisor of Trade and Industrial Education. Oklahoma (First Term)

FACULTY 123

- Martha Dill, Instructor, Commercial Education, Vocational School, Jacksonville, Florida (Both Terms)
- ROBERT D. DOLLEY, M.S., Supervisor of Trade and Industrial Education, Florida (Second Term)
- George H. Fern, M.S.. State Director of Vocational Education, Michigan (First Term) Ben E. Harris, M.E., Assistant State Supervisor of Trade and Industrial Education, Alabama (Second Term)
- HERMAN F. HINTON, B.S., State Coordinator and Teacher Trainer, Trade and Industrial Education, Florida (First Term)
- WALTER E. KEYES, M.S., State Coordinator and Teacher Trainer, Trade and Industrial Education, Florida (Both Terms)
- EUNICE KIRKPATRICK, Instructor, Commercial Education, Vocational School, Jacksonville. Florida (First Term)
- E. G. Ludtke, B.S., State Supervisor of Trade and Industrial Education, Louisiana (First Term)
- BLONDZA McDavid, B.S., Principal, Vocational School, Lakeland, Florida (First Term)
  Evelyn Messer, Principal, Lively Continuation School, Tallahassee, Florida (Second Term)
  Louise Noland, B.S., Instructor, Commercial Education, Vocational School, Jacksonville,
  Florida (Both Terms)
- VIOLET O'REILLY, M.A., Principal, L. E. Rabouin Vocational School, New Orleans, Louisiana (Second Term)
- Adele Pennington, B.A., Principal, Vocational School, Jacksonville, Florida (First Term) C. E. Rakestraw, B.S., Agent, Southern Region, U. S. Office of Education, Washington, D. C. (First Term)
- Nettie Randolphi, Instructor, Commercial Education, Vocational School, Jacksonville, Florida (Second Term)
- C. J. Schollenberger, B.S., Instructor of Drafting. Des Moines Public Schools, Des Moines, Iowa (Both Terms)
- Rebecca Stevens, B.S., Principal, Sanford Continuation School, Sanford, Florida (Second Term)
- B. H. VAN OOT, Ph.D., State Supervisor of Trade and Industrial Education, Virginia (Second Term)
- Guy Via, B.S., Director of Training, Newport News Ship-building and Dry Dock Company, Newport News, Virginia (First Term)
- MAUDE WOODS, Instructor, Commercial Education, Vocational School, Jacksonville, Florida (First Term)

### GENERAL INFORMATION

### Nature and Purpose of School

The University of Florida, in cooperation with the State Department of Public Instruction, announces the first session of the School of Trade and Industrial Education, to be held in Daytona Beach, Florida, from June 13 to July 22.

While the School will be held in Florida, it is planned to serve the entire southern region. Few southern states have a sufficient number of trade and industrial teachers within their own boundaries to support individually a project of this kind, but with the cooperation of the supervisors of trade and industrial education in the southern region, a comprehensive group of courses dealing with problems of the South will be offered teachers of trades and industries.

In an effort to accommodate many vocational teachers who have short vacations, the courses have been planned for two short terms of three weeks each: June 13 to July 1, and July 5 to July 22. Students may attend either term, or both, as they desire. All classes will be held at the Seabreeze High School building, and will meet six days a week, two hours a day, during each term.

### Advisory Committee

The state supervisors of trade and industrial education in the southern region, headed by Mr. C. E. Rakestraw, Southern Regional Agent of the United States Office of Education, have agreed to serve on an advisory committee. The personnel of this committee is given on page 122. The school is fortunate in having them as advisors, and their willingness to serve in this capacity affords a most direct means of making courses immediately applicable to local conditions.

### Instructional Staff

The faculty have all been selected because of their outstanding leadership in the field of vocational education. Many of these are being brought from the neighboring southern states, are fully acquainted with southern problems, and hence will find it easy to make their courses fit southern needs. Others come to us from more distant states and possess exceptional knowledge of the specific fields which they teach. Those attending the school will, therefore, have the opportunity, not only of receiving instruction from these able men and women, but also of conferring with them personally about problems of interest. Members of the faculty will be glad to devote their time while on the campus to a discussion of the problems brought before them. It is from such personal contacts that the full benefit of the school will be realized.

### For Whom the School Is Intended

Admission is limited to the following classes of students:

- Those actually engaged in teaching trade and industrial education or vocational courses subsidized from Smith-Hughes or George-Deen funds;
- Novice or apprentice teachers meeting all requirements of the State plan for trade and industrial teachers with the exception of the required amount of teacher training;
- 3. County superintendents or school administrators exercising control over a subsidized trade and industrial program;

4. Directors, supervisors, and coordinators of vocational programs subsidized from Smith-Hughes and George-Deen funds.

To offer educational opportunity to these groups of students is the sole purpose of the School, and the courses have been planned especially to take care of their needs. Teachers and students interested in other branches of learning should attend the regular Summer Session at the University of Florida in Gainesville.

### Courses

A group of fundamental courses dealing with general vocational education have been set up under such titles as: The History and Development of Vocational Education in the United States; Philosophy of Vocational Education; Industrial History and Development in the South; Labor Relations; Graphic Analysis; Conference Methods; Vocational School Organization; Apprenticeship Training; Vocational Psychology.

Courses featuring the Day Trade School and intended for active teachers, or for those in training, and administrators of such programs are listed as: Teaching Methods and Devices for Day Trade Schools; Organization Specific Subject Content for Day Trade Schools; Organization for Individual Instruction and Progression; Trade Shop Planning, Organization, and Control.

Other courses carefully selected for the training of Evening School teachers, administrators, or those aspiring to qualify for this work, are as follows: Teaching Methods and Devices for Evening School Teachers; Organization of Subject Matter for Evening School Classes; Evening Schools, Their Organization and Control.

Courses in diversified cooperative training have also been provided. These are intended not only to qualify one for this type of work but also to broaden the training of those now in the service. Such courses are listed as: Organization and Administration of Diversified Cooperative Training; Occupational Surveys; Methods of Student Counseling, Guidance, and Selection; Industrial Plant Job Analysis; Related Study Material; Coordination of Diversified Cooperative Training.

### Credits

Credits earned will apply at the University toward the degree of Bachelor of Science in Education, with a major in the field of trades and industries. Students who have attended another institution and now wish to work for this degree should see requirements for admission to the University of Florida, as set forth in the Bulletin of the 1938 Summer Session, page 60.

The maximum number of credits a student may earn each term is four, and these will count as credits earned in residence at the University.

### Certification

All courses have been approved by the Florida State Board for Vocational Education and may be used towards satisfying teacher-training requirements for certification or for extension of certificates. See regulations, page 65, Bulletin of the Summer Session.

### Admission

Students wishing to receive college credit must meet the entrance requirements of the University of Florida. For information concerning admission requirements for college:

credit see page 60 of the Bulletin of the Summer Session. A copy will be mailed upon request.

All students including those not desiring college credit, must comply with Section 1, page 121, of this bulletin.

### Fees

A registration fee of \$8 a term, or \$16 for the two terms, will be charged each student whether he is from Florida or from another state. There is no tuition charge.

### Living Expenses

Living expenses at Daytona Beach are reasonable. Rooms rent for \$4 to \$6 a week, and meals may be had at 35 cents and up. The city is amply provided with hotels, apartment houses, boarding houses, restaurants, and cafeterias. Early reservation is encouraged. It is suggested that those who wish apartments come a day or two in advance as it will be more satisfactory to personally inspect accommodations of this kind. For further information about rooms or housing accommodations prior to the opening of school, write to Mr. R. S. Dymond, Daytona Beach, Florida.

### EDUCATIONAL OPPORTUNITIES

### Practice Teaching

The Daytona Beach Continuation School, which operates on a twelve months' basis, will afford opportunity to teachers in general continuation school work to observe and to do practice teaching in the various subjects that are being offered. This will include elementary through high school work, all branches of commercial education, retail selling, and other subjects relating to the distributive occupations.

### Manual Arts

Since manual arts shop work should contribute definitely to the successful conduct of trade and industrial education, several courses in manual arts will be offered. Of special interest are the courses in curriculum construction, in which it is planned to work out details of a State-wide curriculum in the field, with a view to its official adoption as a Florida required course of study.

### Library

The Seabreeze High School has offered the use of its library to the School. This contains approximately 5,000 volumes: reference books, encyclopedias, dictionaries, year-books, handbooks, and Government publications. In addition the University of Florida will provide reference books dealing with phases of trade and industrial education. A librarian will be in charge and will be glad to assist students and faculty in the use of the library.

### **Educational Conferences**

There will be a number of conferences conducted during the summer that will be of special interest. Among them will be a conference of representative peace officers from the State for the purpose of mapping out a training program for that group of people. Also the Florida Fire College, conducted under the auspices of the State Department of Public Instruction, will hold a short meeting. There will probably be some other pro-

fessional conferences called by the State Department of Public Instruction to meet at Daytona Beach to work out special problems affecting the schools generally.

### RECREATION

Because the enrollment in the School for Trade and Industrial Education will be drawn largely from persons employed twelve months in the year, every effort has been made to select a place offering not only the facilities for study but those for spending an ideal vacation. Daytona Beach meets these requirements. The authorities have made available the plant of the Seabreeze High School, two blocks from the ocean, with its modern equipment and excellent library, and have cooperated in securing comfortable and reasonable living accommodations for students and faculty.

There will be available a great variety of attractions. There is the beach, with a motoring length of twenty-three miles and a low-tide width of 500 feet. Surf-bathing is especially safe due to the shallowness of the Atlantic at that point.

Those who desire to fish will find excellent fishing from the pier that projects into the Atlantic a thousand feet or more, by boat on the inland waterway, or in the inland lakes, which may be reached in a short drive from Daytona Beach. Deep sea fishing parties will be arranged for those who like this more rugged type of fishing.

Golf, tennis, lawn bowling, and shuffle-board may be enjoyed by those who prefer these sports, and dancing, social gatherings, teas, and theatre parties will be arranged for all students.

At Daytona's out-door auditorium on the shore of the Atlantic and only two blocks from the campus, free band concerts and other musical and dramatic programs will be held throughout the summer.

For those students who bring their families, there are for the children playgrounds and courts where supervised play will be conducted by the City Director of Athletics.

The average summer temperature at Daytona Beach is 79 degrees.

### CURRICULA AND SCHEDULE OF CLASSES

### Trade and Industrial Education

### FIRST TERM

### For Day Trade School Teachers

TIE. 201.—Organization Specific Subject Content for Day Trade Schools. 8 to 10 daily. Room 19. 2 credits. LUDTKE.

The methods of making occupational studies to determine jobs or operations and functioning related information in which instruction should be given and the procedure in organization for teaching purposes. Designed to meet the needs of Trade Shop Teachers, Trade Shop Related Teachers, and Part-Time Preparatory Teachers.

TIE. 204.—Trade Shop Planning Organization and Control. 10 to 12 daily. Room 20. 2 credits. FERN.

Items for consideration in planning shops, management and control with respect to floor space, light, equipment, supplies, inventories, Federal and State regulations, and record keeping devices will be covered in this course. Designed to meet the needs of Trade Shop Teachers and Part-Time Preparatory Teachers.

TIE. 205.—Graphic Analysis. 1:30 to 3:30 daily. Room 13. 2 credits. SCHOLLENBERGER.

A study of procedures which permit continuous recording of changes in occupational and educational practices by means of graphic representation. Problems developed in the course will be solved by methods and devices in graphic analysis. Designed to meet the needs of Trade Shop Teachers, Trade Shop Related Teachers, and Part-Time Preparatory Teachers.

### For Distributive Education Teachers

TIE. 207.—Organization and Administration of Courses in Distributive Occupations. 8 to 10 daily. Room 18. 2 credits. CANNON.

The provisions and interpretations of the George-Deen Act as they pertain to administration and supervision of distributive occupations.

TIE. 208.—Special Problems in Training for Distributive Occupations. 1:30 to 3:30 daily. Room 18. 2 credits. CANNON.

Determining functioning of related subject matter in distributive occupations and preparing this material for teaching purposes.

### For Evening School Teachers

TIE. 211.—Evening Schools—Their Organization and Control. 8 to 10 daily. Room 24. 2 credits. COVELLE.

The development of a knowledge and understanding of the value, possibilities, and limitations of evening schools and classes to the end that the evening school teacher will understand clearly his place in such a program. The course will include a thorough study of methods and procedures in organization, selection of students, Federal, State, and local laws and regulations governing the conduct of evening schools and classes. Designed to meet the needs of Evening Trade Extension Teachers.

TIE. 212.—Organization of Subject Matter for Evening School Classes. 10 to 12 daily. Room 24. 2 credits. COVELLE.

The development of a knowledge of trade or job analysis and the ability to use such analysis in the arrangement of subject matter so that teaching may be simplified and learning stimulated. Methods of analysis to determine trade or job content and means of determining student needs will be covered. Those taking the course will be requested to make a job analysis and organize the content for teaching purposes. Designed to meet the needs of Evening Trade Extension Teachers.

TIE. 213.—Teaching Methods and Devices for Evening School Teachers. 1:30 to 3:30 daily. Room 19. 2 credits. LUDTKE.

The procedure to be followed in setting up objectives and organizing class work so as to secure the active interest of all students. Teaching aids and devices will be gone into thoroughly. The student must plan a series of lessons with a view to exemplifying the use of various teaching methods and devices and do demonstration teaching. Designed to meet the needs of Evening Trade Extension Teachers.

### For Diversified Cooperative Training

TIE. 221.—Organization and Administration of Diversified Cooperative Training. 8 to 10 daily. Room 20. 2 credits. ALLEN.

Objectives to be attained, organization to attain these objectives, Federal and State requirements, social security, insurance, compensation and labor laws involved will be studied.

TIE. 222.—Occupational Surveys. 10 to 12 daily. Room 19. 2 credits. BABCOCK.

A study of procedure in making community industrial surveys and of individual industrial plants or business concerns to determine community training needs and acceptable industrial concerns in which to give training.

TIE. 223.—Methods of Student Counseling, Guidance, and Selection. 1:30 to 3:30 daily. Room 20. 2 credits. ALLEN.

The procedure to be followed in securing student applicants for training, factors involved in selection of students, occupational counseling, training assignments, compensation, and work contracts.

TIE. 224.—Industrial Plant Job Analysis. 1:30 to 3:30 daily. Room 23. 2 credits. RAKESTRAW.

The student must make a complete schedule of work processes in an individual plant. Also based upon these processes he must make a schedule of student training, related study, and compensation

TIE. 225.—Related Study Material. 10 to 12 daily. Room 23. 2 credits. RAKESTRAW.

The source of securing diversified general and specific related subject matter. Organization of it for teaching purposes, related class room lay out and organization, theory and methods in teaching diversified related subjects.

TIE. 226.—Coordination of Diversified Cooperative Training. 8 to 10 daily. Room 23. 2 credits. KEYES.

Coordination aims; purposes, methods of promotion, community and industrial relationships, advisory committee organizations and function, research problems, trainee follow-up and placement.

### For General Continuation Teachers

TIE. 227.—General Continuation School Organization. 1:30 to 3:30 daily. Room 15. 2 credits. BABCOCK.

The development of a knowledge and understanding of the value, possibilities, and limitations of continuation schools to the end that the continuation school teacher will understand clearly his place in such a program. A thorough study of methods and procedures in organization, selection of students, Federal, State, and local laws, regulations governing the conduct of continuation schools.

TIE. 231.—Practice Teaching in Office Practices and Filing. 1:30 to 3:30 daily. Room 22. 1 credit. NOLAND.

TIE. 232.—Practice Teaching in Shorthand. 8 to 10 daily. Room 22. 1 credit. WOODS.

TIE. 233.—Practice Teaching in Typewriting. 8 to 10 daily. Room 21. 1 credit. DILL.

TIE. 234.—Practice Teaching in Machine and Pen Bookkeeping. 1:30 to 3:30 daily. Room 6. 1 credit. KIRKPATRICK.

TIE. 235.—Practice Teaching in Academic Subjects. 10 to 12 daily. Room 6. 1 credit. PENNINGTON.

TIE. 236.—Practice Teaching in Business English. 10 to 12 daily. Room 22. 1 credit. McDAVID.

Instruction in special methods of teaching and organization of instructional material for individual progression, practice demonstration, and observation teaching. One hour daily will be devoted to class room study and one hour a day to teaching a regular continuation school class.

### General Subjects

(Desirable for all Trade and Industrial Personnel)

TIE. 241.—History and Development of Vocational Education in the United States. 10 to 12 daily. Room 13. 2 credits. HARRIS.

A study of the development of Vocational Education by stages from its beginning to the present time. Designed for Directors, Supervisors, Superintendents, and Principals.

TIE. 243.—Labor Relations. 8 to 10 daily. Room 15. 2 credits. VIA.

The progression and development of skilled labor from the beginning to the present time. Designed for Directors and Supervisors.

TIE. 244.—Conference Methods. 8 to 10 daily. Room 13. 2 credits. HARRIS. Methods and devices that can be used successfully in leading and managing foremen conferences and in the selection of problems affecting vocational courses. Designed for Directors, Supervisors, Superintendents, and Principals.

TIE. 246.—Apprenticeship Training. 10 to 12 daily. Room 15. 2 credits. VIA.

The laws affecting apprenticeship training, organization of training programs in cooperation with the Federal Department of Labor's Apprenticeship Committee. Types and kinds of training services to be given. Designed for Directors and Supervisors.

### For Supervisors and Directors

(Desirable for all Trade and Industrial Personnel)

TIE. 251.—Administration and Supervision of Vocational Education. 1:30 to 3:30 daily. Room 24. 2 credits. FERN.

Duties and responsibilities of vocational directors and supervisors. Special subjects such as laws, promotional methods, public relations, legislation, business organization and control, surveys, training teachers in services, placement and plan organization will be included.

### Trade and Industrial Education

SECOND TERM

For Day Trade School Teachers

TIE. 202.—Teaching Methods and Devices for Trade Shop Teachers. 8 to 10 daily. Room 19. 2 credits. SCHOLLENBERGER.

The methods used in preparing instructional material for teaching purposes and the use of such methods and aids as demonstrations, illustrations, lectures, conference, instruction sheets, charts, films, slides, and models in demonstration teaching. Designed to meet the needs of Trade Shop Teachers, Part-Time Preparatory Teachers, and Trade Shop Related Teachers.

TIE. 203.—Organization for Individual Instruction and Progression. 10 to 12 daily. Room 23. 2 credits. ALLEN.

Means of providing and carrying on individual instruction for students at various attainment levels and progression records and forms for recording individual progress will be thoroughly covered. Designed to meet the needs of Trade Shop Teachers, Trade Shop Related Teachers, and Part-Time Preparatory Teachers.

TIE. 205.—Graphic Analysis. 1:30 to 3:30 daily. Room 23. 2 credits. SCHOLLENBERGER.

### For Distributive Education Teachers

TIE. 207.—Organization and Administration of Courses in Distributive Occupations. 8 to 10 daily. Room 18. 2 credits. CANNON.

TIE. 208.—Special Problems in Training for Distributive Occupations. 1:30 to 3:30 daily. Room 18. 2 credits. CANNON.

### For Evening School Teachers

TIE. 211.—Evening Schools—Their Organization and Control. 8 to 10 daily. Room 15. 2 credits, HOLLEY.

TIE. 212.—Organization of Subject Matter for Evening School Classes. 10 to 12 daily. Room 15. 2 credits. HOLLEY.

TIE. 213.—Teaching Methods and Devices for Evening School Teachers. 1:30 to 3:30 daily. Room 19. 2 credits. BREIT.

### For Diversified Cooperative Training

TIE. 221.—Organization and Administration of Diversified Cooperative Training. 8 to 10 daily. Room 23. 2 credits. ALLEN.

TIE. 222.—Occupational Surveys. 10 to 12 daily. Room 24. 2 credits. BABCOCK.

TIE. 223.—Methods of Student Counseling, Guidance, and Selection. 1:30 to 3:30 daily. Room 15. 2 credits. DOLLEY.

TIE. 224.—Industrial Plant Job Analysis. 1:30 to 3:30 daily. Room 20. 2 credits. BROADFOOT.

TIE. 225.—Related Study Material. 10 to 12 daily. Room 19. 2 credits. Breit.

TIE. 226.—Coordination of Diversified Cooperative Training. 8 to 10 daily. Room 24. 2 credits. BROADFOOT.

### For General Continuation Teachers

TIE. 227.—General Continuation School Organization. 1:30 to 3:30 daily. Room 24. 2 credits. BABCOCK.

TIE. 231.—Practice Teaching in Office Practices and Filing. 1:30 to 3:30 daily. Room 22. 1 credit. NOLAND.

TIE. 232.—Practice Teaching in Shorthand. 8 to 10 daily. Room 23. 1 credit. RANDOLPH.

TIE. 233.—Practice Teaching in Typing. 8 to 10 daily. Room 21. 1 credit. DILL.

TIE. 234.—Practice Teaching in Machine and Pen Bookkeeping. 1:30 to 3:30 daily. Room 6. 1 credit. ASHFORD.

TIE, 235.—Practice Teaching in Academic Subjects. 10 to 12 daily. Room 6. 1 credit. STEVENS.

TIE. 236.—Practice Teaching in Business English. 10 to 12 daily. Room 22. 1 credit. MESSER.

### For General Subjects

(Desirable for all Trade and Industrial Personnel)

TIE. 242.—Industrial History and Development in the South. 10 to 12 daily. Room 20. 2 credits. CHAPMAN.

The historical transition of economic and industrial growth in the southern states. Contemporary industrial development. A general orientation course for vocational teachers. Designed for Directors, Supervisors, Superintendents, and Principals.

TIE. 245.—Vocational Psychology. 10 to 12 daily. Room 13. 2 credits. O'REILLY.

Physical, biological, and psychological factors which tend to slow up or inhibit learning with procedures and methods for reduction or elimination of these inhibiting difficulties. Designed for Directors, Supervisors, Superintendents, and Principals.

TIE. 247.—Vocational School Organization. 1:30 to 3:30 daily. Room 13. 2 credits. O'REILLY.

The characteristics and functions of various types of vocational schools, methods of control, management, and planning. Designed for Directors, Supervisors, Superintendents, and Principals.

TIE. 248.—Philosophy of Vocational Education. 8 to 10 daily. Room 20. 2 credits. CHAPMAN.

Basic principles involved in vocational education and the application of these principles to situations and training services. Designed for Directors, Supervisors, Superintendents, and Principals.

### Industrial Arts Education

### FIRST TERM

IN. 351.—Seminar in Curriculum Construction for Secondary School Industrial Arts. 1:30 to 3:30 daily. Room 18. 2 credits. BOHANNON.

A comprehensive study of the basic principles and underlying philosophy of departmental objectives and subject-matter objectives in the field of industrial arts; consideration of the various plans of organizing course materials in the different areas of activities in industrial arts; courses of study written, compared, and evaluated for each area and combination of areas taught in the State of Florida with the idea of submitting them for State adoption.

IN. 354.—General Shop Organization and Management. 10 to 12 daily. Room 18. 2 credits. BOHANNON.

Group and individual investigations of departmental and subject-matter activities, materials, supplies, shop layouts, equipment, organization, maintenance, and supervision in the field of industrial arts.

### SECOND TERM

IN. 352.—Seminar in Curriculum Construction for Secondary School Industrial Arts. 1:30 to 3:30 daily. Room 18. 2 credits. BOHANNON. Continuation of IN. 351.

IN. 353.—Industrial Arts Crafts. 10 to 12 daily. Room 18. 2 credits. BOHANNON.

Investigation of several types of technical and crafts activities which have not been adequately explored and utilized as a means of enriching and supplementing the industrial arts program; opportunity given for technical projects involved in above study.

IN. 355.—Instruction Sheets and Supplementary Teaching Aids in Industrial Arts. 8 to 10 daily. Room 18. 2 credits. BOHANNON.

Study and preparation of instruction sheets as adapted to the various areas of the industrial arts program; study and evaluation of reference materials, and other teaching aids and devices available in this field of work.

THE ENGINEERING EXPERIMENT STATION presents the 16TH ANNUAL SHORT COURSE AND CONFERENCE ON ELECTRIC METERS AND RELAYS

MAY 23 TO MAY 27

Vol. XXXIII, Series 1

No. 4, Extra No. 1 April 15, 1938

Published Monthly by the University of Florida, Gainesville, Florida. Entered in the post office in Gainesville, Florida, as second-class matter, under Act of Congress, August 24, 1912 Cfice of Publication, Gainesville, Fla.

#### ENGINEERING EXPERIMENT STATION UNIVERSITY OF FLORIDA

## ANNUAL SHORT COURSE AND CONFERENCE ON ELECTRICAL METERS AND RELAYS

MAY 23 - MAY 27

### ADMINISTRATIVE OFFICERS

John J. Tigert, President of the University Joseph Weil, Dean, College of Engineering; and Director, Engineering Experiment Station

## STAFF OF INSTRUCTION

E. F. Smith, Department of Electrical Engineering, Chairman

S. P. Sashoff, Department of Electrical Engineering J. W. Wilson, Department of Electrical Engineering

Assisted by manufacturers' engineers and specialists from utility companies.

#### MANUFACTURERS COOPERATING

James G. Biddle Company Duncan Electric Company
Eastern Specialty Company
Esterline-Angus Company Ferranti Electric Company Walter V. Gearhart Company General Electric Company Herman D. Steel, Jewel Company Leeds and Northrup Company

Weston Electrical Instrument Company

Palmer Electric and Manufacturing Company Sangamo Electric Company Southeast Joslyn Company States Company Walker Electric Company Ward Engineering Company Westinghouse Electric and Manufacturing Company

#### GENERAL INFORMATION

The Engineering Experiment Station of the University of Florida, in cooperation with the Southeastern Metermen's Association, and assisted by the various utility companies, municipalities and manufacturers of electrical apparatus, will offer the sixteenth Short Course and Conference on Electric Meters and Relays from May 23 to May 27, 1938, inclusive. The course will be given in the Laboratories of the Department of Electrical Engineering, University of Florida, Gainesville.

Particular attention will be paid to engineering problems confronting meter departments. Special consideration this year will be given to relays and relaying problems. On the other hand, every op-portunity will be given the less experienced metermen to secure more elementary instruction, both along practical and theoretical lines.

The importance of this conference can not be overestimated, considering that upon the accuracy of metering must depend not only the gross income of the utility companies, but also in many cases the good will of the public at large. Lectures on operating economy and customer relations will be presented. Instruction will be given by lectures, demonstrations, and supervised problem work. Particular stress will, however, be placed upon the solution of individual cases brought up by the conference. up by the conference.

#### REGISTRATION

Registration will be held in the Dynamo Laboratory of Benton Hall. A registration fee of \$5 will be charged to defray some of the expense of the course. Meals and lodging may be had near the campus at \$1.25 per day and up. For additional information concerning this course communicate with the Department of Electrical Engineering, University of Florida, Gainesville, Florida.

#### **PROGRAM**

### Monday, May 23

9 A. M. - 12 Noon
1 P. M. - 2 P.M.
2 P. M. - 2:15 P.M.
2:15 P.M. - 5 P.M.

- Theory of Power Measurement of power in single phase circuits; theory and construction of single phase watt hour meters; three wire systems; with practical demonstrations.

7 P. M. - 9 P.M. - Question Box and General Discussion

NOTE: Question Box and General Discussion period will be under the direction of a special committee which will select questions and prepare answers for presentation to the entire group. If no questions are forthcoming, the committee will prepare a substitute program.

#### Tuesday, May 24

9 A. M. - 10 A.M. - General Lecture

10 A. M. - 10:15 A.M. - 12 Noon

10:15 A. M.- 12 Noon

-GROUP A. POLYPHASE POWER MEASUREMENTS:

Measurement of power in polyphase circuits;
theory and construction of polyphase watt
hour meters; factors to be observed in addition to those of single phase meters, etc.
-GROUP B. SINGLE PHASE METER TESTING:
Special problems in single phase power
measurement, etc.

1 P. M. - 3 P.M. - INSTRUMENT TRANSFORMERS:

Theory, construction, accuracy, phase angle, burden, ratios, selection, testing, etc.

-Intermission

-GROUP A. K.V.A. METERING: '

Theory, practice, errors, etc; verification of metering connections.

-GROUP B. SPECIAL PROBLEMS:

Polyphase metering and polyphase meter testing; verification of metering connections,

7 P. M. - 9 P.M. - Question Box and General Discussion

#### Wednesday, May 25

9 A. M. - 10 A.M. 10 A. M. - 10:15 A.M. 10:15 A.M. - 12 Noon

- 3:15 P.M.

5 P.M.

3 P. M.

3:15 P. M. -

-General Lecture

-Intermission -GROUP A. DISCUSSION LED BY CONFERENCE CHAIR-

Reading meters, high bill complaints; customer relations; service locations; meter constants.

## Wednesday, May 25 (Continued)

		Wednesday, May 25 (Continued)
10:15 A.M.	- 12 Noon	-GROUP B. RELAYS:
1 P.M.	- 3 P.M.	Theory and applicationSPECIAL PROBLEMS IN INSTRUMENT TRANSFORMER INSTALLATION
3 P.M. 3:15 P.M.	- 3:15 P.M. - 5 P.M.	-Intermission -GROUP A. DISCUSSION LED BY CONFERENCE CHAIR-MAN:
		MAN: Meter sockets and cabinets; conversion of house-type to socket-type meters; sealing watt hour meters and meter cases; company meter numbers and identificationsGROUP B. RELAYS: Maintenance, troubles experienced, etc.
7 P.M.	- 9 P.M.	-Business Meeting of Southeastern Metermen's Association.
		Thursday, May 26
9 A.M.	- 10 A.M.	-General Lecture
	-10:15 A.M. - 12 Noon	-Intermission -GROUP A. DISCUSSION LED BY CONFERENCE CHAIR-MAN:
		Methods of making load and voltage checks on distribution circuits and distribution transformers; importance of relays to the meterman; practical use of the oscilloscope by the meterman.
		-GROUP B. RELAYS: Servicing the newer types; anticipated de-
l P.M.	- 3 P.M.	velopments, etcGROUP A. DISCUSSION LED BY CONFERENCE CHAIR-MAN:
		Forms and reports; laboratory practice of testing portable test meters, volt meters, ammeters, etc.; use and care of recording and indicating instruments; totalizing metering.
		-GROUP B. DEMAND METERING: Theory; application; maintenance; etc.
3 P.M. 3:15 P.M.	- 3:15 P.M.	-Intermission -ROUND TABLE CONFERENCE:
O . TO W.	- J F • IVI •	Application of the National Electric Code to the meter loop and service; fusing of indi- vidual service loop to customers at pole; troubles experienced with meter installation; off-peak water heater control; instrument
7 P.M.	- 9 P.M.	transformersQuestion Box and General Discussion
		Friday, May 27
9 A.M. 12	- 12 Noon - 2 P.M.	-Manufacturers' and Executives' Period
2 P.M. 8:30 P.M.	- 5 P.M.	-Luncheon - Installation of Officers -Manufacturers' and Executives' Period -Annual Banquet

Schedule of Courses

1938-39

Vol. XXXIII, Series 1, No. 5

May 1, 1938

Published Monthly by the University of Florida, Gainesville, Florida. Entered in the post office in Gainesville, Florida, as second-class matter, under Act of Congress, August 24, 1912.

Office of Publication, Gainesville, Fla.

## UNIVERSITY OF FLORIDA

#### SCHEDULE OF COURSES

1938-39

#### EXPLANATIONS

#### GENERAL COLLEGE SCHEDULE

In the first part of this schedule the courses which form the major part of the General College Program are listed. The following notes will be of assistance in locating and identifying the courses:

Course Numbers: The first digit of the course number indicates the field in which the course is offered, i.e., Social Science courses are identified by the initial digit 1, Physical Science 2, Language 3, Humanities 5, Biological Science 6. The letters in the abbreviation and the second (and third) digits indicate the subdivisions of the major fields.

Section Numbers: Sections indicated with one digit as 1, 2, 3, etc. represent lecture sections; with two digits, as 10, 11, 12, etc. represent recitation or discussion sections; with three digits, represent laboratory sections.

Progress Tests: In addition to the meetings of the various sections in the basic courses, progress tests will be given in C-1, C-2, C-3, C-41, and C-42 on Saturdays, alternating at 9 and 10 A.M. Students registering for these courses should include these hours in their schedules.

HT HORTICULTURE BUILDING

## ABBREVIATIONS

A G

Under the heading DPT will be found the department name abbreviations adopted for official records.

The following abbreviations have been used to designate buildings:

AGRICULTURE BUILDING

UNIVERSITY AUDITORIUM A U LA LANGUAGE HALL BARRACKS LW LAW BUILDING BN BENTON HALL PE PEABODY HALL R II BUCKMAN HALL PHOTO LABORATORY РН CHEMISTRY BUILDING CH RA RADIO STATION DL DAIRY LABORATORY SC SCIENCE HALL E G ENGINEERING BUILDING SE SEAGLE BUILDING F X EXPERIMENT STATION YN YONGE BUILDING

Financial Report

of

The University of Florida

June, 1937

Vol. XXXIII, Series 1, No. 6

June 1, 1938

Published monthly by the University of Florida, Gainesville, Florida Entered in the post office in Gainesville, Florida, as second-class matter, under Act of Congress, August 24, 1912 Office of Publication, Gainesville, Fla.

### REPORT OF THE BUSINESS MANAGER

To Dr. Jno. J. Tigert, President, University of Florida.

Sir: I have the honor to submit herewith the financial report for the year ending June 30, 1937.

This report is summarized and includes a balance sheet with supporting schedules for the University, Experiment Station, Agricultural Extension and other subsidiary departments and divisions.

It is set up, as far as practical, in accordance with the general plan for institutional accounting as recommended by the National Committee on Standard Reports for Institutions of Higher Learning.

Respectfully submitted,

K. H. GRAHAM, Business Manager.

#### 1-0

#### CONDENSED SUMMARY

#### INCOME

The income for Educational and General purposes for the year 1936-37 amounted to \$1,841,670.60, and was derived from the following sources as itemized in schedule B-1. This amount is the principal income of the University, Experiment Stations, Extension Divisions and Radio Station. A comparison of the same sources for 1955-36 is also included.

	1935-36		1936-37	
Student Fees Federal Appropriations State Appropriations Endowment Income Sales and Services of Educational	125,037.04 355,688.08 1,204,439.98 30,796.59	6.94% 19.69% 66.68% 1.70%	155,086.51 359,334.82 1,206,678.48 9,949.14	8.42% 19.51% 65.52% .54%
Departments Other Sources	89,920.35 149.34	4.98%	110,325.84	5.99%

Income from Auxiliary Enterprises and Activities amounted to \$220,392.90, from Custodian Funds \$337,827.22, and from Other Sources (Non-Educational) \$90.00, as per Schedule B-1.

#### EXPENDITURES

Educational and General Expenditures for the year 1936-37 amounted to \$1,857,483.43, as instructed in Schedule 8-2. These expenditures are for the following general purposes and are compared with similar disbursements for 1935-36.

	1935-36		1936-37	
General Administration	93,615.29	5.50%	92,249.43	4.96%
Instruction and Departmental Research	612,490.89	35.97%	634.866.55	34.17%
Organized Research	476,923.84	28.01%	581,367.72	31.30%
Extension	420,419.25	24.69%	446,022.74	24.01%
Library and Museum	32,084.45	1.88%	32,012.48	1.73%
Operation of Physical Plant	67,314.95	3.95%	70.964.51	3.83%

Expenditures from Auxiliary Enterprises and Activities amounted to \$199,136.63, from Custodian Funds \$314,776.54, and from Other Sources (Non-Educational) \$672.47, as per Schedule

#### CURRENT BALANCES

Unexpended funds on June 30, 1937, as per Exhibit B, were as follows:

University	22,413.54
Radio Station	3,830.52
Experiment Stations	18,588.92
Agricultural Extension	2,636.87
Auxiliary Enterprises and Activ	ties 52,838.52
Custodian Funda	59,989,38

#### ENDOWMENT FUNDS

Permanent Endowments created by land-grants of the Federal Government and by private gifts amounted to \$288,347.85 on June 30, 1937. These endowments were derived from the following sources:

Land	Grai	nt	Fun	дə			221,847.85
Prive	ate (	Gif	ta	for	Departmental	Use	40,000.00
					Scholershins		26 500 00

A detailed statement appears as Exhibit "C" showing investment of these funds.

#### PLANT FUNDS

The value of all property held by the University on June 30, 1937 amounted to \$7,056,726,82, distributed as follows:

Land			339,	356.40
Buildings	and	Improvements	4,481,	404.46
Faut nment			0 037	965 96

Tiese am its are itemized in Schedules D-2a to D-2d.

7,059,600.36

## The University Record of the University of Florida

Bulletin of Information the General College 1938-39

Vol. XXXIII, Series I No. 7 July 1, 1938

Published monthly by the University of Florida, Gainesville, Florida Entered in the post office in Gainesville, Florida, as second-class matter, under Act of Congress, August 24, 1912 Office of Publication, Gainesville, Florida

## The Record comprises:

The Reports of the President to the Board of Control, the bulletins of information, announcements of special courses of instruction, and reports of the University Officers.

These bulletins will be sent gratuitously to all persons who apply for them. The applicant should specifically state which bulletin or what information is desired. Address

THE REGISTRAR,
University of Florida,
Gainesville, Florida

Research Publications.—Research publications contain results of research work. Papers are published as separate monographs numbered in several series.

There is no free mailing list of these publications. Exchanges with institutions are arranged by the University Library. Correspondence concerning such exchanges should be addressed to the University Librarian, University of Florida, Gainesville, Florida. The issue and sale of all these publications is under the control of the Committee on Publications. Requests for individual copies, or for any other copies not included in institutional exchanges, should be addressed to the University Library, University of Florida, Gainesville, Florida.

## UNIVERSITY CALENDAR

August 22-Aug. 27, Monday-Saturday .... Comprehensive Examinations.

## REGULAR SESSION, 1938-39

September 1, Thursday				application	for	admission	for
	first	semes	ster.				

#### FIRST SEMESTER

September 12, Monday, 8 A.M1938-39 session begins.	Placement Tests-University
Auditorium.	

September 13-17, Tuesday-Saturday .....Freshman Week.

September 16, Friday ......Registration of Second-Year General College students.

September 17, Sat., 8 A.M. to 12 NOON....Registration of Upper Division students.

September 19, Monday, 8 A.M. .....Classes for the 1938-39 session begin; late registration fee, \$5.

September 24, Saturday, 12 Noon .......Last day for registration for the first semester, and for adding courses.

October 3, Monday, 7:30 P.M. .....Meeting of the General Assembly, P. K. Yonge Laboratory School Auditorium.

October 11, Tuesday, 5 p.m. ....Last day for students to apply to the Dean to be designated as Honor Students.

October 15, Saturday, 12 NOON ......Last day for making application for a degree at the end of the first semester.

October 22, Saturday .......Tampa-Florida football game in Tampa. Classes suspended.

November 11, Friday ......Armistice Day—special exercises.

November 19, Saturday ......Homecoming—classes suspended.

November 23, Wednesday, 5 P.M. .....Thanksgiving Recess begins.

November 28, Monday, 8 a.m. .....Thanksgiving Recess ends.

December 1, Thursday .....Last day for removing grades of I or X received in preceding semester of attendance.

December 7, Wednesday, 5 p.m. Last day for dropping courses without receiving grade of E and being assessed failure fee.

December 8, Thursday, 5 P.M. ......Progress Reports for General College students due in the Office of the Registrar.

December 17, Saturday, 12 NOON .........Christmas Recess begins.

#### 1939

January 3, Tuesday, 8	3 A.M.	Christmas	Recess	ends.
-----------------------	--------	-----------	--------	-------

January 20, Friday, 9 A.M. ......Final examinations begin for Upper Division students.

February 3, Friday, 10 A.M.	
February 3, Friday, 12 NOON	First semester ends; all grades for Upper Division students are due in the Office of the Registrar. Last day of classes for the General College, first semester.
February 4, Saturday	Inter-Semester day.
s	ECOND SEMESTER
February 6, Monday, 8 A.M.	Registration for second semester. Placement Tests, Agriculture 106.
February 7, Tuesday, 8 A.M.	Classes begin; late registration fee, \$5.
February 11, Saturday, Noon	Last day for registration for the second semester, and for adding courses.
February 18, Saturday, 2:30 P.M.	Meeting of the General Assembly, P. K. Yonge Laboratory School Auditorium.
February 25, Saturday, 12 NOON	Last day for making application for a degree at the end of the second semester.
March 15, Wednesday	Last day for students to apply to the Dean to be designated as Honor Students.
March 23, Thursday, 5 P.M.	Progress Reports for General College students due in the Office of the Registrar.
March 29, Wednesday	Last day for removing grades of I or X received in preceding semester of attendance.
April 12, Wednesday, 5 P.M.	Spring Recess begins.
April 17, Monday, 8 A.M.	Spring Recess ends.
	Last day for dropping courses without receiving grade of E and being assessed failure fee.
April 21, Friday	Last day for graduate students, graduating at the end of the semester, to submit theses to the Dean.
May 17, Wednesday, 8:30 A.M	Final examinations begin.
May 26, Friday	.Annual Phi Beta Kappa banquet.
May 27-29, Saturday-Monday	.Commencement Exercises.
May 27, Saturday	
May 28. Sunday	.Baccalaureate Sermon.
May 29, Monday	
May 29, Monday, 12 NOON	Second semester ends; all grades for Upper Division students are due in the Office of the Registrar.
May 29, Monday	Boys' Club Week begins.
SUMMI	ER SESSION 1939

## SUMMER SESSION, 1939

June 12, Monday	First Summer Term begins.
July 21, Friday	First Summer Term ends.
July 24. Monday	Second Summer Term begins
August 25, Friday	Second Summer Term ends.

## FIRST SEMESTER, 1939-40

September 11, Monday, 11 A.M. ......1939-40 session begins (date provisional).

## **FACULTY**

#### C-1. MAN AND THE SOCIAL WORLD

- ROLLIN SALISBURY ATWOOD, Ph.D. (Professor of Economic Geography in the College of Business Administration), Chairman
- WILLIAM GRAVES CARLETON, M.A. (Associate Professor in the General College)
- James Edward Chace, M.B.A. (Assistant Professor of Economics in the College of Business Administration)
- Manning Julian Dauer, Ph.D. (Assistant Professor of History and Political Science in the College of Arts and Sciences)
- ROLAND BYERLY EUTSLER, Ph.D. (Professor of Economics in the College of Business Administration)
- Angus McKenzie Laird, M.A. (Assistant Professor of English in the College of Arts and Sciences)
- JOHN BERRY McFerrin, Ph.D. (Assistant Professor of Business Administration in the College of Business Administration)
- Walter Jeffries Matherly, M.A. (Professor and Head of the Department of Economics and Dean of the College of Business Administration)
- COMER VANN WOODWARD, Ph.D. (Assistant Professor of Social Science and the Humanities in the General College)

## C-2. MAN AND THE PHYSICAL WORLD

- LEONARD WILLIAM GADDUM, Ph.D. (Biochemist, Experiment Station), Chairman
- ALVIN PERCY BLACK, Ph.D. (Professor of Agricultural Chemistry in the College of Arts and Sciences)
- SIGISMOND DE RUDESHEIM DIETTRICH, Ph.D. (Assistant Professor of Economic Geography in the College of Business Administration)
- THOMAS NICHOLAS GAUTIER, B.S. (Instructor in the General College)
- HAROLD LORRAINE KNOWLES, Ph.D. (Assistant Professor of Physics in the College of Arts and Sciences)
- JOSEPH HARRISON KUSNER, Ph.D. (Assistant Professor of Mathematics in the College of Arts and Sciences)
- CECIL GLENN PHIPPS, Ph.D. (Associate Professor of Mathematics in the College of Arts and Sciences)
- EDWARD SCHAUMBERG QUADE, Ph.D. (Instructor in Mathematics in the College of Arts and Sciences)
- ROBERT DICKERSON SPECHT, B.A. (Instructor in Mathematics in the College of Arts and Sciences)
- FRANCIS DUDLEY WILLIAMS, Ph.D. (Instructor in Physics in the College of Arts and Sciences)

#### C-3. READING, SPEAKING AND WRITING

Jacob Hooper Wise, Ph.D. (Professor of Education in the College of Education), Chairman Marcus Gordon Brown, M.A. (Instructor in French in the College of Arts and Sciences)

Washington Augustus Clark, Jr., M.A. (Assistant Professor of English in the College of Arts and Sciences)

FACULTY 223

- FREDERICK WILLIAM CONNER, M.A. (Instructor in English in the College of Arts and Sciences)
- HENRY PHILIP CONSTANS, M.A. (Head Professor of Speech in the College of Arts and Sciences)
- Francis Marion DeGaetani, B.A.E. (Instructor in Spanish and German in the College of Arts and Sciences)
- LESTER LEONARD HALE, M.A. (Instructor in Speech in the College of Arts and Sciences)
- ARTHUR ARIEL HOPKINS, M.A. (Associate Professor of Speech in the College of Arts and Sciences)
- CLIFFORD PIERSON LYONS, Ph.D. (Head Professor of English in the College of Arts and Sciences)
- Burton Alviere Milligan, M.A. (Assistant Professor in the General College)—(on leave 1938-39)
- ALTON CHESTER MORRIS, M.A. (Assistant Professor of English in the College of Arts and Sciences)
- CHARLES EUGENE MOUNTS, M.A. (Assistant Professor of English in the College of Arts and Sciences)
- CHARLES ARCHIBALD ROBERTSON, M.A. (Professor of English in the College of Arts and Sciences)
- KENNETH GORDON SKAGGS, M.A. (Instructor in English in the College of Arts and Sciences)
- HERMAN EVERETTE SPIVEY, Ph.D. (Assistant Professor of English in the College of Arts and Sciences)

#### C-41. MAN AND HIS THINKING

- WILLIAM HAROLD WILSON, Ph.D. (Professor of Mathematics and Assistant Dean in the College of Arts and Sciences), Chairman
- ELMER DUMOND HINCKLEY, Ph.D. (Professor and Head of Department of Psychology in the College of Arts and Sciences)
- WINSTON WOODARD LITTLE, M.A. (Professor of Secondary Education in the College of Education and Dean of the General College)

#### C-42. GENERAL MATHEMATICS

- FRANKLIN WESLEY KOKOMOOR, Ph.D. (Professor of Mathematics in the College of Arts and Sciences), Chairman
- URI PEARL DAVIS, M.A. (Instructor in Mathematics in the College of Arts and Sciences)
- BERNARD FRANCIS DOSTAL, M.A. (Assistant Professor of Mathematics in the College of Arts and Sciences)
- JOSEPH HARRISON KUSNER, Ph.D. (Assistant Professor of Mathematics in the College of Arts and Sciences)
- Samuel W. McInnis, M.A. (Assistant Professor of Mathematics in the College of Arts and Sciences)
- CECIL GLENN PHIPPS, Ph.D. (Associate Professor of Mathematics in the College of Arts and Sciences)

- ZAREH MEGUERDITCH PIRENIAN, M.S. (Assistant Professor of Mathematics in the College of Arts and Sciences)
- EDWARD SCHAUMBERG QUADE, Ph.D. (Instructor in Mathematics in the College of Arts and Sciences)
- THOMAS MARSHALL SIMPSON, Ph.D. (Head Professor of Mathematics in the College of Arts and Sciences)
- ROBERT DICKERSON SPECHT, B.A. (Instructor in Mathematics in the College of Arts and Sciences)

#### C-5. THE HUMANITIES

- James David Glunt, Ph.D. (Associate Professor of History and Political Science in the College of Arts and Sciences), Chairman
- HENRY HOLLAND CALDWELL, M.A. (Associate Professor of English in the College of Arts and Sciences)
- FREDERICK WILLIAM CONNER, M.A. (Instructor in English in the College of Arts and Sciences)
- Burton Alviere Milligan, M.A. (Assistant Professor in the General College)—(on leave 1938-39)
- WILLIAM EDGAR MOORE, M.A. (Assistant Professor of English in the College of Arts and Sciences)
- CLAUDE LEON MURPHREE, B.A., F.A.G.O. (University Organist)
- OSWALD C. R. STAGEBERG, B.S. in Arch. (Assistant Professor in the General Collegepart time)
- COMER VANN WOODWARD, Ph.D. (Assistant Professor of Social Sciences and the Humanities in the General College)

#### C-6. MAN AND THE BIOLOGICAL WORLD

- James Speed Rogers, Ph.D. (Head Professor of Biology and Geology in the College of Arts and Sciences), Chairman
- CHARLES FRANCIS BYERS, Ph.D. (Assistant Professor of Biology in the College of Arts and Sciences)
- ARCHIE FAIRLY CARR, Ph.D. (Instructor in the General College)
- THEODORE HUNTINGTON HUBBELL, Ph.D. (Professor of Biology and Geology in the College of Arts and Sciences)
- CHARLES ISAAC MOSIER, B.A. (Instructor in Psychology in the College of Arts and Sciences)
- Pettus Holmes Senn, Ph.D. (Associate Professor of Farm Crops and Genetics in the College of Agriculture)
- HOWARD KIEFER WALLACE, M.S. (Instructor in Biology in the College of Arts and Sciences)

THE FLORIDA STATE MUSEUM

THE UNIVERSITY LIBRARY

THE STUDENT HEALTH SERVICE

THE BUREAU OF VOCATIONAL GUIDANCE AND MENTAL HYGIENE

## NOTICE TO PROSPECTIVE STUDENTS

- 1. Applications for admission on regulation University blanks provided for this purpose should be submitted to the Registrar immediately after the end of the spring term, and in no case later than September 1, 1938. Applications will not be considered unless received by September 1, 1938. These blanks may be secured from the principal of any Florida high school or from the Registrar of the University of Florida. The prospective student should fill out an application (Form I) and mail it to the Registrar, and request the high school principal to fill out Form II, which includes the student's high school record. The principal will then send Form II directly to the Registrar.
- 2. All prospective students must take and pass the Placement Tests, besides fulfilling the other requirements, before they will be eligible for admission. Prospective students who did not take these tests in the Spring Testing Program in the high schools of the State may take them at the University during the summer. The tests will be given at 1 P.M. on alternate Saturdays, beginning June 11, in Room 106, Agriculture Building. Students are advised to take the tests at the earliest possible testing period, so they may be advised as to their eligibility for admission. Admission certificates will not be issued until the Placement Tests have been passed.
- 3. Prospective students are advised to be vaccinated against smallpox and to be inoculated against typhoid fever. Unless a certificate is presented showing successful vaccination within five years, students will be vaccinated against smallpox at the time of registration.
- 4. Students entering the University as freshmen are required to participate in the activities of Freshman Week, September 13-17.

#### INTRODUCTORY STATEMENT

The General College has been organized to administer the work of the freshman and sophomore years in the University of Florida. All beginning students will register in this College.

The average student will be able to complete the work of the General College in two years, while superior students may finish the curriculum in a shorter time, and others may find it necessary to remain in the General College for a longer period.

A program of general education is worked out for all students. In this program the University recognizes that broad basic training is needed by all students. To this foundation that has meaning and significance to the student, he may add the special training of the colleges and professional schools of the Upper Division, or drop out of the University with something definite and helpful as he begins his adult life as a citizen. The purposes of the General College are as follows:

- 1. To offer an opportunity for general education and to provide the guidance needed by all students. Thus the choice of professional work is postponed until the student is better acquainted with his capacity and disposition to undertake work that will be profitable to himself and society.
- 2. To broaden the base of education for students who are preparing for advanced study in the colleges and professional schools of the Upper Division, thereby avoiding the handicap of narrow specialization.
- 3. To satisfy the needs of those who have only a limited time to give to college training, and consequently should concern themselves with general viewpoints and major understandings, instead of with introductions to special subject matter fields which they may never enter.
- 4. To provide for the constant adjustments required in higher general education incident to the changing conditions of modern life. The subject matter of the various courses and the methods of presentation are to be constantly varied in order to awaken the interest of the student, to stimulate his intellectual curiosity, to encourage independent study, and to cultivate the attitudes necessary for enlightened citizenship.
- 5. Guidance. Every part of the General College program is designed to guide students. It was felt that too much of the freshman and sophomore work of former years had little meaning and significance to the vast majority. The material studied was preparatory and foundational, and became meaningful only when the student pursued additional courses in the junior and senior years. The material of the comprehensive courses is selected and tested with guidance as a primary function. While, of necessity, we must look forward to distant goals, the General College is trying to present materials that are directly related to life experiences and will immediately become a part of the student's thinking and guide him in making correct "next steps". Thus the whole program—placement tests, progress reports, vocational aptitude tests, selected material in the comprehensive courses, student conferences, provisions for superior students, adjustment for individual differences, election privileges, and comprehensive examinations—are all parts of a plan designed to guide students.

Thus guidance is not attempted at one office by one individual with a small staff. The whole drive of the General College program is one of directing the thinking of the student. While the necessary correlation and unifica-

tion is attempted at the General College Office, throughout the General College period students consult upper division deans and department heads to discuss future work. During the last month of each school year these informal conferences are concluded by a scheduled formal conference, at which each student fills out a pre-registration card for the coming year.

### ADMISSIONS\*

The University of Florida does not require any specific high school units for admission to its General College. However, students must have certain skills and attainments in the four major fields of high school study: namely, English, mathematics, science, and social science. The attainments now required for University admission are not guaranteed by the acquisition of high school credits. On the other hand, the attainments are possible without specific high school class attendance. Thus, while freedom is given to the high schools to organize a program which offers the greatest good to the greatest number, it is expected that the individual student will present a unified program.

#### FLORIDA STUDENTS

The following items will be considered in admitting students to the General College of the University of Florida:

- 1. Graduation from high school.\*\*
- 2. Consistency of the high school record of the student.
- 3. Achievement in high school.
- 4. Personal qualities.
- 5. Recommendation of high school principal.
- 6. Standing on Placement Tests.

#### NON-FLORIDA STUDENTS

In addition to the requirements listed for Florida students, non-Florida students are required to file preliminary credentials satisfactory to the Board of University Examiners. The Board then will determine the eligibility of such students to take the Placement Tests. However, permission to come to Gainesville to take these tests does not guarantee admission to the General College, and all such students will come to Gainesville at their own risk of being refused admission if the results of the tests are not satisfactory.

#### SPECIAL STUDENTS

Special students may be admitted either to the General College or to the various colleges of the University (except the College of Law, to which special students are never admitted) only by approval of the Board of University Examiners. Applications for admission of these students must include:

- 1. The filing of satisfactory preliminary credentials.
- 2. A statement as to the type of studies to be pursued.

<sup>\*</sup>Expenses and fees will be found on pages 243 to 245.

<sup>\*\*</sup>Graduation from high school is required, although no specific high school units are required. The Board of University Examiners may in rare cases, when the principal of the high school the student has attended recommends such action, permit an exceptional student, before graduation, to take the Placement Tests; if the student passes these tests satisfactorily, he will be admitted to the General College. Mature students, lacking a formal high school education, but nossessing because of some other training the necessary admission requirements, may petition the Board of University Examiners for permission to take the Placement Tests and the College Aptitude Test; upon satisfactorily passing these tests, such students will be admitted to the General College.

- 3. Reason for desiring to take special courses.
- 4. Satisfactory evidence of ability to pursue these studies.

#### PREPARATION FOR UPPER DIVISION CURRICULA

Students who have definitely made a choice of the occupations or professions they will follow and who expect to enter a certain curriculum of the Upper Division upon completion of the General College work, may profit by following the suggestions given here.

#### MEDICINE AND DENTISTRY

Entering students who have definitely decided to study medicine or dentistry should notify the Dean of the General College of this choice, in order that a program can be worked out that will satisfy both the requirements of general education and those necessary to enter the medical or dental schools. It is possible for exceptional students to complete the minimum pre-medical requirements in two years. However, less than eight per cent of those admitted to medical schools have less than three or four years of college preparation. To a large extent, students admitted to a medical school with only two years of preparation have done their pre-medical work in the University of which the Medical School is a part.

#### OTHER CURRICULA

Certain curricula of the Upper Division require a working knowledge of foreign language. Students contemplating entering such curricula could with profit begin this study in the high school.

Students expecting to study engineering need a thorough training in mathematics. An effort should be made by such students to obtain the broadest possible mathematical training in the high school. These students should obtain, either in high school or by private arrangement, or by correspondence study, knowledge of elementary mechanical drawing, so as to be able to: (1) letter upper and lower case standard letters neatly and accurately; (2) trace drawings neatly with India ink, using both ruling pens and compasses. The student should obtain either in high school or in outside practice some knowledge of elementary woodworking, so that he will: (1) know the names and uses of all woodworking tools; (2) be able to drive a nail straight; (3) be able to saw a straight line both with the crosscut and ripsaw; (4) be able to square the end of a board.

Students who expect to study architecture or building construction should obtain a thorough foundation in mathematics and the physical sciences.

For information concerning the prerequisites for admission to the colleges and professional schools of the Upper Division, the prospective student should consult the Bulletin of Information for the Upper Division. This will enable the student to make the proper pre-college preparation for the curriculum of his choice.

#### ADMISSION OF ADVANCED STANDING STUDENTS

The Board of University Examiners will determine the advanced standing of students entering from other colleges. In general, the policies of the Board of University Examiners will be as follows:

 All students must present training equivalent to the work of the General College, and in some cases will be required to pass the prescribed comprehensive examinations.

- 2. Students with poor records from other institutions will not be admitted to the University of Florida. Students whose average is below "C" should not apply for admission to the University, and students whose average is only "C" are not guaranteed admission.
- The Board of University Examiners, in the case of transfer students with high or superior records, may vary the requirements for admission to the colleges and professional schools of the Upper Division to the best interest of the student.

#### GENERAL REGULATIONS

#### METHOD OF REGISTRATION

The requirements for admission are found in the first part of this bulletin. Registration procedure will be outlined in detail in the program supplied the student at his first meeting during Freshman Week.

No student is properly registered until all fees have been paid.

To drop a course from his schedule, to add a course, or to change a section, a student should report to the Dean of the General College. Final dates for such changes will be found in the University Calendar.

Students should notice carefully the registration dates listed in the University Calendar. Late registration fees will be charged all students registering at any time after the regular registration period.

#### ACADEMIC CREDITS ABOLISHED

The General College has dispensed with clock hours, class grades, and semester hours credit as prerequisites to the completion of its curriculum.

#### PROGRESS REPORTS

Progress reports will be made by instructors during each semester to indicate the progress the student appears to be making in his work. The student should understand that these reports are only diagnostic in nature, and in no way are added to the Comprehensive Examination to determine the final standing in the course. The progress reports will also serve to acquaint the parents and the Dean of the General College with the student's progress. Progress tests in each course will be given frequently. The results of these tests, together with other indications of progress, will form a progress profile designed to be a constant incentive to both instructor and student.

The progress reports, for the above purpose, will indicate the student's progress (1) by a percentage profile chart, and (2) by the instructor's rating of Excellent, Good, Average, Fair, or Poor, and (3) by the student's estimate of his own progress. It is often necessary to schedule progress tests on Saturdays or during evenings.

#### ATTENDANCE

If any student accumulates absences or fails to do class work to the extent that further enrollment in the class appears to be of little value to him and detrimental to the best interest of the class, it shall be the duty of the instructor to warn such student in writing that further absences or failure to do class work will cause him to be dropped from the course with a failing grade. Where possible this warning will be delivered personally; otherwise, it will be mailed to the student's last University address by the Registrar. Instructors shall immediately report all such warnings to the Course Chairman or Department Head.

Should any absences or failure to do class work be incurred after this warning, the student will be dropped from the course and be given a failing grade. Should be be dropped from more than one course his case will be considered by the Committee on Student Progress who may rule that he be dropped from the University and his record marked "Dropped for Non-Attendance" or "Dropped for Unsatisfactory Work" as the case may be.

#### FAILURE IN STUDIES

The Committee on Student Progress will consider the record of each student in the General College at the end of each session, and will report to the Administrative Board of the General College the names of those students whose further attendance at the University appears to be of doubtful value. The students concerned will be called before the Committee and the facts of each case will be thoroughly considered before final action is taken. Failure to attend classes, to take progress tests, or to take the comprehensive examination at the end of a course may be interpreted as evidence of unsatisfactory progress. If further enrollment at the University appears to be of little value to a student, the Committee may advise the parent to withdraw the student.

## PROGRAM OF STUDIES

For all students who enter the University of Florida.

#### FIRST YEAR

## C-1.—Man and the Social World

C-2.—Man and the Physical World

C-3.—Reading, Speaking, and Writing

C-41.—Man and His Thinking (one semester)

C-42.—General Mathematics (one semester)

X.—Military Science or Physical Education

#### SECOND YEAR

C-5.—The Humanities

C-6.—Man and the Biological World

C-7.—(Elective)\*

C-8.—(Elective)\*

C-9.—(Elective)\*

Y.—Military Science or Physical Education

Except as indicated below, all students must take four comprehensive courses the first year and two the second year. For the remainder of his work the student elects additional comprehensive courses or courses required by the colleges and professional schools of the Upper Division (see pages 233 to 237). Comprehensive courses normally meet four times a week.

The major provisions for individual differences of students are as follows:

C-2.—This course is elective for students of the superior group of the entering class as determined by the Board of University Examiners, if such students begin science programs which include at least two physical science subjects. Other students, with permission, may postpone C-2 until the second year and substitute elective C-7 in its place.

<sup>\*</sup>C-7, C-8, and C-9 must together amount to 8 or more hours a week, throughout the year. Three laboratory hours will be counted as one hour. Any course described or listed in this Bulletin may be substituted for C-7, C-8, and C-9 with certain exceptions as are stated in this Bulletin.

- C-4.—This course is elective for students of the superior group of the entering class.
- C-6.—Students who are especially interested in, or contemplate further work in, either Biology or Botany may, if their work by the end of the first progress reports in December be clearly above the average of the class, then elect either of the laboratory courses, Bly. 61 or Bty. 61, designed to parallel and supplement the lectures and discussions of C-6.

A final standing in the upper half of C-6 and a satisfactory completion of Bly. 61 are accepted as a first year course in College Biology and a substitute for Bly. 101-102 when used as a prerequisite for advanced courses in the Department of Biology. In a like manner, C-6 and Bty. 61 are accepted as a first year course in College Botany and a substitute for Bty. 101-102 when used as a prerequisite for advanced courses in the Department of Botany.

#### COURSES

Courses offered for General College students fall in two groups. The first group consists of courses especially designed and integrated with the General College Program. The second group consists of courses offered in the various departments, some of which are integrated with the General College Program, and some of which are specialized courses required by one or more of the colleges for admission to the Upper Division. (See pages 238 to 242.)

#### COMPREHENSIVE EXAMINATIONS

The student must successfully pass comprehensive course examinations—eight or more—to complete the work of the General College. These examinations, administered by the Board of University Examiners, will be given in January, May and August of each year. General College students who are not enrolled in a course at the time the examination is given and who wish to take any comprehensive examination, must apply in writing to the Board of University Examiners for permission at least one month before the announced date for the examination. Before the application is accepted, the applicant will be required to furnish the Board of Examiners with proof that this privilege has not been used to avoid the payment of the usual University fees. A student must be familiar with the work of the various courses and be able to think in the several fields in a comprehensive way in order to pass these examinations. Six hours time, divided into equal parts, will be required for each examination covering a full year course.

Should a student fail a comprehensive course examination, he may qualify to repeat the examination by repeating the course, or by further study. Evidence of additional preparation must be submitted to the Board of University Examiners with an application in writing to repeat the examination.

#### GRADUATION

When a student has completed his program in the General College and has passed his comprehensive examinations and met the other requirements of the General College curriculum, he will be granted the Associate of Arts Certificate. Students who pass three-fourths of the comprehensive examinations with the standing "Excellent" will, on graduation from the General College, receive the certificate of Associate of Arts, With High Honors.

#### MILITARY SCIENCE AND PHYSICAL EDUCATION

All students will be required to take Military Science, unless exempt because of physical disability, age, or for other reasons set forth in the University By-Laws. Exemptions will be determined before registration, and only those students so exempt will be required to take Physical Education. Either Military Science or Physical Education will be taken for two years by all students except those exempt from both courses.

#### MAXIMUM AND MINIMUM LOADS

The average load for all students will be four comprehensive courses and Military Science or Physical Education. Deviations may be permitted by the Dean of the General College.

#### WITHDRAWAL FROM THE UNIVERSITY

A student wishing to withdraw from the University during any semester or at the end of the first semester should report to the Office of the Registrar and secure a blank to be executed for this purpose. Failure to comply with this requirement makes a student liable for dismissal for non-attendance or for failure in studies, and subject to payment of failure fees when and if he re-enrolls in the University.

#### WOMEN STUDENTS

The University of Florida is an institution for men only, except during the summer session. Under certain circumstances women students may be admitted to the professional schools. For information concerning the admission of women students, the Registrar should be consulted.

#### BIOLOGICAL SCIENCES

C-6. (61-62).—Man and the Biological World. 4 hours or more per week throughout the year.

Designed to give the student a general knowledge and appreciation of the world of living things. The biological problems and principles that are associated with the organism's role as:
(1) a living individual, (2) a member of a race, (3) a product of evolutionary processes, and (4) a member of a socially and economically inter-related complex of living organisms, supply the main sequence and material of the course. Special attention is given to man's place in the organic world and to human qualities that have a biological basis.

Bly. 61.—Laboratory Course in Animal Biology. Elective for students in the upper half of C-6.

An elective taboratory course in animal biology, designed to parallel and supplement the work of C-6 and to give training in laboratory methods and technique. This course witl begin in December when the results of the first progress reports are known. The period from December until the end of the first semester will not require formal registration and will permit the student to determine whether he wishes to continue the course. Those who wish to continue the course for credit will register for Bly. 61 at the beginning of the second semester.

Bty. 61.—Laboratory Course in General Botany. Elective for students in the upper half of C-6.

An elective laboratory course on the structure and behavior of plants, designed to parallel and supplement the work of C-6 and to give training in laboratory methods technique. This course will begin in December when the results of the first progress reports are known. The period from December until the end of the first semester will not require formal registration and will permit the student to determine whether he wishes to continue the course. Those who wish to continue the course for credit will register for Bty. 61 at the beginning of the second semester.

CAg. 63.—Animal Science. 4 or more hours per week throughout one semester. Offered the first semester.

Designed to deal with the fundamental principles of agriculture, pertaining to the many phases of animal husbandry including, origin of breeds of livestock, feeds and feeding, meat and meat products, poultry husbandry, farm sanitation as applied to animal production, dairy cattle, beef, and swine production.

CAg. 64.—Conservation, Economics and Engineering in Agriculture. 4 or more hours per week throughout one semester. Offered the second semester.

This is an introductory course into the fields of Conservation as applied to Forestry; Economics as applied to the individual farm and the agricultural industry; and engineering as applied to farm operation. In addition, the course is designed to assist the student in choosing the field in which he may wish to specialize.

CAg. 65-66.—Plant Science. 4 or more hours per week throughout the year. Designed to give the student a broad viewpoint in the field of agriculture, as well as the fundamental knowledge involved in the production of economic plants. A wide scope of subject matter is included in order to assist in guiding the student who anticipates technical agricultural courses.

#### THE HUMANITIES

C-4. (41).—Man and His Thinking. 4 or more hours per week during one semester. Offered each semester.

Both in private life and vocational life man is faced with the necessity of making decisions and of solving problems. The principal aims are (1) to develop ability to think with greater accuracy and thoroughness, and (2) to develop ability to evaluate the thinking of others. The material used applies to actual living and working conditions. The case method is used to insure practice, and numerous exercises are assigned.

C-5. (51-52).—The Humanities. 4 or more hours per week throughout the year.

An attempt is made to help the student lay a broad foundation for cultured living. While it is impossible to provide an adequate survey of the broad field, immediate help is given in attaining desirable understandings, attitudes, and dispositions. Students react every day to all culture; material is therefore presented from this and past civilizations to condition this reaction. Even though culture is thought of as timeless, ageless, and not belonging to any particular nation or people, the course concerns itself largely with the culture of the Western World.

CBe. 53.—Foundation of Bible Study. 3 hours per week during one semester. Offered each semester.

Through selected readings from the Bible and through comment, the student will be introduced to the dominant personalities and historical periods of the Hebrew people in their relations to people of other cultures, and to the rise and extension of Christianity through the first century.

CPp. 54.—Introduction to Philosophy. 3 hours per week during one semester. This course attempts to serve as a broad survey of philosophic problems and especially modern philosophic problems, such as evolution, the moral consciousness, progress, the principles of aesthetics, and the meaning of religion. It is a foundation course.

#### LANGUAGE

C-3. (31-32).—Reading, Speaking, and Writing. 4 or more hours per week throughout the year.

Designed to furnish the training in reading, speaking, and writing necessary for the student's work in college and for his life thereafter. This training will be provided through practice and counsel in oral reading, in silent reading, in logical thinking, in fundamentals of form and style, in extension of vocabulary, and in control of the body and voice in speaking. Students will be encouraged to read widely as a means of broadening their interests and increasing their appreciation of literature.

CEh. 33.—Effective Writing. 4 or more hours per week during one semester. Offered each semester. Prerequisite: C-3, or permission of C-3 Course Chairman. Open to Upper Division students.

Designed to aid the student to present his ideas in writing which is not only accurate and clear but pleasing and attractive to the reader. Students are encouraged to do creative work.

CEh. 34.—Reading for Leisure. 4 or more hours per week during one semester. Offered each semester. Prerequisite: C-3, or permission of C-3 Course Chairman. Open to Upper Division students.

Designed to aid the student in planning for himself a well-rounded, leisure-reading program, which will serve to keep him abreast of the best in contemporary thought and literature,

CEh. 35-36.—Literary Masters of America. 3 hours per week either semester or throughout the year.

The writers emphasized are selected from the most eminent American authors between Irving and Frost, such writers as everyone should or would like to know, regardless of his intended vocation.

CEh. 37-38.—Literary Masters of England. 3 hours per week either semester or throughout the year.

The most interesting and significant English writers are read and discussed, primarily for an appreciation of their art and outlook on life. Prospective English Majors should elect this course the sophomore year.

CEh. 313-314.—Masterpieces of World Literature. 3 hours per week either semester or throughout the year.

A lecture and reading course designed to acquaint the student with some of the greatest books in the world, books which every educated man should know.

CFh. 33-34.—Reading of French. 3 hours per week throughout the year. Open to General College freshmen in the superior group, to General College sophomores, and to Upper Division students. Prerequisite to advanced courses in French.

A beginning course, basic for further study. The main objective is the attainment of the maximum reading ability that can be developed in one year. Grammar and pronunciation are subordinated. Reading of easy texts is begun at once.

CGn. 33-34.—The Reading of German. 3 hours per week throughout the year. Open to General College students in the second year, to students of the superior group the first year, and to Upper Division students. Prerequisite to advanced courses in German.

This course is designed to give students an opportunity to attain, without stressing formal grammar, a moderate proficiency in the reading of German. Hagboldt, Allerlei, Fabeln.

CSh. 33-34.—The Reading of Spanish. 3 hours per week throughout the year. Open in the second year to General College students; open in the first year to General College students of the superior group, and to Upper Division students.

Designed to give students an opportunity to attain, without stressing formal grammar, a moderate proficiency in the reading of Spanish.

CSc. 33.—Effective Speaking. 4 hours per week during one semester. Offered each semester. Prerequisite: C-3. Prerequisite to advanced courses in Speech.

Designed to aid the student through demonstration and practice to talk effectively to a group.

### PHYSICAL SCIENCES

C-2. (21-22).—Man and the Physical World. 4 or more hours per week throughout the year.

An attempt to survey the phenomena of the physical universe with particular reference to man's immediate environment; to show how these phenomena are investigated; to explain the more important principles and relations which have been found to aid in the understanding of them; and to review the present status of man's dependence upon and ability to utilize physical materials, forces, and relations. The concepts are taken mainly from the fields of physics, chemistry, astronomy, geology, and geography, and they are so integrated as to demonstrate their essential unity. The practical and cultural significance of the physical sciences is emphasized.

C-4. (42).—General Mathematics. 4 or more hours per week during one semester. Offered each semester.

Designed to acquaint the student with the general nature of mathematics, the manner in which the mathematical mode of thought is used in the world of today, and the role it has occupied in the development of that world. A survey of some of the fundamental principles and methods of procedure in the main branches of elementary mathematics, with considerable attention being given to the utilization and cultural importance of the subject and its relations to other branches of knowledge.

CAy. 23.—Descriptive Astronomy. 3 hours, and 2 hours laboratory-observing, during the first semester.

A survey of the astronomical universe. The earth as an astronomical body; the solar system; stars and nebulae; the galaxy; the constellations; astronomical instruments and their uses; amateur telescope making.

CMs. 23-24.—Basic Mathematics. 4 or more hours per week throughout the year. Prerequisite: C-42 except for the superior group in Mathematics.

In place of the traditional college algebra, trigonometry, and analytic geometry in succession, this course offers a completely new sequence of topics including much of the above plus a liberal amount of the calculus. Thus the student will obtain early a working knowledge of such mathematics as is basic to the study of the sciences and other subjects, and needed for the cultivation of habits productive of clear thinking, writing, and speaking. Moreover, the choice of material is so made as to present mathematics as an integrated whole, and at the same time to show its correlation with other subjects in the curriculum.

## SOCIAL SCIENCES

C-1. (11-12).—Man and the Social World. 4 hours per week throughout the year.

Designed to develop and stimulate the ability to interpret the interrelated problems of the modern social world. The unequal rates of change in economic life, in government, in education, in science, and in religion are analyzed and interpreted to show the need for a more effective coordination of the factors of our evolving social organization of today. Careful scrutiny is made of the changing functions of social organizations as joint interdependent activities so that a consciousness of the significant relationships between the individual and social institutions may be developed, from which consciousness a greater degree of social adjustment may be achieved.

CEs. 13.—Economic Foundations of Modern Life. 5 hours per week during one semester. Offered each semester. Prerequisite: C-1.

Emphasis on the functioning of the economic system. Economic organization and institutions as parts of the economic order in their functional capacities. The understanding of economic principles and processes, especially those relating to value, price, cost, rent, wages, profits, and interest, insofar as such knowledge is necessary in understanding the economic situation of the present day. The evaluation of economic forces and processes in terms of their contribution to social well being. Prerequisite for advanced standing in Economics and Business Administration.

CBs. 14.—Elementary Accounting. 5 hours per week during one semester. Offered each semester.

Designed to provide the basic training in accounting. Prerequisite for advanced standing in Economics and Business Administration.

CEs. 15.—Elementary Statistics. 3 or more hours per week during one semester. Offered each semester.

The statistical method as a tool for examining and interpreting data; acquaintance with such fundamental techniques as find application in business, economics, biology, agriculture, psychology, sociology, etc.; basic preparation for more extensive work in the field of statistics. Prerequisite for advanced standing in Economics and Business Administration.

CEn. 13.—Introduction to Education. 3 hours per week during second semester.

An attempt is made to foreshadow the field of Education so that the student may see the whole field before he studies its detailed and technical parts. Butterwick and Seegers, An Orientation Course in Education.

10

CHy. 13.—History of the Modern World. 4 hours per week during one semester. Offered each semester. Prerequisite: C-1. Designed for General College students. Prerequisite to advanced courses in History.

The historical background of present day civilization is considered insofar as that background has been developed in the fabric of the historical movements since 1815. The political, economic, social, religious, artistic, and cultural aspects of the nineteenth and twentieth centuries are studied.

CPl. 13.—Political Foundations of Modern Life. 4 hours per week throughout one semester. Offered each semester. Prerequisite: C-1. Designed for General College students. Prerequisite to advanced courses in Political Science.

An examination of the principles and practices of our political institutions; how government functions in the United States; what information can be drawn from the practices of other countries.

Recommended for students who intend to take advanced work in political science.

CSy. 13.—Sociological Foundations of Modern Life. 4 hours per week during one semester. Offered each semester. Prerequisite: C-1 or extra reading.

Meaning and scope of sociology; relation to other social studies. The individual and various social groups and processes. Social disorganization and reorganization.

Special emphasis on concrete community studies. Visits will be made to various state institutions and philanthropic agencies.

## ADDITIONAL ELECTIVE COURSES OR COURSES SPECIFIED FOR ADMISSION TO CERTAIN CURRICULA OF THE UPPER DIVISION

(Descriptions of departmental courses will be found in the Bulletin of Information for the Upper Division.)

- Ae. 11A.—Fundamentals of Architecture
- Cy. 101-102.—General Chemistry
- Cy. 201-202.—Analytical Chemistry
- Cl. 223, 226, 229.—Surveying, Higher Surveying
- HPl. 203-204.—Introduction to Athletic Coaching and Physical Education
- In. 111-112.—Industrial Arts Mechanical Drawing
- In. 211-212.—Industrial Arts General Shop
- Ig. 261-262.—Introduction to Engineering
- Jm. 213-214.—Public Opinion, Introduction to Journalism
- Jm. 215-216.—History of American Journalism, Principles of Journalism
- Ms. 253-254.—Differential and Integral Calculus
- Ml. 181-182.—Engineering Drawing, Descriptive Geometry
- Ml. 287-288.—Mechanism and Kinematics, Elementary Design
- Pg. 11A.—Fundamentals of Pictorial Art
- Pgy. 221-222.—Practical Pharmacognosy
- Phy. 223-224.—Galenical Pharmacy
- Ps. 101-102, 103-104.—Elementary Theory of Mechanics, Heat, Sound, Electricity, and Light, and Laboratory
- Ps. 205-206, 207-208.—Principles of Mechanics, Heat, Sound, Electricty, and Light, and Laboratory

## ADMISSION TO THE UPPER DIVISION

## GENERAL REQUIREMENTS FOR ALL STUDENTS

After the student has completed the work of the General College and received a certificate of graduation, he may enter one of the colleges or professional schools of the Upper Division by meeting the specific admission requirements of that college or school. A student remaining in the General College to complete one or more specific requirements may in addition, with the approval of the Dean of the College he expects to enter in the Upper Division, take work which may count in the Upper Division.

The Board of University Examiners administers the admission requirements of the Upper Division. Besides the certificate of graduation from the General College, the student must be certified by the Board that he is qualified to pursue the work of the college or school he wishes to enter.

In addition to the general requirements stated above, the various colleges and schools of the Upper Division have specific requirements for entrance. These requirements are listed below for the curricula of the several colleges and schools. Students in the General College may prepare to meet these requirements by taking as electives the courses indicated under the various curricula presented.

The comprehensive examinations of the General College will cover the content of the courses required for admission to any specific curriculum of the Upper Division selected by the individual student.

## SPECIFIC REQUIREMENTS

### COLLEGE OF ARTS AND SCIENCES

#### BACHELOR OF ARTS

Additional requirements for admission to the curriculum leading to the degree of Bachelor of Arts:

There are no specific requirements for admission to the curriculum leading to the degree of Bachelor of Arts. However, it will be much easier to earn a major in the College of Arts and Sciences if the student elects courses in the contemplated major fields as a part of his General College program.

#### BACHELOR OF SCIENCE

Additional requirements for admission to the curriculum leading to the degree of Bachelor of Science:

There are no specific requirements for admission to the curriculum leading to the degree of Bachelor of Science. However, it is impossible to earn a major in four semesters in some departments of the College of Arts and Sciences, and it is distinctly to the advantage of the student to include as much as he can of the contemplated major field in his General College program.

#### BACHELOR OF ARTS IN JOURNALISM

Additional requirements for admission to the curriculum leading to the degree of Bachelor of Arts in Journalism:

It is strongly recommended that Journalism 213, 214, 215, and 216 be taken for electives C-7 and C-8 in the General College. Any elective may be taken for C-9. However, if they are not so taken it will be possible to arrange for them in the program of studies in the College of Arts and Sciences.

#### COMBINED ACADEMIC AND LAW CURRICULA

Additional requirements for admission to the Combined Academic and Law Curricula:

The College of Arts and Sciences offers three different curricula in combination with Law. One of them leads to the degree of Bachelor of Arts, another to the degree of Bachelor of Arts in Journalism, and the third to the degree of Bachelor of Science.

In order to complete one of these curricula in the shortest possible time, it is necessary that a student select as electives in the General College courses which will form an integral part of his major in the College of Arts and Sciences. For this purpose it is urged that before he registers for any elective in the General College he confer with the head of the department offering his contemplated major.

#### PRE-MEDICAL CURRICULUM

Additional requirements for admission to the Pre-Medical curriculum:

The requirements are the same as for admission to the Bachelor of Science curriculum.

Insofar as possible the student should elect as electives in the General College, sciences and foreign language courses required for admission to the medical college of his choice.

#### THE SCHOOL OF PHARMACY

#### BACHELOR OF SCIENCE IN PHARMACY

Additional requirements for admission to the curriculum leading to the degree of Bachelor of Science in Pharmacy:

Students planning to study pharmacy are advised to offer Cy. 101-102, General Chemistry, for C-7; Phy. 223-224, Galenical Pharmacy, for C-8; Pgy. 221-222, Practical Pharmacognosy, for C-9. Students of the superior group are advised to offer Cy. 101-102, General Chemistry, for C-2; CMs. 23-24, Basic Mathematics, for C-4; and Ps. 101-102, 103-104, General Physics, for C-7.

#### Women Students

By act of the 1935 Legislature women are permitted to enroll in the University of Florida to study pharmacy. Women are therefore admitted to the General College to meet the specific requirements for admission to the curriculum leading to the degree of Bachelor of Science in Pharmacy.

Required Curriculum for Women Students. The subjects indicated above as prerequisite to the curriculum in pharmacy must be followed without variation by women students. Women students will not take Military Science or Physical Education.

#### COLLEGE OF AGRICULTURE

Additional requirements for admission to the College of Agriculture:

Students are required to have completed the following courses as electives in the General College: Cy. 101-102. General Chemistry, for C-7; CAg. 63-64, Animal Science, for C-8; CAg. 65-66, Plant Science, for C-9.

Students entering the College of Agriculture may take a major in any one of the following departments:

Agricultural Chemistry Agricultural Economics Agricultural Education Agricultural Engineering Agronomy, including the divisions of (a) Soils

(b) Crops

Animal Husbandry, including the divisions of

- (a) Animal Production
- (b) Dairy Husbandry and Animal Nutrition
- (c) Dairy Manufactures
- (d) Poultry Husbandry

Botany and Bacteriology Entomology and Plant Pathology Horticulture

#### THE SCHOOL OF FORESTRY

Additional requirements for admission to The School of Forestry:

Students should have completed the following courses as electives in the General College: Cy. 101-102, General Chemistry, for C-7; CAg. 63-64, Animal Science. for C-8; Bty. 101-102, General Botany, for C-9.

#### THE SCHOOL OF ARCHITECTURE AND ALLIED ARTS

ARCHITECTURE, BUILDING CONSTRUCTION, AND LANDSCAPE ARCHITECTURE

Additional requirements for admission to the curricula leading to the degrees of Bachelor of Architecture, Bachelor of Science in Building Construction, or Bachelor of Science in Landscape Architecture:

Students are required to have completed the following courses as electives in the General College: Ae. 11A, Fundamentals of Architecture, for C-7 and C-8; and CMs. 23-24, Basic Mathematics, for C-9.

Students may commence Fundamentals of Architecture at any time. Those who wish to begin the work the first year in the General College may postpone C-2 until the second year and substitute half of Ae. 11A, Fundamentals of Architecture, in its place. In such cases, students will continue the work in Fundamentals of Architecture as C-8 the second vear.

#### PAINTING AND COMMERCIAL ART

Additional requirements for admission to the curricula leading to the degrees of Bachelor of Fine Arts, or Bachelor of Arts in Commercial Art:

Students are required to have completed the following courses as electives in the General College: Pg. 11A, Fundamentals of Pictorial Art, for C-7 and C-8; and any elective for C-9.

Students may commence Fundamentals of Pictorial Art at any time. Those who wish to begin the work the first year in the General College may postpone C-2 until the second year and substitute half of Pg. 11A, Fundamentals of Pictorial Art, in its place. In such cases, students will continue the work in Fundamentals of Pictorial Art as C-8 the second year.

#### COLLEGE OF BUSINESS ADMINISTRATION

Additional requirements for admission to the curriculum in Business Administration Proper or the curriculum in combination with Law, leading to the degree of Bachelor of Science in Business Administration:

Students must have completed the following courses: CEs. 13, Economic Foundations of Modern Life, CBs. 14, Elementary Accounting, CEs. 15, Elementary Statistics, for C-7, C-8, and one-half of C-9; and one additional half-year elective course for the second half of C-9.

#### COLLEGE OF EDUCATION

Additional requirements for admission to the College of Education:

All students will be required to have the approval of the Admissions Committee of the College of Education. Certain groups must meet additional requirements, as listed below:

The requirements for students whose field of concentration is to be in Health and Physical Education are HPl. 261, Football, for one-half of C-7; HPl. 263, Basketball, for one-half of C-8; HPl. 264, Track and Field, and HPl. 266, Baseball, for the second half of C-7; and electives for the second half of C-8.

The requirements for students whose field of concentration is to be in Agricultural Education are Cy. 101-102, General Chemistry, for C-7; CAg. 63-64, Animal Science, for C-8; and CAg. 65-66, Plant Science, for C-9.

The requirements for students whose field of concentration is to be in Industrial Arts Education are In. 111-112, Industrial Arts Mechanical Drawing, for C-7; In. 211-212, Industrial Arts General Shop, for C-8; and an elective for C-9.

#### COLLEGE OF ENGINEERING

Immediately upon entering the University, a student who expects to later register for a curriculum in engineering should confer with the Dean of the College of Engineering. Particular care should be used by each student in choosing subjects in the General College so that he will have the proper prerequisites for advanced subjects.

In the freshman year, by exercising the substitution privilege for C-2 and C-4 properly qualified students should take Cy. 101-102, CMs. 23-24, and Ml. 281-282. In the sophomore year, they should take Ms. 253-254, Ps. 205-206-207-208 and the lower division departmental prerequisite for C-7, C-8, and C-9.

Lower Division Departmental Prerequisites are are follows:

For	students	majoring	in	Chemical Engineering Cy. 201-202	(4.4)
For	students	majoring	in	Civil Engineering Cl. 223-226	(3.3)
For	students	majoring	in	Electrical Engineering Ml. 387-388	(3-3)
For	students	majoring	in	Industrial Engineering Ig. 261-262	(1-1)
For	students	majoring	in	Mechanical Engineering Ml. 387-388	(3-3)

The student should make every effort to complete these courses before entering the Upper Division; although he may be enrolled in the Upper Division "on probation", until he completes them.

## SUGGESTED SCHEDULES FOR CENERAL COLLEGE STUDENTS CONTEMPLATING ENTRANCE TO COLLEGE OF ENGINEERING

## Freshman Year (All Curricula)

C-1	Man and the Social World
C-3	Reading, Speaking and Writing
X	Military Science or Physical Education
Cy. 101-102	(ln lieu of C-2)—(4-4)
CMs. 23-24	(In lieu of C-4)—(4-4)
Ml. 181	Mechanical Drawing—(2-0)
Ml. 182	Descriptive Geometry—(0-2)

## Sophomore Year (All Curricula)

C-5	.The Humanities
C-6	.Man and the Biological World
Y	Military Science or Physical Education
Ps. 205-206	.Physics—(3-3)
Ps. 207-208	.Physics Laboratory—(1-1)
Ms. 253-254	Differential and Integral Calculus—(4-4)

## **EXPENSES**

## GENERAL FEES REQUIRED BEFORE REGISTRATION

	1st Sem.	2nd Sem.
General College. Freshmen	\$32.25	\$29.25
General College, Sophomores		29.25
Upper Division Students	30.75	29.25
Law College Students		39.25
Graduate School		15.00
All Non-Florida Students Pay Additional	50.00	50.00

#### DESCRIPTION OF GENERAL FEES

General Fees listed in the above table include the following:

Registration and Contingent Fee: A fee of \$15.00 per semester is charged every student. Students in the College of Law pay \$5.00 each semester.

Infirmary Fee: All students are charged an infirmary fee of \$3.75 per semester which secures for the student in case of illness the privilege of a bed in the infirmary and the services of the University Physician and professionally trained nurses, except in cases involving a major operation. A student requiring an emergency operation, which is not covered by the fee assessed, may employ the services of any accredited physician whom he may select, and utilize the facilities of the infirmary for the operation. To secure this medical service, the student must report to the physician in charge of the infirmary. When the operating room is used a fee of \$5.00 is charged. Board in the infirmary is charged at the rate of \$1.00 a day.

Student Activity Fee: This fee is assessed to maintain and foster athletic sports, student publications, and other student activities. Student fees are passed by a vote of the student body and approved by the Board of Control before they are adopted.

Swimming Pool Fee: A fee of .50c per semester is charged all students for use of the lockers and supplies at the swimming pool.

Military Fee: A fee of \$1.50 is charged all students registered for Military Science.

## TUITION

Classification of Students.—For the purpose of assessing tuition, students are classified as Florida and non-Florida students.

A Florida student, if under twenty-one years of age, is one: (1) whose parents have been residents of Florida for at least twelve consecutive months next preceding his registration; or (2) whose parents were residents of Florida at the time of their death, and who has not acquired residence in another state; or (3) whose parents were not residents of Florida at the time of their death but whose natural guardian has been a resident of Florida for at least twelve consecutive months next preceding his registration. A Florida student, if over twenty-one years of age, is one (1) whose parents are residents of Florida (or were at the time of their death) and who has not acquired residence in another state; or (2) who, while an adult, has been a resident of Florida for at least twelve consecutive months next preceding his registration; or (3) who is the wife of a man who has been a resident of Florida for at least twelve consecutive months next preceding her registration; or (4) is an alien who has taken out his first citizenship papers and who has been a resident of Florida for at least twelve consecutive months next preceding his registration.

All students not able to qualify as Florida students are classified as non-Florida students.

If the status of a student changes from a non-Florida student to a Florida student, his classification may be changed at the next registration thereafter.

No tuition, except in the College of Law, is charged Florida students.

Non-Florida students, including those pursuing graduate work, pay a fee of \$50 per semester in addition to the fees charged Florida students.

A fee of \$10 in addition to the fee for non-Florida students will be charged all students registering incorrectly. The burden of proof as to residence is with the student.

#### SPECIAL FEES

Fees which apply in special cases only are listed below:

#### LABORATORY FEES

There are no laboratory or course fees.

#### BREAKAGE FEE

Any student registering for a course requiring locker and laboratory apparatus in one or more of the following departments is required to buy a breakage book: Chemistry, Pharmacy, Biology, and Soils. This book costs \$5. A refund will be allowed on any unused portion at the end of the year, when the student has checked in his apparatus to the satisfaction of the departments concerned.

#### LATE REGISTRATION FEE

A fee of \$5 is charged all students who do not complete their registration on the dates set by the University Council and published in the Calendar. Registration is not complete until all University bills are paid, and any who fail to meet their obligations are not regarded as students of the University.

#### ROOM RESERVATION FEE

Students wishing to reserve rooms in the dormitories must pay a room reservation fee of \$10 at the time such reservation is made. The fee is retained as a deposit against damage to the room and its furnishings. The fee, less charges for any damage done to the room by the student, is refunded when he returns his key and gives up his room at the end of the scholastic year.

#### SPECIAL EXAMINATION FEE

A fee of \$5 is charged for each examination taken at a time other than that regularly scheduled.

#### LIBRARY FINES

A fine of 2 cents a day is charged for each book in general circulation which is not returned within the limit of two weeks. "Reserve" books may be checked out overnight, and if they are not returned on time the fine is 25 cents for the first hour and five cents an hour or fraction of an hour thereafter until they are returned. No student may check out a book if he owes the Library more than 50 cents in fines.

#### NON-RESIDENT PENALTY FEE

A fee of \$10 in addition to the fee for non-Florida students will be charged all students registering incorrectly. The burden of proof as to residence is on the student.

EXPENSES 245

#### FAILURE FEES AND EXAMINATION FEES

In lieu of a reexamination fee, a failure fee is charged for each failing grade a General College student has received since he last paid registration fees. This fee is assessed according to the following schedule and must be paid before the student is permitted to continue in the University:

Each failing grade in C-1, C-2, C-3, C-41, C-42, C-5, or C-6	. \$5.00
Each semester hour failed in all other courses	. 2.50

A non-refundable fee of \$1, payable on the day of application, is charged for each application for a comprehensive examination. Applications are necessary only in case the student is not currently registered in the course concerned.

## FEES FOR ADULT SPECIAL STUDENTS

Adult special students who carry 9 hours or less will be charged the registration and contingent fee of \$15 a semester and a proportionate part of any tuition fee assessed on the basis of a normal load of 15 semester hours. These students will not be entitled to any of the privileges attached to any other University fee.

## SUMMARY OF EXPENSES FOR THE YEAR

	Minimum	Maximum
General Fees and Course Expenses	.\$ 60.00*	\$ 62.25*
Books and Training Supplies for the Year	30.00	50.00
Laundry and Cleaning	25.00	35.00
Room and Board		300.00
,		
Estimated total expense	.\$319.50*	\$447.25*

<sup>\*</sup>Non-Florida students are charged \$100 tuition per year in addition.

#### REFUNDS

Students resigning before they have attended classes for three days are entitled to a refund of all fees except \$5 of the registration and contingent fee. This \$5 is the cost of service in registering the student and is never refunded.

#### ROOM AND BOARD

#### DORMITORIES

The University operates three dormitories, the New Dormitory, Thomas Hall, and Buckman Hall, together accommodating about five hundred students. It is recommended that freshmen room in one of the dormitories for at least the first year. Accordingly, preference is given freshmen applying for rooms in the dormitories.

Rooms in the dormitories are partially furnished. Students must provide their own bedding, towels, and toilet articles. Janitor and maid service is provided. Student monitors, of whom the president of the student body is head, supervise the conduct of students in the dormitories. Students are not permitted to cook in the dormitories.

All dormitory rooms are furnished with beds, chifforobes, study tables, and chairs. Lasy chairs may be secured at a rental charge of \$1 per semester. Different accommodations are provided in the three dormitories.

New Dormitory.—The New Dormitory is of strictly fireproof construction. Most of the rooms are arranged in suites of two rooms, a study and a bedroom, accommodating two students. A limited number of single rooms and several suites for three students are available. All rooms are equipped with lavatories, while adjacent bathrooms provide hot and cold showers.

Thomas Hall.—Sections A, C, D, E, and F have been remodeled throughout, making available both single and double rooms. All rooms in these sections, with exception of double rooms in Section D, are equipped with lavatories. In other sections the rooms are arranged in suites, consisting of study and bedroom, accommodating three students.

Baths, with lavatories and hot and cold showers, are located on each floor of each section, thus providing a bathroom for each four suites.

Buckman Hall.—Rooms in Buckman Hall are arranged in suites of study and bedrooms accommodating three students. Baths, with lavatories and hot and cold showers, are located on each floor of each section, thus providing bathroom facilities for each four suites.

Room Rent.-Rooms in the dormitories are rented to students at the following rates:

#### ROOM RENT PER STUDENT PER SEMESTER

Ne	w Dormitory	Thomas	Buckman
Single rooms, 1st, 2nd, 3rd floors	\$42.00	\$38.00	
Single rooms, 4th floor			******
Two room suites, 1st, 2nd, 3rd floors	40.00		*******
Two room suites, 4th floor		******	b
Three room suites, 1st, 2nd, 3rd floors	36.00	******	
Double rooms, Section D		30.00	
Double rooms, Section A, C, E, and F		32.00	
All other rooms		24.50	24.50

Applications.—Applications should be made as early as possible, since accommodations are limited to five hundred students. Applications must be accompanied by the room reservation fee of \$10. If a room has been assigned, no refund will be made later than September 1. Students not assigned a room will be given a refund upon request. Students signing contracts and being assigned rooms will not be granted a refund if they withdraw from the dormitories during the period stipulated in the contract. Contracts for the dormitory rooms are for the scholastic year, and in the absence of exceedingly important reasons, no student will be given permission to vacate a room during this time unless he transfers his contract to some student not living on the campus.

Keys for dormitory rooms may be secured by student occupants from the Head Janitor in the Archway on presentation of the Room Reservation Fee receipt.

Room contracts will be signed and submitted to include the purchase of not less than four Cafeteria tickets per semester. These tickets carry a monetary value of \$15 each, costing \$14.25. One of these tickets will last approximately three weeks.

#### ROOMING HOUSES

The administration of the University provides an inspection service and publishes a list of approved rooming houses for students. Rental in these houses ranges from \$5 to \$15 per month per student, two students per room. In a number of instances, room and

247

board may be secured in the same house at rates from \$25 to \$40 per month. In case a student plans to live off the campus, he is urged to secure information from the Office of the Dean of Students to avoid embarrassment in dealing with landlords other than those of approved rooming houses.

#### COOPERATIVE LIVING ORGANIZATION

The Cooperative Living Organization, organized and operated by students to furnish economical living accommodations for its membership is located at 541 S. Ninth Street. The qualifications for membership are: maximum income \$25 per month, scholastic ability, references of good character. In order to secure membership in the CLO students should apply to the CLO manager at the above address.

#### SELF-HELP

In view of the fact that there are comparatively few positions on the campus and in the City of Gainesville, it is strongly urged that no freshman come to the University with the expectation of depending very largely upon his earnings during his first college year.

The Committee on Self-Help, of which the Dean of Students is chairman, undertakes to award positions on the campus to deserving upperclassmen.

A few students are employed as laboratory assistants, office workers, waiters, and in other capacities. Application for employment should be made to the Dean of Students.

#### REQUIREMENTS AND QUALIFICATIONS FOR STUDENT EMPLOYMENT

- A. The student must be making an average of C or its equivalent.
- B. The student must give evidence of need for the job.
- C. Possession of a car will be evidence of lack of need unless explained on the basis of necessity for the student's livelihood.
  - D. Preference will be given to those having experience.
- E. No graduate students will be used except as graduate assistants in positions requiring the training which the student has secured in college.
- F. No student on probation of any kind will be given a position. If, while holding one, he is placed on probation, he will be required to resign the position.
- G. Due to scarcity of jobs, it is contrary to the policy of the University for students to hold two University jobs whose aggregate salaries exceed \$200 per year.

#### CLASSIFICATION OF WORK AND RATE OF PAY

Α.	Laboratory Assistance:	
	1. Technical—Requiring skill and training in a particular field40c	-45c per hour
	2. General—Requiring some skill above common labor	30c per hour
	3. Unskilled Labor	25c per hour
В.	Clerical:	
	1. Highly skilled in a certain field, expert stenographer and typist40c	-45c per hour
	2. Typing, filing, bookkeeping, and limited amount of stenographic	
	work	35c per hour
	3. General office work	30c per hour
C.	Mechanical:	
٠.	1. Skilled	35c per hour
	2. Unskilled	25c per hour

#### SCHOLARSHIPS AND LOAN FUNDS

The University of Florida is unfortunate in the paucity of scholarships and loans which are open to students. Generally, the scholarships and loans which are available are administered directly by the donors. However, the Committee on Scholarships, of which the Dean of Students is chairman, collects all information relative to vacancies, basis of award, value, and other pertinent facts and supplies this information to interested students. The Committee also collects information on applicants and supplies this information to the donors. In some instances, the Committee has been given authority to make the awards without consulting the donors.

While scholarship, as evidenced by academic attainment, is an important feature in making awards, it is by no means the only consideration. The student's potential capacity to profit by college training and to make reasonable returns to society is a large factor in making all awards.

Unless otherwise specified, applications for the scholarships and loans listed below should be addressed to the Chairman of the Committee on Scholarships and Loan Funds, University of Florida.

County Agricultural Scholarships.—Provision has been made by a legislative act for a scholarship from each county—to be offered and provided for at the discretion of the Board of County Commissioners of each county. The recipient is to be selected by competitive examination. The value of each scholarship is a sum sufficient to pay for board in the dining hall and room in the dormitory. Whether such a scholarship has been provided for by any county may be learned from the Clerk of the Board of County Commissioners, or the County Agent of the county in question. If it is desired, questions for the examination will be provided and papers graded by the University.

Vocational Rehabilitation Scholarships.—The Department of Vocational Rehabilitation is willing to aid any citizen of Florida who can give evidence of being prepared to enter college, and who gives promise of being a successful student, provided that he has sustained, by reason of physical impairment, a vocational handicap; and provided the course which he selects can be reasonably expected to fit him to earn a livelihood. The sum spent on recipients of this fund at the University of Florida during the present year will amount to approximately \$100 per student. Inquiries for these scholarships should be addressed to Mr. Claud M. Andrews, State Supervisor of Vocational Rehabilitation, Tallahassee, Florida.

Rotary Loan Fund.—The Rotarians of Florida have set aside a considerable sum of money to be used in making loans to worthy boys who would not otherwise be able to attend college. The maximum loan is \$150 per year. These loans are not available to freshmen. Applications for these loans should be made to the President of the Rotary Club of the city from which the student registers, or to Mr. K. H. Graham, Secretary-Treasurer, Rotary Educational Loan Fund, Inc., Language Hall, University of Florida, Gainesville, Florida.

Knights Templar Scholarship Loans.—The Grand Lodge of Knights Templar in the State of Florida has arranged a number of loans, in amount of \$200 to each student, for students pursuing a course at the University of Florida. These loans are made available through application to the Knights Templar Lodge in the various cities in the state, and are handled by the Grand Lodge officers. Approximately thirty students receive aid from these scholarships each year.

Knights of Pythias Scholarship Loans.—Several scholarship loans have been established by the Grand Lodge of the Knights of Pythias. Application for these loans should be made to Mr. Frank Kellow, Secretary-Treasurer, Student Aid Department, Grand Lodge of Florida Knights of Pythias, Fort Myers, Florida.

United Daughters of the Confederacy Scholarships.—Scholarships have been established by various chapters of the Florida Division, United Daughters of the Confederacy. Applications should be made to Mrs. David D. Bradford, Chairman of Education, 2109 Watrous Ave., Tampa, Florida.

Loring Memorial Scholarship.—A scholarship of approximately \$250 per year is maintained by Mrs. William Loring Spencer in memory of her distinguished uncle, General Loring.

Arthur Ellis Ham Memorial Scholarship.—Established in 1919 by Mrs. Elizabeth C. Ham, in accordance with the last will and in memory of her husband, Captain Arthur Ellis Ham, a former student of the University, who fell in battle at St. Mihiel, France, on September 14, 1918. Value: the income from a fund of \$5,000.

Albert W. Gilchrist Memorial Scholarship.—This scholarship is open to students of the junior and senior classes. Two of these awards are made annually, each one being worth \$200 per year. Scholastic achievement is the principal basis of this award.

David Levy Yulee Memorial Scholarship.—This scholarship is awarded annually on the basis of scholarship, and is open to the members of the junior and senior classes. Value, about \$200.

Duval High Memorial Scholarship.—An act creating the Memorial Duval High School Scholarship and authorizing and appropriating annually \$275 of the Duval County funds as financial assistance for one worthy high school graduate is covered by House Bill No. 823, and was approved May 20, 1927.

This scholarship, created to memorialize and assist in preserving the high standards and traditions of the Duval High School, where many of Florida's worthy citizens were educated, was established by the Board of County Commissioners of Duval County, Florida. Application should be made to the Chairman of the Board of County Commissioners, Jacksonville.

Jacksonville Rotary Club Scholarship.—The Jacksonville Rotary Club maintains a scholarship of \$250, which is given, at its discretion, to a student meeting such requirements as it may make pertaining to the scholarship. Application should be made to the President of the Jacksonville Rotary Club.

William Wilson Finley Foundation.—As a memorial to the late President Finley, and in recognition of his interest in agricultural education, the Southern Railway Company has donated to the University of Florida the sum of \$1,000, to be used as a loan fund. No loan from this fund to am individual is to exceed \$150 per year. Recipients are selected by the Dean of the College of Agriculture, to whom applications should be sent.

Florida Bankers Association Scholarship.—The Florida Bankers Association awards three scholarships annually: one for North and West Florida, one for Central Florida, and one for South Florida. These scholarships are awarded on an examination given at the Annual Boys' Short Course. The examination is given and the award made by the State Boys' Club Agent. Application for these scholarships should be made to the Dean of the College of Agriculture.

The American Bankers Association Foundation.—One loan scholarship is made to a student at the University of Florida whose major course is in banking, economics, or related subjects in classes of junior grade or above. Value, \$250.

Murphree Engineering Loan Fund.—On September 16, 1929, a friend of our late President, Dr. A. A. Murphree, gave to the Engineering College \$500, to be used as a revolving loan fund. This fund was to be used in cases of emergency when, on account of financial

difficulties, worthy students would be kept from graduating unless they could receive some assistance. Only in special cases are these loans made to members of the junior class. Applications for loans from this fund should be made to the Dean of the College of Engineering.

Florida Association of Architects Loan Fund.—The Florida Association of Architects has created a revolving loan fund of \$500 for the purpose of aiding needy students in Architecture who have proved themselves worthy. Applications should be made to the Director of the School of Architecture and Allied Arts.

The Colonial Dames of America, Betty Wollman Scholarship, \$250; Eleanora Hopkins Scholarship, \$250; and Crawford Livingston Scholarship, \$250.—Applications should be made to Mrs. Walter W. Price, 1 West 72nd Street, New York City.

The National Society of The Colonial Dames of America in the State of Florida Scholarship.—The National Society of The Colonial Dames of America in the State of Florida has established a loan scholarship for deserving students. This scholarship is administered by the Directors of the Florida Educational Loan Association. Application should be made to the Chairman of the Florida Educational Loan Association, University of Florida.

Lake Worth Woman's Club Scholarship.—The Lake Worth Woman's Club, of Lake Worth, Florida, maintains a scholarship of \$100 a year. Application should be made to the Chairman of the Scholarship Committee, Lake Worth Woman's Club, Lake Worth, Florida.

Fairchild Scholarship National.—Mr. Samuel W. Fairchild, of New York City, offers annually a scholarship amounting to \$500. The award is made, by competitive examination, to a graduate in pharmacy who will do post-graduate work in the year immediately following his graduation. Examinations are held in June at the various colleges of pharmacy which are members of the American Association of Colleges of Pharmacy. Further information may be obtained from the Director of the School of Pharmacy.

The Ladies' Auxiliary Fund.—The Ladies' Auxiliary of the Florida State Pharmaceutical Association has established a loan fund for deserving students of pharmacy in need of assistance. Further information may be obtained from the Director of the School of Pharmacy.

Tolbert Memorial Student Loan Fund.—Through the efforts of various student organizations approximately \$4,000 has been accumulated for making short time loans to students to meet financial emergencies. These loans are made in amounts not exceeding \$50 and for a period not exceeding 90 days. The fund is administered by a committee of students in cooperation with the Office of the Dean of Students to whose office application for a loan should be made.

Jacksonville Kiwanis Club Scholarships.—The Jacksonville Kiwanis Club maintains two scholarships for Jacksonville boys. Application should be made by letter to Mr. W. S. Paulk, Supervisor, Boys' and Girls' Work Committee, Jacksonville Kiwanis Club, Chamber of Commerce Building, Jacksonville, Florida.

Phi Kappa Phi Loan Fund.—The Florida chapter of Phi Kappa Phi, national honorary scholastic society, has established a \$250 annual loan fund for Phi Kappa Phi members. Loans will be made principally to students intending to pursue graduate work. Application should be made to Mr. B. J. Otte, Chairman, Phi Kappa Phi Loan Fund, University of Florida.

University Scholarship Tag Fund.—Through the co-operation of the State Motor Vehicle Commission, arrangements have been made to sell front automobile tags to alumni and friends of the University. The income thus acquired is used to provide additional scholar-

ships for students. Awards are made on the basis of need, scholarship, and extra-curricular activity. Applications are made to the Athletic Association.

Duncan U. Fletcher Agricultural Scholarship.—Awarded by the United States Sugar Corporation in the memory of the outstanding character of our late Senator, a scholarship of \$500 annually for a period of four years to students particularly interested in agricultural activities. Details governing the award of these scholarships together with application blank may be obtained from the Office of the Dean of Students. This scholarship will not be open in 1938-39.

Sears, Roebuck Scholarships.—Sears, Roebuck and Company has given funds to the University of Florida for the establishment of a number of scholarships in the amount of \$100 annually to students particularly interested in agricultural activities. Details governing the award of these scholarships together with application blank may be obtained from the Office of the Dean of Students.

#### PRIZES AND MEDALS

Board of Control Awards.—The Board of Control annually awards the following medals:

- 1. The General College Declamation Medal, to the best declaimer of the General College.
- 2. Junior Oratorical Contest Medal, to the best orator of the junior class.
- 3. Senior Oratorical Contest Medal, to the best orator of the senior class.

Harrison Company Award.—A set of the Florida Reports, Volumes 1-22, Reprint Edition, is offered by the Harrison Company to the senior law student doing all his work in this institution, and making the highest record during his law course.

Harrison Company First Year Award.—Redfearn on Wills and Administration of Estates in Florida is offered by the Harrison Company to the first year law student making the highest average in twenty-eight hours of law taken in this institution.

Redfearn Prize.—For the past three years Hon. D. H. Redfearn of Miami has offered a prize of \$50 for the best essay by a law student on some topic of legal reform. This prize will be continued in 1938-39.

Groover-Stewart Drug Company Cup.—Mr. F. C. Groover, president of the Groover-Stewart Drug Company, has given a large silver loving cup which is awarded to the graduating class in the School of Pharmacy attaining the highest general average in scholarship and is held by that class until this average is exceeded by a subsequent graduating class.

David W. Ramsaur Medal.—Mrs. D. W. Ramsaur of Jacksonville offers a gold medal to that graduate of the School of Pharmacy making the highest average in scholarship and evincing leadership in student activities.

Haisley Lynch Medal.—The University is grateful to Mrs. L. C. Lynch of Gainesville for her gift of the Haisley Lynch Medal for the best essay in American history. This medal is awarded annually by her in loving memory of her son, Haisley Lynch, a former student of the University, who was killed in action in France during the World War.

Gargoyle Key.—Gargoyle Society awards a gold key each year to the graduate of the General College, who, in the opinion of the members, was outstanding in scholarship, leadership, initiative, and general ability. To be eligible for the award the student must have completed the fundamental course in Architecture or that in Painting.

The David Levy Yulee Lectureship and Speech Contest.—Under the provisions of the will of Nannie Yulee Noble, a sum of money was bequeathed to the University of Florida, the income of which was to be used to bring outstanding speakers to the University to

deliver lectures to the student body and faculty on the general topic "The Ideal of Honor and Service in Politics".

In addition there is held annually a David Levy Yulee Speech Contest, the purpose of which is to stimulate student thought and encourage the creation and presentation of orations on a general idealistic theme. The contest is open to all students in the University and the winners of first and second place receive cash awards of \$40 and \$25, respectively.

The James Miller Leake Medal.—This is a medal awarded annually for an essay in American History. The medal is given by the Gainesville Chapter of the Daughters of the American Revolution and named for the Head of the Department of History and Political Science of the University of Florida.

Fine Arts Society Award.—The Fine Arts Society annually offers a gold medal and citation to the outstanding student receiving the baccalaureate degree in the School of Architecture and Allied Arts in recognition of his scholastic standing and leadership. The award is offered only when there are five or more students graduating.

Sigma Tau Award.—The Upsilon Chapter of Sigma Tau awards annually a medal for scholastic ability to the sophomore in the College of Engineering who, during his freshman year, made the highest average in his scholastic work.

Sigma Delta Chi Scholarship Key Award.—Sigma Delta Chi, professional journalistic fraternity, awards annually a key to ten percent of the students graduating in journalism who have the highest scholastic average for the three years' academic work immediately preceding the year in which the nominees are candidates for degrees.

Dillon Achievement Cup.—Mr. Ralph M. Dillon, Tampa, has given a large silver loving cup on which is engraved each year the name of that student graduating in journalism who, in the opinion of the Dean of the College of Arts and Sciences and the faculty of the Department of Journalism, possesses the highest qualifications for service to the press of Florida.

Delta Sigma Pi Scholarship Key.—Each year the Florida chapter of the international fraternity of Delta Sigma Pi, professional business administration fraternity, awards a gold key to that male senior in the College of Business Administration who upon graduation ranks highest in scholarship for the entire course in Business Administration.

Beta Gamma Sigma Scroll.—Each year the Florida chapter of Beta Gamma Sigma, national honorary business administration fraternity, awards a scroll to the junior in the College of Business Administration who, during his preparatory work in the General College, made the highest scholastic average of all students who enter the College of Business Administration.

The Chapter Scholarship Award.—A Certificate of Merit, signed by the President of the American Institute of Chemical Engineers and the Chairman of the Committee on Student Chapters, and a student membership badge are given to the junior in Chemical Engineering who is a member of the Student Chapter and who has attained the highest scholarship standing during his freshman and sophomore years.

Alpha Kappa Psi Scholarship Medallion.—Each year Alpha Kappa Psi, international professional fraternity in commerce, awards a white gold-bronze medallion to the Senior in the College of Business Administration who for his first three years at the University of Florida has been most outstanding in scholarship and campus activities and has shown the most likely qualifications for a successful business career in the future.

#### GENERAL EXTENSION DIVISION

The General Extension Division of the University of Florida offers educational opportunities and numerous services to persons who are removed from the campus.

The Division represents the Colleges of Arts and Sciences, Education, Law, Business Administration, and the School of Pharmacy of the University, and the College of Arts and Sciences and the Schools of Education and Music of the State College for Women.

The work is carried on through departments. Formal courses for college credit and some high school work are offered through the Department of Correspondence Study. Wherever a sufficient number of students may be enrolled, university classes are offered by the Department of Extension Classes.

Short courses of informal instruction are offered to professional, business, trade and civic groups in an effort to give them the latest information in their respective fields of interest. The Department of Women's Activities offers information and instruction on subjects of particular interest to groups of Florida women.

The Department of Auditory Instruction offers cultural and informational programs by lectures and discussion for the benefit of special groups, schools and individuals. Training for naturalization, citizenship schools and cooperation with the War Department in enrolling young men for the Citizens' Military Training Camps, because of their educational value, are some phases of the work of the Department of Citizenship Training.

Through the Departments of Visual Instruction and General Information and Service, the world of letters and arts and music is carried to thousands in more isolated communities through the traveling libraries and art exhibits which are sent out. A picture of the world and its work is circulated in the slides and filmslides furnished for instruction and entertainment. The best in recorded music is provided for work in music appreciation and culture.

These and the various service functions of the Division establish contacts which enable the University to aid individuals, organizations and communities, and to contribute to adult education.

#### SUMMER SESSION

The University Summer Session is an integral part of the University. During the summer, the General College, the College of Education, the College of Arts and Sciences, the College of Law, the College of Business Administration, the College of Agriculture, and the Graduate School operate, and College of Engineering conducts certain field work.

Since women are admitted to the Summer Session, many professional courses for primary and elementary school teachers are offered in addition to those usually given in the winter session.

#### DIVISION OF ATHLETICS AND PHYSICAL EDUCATION

In September, 1933, the University of Florida joined twelve other southern institutions in forming the new Southeastern Conference. This new conference represents colleges and universities in the states of Louisiana, Mississippi, Alabama, Georgia, Florida, Tennessee, and Kentucky.

The type of athletic program undertaken by the Department of Physical Education at the University of Florida compares with that in leading universities. A two-year course of required Physical Education is included in the curriculum of the Lower Division. Students who are exempt from Military Science are required to take this work, which is designed to present participation, training, and instructional opportunities in sports included in the intramural program. This course may also be taken as an elective.

The second major sub-division of this Department is that in which are included intercollegiate athletics. These sports are divided into two groups, generally known as major
and as minor sports. In the major group are football, basketball, boxing, baseball, and
track; and in the minor group, swimming, tennis, golf, and cross country. The equipment
includes two baseball diamonds, four athletic fields, six handball courts, two indoor basketball courts, eight tennis courts, a large outdoor swimming pool, a concrete stadium with
a seating capacity of 23,000, and two quarter-mile running tracks, one providing permanent
seats for approximately 1,500.

The function of the Intramural Department is to encourage the entire student body to participate in organized athletic sports and wholesome recreation. The Department provides facilities for such competition and recreation; organizes and promotes competition between students, groups, and individuals; and fosters a spirit of fair play and sportsmanship among participants and spectators.

The program of intramural activities includes the following sports: golf, swimming, horseshoes, touch football, basketball, boxing, wrestling, diamondball, tennis, handball, water basketball, track, shuffle board, foul shooting, ping pong, badminton, cross country, and Sigma Delta Psi (national athletic fraternity) events.

The proper utilization of leisure time through recreation and play is splendidly expressed in this program. It is estimated that more than 2.000 students (about seventy per cent of the student body) take part in some sport sponsored by the Department. There is a decided trend toward the expansion of recreational facilities for a large group of students as opposed to intense competition for a few.

The rules of the Southeastern Conference do not permit member institutions to employ athletes or to pay students for their services on athletic teams. However, this does not mean that a student is ineligible to receive aid from his institution in the form of scholarships, loan funds, or compensation for student labor merely because he may be proficient in athletics. Athletes in the University of Florida are eligible to all forms of assistance that may be available to other students. As a rule, awards are made only to those who are unable financially to attend the University without assistance and whose standards of conduct and scholarship are worthy of consideration. Awards are usually made in the form of board, rent, books, and similar items rather than in the form of cash, and may be continued from year to year throughout the college course to those students whose records prove satisfactory. Administration of these funds is in the hands of the Committee on Scholarships. Further information may be secured by writing to the Dean of Students, who is chairman of that Committee.

#### DIVISION OF MILITARY SCIENCE AND TACTICS

The course in Military Science is required of all physically qualified General College students except adult special students and students transferring from other universities or colleges.

Students who complete the basic course and are selected by the Professor of Military Science and Tactics and the President of the University may elect the advanced courses. Students electing these courses must carry them to completion as a prerequisite to graduation. Upon the completion of these courses, those students recommended by the Professor of Military Science and Tactics and the President of the University will, upon their own

application, be offered a commission in the Officers Reserve Corps, United States Army. Students electing to do advanced work in Military Science and Tactics must attend a summer camp, usually between their junior and senior years, established for this purpose by the United States Government. The War Department pays all expenses for the camp including mileage, rations, medical attendance, clothing, and laundry service, and in addition the pay of the seventh grade, United States Army.

#### UNIVERSITY OF FLORIDA BAND

Students may enroll in the band under either of the two following plans:

- a. A student may elect to take Band practice and drill for Military Science and Tactics.
  - BAND, 4 hours per week throughout first two years.
- A student may elect to combine Band practice and drill with the study of Military Science and Tactics,

SAND, 4 hours per week throughout first two years.

MILITARY, 3 hours per week throughout first two years.

Band work will be open to upperclassmen upon permission of the Director of the University of Florida Band.

While both of the above outlined plans will satisfy for graduation the basic military requirements of the General College, only the second one (b) will qualify the student to enroll for advanced work with the R.O.T.C.

#### DIVISION OF MUSIC

The Division of Music offers opportunity for membership in three musical organizations: The University Band, the Glee Club, and the Symphony Orchestra.

All University of Florida students who qualify are eligible for membership in any of these organizations.

The Band performs at all football games within the State and makes at least one out of State trip each season. The Band plays at military parades on the campus, gives a number of concerts and broadcasts during the second semester, and performs at such public functions as the Gasparilla Celebration, the Governor's Inauguration, etc.

The University of Florida Glee Club is composed of men enrolled in the University who are interested in choral singing. The Glee Club makes several trips through the State, particularly during the second semester. Members of the Glee Club are heard regularly each week over the radio in a broadcast period known as the University Hour.

The University of Florida Symphony Orchestra affords an opportunity for the study and performance of symphonic and classical music, makes a number of trips through the State each season and gives a number of concerts and broadcasts on the campus.

Private lessons are offered by the members of the faculty of the Division of Music. These lessons are arranged as follows:

- 1. Orchestra and Band instruments, Mr. Brown.
- 2. Voice, including radio broadcasting. Mr. DeBruyn.
- 3. Piano, Organ, Harmony and Counterpoint, Mr. Murphree.

Lesson periods are arranged at the convenience of the instructor and pupil. Instructors may be consulted concerning lesson periods and rates.

#### UNIVERSITY OF FLORIDA LIBRARIES

The libraries of the University are the General Library, the Experiment Station Library, the General Extension Division Library, the Law Library, and the P. K. Yonge Laboratory School Library. The libraries now contain approximately 129,000 volumes.

The General Library is housed in the Library Building, a modern fire-proof structure, with a seating capacity of between 750 and 800, and stack capacity of 200,000 volumes. There are 48 carrels in the stacks for the use of faculty and graduate students. A collection of Floridiana, material concerning Florida and written by Floridians, is housed in the Florida Room.

The Library contains general reference books, encyclopedias, dictionaries, yearbooks, handbooks, standard encyclopedias and dictionaries in foreign languages, and files of bound periodicals in both English and foreign languages.

The University Library is a depository for official publications of the United States Government. The Library receives valuable studies from universities, learned societies, and other organizations on exchange. It receives regularly by subscription 529 and by gift and exchange 747 periodicals of a general and scientific nature. Many daily and weekly state newspapers contribute complimentary copies.

The Library welcomes every opportunity to be of assistance to both faculty and students. In addition to an open shelf browsing collection of over 1600 volumes, recreational reading is fostered by means of a book display which contains books of timely interest. Bibliographies are prepared and information is collected for class work. Special attention is given to collecting material for debate activity.

The Library is open from 7:45 A.M. to 10:30 P.M. every week day except Saturday, when it closes at 1:30 P.M. During the regular session it is open on Sundays from 2 to 6 P.M.

#### THE FLORIDA STATE MUSEUM

The Florida State Museum was created by an act of the legislature in 1917 as a department of the University of Florida.

The main objective of The Florida State Museum is to collect, preserve and interpret data concerning the history of Florida, both natural and civil. In the natural history of the state the endeavor is to collect the minerals and exhibit them in connection with their manufactured products of economics and commerce; to collect the fossils of vegetable and animal life showing the evolution of life through the geologic ages; to collect specimens of recent vegetable and animal life illustrating the flora and fauna of the state in connection with their economic and commercial enterprises. In the civil history of the state the endeavor is to collect material and data of the works of mankind from the early aborigines on up through the beginning of civilization to the present time; to maintain exhibits of artifacts of early man, and exhibits of articles in the economic, industrial and social life showing the advancement of civilization.

To maintain a department of archives for the preservation of the records of the state; to maintain a library of publications pertinent to the general and diversified activities of the museum; to maintain a gallery of art for the preservation and exhibit of portraits of persons who have been responsible for making Florida a better place to live, and for the exploitations of works of art for the edification of and as a social center for our citizens; to maintain a department of museum extension among the schools and communities of the state; to publish reports, bulletins, and monographs of the progress of the work, are some of the activities for which The Florida State Museum strives, and for which the law provides.

In carrying on the general activities as above outlined The Florida State Museum now has a total of 337,414 specimens catalogued at an inventoried value of \$347,792.08, the majority of which has been presented or provided by will. The museum is free to the public every day in the year.

#### HEALTH SERVICE

Through the Students' Health Service the University makes available to any student physical examinations, health consultations, and medical attention. General service is provided free of charge, but special fees are charged for services which are individual in character, such as dentistry. X-rays, board and laundry in the Infirmary, special drugs and serums, major surgery, special nurses, etc. No student, however, will be denied service because of inability to pay these fees.

The University Infirmary and the offices of the Health Service are on the campus. The Infirmary is open day and night for the admission of patients. The Resident Physician lives at the Infirmary and his services are available at all hours in case of emergency. The Dispensary in the Infirmary building is open from 7:30 to 9 a.m., from 12 noon to 1 p.m. and from 4 to 7 p.m., during which time physicians are in attendance and may be consulted. A nurse is constantly on duty from 7 a.m. to 9 p.m. for emergency treatment.

It is the aim of the Health Service not only to function as a Health Service and render preventive measures, but to provide full hospital care in cases of illness. The Infirmary is rated as a Fully Approved Hospital by the Examining Board of the American College of Surgeons.

The facilities of the Dispensary are such that any number of students can be given attention in a day. The Dispensary is maintained to offer conferences with physicians, examinations, diagnosis, and treatment of minor injuries and illnesses which a student may suffer. The student is encouraged to use this service freely in order that he may avoid more serious illnesses by the lack of treatment or from improper treatment. In the Dispensary, a modern, well equipped drug room furnishes drugs to the student without charge. A laboratory in connection with the Infirmary and Dispensary is in charge of a trained nurse-technician, rendering efficient service in prompt diagnosis. The normal capacity of the Infirmary, 45 beds, can be increased in emergencies. Ample provisions are made for the isolation of communicable diseases. A completely equipped operating room is maintained to provide facilities for major surgical operations. The Infirmary is equipped with a mobile unit X-ray, which is used for the examination of fractures, but the equipment does not provide sufficient service for an extensive diagnostic X-ray study of the intestinal tract, etc. This service is made available to the students at actual cost of the materials used.

Students enrolling in the University for the first time are furnished by the Registrar's Office a physical examination form which is to be completed by the family physician and attached to Registration papers. On admission, the student is given a careful physical examination by the University Physician. It is necessary that this physical examination by the home physician be completed in order that parents may be aware of defects which should be corrected prior to the student's entrance in the University. The correction of these defects is necessary in order that he may be in proper physical condition to begin his college work.

There are three principal phases of the activities of the University Health Service: (1) personal attention, (2) sanitation, and (3) education.

1. Personal Attention.—This division is concerned with the physical examination of students. A complete record of the physical condition of each student is made and filed

when he is admitted to the University. From this record can be determined, in large measure, what procedure is essential to keep the student in the best physical condition during his academic life. The following are some of the phases of the work in the personal division:

- a. Provision for maintaining the health of normal, physically sound students; cooperation with the Department of Physical Education regarding physical exercise; education concerning right living; safeguarding of environment.
- b. Protection of the physically sound students from communicable diseases; early detection, isolation, and treatment of all cases of communicable diseases—tuber-culosis, diphtheria, scarlet fever, measles, typhoid fever, smallpox, mumps, etc.
- c. Treatment and professional care of all students who are ill or in need of medical advice or treatment. For extended care by the Health Service it is necessary that the student enter the Infirmary. Any student may be admitted to the Infirmary upon the recommendation of the University Physician. To all patients in the Infirmary the staff will furnish medical and nursing services.
- d. Reconstruction and reclamation: correction of defects, advice, and treatment of all abnormalities.
- 2. Sanitation.—The student's environment should be made as hygienic as possible. Hence, this division concerns itself with the sanitary conditions both on and off the campus.
- 3. Education.—Every student in the University is made familiar with the fundamentals of both personal and public hygiene. Through personal conferences education in hygiene and right living is conducted.

#### VACCINATION

Prospective students are advised to be vaccinated against smallpox and to be inoculated against typhoid fever. Unless a certificate is presented showing successful vaccination within five years, students will be vaccinated against smallpox at the time of registration.

#### BUREAU OF VOCATIONAL GUIDANCE AND MENTAL HYGIENE

A program of vocational guidance is carried on for the students through a series of tests, interviews, and the application of scientific occupational information. The Bureau offers a service to those encountering mental difficulties which interfere with their scholastic work. Further information concerning these services may be obtained from the Bulletin of the Bureau of Vocational Guidance and Mental Hygiene.

#### FLORIDA UNION

Florida Union serves a three-fold purpose: It is the official center of student activities and presents a broad program of recreation and entertainment for the student body; it is the campus home of faculty, students, alumni, and friends of the University; it aids in establishing a cultural pattern which will distinguish Florida men. The building is open daily from 8:00 a.m. until 11:00 p.m. The game room, reading room, lounge rooms, and various meeting rooms are available to the student body. The offices of the Student Body, the Y.M.C.A., Alumni Association, and the Publicity Department of the University are located in the Florida Union. A soda-fountain and the bookstore in the annex offer attractive service at the most economical prices. A cordial welcome always awaits every student at the Florida Union.

#### STUDENT ORGANIZATIONS AND PUBLICATIONS

Student Government.—Student government in the University of Florida is a cooperative organization based on mutual confidence between the student body and the faculty. Considerable authority has been granted the Student Body for the regulation and conduct of student affairs. The criterion in granting authority to the Student Body has been the disposition of the students to accept responsibility commensurate with the authority granted them. Generally speaking, the fields of student activity include regulation of extra-curricular affairs and the administration of the Honor System.

Every enrolled student, having paid his activity fee, is a member of the Student Body and has an equal vote in its government.

The University authorities feel that training in acceptance of responsibility for the conduct of student affairs at the University is a valuable part of the educational growth of the individual student. The Student Body is practically a body politic, occupying its franchise under grant from the Board of Control and subject to its continued approval.

Student government is patterned on the state and national form of government, but adapted to the local needs of the Student Body. Powers are distributed into the three branches: (1) legislative, which is embodied in the Executive Council; (2) judicial, which is embodied in the Honor Court with penal and civil jurisdiction of all judicial matters; (3) executive, embodied in the President and shared with the Vice-President and the Secretary-Treasurer of the Student Body. Members of all three branches are elected directly by the Student Body once a year.

Student government enacts and enforces suitable laws; and promotes athletics, debating, publications of the Student Body, entertainments of a general educational value, and such other activities as the Student Body may adopt. The officers of the Student Body are the President, Vice-President, Secretary-Treasurer, members of the Honor Court, Athletic Council, Executive Council, Lyceum Council, editors and business managers of student publications, and student members of the Board of Student Publications.

Debating.—Practice in debating is open to all students through the programs of the varsity and General College debate squads. This work, which is sponsored by the Debate Club, is under direction of the Department of Speech, and culminates in an extensive schedule of intercollegiate debates.

Dramatics.—Any student has an opportunity to participate in several plays which are presented each year by the Florida Players, a dramatic group under direction of the Department of Speech.

Executive Council.—The Executive Council is composed of representatives elected from the colleges on the campus and in general acts as administrator of Student Body affairs. The Athletic Council and the Lyceum Council have jurisdiction over their respective fields.

Publications.—The Student Body publishes The Seminole, the year book; The Florida Alligator, a weekly newspaper; The "F" Book, the student's guide; and The Florida Review, the campus literary magazine.

Y. M. C. A.—The purpose of the Young Men's Christian Association is to provide a medium through which the highest ideals of education and religion may be expressed in terms of service. The program of the Association is planned to meet definite needs as they become apparent. There is no membership fee. Any student may become a member by subscribing to its purpose and contributing to its support. A secretary having extensive experience with the problems of students is available for counsel and help.

Social Fraternities.—Twenty-two national social fraternities have established chapters at the University; most of them have already built chapter houses and the others have leased homes. The general work of the fraternities is controlled by the Interfraternity Conference, composed of two delegates from each of the national fraternities. The national fraternities at Florida are Alpha Gamma Rho, Alpha Tau Omega, Beta Theta Pi, Chi Phi, Delta Chi, Delta Tau Delta, Delta Sigma Phi, Kappa Alpha, Kappa Sigma, Lambda Chi Alpha, Phi Beta Delta, Phi Delta Theta, Phi Kappa Tau, Pi Kappa Alpha, Pi Kappa Phi, Sigma Alpha Epsilon, Sigma Chi, Sigma Nu, Sigma Phi Epsilon, Tau Epsilon Phi, Theta Chi, and Theta Kappa Nu. There is one state-organized fraternity on the campus, Pi Delta Sigma.

Honor Societies, Fraternities, and Clubs, -Agricultural Club; Alpha Epsilon Delta, premedical fraternity; Alpha Kappa Psi, business fraternity; Alpha Tau Alpha, agricultural education fraternity; Alpha Zeta, agricultural fraternity; American Institute of Chemical Engineers, Student Branch; American Institute of Electrical Engineers, Student Branch; American Pharmaceutical Association, Student Branch; American Society of Mechanical Engineers, Student Branch; Benton Engineering Society; Beta Gamma Sigma, commerce fraternity; Commerce Club; Delta Sigma Pi, commerce fraternity; English Club; Florida Blue Key, leadership fraternity; Fourth Estate Club, journalistic society; Gamma Sigma Epsilon, chemical fraternity; Gargoyle, architectural club; Kappa Delta Pi, educational fraternity; Kappa Epsilon, Women's pharmacy society; Kappa Gamma Delta, aeronautical fraternity; Kappa Kappa Psi, band fraternity; Kappa Phi Kappa, educational fraternity; Leigh Chemical Society; Mathematics Colloquium; Mortar and Pestle, pharmacy club; Phi Alpha Delta, legal fraternity; Phi Beta Kappa, scholarship fraternity; Phi Delta Phi, legal fraternity; Phi Eta Sigma, freshman scholastic fraternity; Phi Kappa Phi, scholastic fraternity; Phi Sigma, biological fraternity; Pi Delta Epsilon, journalistic fraternity; Pi Gamma Mu, social science fraternity; Rho Chi, pharmacy fraternity; Sabres, military fraternity; Sigma Delta Chi, journalistic fraternity; Sigma Delta Psi, athletic fraternity; Sigma Tau, engineering fraternity; Tau Kappa Alpha, forensic fraternity; and Thyrsus, horticultural fraternity.

#### HONOR SYSTEM

The Honor System.—One of the finest tributes to the character of the students at the University of Florida is the fact that the Student Body is a self-governing group. The details of the system by which this result is reached will be explained to all freshmen during the first week of their enrollment in the University. However, each parent, as well as each prospective student, is urged to read the following discussion of the Honor System, as this phase of student government forms the keystone of the entire system.

In addition to permitting student legislation on questions of interest to the members of the Student Body, execution of the laws passed, and the expenditure of student funds, the governing system at the University gives to the students the privilege of disciplining themselves through the means of the Honor System. Inaugurated by some of our greatest educators, in higher institutions of the nation, and early adopted in some departments of the University of Florida, the Honor System was finally established in the entire University in 1914, as the result of student initiative. This plan, having met with the approval of all officials of the University, was given the sanction of the Board of Control, and student representatives were selected by the students to administer the system.

Among the basic principles of an Honor System are the convictions that self-discipline is the greatest builder of character, that responsibility is a prerequisite of self-respect, and that these are essential to the highest type of education. Officials of the University and the

Board of Control feel that students in the University of Florida should be assumed to be honest and worthy of trust, and they display this confidence by means of an Honor System.

The success of the System is dependent upon the honor of each individual member of the student body in that: (1) he is duty-bound to abide by the principles of the Honor Code, and (2) he is further pledged to report to the Honor Court such violations of the Code as he may observe.

Many men coming to the University for the first time may feel hesitant about assuming this responsibility, inasmuch as early school training has created feelings of antipathy toward one who "tattle-tales" on a fellow-student. The theory of an Honor System adequately overcomes this natural reaction, however, when it is realized that this system is a student institution itself, and not a faculty measure for student discipline, and that to be worthy of the advantages of the Honor System each student must be strong enough to do his duty in this regard. In this way the responsibility for each man's conduct is placed where it must eventually rest—on himself.

The Honor Code of the Student Body is striking in its simplicity; yet it embodies the fundamentals of sound character. Each man is pledged to refrain from:

(a) cheating, (b) stealing, (c) obtaining money or credit for worthless checks.

On the basis of this Code, students are extended all privileges conceived to be the basic rights of men of Honor. There are no proctors or spies in the examination rooms, each student feeling free to do his work, or to leave the room as occasion arises. Secondly, fruits and supplies are placed openly on the campus, with the confidence that each man will pay for any he may take. This system makes each man the keeper of his own conscience until he has proven to his fellow-students that he no longer deserves the trust placed in him.

A breach of the System may be flagrant and serious, or it may be extenuated by circumstances. It may need only mild corrective measures to help the violator obtain a finer conception of right and wrong; it may need strong measures. To enforce the System equitably the students have established the Honor Court. The Court is composed of twelve students and a chancellor all of whom are elected annually from the upper classes of the various colleges on the campus. Any student convicted by this Court has the right of appeal from its ruling to the Faculty Discipline Committee. A tribute to the efficiency of the Honor Court in its existence on the Florida campus is realized in the fact that, since its establishment, a surprisingly insignificant number of the Court's decisions have been altered upon appeal.

The penal purpose of the Honor Court should receive less stress, perhaps, than its educational purpose, which is its most important function. The responsibility of acquainting every member of the Student Body with the purpose, advantages, and principles of the Honor System is placed upon members of the Court. In line with this work, members of the Honor Court participate in the orientation program each year during Freshman Week. In addition to a series of explanatory talks at that time, special chapel programs are conducted by the Honor Court during the school year. Honor System talks are delivered in the high schools of the State upon request and at regularly scheduled times each spring, and radio programs are broadcast especially for the high schools from Station WRUF in Gainesville. In this way the Honor Court has endeavored to fulfill its responsibility to the men who undertake the problem of self-government and self-discipline at the University of Florida.

The parent of every prospective student should feel that it is his responsibility to stress the paramount importance of honorable conduct on the part of his son while the latter is in attendance at the University of Florida. Dishonest action brings sorrow both to parent and to student.

Because University students have proved worthy of the trust and responsibility involved in administering an Honor System, this feature of student government has become the greatest tradition at the University of Florida. It must be remembered that inasmuch as it is primarily a student responsibility, the future of the system rests with each new class of students entering the University. The University faculty and authorities pledge their support to the Honor System. Each student must support it, or, in failing to support it, contribute to the loss of this tradition.

THE DIVISION OF MUSIC

THE FLORIDA STATE MUSEUM

THE UNIVERSITY LIBRARY

THE STUDENT HEALTH SERVICE

THE BUREAU OF VOCATIONAL GUIDANCE AND MENTAL HYGIENE

#### ADMISSION

The University of Florida is not a coeducational institution. It is an institution of higher learning for men. The State institution of higher learning for women is the Florida State College for Women located at Tallahassee.

Women students are admitted to the University of Florida in the regular session under the laws of the State providing they meet the following conditions:

- 1. Women students who are at least twenty-one years of age and who have received credit from a reputable educational institution in at least sixty semester hours of academic college work shall be eligible to enroll as students in the University of Florida in such subjects and courses as they are unable to obtain in any other institution under the supervision of the Board of Control. provided they are able in every way, regardless of sex, to meet the admission and eligibility requirements of said University.
- 2. Women having the prerequisite qualifications shall be eligible to enroll as students in the School of Pharmacy in the University of Florida, provided they are able in every way, regardless of sex, to meet the admission and eligibility requirements of students in said School of Pharmacy in the University of Florida.

#### FROM THE GENERAL COLLEGE

After the student has completed the work of the General College and received a certificate of graduation, he may enter one of the colleges or professional schools of the Upper Division by meeting the specific admission requirements of that college or school.

The Board of University Examiners administers the admission requirements of the Upper Division. Besides the certificate of graduation from the General College, the student must be certified by the Board as qualified to pursue the work of the college or school he wishes to enter.

In addition to the general requirements stated above, the various colleges and schools of the Upper Division have specific requirements for entrance. These requirements are listed under the curricula of the several colleges and schools. Students in the General College may prepare to meet these requirements by taking, as electives, the courses indicated under the various curricula presented.

The comprehensive examinations of the General College will cover the content of the courses required for admission to any specific curriculum of the Upper Division selected by the individual student.

#### OLD STUDENTS

Students who have registered at the University of Florida prior to the 1935 Summer Session may continue in the curriculum they have elected to follow in one of the colleges or professional schools of the Upper Division, without completing the prescribed requirements for graduation from the General College.

#### TRANSFER STUDENTS

All students admitted to the colleges and professional schools of the Upper Division will be required to meet the requirements for admission to those colleges. Other students will be admitted to the General College, providing they meet the standards for admission.

The manner in which students transferring from other colleges to the University may meet the requirements for admission to the colleges of the Upper Division will be determined by the Board of University Examiners, after due consideration of the training of the student before application for admission to the University of Florida. In general, the policy of the Board of University Examiners will be as follows:

- The Board of University Examiners will always bear in mind the aims of the curriculum of the General College. All students must present training equivalent to the work of the General College, and must pass the prescribed comprehensive examinations.
- 2. Students with average records from other institutions will be required to meet in toto the requirements for admission to the Upper Division.
- The Board of University Examiners, in the case of transfer students with high or superior records, may vary the requirements for admission to the colleges and professional schools of the Upper Division, under the new plan, to the best interest of the student.

Students attending other institutions who contemplate entering the University of Florida should communicate with the Registrar for information concerning the method of admission. Such students should, at the end of their last term or semester in another institution, request the registrar of that institution to send directly to the Registrar of the University of Florida a complete official transcript of their work, and should also have such transcripts sent from any other institutions previously attended.

Students who, for any reason, are not allowed to return to the institution they last attended, or have not made a satisfactory record in the work carried at other institutions, will be denied admission to the University of Florida. Students with an average below C need not apply for admission. Students with an average of C or higher are not guaranteed admission.

#### SPECIAL STUDENTS

Only by the approval of the Board of University Examiners may special students be admitted either to the General College or to the various colleges of the University. Special students are never admitted to the College of Law. Applications for admission of these students must include:

- 1. The filing of satisfactory preliminary credentials.
- 2. A statement as to the type of studies to be pursued.
- 3. Reason for desiring to take special courses.
- 4. Satisfactory evidence of ability to pursue these studies.

EXPENSES 277

#### **EXPENSES**

#### GENERAL FEES REQUIRED BEFORE REGISTRATION

	1st Sem.	2nd Sem.
General College, Freshmen	\$33.25	\$30.25
General College, Sophomores	33.25	30.25
Upper Division Students	31.75	30.25
Law College Students	41.75	40.25
Graduate School	16.00	16.00
All Non-Florida Students Pay Additional	50.00	50.00

#### DESCRIPTION OF GENERAL FEES

General Fees listed in the above table include the following:

Registration and Contingent Fee: A fee of \$15.00 per semester is charged every student. Students in the College of Law pay \$25.00 each semester.

Special Fee: A fee of \$1.00 per semester is required of each student for the construction and rehabilitation of buildings.

Infirmary Fee: All students are charged an infirmary fee of \$3.75 per semester which secures for the student in case of illness the privilege of a bed in the infirmary and the services of the University Physician and professionally trained nurses, except in cases involving a major operation. A student requiring an emergency operation, which is not covered by the fee assessed, may employ the services of any accredited physician whom he may select, and ntilize the facilities of the infirmary for the operation. To secure this medical service, the student must report to the physician in charge of the infirmary. When the operating room is used a fee of \$5.00 is charged. Board in the infirmary is charged at the rate of \$1.00 a day.

Student Activity Fee: This fee is assessed to maintain and foster athletic sports, student publications, and other student activities. Student fees are passed by a vote of the student body and approved by the Board of Control before they are adopted.

Swimming Pool Fee: A fee of .50c per semester is charged all students for use of the lockers and supplies at the swimming pool.

Military Fee: A fee of \$1.50 is charged all students registered for Military Science.

#### TUITION

Classification of Students.—For the purpose of assessing tuition, students are classified as Florida and non-Florida students.

A Florida student, if under twenty-one years of age, is one: (1) whose parents have been residents of Florida for at least twelve consecutive months next preceding his registration; or (2) whose parents were residents of Florida at the time of their death, and who has not acquired residence in another state; or (3) whose parents were not residents of Florida at the time of their death but whose natural guardian has been a resident of Florida for at least twelve consecutive months next preceding his registration. A Florida student, if over twenty-one years of age, is one (1) whose parents are residents of Florida (or were at the time of their death) and who has not acquired residence in another state; or (2) who, while an adult, has been a resident of Florida for at least twelve consecutive months next preceding his registration; or (3) who is the wife of a man who has been a resident of Florida for at least twelve consecutive months next preceding her registration; or (4) is

an alien who has taken out his first citizenship papers and who has been a resident of Florida for at least twelve consecutive months next preceding his registration.

All students not able to qualify as Florida students are classified as non-Florida students.

If the status of a student changes from a non-Florida student to a Florida student, his classification may be changed at the next registration thereafter.

No tuition, except in the College of Law, is charged Florida students.

Non-Florida students, including those pursuing graduate work, pay a fee of \$50 per semester in addition to the fees charged Florida students.

A fee of \$10 in addition to the fee for non-Florida students will be charged all students registering incorrectly. The burden of proof as to residence is with the student.

#### SPECIAL FEES

Fees which apply in special cases only are listed below:

#### LABORATORY FEES

There are no laboratory or course fees.

#### BREAKAGE FEE

Any student registering for a course requiring locker and laboratory apparatus in one or more of the following departments is required to buy a breakage book: Chemistry, Pharmacy, Biology, and Soils. This book costs \$5. A refund will be allowed on any unused portion at the end of the year, when the student has checked in his apparatus to the satisfaction of the departments concerned.

#### LATE REGISTRATION FEE

A fee of \$5 is charged all students who do not complete their registration on the dates set by the University Council and published in the Calendar. Registration is not complete until all University bills are paid, and any who fail to meet their obligations are not regarded as students of the University.

#### ROOM RESERVATION FEE

Students wishing to reserve rooms in the dormitories must pay a room reservation fee of \$10 at the time such reservation is made. The fee is retained as a deposit against damage to the room and its furnishings. The fee, less charges for any damage done to the room by the student, is refunded when he returns his key and gives up his room at the end of the scholastic year.

#### SPECIAL EXAMINATION FEE

A fee of \$5 is charged for each examination taken at a time other than that regularly scheduled.

#### LIBRARY FINES

A fine of 2 cents a day is charged for each book in general circulation which is not returned within the limit of two weeks. "Reserve" books may be checked out overnight, and if they are not returned on time the fine is 25 cents for the first hour and five cents an hour or fraction of an hour thereafter until they are returned. No student may check out a book if he owes the Library more than 50 cents in fines.

#### NON-RESIDENT PENALTY FEE

A fee of \$10 in addition to the fee for non-Florida students will be charged all students registering incorrectly. The burden of proof as to residence is on the student.

EXPENSES 279

#### EAILURE FEES

A fee of \$2.50 a semester hour is charged for courses in which the student does not receive a passing grade. Once the student has failed a course, this fee must be paid before he will be permitted to register again in the University.

#### FEES FOR ADULT SPECIAL STUDENTS

Adult special students who carry 9 hours or less will be charged the registration and contingent fee of \$15 a semester and a proportionate part of any tuition fee assessed on the basis of a normal load of 15 semester hours. These students will not be entitled to any of the privileges attached to any other University fee.

#### SUMMARY OF EXPENSES FOR THE YEAR

Minimum	Maximum
General Fees and Course Expenses\$ 60.00*	\$ 62.25*
Books and Training Supplies for the Year	50.00
Laundry and Cleaning 25.00	35.00
Room and Board	300.00
Estimated total expense\$319.50*	\$447.25*

<sup>\*</sup>Non-Florida students are charged \$100 tuition per year in addition.

#### REFUNDS

Students resigning before they have attended classes for three days are entitled to a refund of all fees except \$5 of the registration and contingent fee. This \$5 is the cost of service in registering the student and is never refunded.

#### ROOM AND BOARD

#### DORMITORIES

The University operates three dormitories, the New Dormitory, Thomas Hall, and Buckman Hall, together accommodating about five hundred students. It is recommended that freshmen room in one of the dormitories for at least the first year. Accordingly, preference is given freshmen applying for rooms in the dormitories.

Rooms in the dormitories are partially furnished. Students must provide their own bedding, towels, and toilet articles. Janitor and maid service is provided. Student monitors, of whom the president of the student body is head, supervise the conduct of students in the dormitories. Students are not permitted to cook in the dormitories.

All dormitory rooms are furnished with beds, chifforobes, study tables, and chairs. Easy chairs may be secured at a rental charge of \$1 per semester. Different accommodations are provided in the three dormitories.

New Dormitory.—The New Dormitory is of strictly fireproof construction. Most of the rooms are arranged in suites of two rooms, a study and a bedroom, accommodating two students. A limited number of single rooms and several suites for three students are

available. All rooms are equipped with lavatories, while adjacent bathrooms provide hot and cold showers.

Thomas Hall.—Sections A, C, D, E, and F have been remodeled throughout, making available both single and double rooms. All rooms in these sections, except the double rooms in Section D, are equipped with lavatories. In other sections the rooms are arranged in suites, consisting of study and bedroom, accommodating three students.

Baths, with lavatories and hot and cold showers, are located on each floor of each section, thus providing a bathroom for each four suites.

Buckman Hall.—Rooms in Buckman Hall are arranged in suites of study and bedrooms accommodating three students. Baths, with lavatories and hot and cold showers, are located on each floor of each section, thus providing bathroom facilities for each four suites.

Room Rent.—Rooms in the dormitories are rented to students at the following rates:

#### ROOM RENT PER STUDENT PER SEMESTER

Nev	v Dormitory	Thomas	Buckman
Single rooms, 1st, 2nd, 3rd floors	\$42.00	\$38.00	
Single rooms, 4th floor	40.00		
Two room suites, 1st, 2nd, 3rd floors	40.00		
Two room suites, 4th floor	34.00		
Three room suites, 1st, 2nd, 3rd floors	36.00		
Double rooms, Section D		30.00	
Double rooms, Section A, C, E, and F		32.00	•••••
All other rooms		24.50	24.50

Applications.—Applications should be made as early as possible, since accommodations are limited to five hundred students. Applications must be accompanied by the room reservation fee of \$10. If a room has been assigned, no refund will be made later than September 1. Students not assigned a room will be given a refund upon request. Students signing contracts and being assigned rooms will not be granted a refund if they withdraw from the dormitories during the period stipulated in the contract. Contracts for the dormitory rooms are for the scholastic year, and in the absence of exceedingly important reasons, no student will be given permission to vacate a room during this time unless he transfers his contract to some student not living on the campus.

Keys for dormitory rooms may be secured by student occupants from the Head Janitor in the Archway on presentation of the Room Reservation Fee receipt.

Room contracts will be signed and submitted to include the purchase of not less than four Cafeteria tickets per semester. These tickets, carrying a monetary value of \$15 each, cost \$14.25. One of these tickets will last approximately three weeks.

#### ROOMING HOUSES

The administration of the University provides an inspection service and publishes a list of approved rooming houses for students. Rental in these houses ranges from \$5 to \$15 per month per student, two students per room. In a number of instances, room and board may be secured in the same house at rates from \$25 to \$40 per month. In case a student plans to live off the campus, he is urged to secure information from the Office of the Dean of Students to avoid embarrassment in dealing with landlords other than those of approved rooming houses.

#### COOPERATIVE LIVING ORGANIZATION

The Cooperative Living Organization, organized and operated by students to furnish economical living accommodations for its membership is located at 541 S. Ninth Street. The qualifications for membership are maximum income \$25 per month, scholastic ability, and references of good character. In order to secure membership in the CLO students should apply to the CLO manager at the above address.

#### SELF-HELP

In view of the fact that there are comparatively few positions for students on the campus and in the City of Gainesville, it is strongly urged that no freshman come to the University with the expectation of depending very largely upon his earnings during his first college year.

The Committee on Self-Help, of which the Dean of Students is chairman, undertakes to award positions on the campus to deserving *upperclassmen*.

A few students are employed as laboratory assistants, office workers, waiters, and in other capacities. Application for employment should be made to the Dean of Students.

#### REQUIREMENTS AND QUALIFICATIONS FOR STUDENT EMPLOYMENT

- A. The student must be making an average of C or its equivalent.
- B. The student must give evidence of need for the job.
- C. Possession of a car will be evidence of lack of need unless explained on the basis of necessity for the student's livelihood.
  - D. Preference will be given to those having experience.

2. Unskilled

- E. No graduate students will be used except as graduate assistants in positions requiring the training which the student has secured in college.
- F. No student on probation of any kind will be given a position. If, while holding one, he is placed on probation, he will be required to resign the position.
- G. Due to scarcity of jobs, it is contrary to the policy of the University for students to hold two University jobs whose aggregate salaries exceed \$200 per year.

#### CLASSIFICATION OF WORK AND RATE OF PAY

A.	Laboratory 'Assistance: 1. Technical—Requiring skill and training in a particular field40c 2. General—Requiring some skill above common labor	-45c per hour 30c per hour 25c per hour
В.	Clerical:  1. Highly skilled in a certain field, expert stenographer and typist40c 2. Typing, filing, bookkeeping, and limited amount of stenographic  work  3. General office work	35c per hour 36c per hour 30c per hour
	Mechanical:	35c per hour

25c per hour

#### SCHOLARSHIPS AND LOAN FUNDS

The University of Florida is unfortunate in the paucity of scholarships and loans which are open to students. Generally, the scholarships and loans which are available are administered directly by the donors. However, the Committee on Scholarships, of which the Dean of Students is chairman, collects all information relative to vacancies, basis of award, value, and other pertinent facts, and supplies this information to interested students. The Committee also collects information on applicants and supplies this information to the donors. In some instances, the Committee has been given authority to make the awards without consulting the donors.

While scholarship, as evidenced by academic attainment, is an important feature in making awards, it is by no means the only consideration. The student's potential capacity to profit by college training and to make reasonable returns to society are important considerations in making all awards.

Unless otherwise specified, applications for the scholarships and loans listed below should be addressed to the Chairman of the Committee on Scholarships and Loan Funds, University of Florida.

County Agricultural Scholarships.—Provision has been made by a legislative act for a scholarship from each county—to be offered and provided for at the discretion of the Board of County Commissioners of each county. The recipient is to be selected by competitive examination. The value of each scholarship is a sum sufficient to pay for board in the dining hall and room in the dormitory. Whether such a scholarship has been provided for by any county may be learned from the Clerk of the Board of County Commissioners, or the County Agent of the county in question. If it is desired, questions for the examination will be provided and papers graded by the University.

Vocational Rehabilitation Scholarships.—The Department of Vocational Rehabilitation is willing to aid any citizen of Florida who can give evidence of being prepared to enter college, and who gives promise of being a successful student, provided that he has sustained, by reason of physical impairment, a vocational handicap; and provided the course which he selects can be reasonably expected to fit him to earn a livelihood. The sum spent on recipients of this fund at the University of Florida during the present year will amount to approximately \$100 per student. Inquiries for these scholarships should be addressed to Mr. Claud M. Andrews, State Supervisor of Vocational Rehabilitation, Tallahassee, Florida.

Rotary Loan Fund.—The Rotarians of Florida have set aside a considerable sum of money to be used in making loans to worthy boys who would not otherwise be able to attend college. The maximum loan is \$150 per year. These loans are not available to freshmen. Applications for these loans should be made to the President of the Rotary Club of the city from which the student registers, or to Mr. K. H. Graham, Secretary-Treasurer, Rotary Educational Loan Fund, Inc., Language Hall, University of Florida, Gainesville, Florida.

Knights Templar Scholarship Loans.—The Grand Lodge of Knights Templar in the State of Florida has arranged a number of loans, in amount of \$200 to each student, for students pursuing a course at the University of Florida. These loans are made available through application to the Knights Templar Lodge in the various cities in the state, and are handled by the Grand Lodge officers. Approximately thirty students receive aid from these scholarships each year.

Knights of Pythias Scholarship Loans.—Several scholarship loans have been established by the Grand Lodge of the Knights of Pythias. Application for these loans should be made to Mr. Frank Kellow, Secretary-Treasurer, Student Aid Department, Grand Lodge of Florida Knights of Pythias, Fort Myers, Florida.

United Daughters of the Confederacy Scholarships.—Scholarships have been established by various chapters of the Florida Division, United Daughters of the Confederacy. Applications should be made to Mrs. David D. Bradford, Chairman of Education, 2109 Watrous Ave., Tampa, Florida.

Loring Memorial Scholarship.—A scholarship of approximately \$250 per year is maintained by Mrs. William Loring Spencer in memory of her distinguished uncle, General Loring.

Arthur Ellis Ham Memorial Scholarship.—Established in 1919 by Mrs. Elizabeth C. Ham, in accordance with the last will and in memory of her husband, Captain Arthur Ellis Ham, a former student of the University, who fell in battle at St. Mihiel, France, on September 14, 1918. Value: the income from a fund of \$5,000.

Albert W. Gilchrist Memorial Scholarship.—This scholarship is open to students of the junior and senior classes. Two of these awards are made annually, each one being worth \$200 per year. Scholastic achievement is the principal basis of this award.

David Levy Yulee Memorial Scholarship.—This scholarship is awarded annually on the basis of scholarship, and is open to the members of the junior and senior classes. Value, about \$200.

Duval High Memorial Scholarship.—An act creating the Memorial Duval High School Scholarship and authorizing and appropriating annually \$275 of the Duval County funds as financial assistance for one worthy high school graduate is covered by House Bill No. 823, and was approved May 20, 1927.

This scholarship, created to memorialize and assist in preserving the high standards and traditions of the Duval High School, where many of Florida's worthy citizens were educated, was established by the Board of County Commissioners of Duval County, Florida. Application should be made to the Chairman of the Board of County Commissioners, Jacksonville.

Jacksonville Rotary Club Scholarship.—The Jacksonville Rotary Club maintains a scholarship of \$250, which is given, at its discretion, to a student meeting such requirements as it may make pertaining to the scholarship. Application should be made to the President of the Jacksonville Rotary Club.

William Wilson Finley Foundation.—As a memorial to the late President Finley, and in recognition of his interest in agricultural education, the Southern Railway Company has donated to the University of Florida the sum of \$1,000, to be used as a loan fund. No loan from this fund to an individual is to exceed \$150 per year. Recipients are selected by the Dean of the College of Agriculture, to whom applications should be sent.

Florida Bankers Association Scholarship.—The Florida Bankers Association awards three scholarships annually: one for North and West Florida, one for Central Florida, and one for South Florida. These scholarships are awarded on an examination given at the Annual Boys' Short Course. The examination is given and the award made by the State Boys' Club Agent. Application for these scholarships should be made to the Dean of the College of Agriculture.

The American Bankers Association Foundation.—One loom scholarship is made to a student at the University of Florida whose major course is in banking, economics, or related subjects in classes of junior grade or above. Value, \$250. Application for loan should be made to the Chairman of the Committee on Awards, 110 E. 42nd Street, New York City.

Murphree Engineering Loan Fund.—On September 16, 1929, a friend of our late President, Dr. A. A. Murphree, gave to the Engineering College \$500, to be used as a revolving loan fund. This fund was to be used in cases of emergency when, on account of financial

difficulties, worthy students would be kept from graduating unless they could receive some assistance. Only in special cases are these loans made to members of the junior class. Applications for loans from this fund should be made to the Dean of the College of Engineering.

Florida Association of Architects Loan Fund.—The Florida Association of Architects has created a revolving loan fund of \$500 for the purpose of aiding needy students in Architecture who have proved themselves worthy. Applications should be made to the Director of the School of Architecture and Allied Arts.

The Colonial Dames of America, Betty Wollman Scholarship, \$250; Eleanora Hopkins Scholarship, \$250; and Crawford Livingston Scholarship, \$250.—Applications should be made to Mrs. Walter W. Price, 1 West 72nd Street, New York City.

The National Society of The Colonial Dames of America in the State of Florida Scholarship.—The National Society of The Colonial Dames of America in the State of Florida has established a loan scholarship for deserving students. This scholarship is administered by the Directors of the Florida Educational Loan Association. Application should be made to the Chairman of the Florida Educational Loan Association, University of Florida.

Lake Worth Woman's Club Scholarship.—The Lake Worth Woman's Club, of Lake Worth, Florida, maintains a scholarship of \$100 a year. Application should be made to the Chairman of the Scholarship Committee, Lake Worth Woman's Club, Lake Worth, Florida.

Fairchild Scholarship National.—Mr. Samuel W. Fairchild, of New York City, offers annually a scholarship amounting to \$500. The award is made, by competitive examination, to a graduate in pharmacy who will do post-graduate work in the year immediately following his graduation. Examinations are held in June at the various colleges of pharmacy which are members of the American Association of Colleges of Pharmacy. Further information may be obtained from the Director of the School of Pharmacy.

The Ladies' Auxiliary Fund.—The Ladies' Auxiliary of the Florida State Pharmaceutical Association has established a loan fund for deserving students of pharmacy in need of assistance. Further information may be obtained from the Director of the School of Pharmacy.

Tolbert Memorial Student Loan Fund.—Through the efforts of various student organizations approximately \$4,000 has been accumulated for making short time loans to students to meet financial emergencies. These loans are made in amounts not exceeding \$50 and for a period not exceeding 90 days. The fund is administered by a committee of students in cooperation with the Office of the Dean of Students to whose office application for a loan should be made.

Jacksonville Kiwanis Club Scholarships.—The Jacksonville Kiwanis Club maintains two scholarships for Jacksonville boys. Application should be made by letter to Mr. W. S. Paulk, Supervisor, Boys' and Girls' Work Committee, Jacksonville Kiwanis Club, Chamber of Commerce Building, Jacksonville, Florida.

Phi Kappa Phi Loan Fund.—The Florida chapter of Phi Kappa Phi, national honorary scholastic society, has established a \$250 annual loan fund for Phi Kappa Phi members. Loans will be made principally to students intending to pursue graduate work. Application should be made to Mr. B. J. Otte, Chairman, Phi Kappa Phi Loan Fund, University of Florida.

University Scholarship Tag Fund.—Through the co-operation of the State Motor Vehicle Commission, arrangements have been made to sell front automobile tags to alumni and friends of the University. The income thus acquired is used to provide additional scholar-

ships for students. Awards are made on the basis of need, scholarship, and extra-curricular activity. Applications are made to the Athletic Association.

Duncan U. Fletcher Agricultural Scholarship.—Awarded by the United States Sugar Corporation in the memory of the outstanding character of our late Senator, a scholarship of \$500 annually for a period of four years to students particularly interested in agricultural activities. Details governing the award of these scholarships together with application blank may be obtained from the Office of the Dean of Students. This scholarship will not be open in 1938-39.

Sears, Roebuck Scholarships.—Sears, Roebuck and Company has given funds to the University of Florida for the establishment of a number of scholarships in the amount of \$50 and \$100 annually to students particularly interested in agricultural activities. Details governing the award of these scholarships together with application blank may be obtained from the Office of the Dean of Students.

#### PRIZES AND MEDALS

Board of Control Awards.—The Board of Control annually awards the following medals:

- 1. The General College Declamation Medal, to the best declaimer of the General College.
- 2. Junior Oratorical Contest Medal, to the best orator of the junior class.
- 3. Senior Oratorical Contest Medal, to the best orator of the senior class.

Harrison Company Award.—A set of the Florida Reports, Volumes 1-22, Reprint Edition, is offered by the Harrison Company to the senior law student doing all his work in this institution, and making the highest record during his law course.

Harrison Company First Year Award.—Redfearn on Wills and Administration of Estates in Florida is offered by the Harrison Company to the first year law student making the highest average in twenty-eight hours of law taken in this institution.

Redfearn Prize.—For the past three years Hon. D. H. Redfearn of Miami has offered a prize of \$50 for the best essay by a law student on some topic of legal reform. This prize will be continued in 1938-39.

Groover-Stewart Drug Company Cup.—Mr. F. C. Groover, president of the Groover-Stewart Drug Company, has given a large silver loving cup which is awarded to the graduating class in the School of Pharmacy attaining the highest general average in scholarship and is held by that class until this average is exceeded by a subsequent graduating class.

David W. Rantsaur Medal.—Mrs. D. W. Ramsaur of Jacksonville offers a gold medal to that graduate of the School of Pharmacy making the highest average in scholarship and evincing leadership in student activities.

Haisley Lynch Medal.—The University is grateful to Mrs. L. C. Lynch of Gainesville for her gift of the Haisley Lynch Medal for the best essay in American history. This medal is awarded annually by her in loving memory of her son, Haisley Lynch, a former student of the University, who was killed in action in France during the World War.

Gargoyle Key.—Gargoyle Society awards a gold key each year to the graduate of the General College, who, in the opinion of the members, was outstanding in scholarship, leadership, initiative, and general ability. To be eligible for the award the student must have completed the fundamental course in Architecture or that in Painting.

The David Levy Yulee Lectureship and Speech Contest.—Under the provisions of the will of Nannie Yulee Noble, a sum of money was bequeathed to the University of Florida, the income of which was to be used to bring outstanding speakers to the University to

deliver lectures to the student body and faculty on the general topic "The Ideal of Honor and Service in Politics".

In addition there is held annually a David Levy Yulee Speech Contest, the purpose of which is to stimulate student thought and encourage the creation and presentation of orations on a general idealistic theme. The contest is open to all students in the University and the winners of first and second place receive cash awards of \$40 and \$25, respectively.

The James Miller Leake Medal.—This is a medal awarded annually for an essay in American History. The medal is given by the Gainesville Chapter of the Daughters of the American Revolution and named for the Head of the Department of History and Political Science of the University of Florida.

Fine Arts Society Award.—The Fine Arts Society annually offers a gold medal and citation to the outstanding student receiving the baccalaureate degree in the School of Architecture and Allied Arts in recognition of his scholastic standing and leadership. The award is offered only when there are five or more students graduating.

Sigma Tau Award.—The Upsilon Chapter of Sigma Tau awards annually a medal for scholastic ability to the sophomore in the College of Engineering who, during his freshman year, made the highest average in his scholastic work.

Sigma Delta Chi Scholarship Key Award.—Sigma Delta Chi, professional journalistic fraternity, awards annually a key to ten percent of the students graduating in journalism who have the highest scholastic average for the three years' academic work immediately preceding the year in which the nominees are candidates for degrees.

Dillon Achievement Cup.—Mr. Ralph M. Dillon, Tampa, has given a large silver loving cup on which is engraved each year the name of that student graduating in journalism who, in the opinion of the Dean of the College of Arts and Sciences and the faculty of the Department of Journalism, possesses the highest qualifications for service to the press of Florida.

Delta Sigma Pi Scholarship Key.—Each year the Florida chapter of the international fraternity of Delta Sigma Pi, professional business administration fraternity, awards a gold key to that male senior in the College of Business Administration who upon graduation ranks highest in scholarship for the entire course in Business Administration.

Beta Gamma Sigma Scroll.—Each year the Florida chapter of Beta Gamma Sigma, national honorary business administration fraternity, awards a scroll to the junior in the College of Business Administration who, during his preparatory work in the General College, made the highest scholastic average of all students who enter the College of Business Administration.

The Chapter Scholarship Award.—A Certificate of Merit, signed by the President of the American Institute of Chemical Engineers and the Chairman of the Committee on Student Chapters, and a student membership badge are given to the junior in Chemical Engineering who is a member of the Student Chapter and who has attained the highest scholarship standing during his freshman and sophomore years.

Alpha Kappa Psi Scholarship Medallion.—Each year Alpha Kappa Psi, international professional fraternity in commerce, awards a white gold-bronze medallion to the Senior in the College of Business Administration who for his first three years at the University of Florida has been most outstanding in scholarship and campus activities and has shown the most likely qualifications for a successful business career in the future.

# GENERAL INFORMATION

## DEGREES

The Board of Control will confer the degree appropriate to the course pursued under the following conditions:

- 1. Curriculum requirements.—Certification by the Registrar that all requirements of the course of study as outlined in the college announcement, or its equivalent as determined by the faculty of the college offering the course, have been completed.
  - 2. Recommendation of the faculty.
- 3. Residence requirements.—Advanced standing will be allowed on certification from other recognized institutions and may be obtained also by examination held before a committee of the faculty appointed for that purpose provided that the following minimum requirement for residence at the University of Florida has been met:

The student must earn at least one year's credit in residence in this University. If the term of residence is only one year, that year must be the senior year. In addition, special residence requirements must be met in several of the schools and colleges. See individual announcements.

4. Attendance at commencement.—All candidates for degrees are required to be present at commencement exercises. A student who fails to attend shall not receive his diploma until he complies with this requirement.

## BY-LAWS

For information relative to graduation, failure in studies, conduct, social activities, etc., the student should consult the *Bulletin of By-Laws*. Each student is held responsible for observance of the rules and regulations of the University insofar as they affect him.

# GENERAL EXTENSION DIVISION

The General Extension Division of the University of Florida offers educational opportunities and numerous services to persons not residing in the vicinity of the campus.

The Division represents the Colleges of Arts and Sciences, Education, Law, Business Administration, and the School of Pharmacy of the University, and the College of Arts and Sciences and the Schools of Education and Music of the State College for Women.

The work is carried on through departments. Formal courses for college credit and some high school work are offered through the Department of Correspondence Study. Wherever a sufficient number of students may be enrolled, university classes are offered by the Department of Extension Classes.

Short courses of informal instruction are offered to professional, business, trade and civic groups in an effort to give them the latest information in their respective fields of interest. The Department of Women's Activities offers information and instruction on subjects of particular interest to groups of Florida women.

The Department of Auditory Instruction offers cultural and informational programs by lectures and discussion for the benefit of special groups, schools and individuals. Training for naturalization, citizenship schools and cooperation with the War Department in enrolling young men for the Citizens' Military Training Camps, because of their educational value, are some phases of the work of the Department of Citizenship Training.

Through the Departments of Visual Instruction and General Information and Service the world of letters and arts and music is carried to thousands in more isolated communities through the traveling libraries and art exhibits. A picture of the world an its work is circulated in the slides and filmslides furnished for instruction and entertainment. The best in recorded music is provided for work in music appreciation and for culture.

These and the various service functions of the Division establish contacts which enable the University to aid individuals, organizations and communities, and to contribute the adult education.

# SUMMER SESSION

The University Summer Session is an integral part of the University. The General College, the College of Education, the College of Arts and Sciences, the College of Law the College of Business Administration, the College of Agriculture, and the Graduat School operate during the summer, and certain field work in the College of Engineering in conducted.

Since women are admitted to the Summer Session, many professional courses for primar and elementary school teachers are offered in addition to those usually given in the winter session.

# DIVISION OF ATHLETICS AND PHYSICAL EDUCATION

In September, 1933, the University of Florida joined twelve other southern institution in forming the new Southeastern Conference. This new conference represents college and universities in the states of Louisiana, Mississippi, Alabama, Georgia, Florida, Ternessee, and Kentucky.

The type of athletic program undertaken by the Department of Physical Education at the University of Florida compares with that in leading universities. A two-year cours of required Physical Education is included in the curriculum of the Lower Division. Students who are exempt from Military Science are required to take this work, which is designe to present participation, training, and instructional opportunities in sports included in the intramural program. This course may also be taken as an elective.

The second major sub-division of this Department is that in which are included intercollegiate athletics. These sports are divided into two groups, generally known as major and as minor sports. In the major group are football, basketball, boxing, baseball, an track; and in the minor group, swimming, tennis, golf, and cross country running. The equipment includes two baseball diamonds, four athletic fields, six handball courts, twindoor basketball courts, eight tennis courts, a large outdoor swimming pool, a concret stadium with a seating capacity of 23,000, and two quarter-mile running tracks, one providing permanent seats for approximately 1,500.

The function of the Intramural Department is to encourage the entire student body t participate in organized athletic sports and wholesome recreation. The Department provides facilities for such competition and recreation; organizes and promotes competition between students, groups, and individuals; and fosters a spirit of fair play and sportsman ship among participants and spectators.

The program of intramural activities includes the following sports: golf, swimming horseshoes, touch football, basketball, boxing, wrestling, diamondball, tennis, handball water basketball, track, shuffle board, foul shooting, ping pong, badminton, cross countranning, and Sigma Delta Psi (national athletic fraternity) events.

The proper utilization of leisure time through recreation and play is splendidly expressed in this program. It is estimated that more than 2,000 students (about seventy per cent of the student body) take part in some sport sponsored by the Department. There is a decided trend toward the expansion of recreational facilities for a large group of students as opposed to intense competition for a few.

The rules of the Southeastern Conference do not permit member institutions to employ athletes or to pay students for their services on athletic teams. However, this does not mean that a student is ineligible to receive aid from his institution in the form of scholarships, loan funds, or compensation for student labor merely because he may be proficient in athletics. Athletes in the University of Florida are eligible to all forms of assistance that may be available to other students. As a rule, awards are made only to those who are unable financially to attend the University without assistance and whose standards of conduct and scholarship are worthy of consideration. Awards are usually made in the form of board, rent, books, and similar items rather than in the form of cash, and may be continued from year to year throughout the college course to those students whose records prove satisfactory. Administration of these funds is in the hands of the Committee on Scholarships. Further information may be secured by writing to the Dean of Students, who is chairman of that Committee.

# DIVISION OF MILITARY SCIENCE AND TACTICS

The course in Military Science is required of all physically qualified General College students except adult special students and students transferring from other universities or colleges.

Students who complete the basic course and are selected by the Professor of Military Science and Tactics and the President of the University may elect the advanced courses. Students electing these courses must carry them to completion as a prerequisite to graduation. Upon the completion of these courses, those students recommended by the Professor of Military Science and Tactics and the President of the University will, upon their own application, be offered a commission in the Officers Reserve Corps, United States Army. Students electing to do advanced work in Military Science and Tactics must attend a summer camp, usually between their junior and senior years, established for this purpose by the United States Government. The War Department pays all expenses for the camp including mileage, rations, medical attendance, clothing, and laundry service, and in addition the pay of the seventh grade, United States Army.

# UNIVERSITY OF FLORIDA BAND

Students may enroll in the band under either of the two following plans:

 A student may elect to substitute Band practice and drill for Military Science and Tactics.

BAND, 4 hours per week throughout first two years.

b. A student may elect to combine Band practice and drill with the study of Military Science and Tactics.

SAND, 4 hours per week throughout first two years.
MILITARY, 3 hours per week throughout first two years.

Band work will be open to upperclassmen upon permission of the Director of the University of Florida Band.

While both of the above outlined plans will satisfy for graduation the basic military requirements of the General College, only the second one (b) will qualify the student to enroll for advanced work with the R.O.T.C.

# DIVISION OF MUSIC

The Division of Music offers opportunity for membership in three musical organizations: The University Band, the Glee Club, and the Symphony Orchestra.

All University of Florida students who qualify are eligible for membership in any of these organizations.

The Band performs at all football games within the State and makes at least one out of State trip each season. The Band plays at military parades on the campus, gives a number of concerts and broadcasts during the second semester, and performs at such public functions as the Gasparilla Celebration, the Governor's Inauguration, etc.

The University of Florida Glee Club is composed of men enrolled in the University who are interested in choral singing. The Glee Club makes several trips through the State, particularly during the second semester. Members of the Glee Club are heard regularly each week over the radio in a broadcast period known as the University Hour.

The University of Florida Symphony Orchestra affords an opportunity for the study and performance of symphonic and classical music, makes a number of trips through the State each season and gives a number of concerts and broadcasts on the campus.

Private lessons are offered by the members of the faculty of the Division of Music. These lessons are arranged as follows:

- 1. Orchestra and Band instruments, Mr. Brown.
- 2. Voice, including radio broadcasting, Mr. DeBruyn.
- 3. Piano, Organ, Harmony and Counterpoint, Mr. Murphree.

Lesson periods are arranged at the convenience of the instructor and pupil. Instructors may be consulted concerning lesson periods and rates.

# UNIVERSITY OF FLORIDA LIBRARIES

The libraries of the University are the General Library, the Experiment Station Library, the General Extension Division Library, the Law Library, and the P. K. Yonge Laboratory School Library. The libraries now contain approximately 129,000 volumes.

The General Library is housed in the Library Building, a modern fire-proof structure, with a seating capacity of between 750 and 800, and stack capacity of 200,000 volumes. There are 48 carrels in the stacks for the use of faculty and graduate students. A collection of Floridiana, material concerning Florida and written by Floridians, is housed in the Florida Room.

The Library contains general reference books, encyclopedias, dictionaries, yearbooks, handbooks, standard encyclopedias and dictionaries in foreign languages, and files of bound periodicals in both English and foreign languages.

The University Library is a depository for official publications of the United States Government. The Library receives valuable studies from universities, learned societies, and other organizations on exchange. It receives regularly by subscription 529 and by gift and exchange 747 periodicals of a general and scientific nature. Many daily and weekly state newspapers contribute complimentary copies.

The Library welcomes every opportunity to be of assistance to both faculty and students. In addition to an open shelf browsing collection of over 1600 volumes, recreational reading is fostered by means of a book display which contains books of timely interest. Bibliographies are prepared and information is collected for class work. Special attention is given to collecting material for debate activity.

The Library is open from 7:45 A.M. to 10:30 P.M. every week day except Saturday, when it closes at 1:30 P.M. During the regular session it is open on Sundays from 2 to 6 P.M.

# THE FLORIDA STATE MUSEUM

The Florida State Museum was created by an act of the legislature in 1917 as a department of the University of Florida.

The main objective of The Florida State Museum is to collect, preserve and interpret data concerning the history of Florida, both natural and civil. In the natural history of the state the endeavor is to collect the minerals and exhibit them in connection with their manufactured products of economics and commerce; to collect the fossils of vegetable and animal life showing the evolution of life through the geologic ages; to collect specimens of recent vegetable and animal life illustrating the flora and fauna of the state in connection with their economic and commercial enterprises. In the civil history of the state the endeavor is to collect material and data of the works of mankind from the early aborigines on up through the beginning of civilization to the present time; to maintain exhibits of artifacts of early man, and exhibits of articles in the economic, industrial and social life showing the advancement of civilization.

To maintain a department of archives for the preservation of the records of the state; to maintain a library of publications pertinent to the general and diversified activities of the museum; to maintain a gallery of art for the preservation and exhibit of portraits of persons who have been responsible for making Florida a better place to live, and for the exploitations of works of art for the edification of and as a social center for our citizens; to maintain a department of museum extension among the schools and communities of the state; to publish reports, bulletins, and monographs of the progress of the work, are some of the activities for which The Florida State Museum strives, and for which the law provides.

In carrying on the general activities as above outlined The Florida State Museum now has a total of 337,414 specimens catalogued at an inventoried value of \$347,792.08, the majority of which has been presented or provided by will. The museum is free to the public every day in the year.

# HEALTH SERVICE

Through the Students' Health Service the University makes available to any student physical examinations, health consultations, and medical attention. General service is provided free of charge, but special fees are charged for services which are individual in character, such as dentistry, X-rays, board and laundry in the Infirmary, special drugs and serums, major surgery, special nurses, etc. No student, however, will be denied service because of inability to pay these fees.

The University Infirmary and the offices of the Health Service are on the campus. The Infirmary is open day and night for the admission of patients. The Resident Physician lives at the Infirmary and his services are available at all hours in case of emergency. The Dispensary in the Infirmary building is open from 7:30 to 9 a.m., from 12 noon to 1 p.m.

and from 4 to 7 P.M., during which time physicians are in attendance and may be consulted. A nurse is constantly on duty from 7 A.M. to 9 P.M. for emergency treatment.

It is the aim of the Health Service not only to function as a Health Service and render preventive measures, but to provide full hospital care in cases of illness. The Infirmary is rated as a Fully Approved Hospital by the Examining Board of the American College of Surgeons.

The facilities of the Dispensary are such that any number of students can be given attention in a day. The Dispensary is maintained to offer conferences with physicians, examinations, diagnosis, and treatment of minor injuries and illnesses which a student may suffer. The student is encouraged to use this service freely in order that he may avoid more serious illnesses by the lack of treatment or from improper treatment. In the Dispensary, a modern, well equipped drug room furnishes drugs to the student without charge. A laboratory in connection with the Infirmary and Dispensary is in charge of a trained nurse-technician, rendering efficient service in prompt diagnosis. The normal capacity of the Infirmary, 45 beds, can be increased in emergencies. Ample provisions are made for the isolation of communicable diseases. A completely equipped operating room is maintained to provide facilities for major surgical operations. The Infirmary is equipped with a mobile unit x-ray, which is used for the examination of fractures, but the equipment does not provide sufficient service for an extensive diagnostic X-ray study of the intestinal tract, etc. This service is made available to the students at actual cost of the materials used.

Students enrolling in the University for the first time are furnished by the Registrar's Office a physical examination form which is to be completed by the family physician and attached to Registration papers. On admission, the student is given a careful physical examination by the University Physician. It is necessary that this physical examination by the home physician be completed in order that parents may be aware of defects which should be corrected prior to the student's entrance in the University. The correction of these defects is necessary in order that he may be in proper physical condition to begin his college work.

There are three principal phases of the activities of the University Health Service: (1) personal attention, (2) sanitation, and (3) education.

- 1. Personal Attention.—This division is concerned with the physical examination of students. A complete record of the physical condition of each student is made and filed when he is admitted to the University. From this record can be determined, in large measure, what procedure is essential to keep the student in the best physical condition during his academic life. The following are some of the phases of the work in the personal division:
  - a. Provision for maintaining the health of normal, physically sound students; cooperation with the Department of Physical Education regarding physical exercise; education concerning right living; safeguarding of environment.
  - Protection of the physically sound students from communicable diseases; early
    detection, isolation, and treatment of all cases of communicable diseases—tuberculosis, diphtheria, scarlet fever, measles, typhoid fever, smallpox, mumps, etc.
  - c. Treatment and professional care of all students who are ill or in need of medical advice or treatment. For extended care by the Health Service it is necessary that the student enter the Infirmary. Any student may be admitted to the Infirmary upon the recommendation of the University Physician. To all patients in the Infirmary the staff will furnish medical and nursing services.
  - d. Reconstruction and reclamation: correction of defects, advice, and treatment of all abnormalities.

- Sanitation.—The student's environment should be made as hygienic as possible.Hence, this division concerns itself with the sanitary conditions both on and off the campus.
- 3. Education.—Every student in the University is made familiar with the fundamentals of both personal and public hygiene. Through personal conferences education in hygiene and right living is conducted.

# VACCINATION

Prospective students are advised to be vaccinated against smallpox and to be inoculated against typhoid fever. Unless a certificate is presented showing successful vaccination within five years, students will be vaccinated against smallpox at the time of registration.

# BUREAU OF VOCATIONAL GUIDANCE AND MENTAL HYGIENE

A program of vocational guidance is carried on for the students through a series of tests, interviews, and the application of scientific occupational information. The Bureau offers a service to those encountering mental difficulties which interfere with their scholastic work. Further information concerning these services may be obtained from the Bulletin of the Bureau of Vocational Guidance and Mental Hygiene.

# FLORIDA UNION

Florida Union serves a three-fold purpose: It is the official center of student activities and presents a broad program of recreation and entertainment for the student body; it is the campus home of faculty, students, alumni, and friends of the University; it aids in establishing a cultural pattern which will distinguish Florida men. The building is open daily from 8:00 A.M. until 11:00 P.M. The game room, reading room, lounge rooms, and various meeting rooms are available to the student body. The offices of the Student Body, the Y.M.C.A., Alumni Association, and the Publicity Department of the University are located in the Florida Union. A soda-fountain and the bookstore in the annex offer attractive service at the most economical prices. A cordial welcome always awaits every student at the Florida Union.

# STUDENT ORGANIZATIONS AND PUBLICATIONS

Student Government.—Student government in the University of Florida is a cooperative organization based on mutual confidence between the student body and the faculty. Considerable authority has been granted the Student Body for the regulation and conduct of student affairs. The criterion in granting authority to the Student Body has been the disposition of the students to accept responsibility commensurate with the authority granted them. Generally speaking, the fields of student activity include regulation of extra-curricular affairs and the administration of the Honor System.

Every enrolled student, having paid his activity fee, is a member of the Student Body and has an equal vote in its government.

The University authorities feel that training in acceptance of responsibility for the conduct of student affairs at the University is a valuable part of the educational growth of the individual student. The Student Body is practically a body politic, occupying its franchise under grant from the Board of Control and subject to its continued approval.

Student government is patterned on the state and national form of government, but adapted to the local needs of the Student Body. Powers are distributed into the three branches: (1) legislative, which is embodied in the Executive Council; (2) judicial, which is embodied in the Honor Court with penal and civil jurisdiction of all judicial matters; (3) executive, embodied in the President and shared with the Vice-President and the Secretary-Treasurer of the Student Body. Members of all three branches are elected directly by the Student Body once a year.

Student government enacts and enforces suitable laws; and promotes athletics, debating, publications of the Student Body, entertainments of a general educational value, and such other activities as the Student Body may adopt. The officers of the Student Body are the President, Vice-President, Secretary-Treasurer, members of the Honor Court, Athletic Council, Executive Council, Lyceum Council, editors and business managers of student publications, and student members of the Board of Student Publications.

Debating.—Practice in debating is open to all students through the programs of the varsity and General College debate squads. This work, which is sponsored by the Debate Club, is under direction of the Department of Speech, and culminates in an extensive schedule of intercollegiate debates.

Dramatics.—Any student has an opportunity to participate in several plays which are presented each year by the Florida Players, a dramatic group under direction of the Department of Speech.

Executive Council.—The Executive Council is composed of representatives elected from the colleges on the campus and in general acts as administrator of Student Body affairs. The Athletic Council and the Lyceum Council have jurisdiction over their respective fields.

Publications.—The Student Body publishes The Seminole, the year book; The Florida Alligator, a weekly newspaper; The "F" Book, the student's guide; and The Florida Review, the campus literary magazine.

Y. M. C. A.—The purpose of the Young Men's Christian Association is to provide a medium through which the highest ideals of education and religion may be expressed in terms of service. The program of the Association is planned to meet definite needs as they become apparent. There is no membership fee. Any student may become a member by subscribing to its purpose and contributing to its support. A secretary having extensive experience with the problems of students is available for counsel and help.

Social Fraternities.—Twenty-two national social fraternities have established chapters at the University; most of them have already built chapter houses and the others have leased homes. The general work of the fraternities is controlled by the Interfraternity Conference, composed of two delegates from each of the national fraternities. The national fraternities at Florida are Alpha Gamma Rho, Alpha Tau Omega, Beta Theta Pi, Chi Phi, Delta Chi, Delta Tau Delta, Delta Sigma Phi, Kappa Alpha, Kappa Sigma, Lambda Chi Alpha, Phi Beta Delta, Phi Delta Theta, Phi Kappa Tau, Pi Kappa Alpha, Pi Kappa Phi, Sigma Alpha Epsilon, Sigma Chi, Sigma Nu, Sigma Phi Epsilon, Tau Epsilon Phi, Theta Chi and Theta Kappa Nu. There is one state-organized fraternity on the campus, Pi Delta Sigma.

Honor Societies, Fraternities, and Clubs.—Agricultural Club; Alpha Epsilon Delta, premedical fraternity; Alpha Kappa Psi, business fraternity; Alpha Phi Omega, service fraternity; Alpha Tau Alpha, agricultural education fraternity; Alpha Zeta, agricultural fraternity; American Institute of Chemical Engineers, Student Branch; American Institute of Electrical Engineers, Student Branch; American Pharmaceutical Association, Student Branch; American Society of Mechanical Engineers, Student Branch; Benton Engineering Society; Beta Gamma Sigma, commerce fraternity; Commerce Club; Delta Sigma Pi, commerce fraternity; English Club; Florida Blue Key, leadership fraternity; Florida Fourth Estate Club, journalistic society; Gamma Sigma Epsilon, chemical fraternity; Gargoyle, architectural club; Kappa Delta Pi, educational fraternity; Kappa Epsilon, women's pharmacy society; Kappa Gamma Delta, aeronautical fraternity; Kappa Kappa Psi, band fraternity; Kappa Phi Kappa, educational fraternity; Leigh Chemical Society; Mathematics Colloquium; Mortar and Pestle, pharmacy club; Phi Alpha Delta, legal fraternity; Phi Beta Kappa, scholastic fraternity; Phi Delta Phi, legal fraternity; Phi Eta Sigma, freshman scholastic fraternity; Phi Kappa Phi, scholastic fraternity; Phi Sigma, biological fraternity; Pi Delta Epsilon, journalistic fraternity; Pi Gamma Mu, social science fraternity; Rho Chi, pharmacy fraternity; Sabres, military fraternity; Sigma Delta Chi, journalistic fraternity; Sigma Delta Psi, athletic fraternity; Sigma Tau, engineering fraternity; Tau Kappa Alpha, forensic fraternity; and Thyrsus, horticultural fraternity.

# HONOR SYSTEM

The Honor System.—One of the finest tributes to the character of the students at the University of Florida is the fact that the Student Body is a self-governing group. The details of the system by which this result is reached will be explained to all freshmen during the first week of their enrollment in the University. However, each parent, as well as each prospective student, is urged to read the following discussion of the Honor System, as this phase of student government forms the keystone of the entire system.

In addition to permitting student legislation on questions of interest to the members of the Student Body, execution of the laws passed, and the expenditure of student funds, the governing system at the University gives to the students the privilege of disciplining themselves through the means of the Honor System. Inaugurated by some of our greatest educators, in higher institutions of the nation, and early adopted in some departments of the University of Florida, the Honor System was finally established in the entire University in 1914, as the result of student initiative. This plan, having met with the approval of all officials of the University, was given the sanction of the Board of Control, and student representatives were selected by the students to administer the system.

Among the basic principles of an Honor System are the convictions that self-discipline is the greatest builder of character, that responsibility is a prerequisite of self-respect, and that these are essential to the highest type of education. Officials of the University and the Board of Control feel that students in the University of Florida should be assumed to be honest and worthy of trust, and they display this confidence by means of an Honor System.

The success of the System is dependent upon the honor of each individual member of the student body in that: (1) he is duty-bound to abide by the principles of the Honor Code, and (2) he is further pledged to report to the Honor Court such violations of the Code as he may observe.

Many men coming to the University for the first time may feel hesitant about assuming this responsibility, inasmuch as early school training has created feelings of antipathy toward one who "tattle-tales" on a fellow-student. The theory of an Honor System adequately overcomes this natural reaction, however, when it is realized that this system is a student institution itself, and not a faculty measure for student discipline, and that to be worthy of the advantages of the Honor System each student must be strong enough to do his duty in this regard. In this way the responsibility for each man's conduct is placed where it must eventually rest—on himself.

The Honor Code of the Student Body is striking in its simplicity; yet it embodies the fundamentals of sound character. Each man is pledged to refrain from:

(a) cheating, (b) stealing, (c) obtaining money or credit for worthless checks.

On the basis of this Code, students are extended all privileges conceived to be the basic rights of men of Honor. There are no proctors or spies in the examination rooms, each student feeling free to do his work, or to leave the room as occasion arises. Secondly, fruits and supplies are placed openly on the campus, with the confidence that each man will pay for any he may take. This system makes each man the keeper of his own conscience until he has proven to his fellow-students that he no longer deserves the trust placed in him.

A breach of the System may be flagrant and serious, or it may be extenuated by circumstances. It may need only mild corrective measures to help the violator obtain a finer conception of right and wrong; it may need strong measures. To enforce the System equitably the students have established the Honor Court. The Court is composed of twelve students and a chancellor all of whom are elected annually from the upper classes of the various colleges on the campus. Any student convicted by this Court has the right of appeal from its ruling to the Faculty Discipline Committee. A tribute to the efficiency of the Honor Court in its existence on the Florida campus is realized in the fact that, since its establishment, a surprisingly insignificant number of the Court's decisions have been altered upon appeal.

The penal purpose of the Honor Court should receive less stress, perhaps, than its educational purpose, which is its most important function. The responsibility of acquainting every member of the Student Body with the purpose, advantages, and principles of the Honor System is placed upon members of the Court. In line with this work, members of the Honor Court participate in the orientation program each year during Freshman Week In addition to a series of explanatory talks at that time, special chapel programs are conducted by the Honor Court during the school year. Honor System talks are delivered in the high schools of the State upon request and at regularly scheduled times each spring, and radio programs are broadcast especially for the high schools from Station WRUF in Gainesville. In this way the Honor Court has endeavored to fulfill its responsibility to the men who undertake the problem of self-government and self-discipline at the University of Florida.

The parent of every prospective student should feel that it is his responsibility to stress the paramount importance of honorable conduct on the part of his son while the latter is in attendance at the University of Florida. Dishonest action brings sorrow both to parent and to student.

Because University students have proved worthy of the trust and responsibility involved in administering an Honor System, this feature of student government has become the greatest tradition at the University of Florida. It must be remembered that inasmuch as it is primarily a student responsibility, the future of the system rests with each new class of students entering the University. The University faculty and authorities pledge their support to the Honor System. Each student must support it, or, in failing to support it, contribute to the loss of this tradition.

# COLLEGE OF AGRICULTURE

#### ADMINISTRATION

John James Tigert, M.A. (Oxon.), Ed.D., D.C.L., LL.D., D.Litt., L.H.D., President Townes Randolph Leigh, Ph.D. (Chicago), Acting Vice-President Wilmon Newell, D.Sc. (Iowa State College), Dean and Director Wilbur Leonidas Floyd, M.S., Assistant Dean, Administration, College of Agriculture H. Harold Hume, D.Sc. (Clemson), Assistant Dean and Director, Research Harold Mowry, M.S.A., Assistant Director, Administration, Experiment Station Arthur Percival Spencer, M.S., Vice-Director and County Agent Leader, Agricultural

Extension Service
HARLEY WILLARD CHANDLER, M.S., Registrar

JOHN FRANCIS COOPER, M.S.A., Editor

CLYDE BEALE, B.A.J., Assistant Editor

EDWIN F. STANTON, Supervisor, Egg-Laying Contest, Chipley IDA KEELING CRESAP, Librarian

### ACRICULTURAL CHEMISTRY

ALVIN PERCY BLACK, Ph.D. (Iowa), Professor of Agricultural Chemistry

#### AGRICULTURAL ECONOMICS

CLARENCE VERNON NOBLE, Ph.D. (Cornell), Head Professor of Agricultural Economics (Part Time)

HENRY GLENN HAMILTON, Ph.D. (Cornell), Professor of Marketing JULIUS WAYNE REITZ, M.S., Associate Professor of Agricultural Economics

### AGRICULTURAL EDUCATION

EDWARD WALTER GARRIS, Ph.D. (Peabody), Professor of Agricultural Education

# AGRICULTURAL ENGINEERING

FRAZIER ROGERS, M.S.A., Head Professor of Agricultural Engineering

### AGRONOMY

ROBERT VERRILL ALLISON, Ph.D. (New Jersey), Head of Department Frederick Burean Smith, Ph.D. (Iowa State College), Professor of Soils Pettus Holmes Senn, Ph.D. (Wisconsin), Associate Professor of Farm Crops and Genetics

### ANIMAL HUSBANDRY

ARTHUR LISTON SHEALY, D.V.M. (McKillip), Head Professor of Animal Husbandry
CLAUDE HOUSTON WILLOUGHBY, M.A., Professor of Animal Husbandry
RAYMOND BROWN BECKER, Ph.D. (Minnesota), Professor of Dairy Husbandry and Animal
Nutrition

NORMAN RIPLEY MEHRHOF, M.S., Professor of Poultry Husbandry

NATHAN WILLARD SANBORN, M.D. (City of New York), Professor of Poultry Husbandry (Special Status)

MARK WIRTH EMMEL, D.V.M. (Iowa State College), Professor of Veterinary Science LLOYD MASSENA THURSTON, Ph.D. (Minnesota), Professor of Dairy Manufactures

WAYNE MILLER NEAL, Ph.D. (Minnesota), Associate Professor of Animal Nutrition William Gordon Kirk, Ph.D. (Iowa State College), Assistant Professor of Animal Husbandry

P. T. DIX ARNOLD, M.S., Assistant Professor of Dairy Husbandry OLIVER WENDEL ANDERSON, M.S., Instructor in Poultry Husbandry LOUIS LEON RUSOFF, M.S., Assistant Professor of Animal Nutrition RAYMOND MERCHANT CROWN, B.S., Assistant Professor of Animal Husbandry

# BOTANY AND BACTERIOLOGY

Madison Derrell Cody, M.A., Head Professor of Botany and Bacteriology William Richard Carroll, Ph.D. (Minnesota), Associate Professor of Botany and Bacteriology

## ENTOMOLOGY AND PLANT PATHOLOGY

JOHN THOMAS CREIGHTON, Ph.D. (Ohio State), Professor and Head of Department HOMER HIXSON, Ph.D. (Iowa), Instructor in Entomology and Plant Pathology

### HORTICULTURE

WILBUR LEONIDAS FLOYD, M.S., Head Professor of Horticulture CHARLES ELLIOTT ABBOTT, M.S., Professor of Fruits and Vegetables JOHN VERTREES WATKINS, M.S.A., Assistant Horticulturist

## ORGANIZATION

The College of Agriculture is composed of three divisions:

- 1. Instruction Division (the College proper)
- 2. Research Division (Experiment Station)
- 3. Agricultural Extension Service

### THE COLLEGE

The aim of the College is to afford young men the best possible opportunity for gaining technical knowledge and training in the art and science of Agriculture, thus enabling graduates to become effective producing agriculturists, leaders in educational work, research workers, etc.

#### LIBRARIES

The University Library contains many works on agriculture and horticulture. Each department has a small collection of well selected volumes which are always accessible. In the Experiment Station Library are bulletins from the United States Department of Agriculture and from the experiment stations of the world, all fully indexed.

### DEGREES AND CURRICULA

To enter the College of Agriculture and register for the curriculum leading to the degree of Bachelor of Science in Agriculture, students are required to present a certificate of graduation from the General College, and to have completed the following courses as electives in the General College:

Cy. 1	01-102,	General	Chemistry	for C-7
CAg.	63-64,	Animal	Science	for C-8
CAg.	65-66.	Plant S	eience	for C-9

The minimum load for students in the College of Agriculture will average 17 hours a semester. A total of 68 hours with 68 honor points will be required for graduation, including Military Science, if it is elected.

Students entering the College of Agriculture may take a major in any one of the following departments:

Agricultural Chemistry
Agricultural Economics
Agricultural Education
Agricultural Engineering
Agronomy, including the
divisions of

- (a) Soils
- (b) Crops

Animal Husbandry, including the divisions of

- (a) Animal Production
- (b) Dairy Husbandry and Animal Nutrition
- (c) Dairy Manufactures
- (d) Poultry Husbandry

Botany and Bacteriology
Entomology and Plant Pathology
Horticulture

The head of the department in which a student majors (or his appointee) will act as the student's adviser, assist the student in arranging his course of study, and make necessary recommendations to the Dean. The student's courses for each semester are subject to the approval of the Dean and of the department head.

If a student anticipates pursuing graduate work, he will find it helpful to elect as many basic courses as possible, such as chemistry, biology, mathematics, botany, physics, economics, and a language. On the other hand, if a student anticipates going into applied agriculture: farming, county agent work, farm superintendency, etc., he will find it profitable to elect as much technical agriculture as possible in departments related to his major work.

To graduate with honors a student must complete 68 semester hours with 136 honor points, and be recommended by the head of the department in which he is majoring and the Dean.

To graduate with high honors a student must perform some special work assigned by the head of the department in which he majors, and pass a comprehensive examination on all his courses in agriculture, in addition to earning 136 honor points.

#### CREDIT FOR PRACTICAL WORK

By previous arrangement with the head of the department and the Dean, students may, during their course of study, do practical work under competent supervision in any recognized agricultural pursuit, and upon returning to the college and rendering a satisfactory written report showing faithful service, will be entitled to one credit for each month of such work. Such credits may not total more than three.

Practical work is especially important for students who have no farm experience.

Even though they cannot procure employment under such co-apetent supervision as will give college credit, they should secure work along the line in which they are majoring. Faculty members will assist as much as possible in securing such vacation employment.

# SCHOOL OF FORESTRY

### ADMINISTRATION

JOHN JAMES TIGERT, M.A. (Oxon.), Ed.D., D.C.L., LL.D., D.Litt., L.H.D., President Townes Randolph Leigh, Ph.D. (Chicago), Acting Vice-President Wilmon Newell, D.Sc. (Iowa State College), Dean HAROLD STEPHENSON NEWINS, M.F. (Yale), Director HARLEY WILLARD CHANDLER, M.S., Registrar

#### FORESTRY FACULTY

HAROLD STEPHENSON NEWINS, M.F. (Yale), Director and Head Professor of Forest Utilization

EDWIN ALLEN ZIEGLER, Sc.D. (Franklin & Marshall), Professor of Forest Economics and Finance

James W. Miller, Jr., B.S.F. (N. C. State), Assistant Professor of Forestry (Silviculture)
Percy Warner Frazer, M.F. (Yale), Assistant Professor of Forestry (Management)
George F. Weber, Ph.D. (Wisconsin), Professor of Forest Pathology (Part Time)

# GENERAL STATEMENT

The work offered by the School of Forestry consists of two Divisions: the four-year course leading to the Bachelor of Science in Forestry and the special two-year Ranger Course offering a certificate at its completion. Both courses deal with southern conditions in relation to Southern Yellow Pine, Southern Hardwood and Naval Stores.

The work offered by the School of Forestry leading to the Bachelor of Science in Forestry meets the strictest requirements necessary in order that the student may be eligible for the Civil Service examination required for employment with the United States Forest Service and other agencies.

The curriculum is designed to provide a broad scientific education in the four fields of forestry, namely: Forest Management, Forest Utilization, Silviculture, and Forest Economics and Finance. The students in their senior year may elect advanced subjects in either of these particular fields.

The Austin Cary Memorial Forest, located eight miles northeast of Gainesville on the Gainesville-Waldo highway and consisting of 1559 acres, is used as an experimental forest where the student gets actual practice in the field of the forestry problems in the particular fields mentioned. The School of Forestry has a small sawmill equipped with edger, cut-off saw and other necessary equipment, located on this forest. Naval stores operations and experiments are being carried on continuously.

# REQUIREMENTS FOR ADMISSION

Graduation from General College or its equivalent as determined by the Board of Examiners. The student should have completed the following courses:

Cy. 101-102, General Chemistry CAg. 63-64, Animal Science	
Bty. 101-102, General Botany	
(Substituted for Ptant Science)	

## REQUIREMENTS FOR GRADUATION

The student must receive a total of 70 hours and 70 honor points as determined by the curriculum inclusive of Military Science, if it is elected. Also the student must attend and successfully complete a six weeks' Sophomore Camp at the Austin Cary Memorial Forest and a six weeks' Junior Camp held on one of the National Forests in the mountains of the eastern United States.

#### GRADUATION WITH HONORS

Regulations, concerning graduation with honors, may be found in the Bulletin of By-Laws.

### CURRICULUM LEADING TO A B.S. DEGREE IN FORESTRY

### First Year General College

As Scheduled

#### Second Year General College

As Scheduled with the following changes:

Courses		First Semester	Credits
Bty. 101	-General	Botany	4
		(Substituted for Plant Science of General College. Also, students should elect Chemistry 101.)	
Courses		Second Semester	Credits
Bty. 102	-General	Botany	4
		(Substituted for Plant Science of General College. Also, students should elect Chemistry 102.)	

Sophomore Summer Camp.—To be held on the Austin Cary Memorial Forest unless otherwise designated.

Six weeks. At least 40 hours a week in the forest, doing practical work, scientific observations, surveying, forest mensuration, identification, protection, improvements, and utilization.

# SHORT COURSE

-Industrial Education Forestry (For Industrial Education Students Only) .....

# TRAINING FOR FOREST RANGERS

Applicants 18 years of age or over who meet the regular entrance requirements of the University or who, in the discretion of the Director of the School of Forestry, the Dean of the College of Agriculture and the Board of University Examiners, are otherwise qualified, or who have been employed in some practical forestry work, may apply to the Registrar for admission to the Short Course for Forest Rangers.

The work of the short course is given to increase the practical efficiency of those students who are in training as Forest Rangers. The usual University credits will not be granted, and the work taken will not count toward any University degree.

Much of the laboratory instruction is given in the nearby forests to which classes are transported by bus or automobile.

Upon satisfactory completion of the first year curriculum and summer camp, students will be given a certificate of work accomplished. At the completion of the second year, the student may secure a certificate of completion of the Ranger Course.

# SCHOOL OF ARCHITECTURE AND ALLIED ARTS

## ADMINISTRATIVE OFFICERS

JOHN JAMES TIGERT, M.A. (Oxon.), Ed.D., D.C.L., LL.D., D.Litt., L.H.D., President Townes Randolph Leich, Ph.D. (Chicago), Acting Vice-President Rudolph Weaver, B.S., F.A.I.A., Director of the School of Architecture and Allied Arts Harley Willard Chandler, M.S., Registrar

#### FACULTY

RUDOLPH WEAVER, B.S., F.A.I.A., Director, Head Professor of Architecture Keith Graham Reeve, M.A.Arch., A.I.A., Associate Professor of Architecture Frederick T. Hannaford, B.A., Assistant Professor of Architecture (Part Time) William T. Arnett, M.A.Arch., Assistant Professor of Architecture John Louis Rochon Grand, M.A., Assistant Professor of Architecture Warren F. Doolittle, B.F.A., Instructor in Drawing and Painting Forrest M. Kelley, B.S.Arch., Graduate Assistant in Architecture

# GENERAL INFORMATION

The work of the School of Architecture and Allied Arts is organized on the basis of a Lower Division and an Upper Division. Five professional courses are offered: Architecture, Building Construction, Landscape Architecture, Painting, and Commercial Art.

Each curriculum is devised with the intention of giving thorough training in the fundamentals of the profession chosen. The project method of teaching, in which related material is co-ordinated, is employed in every course in the School of Architecture and Allied Arts, and the projects of the various courses are so integrated that each curriculum, instead of being a series of separate subjects, is a unified and correlated whole.

Individual instruction is given to each student. Because of the individual nature of the work, each student passes from one group of problems to the next in varying lengths of time according to his accomplishment, and irrespective of University time units and the progress of other students.

#### ARCHITECTURAL REGISTRATION

The State of Florida is one of 36 states which have prescribed by law the qualifications for architectural practice and require the passing of examinations given by a state board. Students who receive the degree in Architecture from the University of Florida will, by action of the Florida State Board of Architecture, be exempt from examination in certain subjects when applying for a certificate of registration.

## SPECIAL LECTURES

Prominent men from related fields and from the various chapters of the American Institute of Architects and the Florida Association of Architects are invited to give lectures which are intended to acquaint the student with the best professional thought and with the culture of our times.

The semi-annual business meeting of the Florida Association of Architects, which is held in the rooms of the School, is open to the students. An opportunity is thus provided for the students to become acquainted with the problems which confront the practicing architect, particularly in Florida, and to meet potential employers.

#### ADMISSION

Requirements for admission to the School of Architecture and Allied Arts are stated under "Admission" in each curriculum. For more detailed information concerning admission, see the *Bulletin of Information for the General College*.

#### ADULT REGISTRATION PRIVILEGE

Persons twenty-one or more years of age who are not candidates for a degree may, by special vote of the faculty and the approval of the Board of University Examiners, be permitted to register in subjects for which they are adequately prepared. For information concerning the Admission of Special Students see page 276.

#### GRADUATE STUDY

The degree of Master of Arts in Architecture is offered in the Graduate School. For further information, see the *Bulletin of the Graduate School*.

### GENERAL REGULATIONS

#### ADVANCEMENT

Advancements in the Departments of Architecture and Painting are made by vote of the faculty. To be advanced from one course to the succeeding one, a student must have completed the projects of the course successfully, and must give evidence of satisfactory accomplishment in all the corequisite courses of his curriculum.

#### ACADEMIC CREDIT

The School of Architecture and Allied Arts has dispensed with clock hours, class grades, and semester hours credit as prerequisites to the completion of its work. Understanding and demonstrated proficiency are used as a test for granting a degree, rather than the traditional accumulation of credits.

#### STUDENT RESPONSIBILITY

The student must assume full responsibility for registering for the proper courses and for fulfilling all requirements for his degree. The faculty will assist and advise, but the student must take the initiative and assume responsibility for managing his own affairs.

# ELECTIVE COURSES

Any student in the School of Architecture and Allied Arts may by permission enroll in courses in addition to those of his regular program to broaden his general or professional education in any direction he may choose.

#### STUDENT'S WORK

The School reserves the right to retain for purposes of exhibition or instruction any work or drawings submitted by students.

### CRADUATION WITH HONORS

Students successfully completing the work of the School shall, according to the character of their work as determined by the faculty, receive diplomas of graduation, of graduation With Honors, or of graduation With High Honors.

### DEGREES AND CURRICULA

## DEPARTMENT OF ARCHITECTURE

The Department of Architecture offers instruction in Architecture, Building Construction, and Landscape Architecture.

Architecture.—The work in Architecture is for students who desire to become architects or to enter some related field in which beauty is combined with utility. It is the aim of this course to prepare students to become draftsmen, designers, inspectors and superintendents of construction, specification writers, teachers, etc., or ultimately to become practicing architects or specialists in their chosen fields.

The course in Architecture, while not of fixed duration, will nominally require three years beyond the General College, and leads to the degree of Bachelor of Architecture.

Building Construction.—The work in Building Construction is for students who are interested in the construction and erection of buildings rather than in their planning, and who wish to prepare themselves to design the structural parts of buildings, the business of contracting, the manufacture or sale of building materials, or for other branches of building construction.

The course in Building Construction, while not of fixed duration, will nominally require two years beyond the General College, and leads to the degree of Bachelor of Science in Building Construction.

Landscape Architecture.—The course in Landscape Architecture is designed to fit students for work in the arrangement and preservation of land areas for use and beauty. The aim is not only to prepare a graduate for immediate usefulness as an assistant to an established practitioner, but also to lay a foundation for his ultimate independent practice of the profession.

The course in Landscape Architecture, while not of fixed duration, will nominally require two years beyond the General College, and leads to the degree of Bachelor of Soience in Landscape Architecture.

## CURRICULUM IN ARCHITECTURE

Admission.—To enter the School of Architecture and Allied Arts and to register for the curriculum leading to the degree in Architecture, students are required to present a certificate of graduation from the General College, and to have completed the following courses as electives in the General College:

Ae. 11A, Fundame	ntals of Architecture	for	C-7	and	C-8
	Mathematics				

Requirements for the Degree.—To qualify for the degree of Bachelor of Architecture a student must complete the following courses to the satisfaction of the faculty and must successfully pass a comprehensive examination in Architecture.

# DEPARTMENT OF PAINTING

The Department of Painting offers instruction in Painting and in Commercial Art.

Painting.—The purpose of the work in Painting is to develop the student's technical ability in pictorial art. Beginning with the fundamentals of drawing, design, and color, the work expands into a highly specialized study of pictorial art, including mural decoration, figure, landscape, and portrait painting.

The course in Painting, while not of fixed duration, will nominally require three years beyond the General College, and leads to the degree of Bachelor of Fine Arts.

Commercial Art.—In all fields of commercial activity the product must possess, to a high degree, the quality of beauty; in bringing the products of industry to the attention of the public the best artistic talent is demanded. To prepare designers for this field of endeavor, the work in Commercial Art is offered. In addition to work in drawing, design, and color, a sound foundation is laid in the fundamentals of business practice.

The course in Commercial Art, while not of fixed duration, will nominally require two years beyond the General College, and leads to the degree of Bachelor of Arts in Commercial Art.

### CURRICULUM IN PAINTING

Admission.—To enter the School of Architecture and Allied Arts and to register for the curriculum leading to the degree in Painting, students are required to present a certificate of graduation from the General College, and to have completed the following courses as electives in the General College:

> Pg. 11A, Fundamentals of Pictorial Art for C-7 and C-8 An elective for C-9

Requirements for the Degree.—To qualify for the degree of Bachelor of Fine Arts a student must complete the following courses to the satisfaction of the faculty and must successfully pass a comprehensive examination in Painting.

N	Iominal	Semester	in	Which	Course	Occurs
Pg. 21A.—Pictorial Composition	1st	2nd	3rd

CHARLES LANGLEY CROW, Ph.D. (Goettingen), Professor Emeritus of Modern Languages Oliver Howard Hauptmann, Ph.D. (Wisconsin), Assistant Professor and Acting Head William Byron Hathaway, M.A., Associate Professor Francis Marion Degaetani, B.A.E., Instructor Oscar Frederick Jones, B.A., Instructor

#### SPEECH

HENRY PHILIP CONSTANS, M.A., Head Professor ARTHUR ARIEL HOPKINS, M.A., Associate Professor LESTER LEONARD HALE, M.A., Instructor ROY EDWARD TEW, B.A.E., Instructor (Part Time)

# GENERAL REGULATIONS

### STUDENT RESPONSIBILITY

Each student must assume full responsibility for registering for the proper courses and for fulfilling all requirements for his degree.

Seniors must file formal application for a degree in the Office of the Registrar and must pay the diploma fee very early in the semester in which they expect to receive the degree; the official calendar shows the latest date on which this can be done.

Each student is responsible for every course for which he registers. Courses can be dropped or changed without penalty only through the office of the Dean of the College.

### SPECIAL STUDENTS

Persons twenty-one or more years of age who are not candidates for a degree, but who give evidence of ability to profit by the courses they will take, may, under exceptional circumstances, be admitted as "Adult Special" students. They are required to comply with the same regulations as the regular students. For information concerning the Admission of Special Students see page 276.

The College of Arts and Sciences strongly discourages the registration of "Adult Special" students. It is felt that every student in the College ought to regularize himself if this is at all possible.

# CORRESPONDENCE STUDY

No part of the last thirty credits counted toward a degree may be earned by correspondence or extension study except by special permission.

#### MAXIMUM LOAD

Students in the College of Arts and Sciences are restricted in the maximum load which they will be permitted to carry in any semester by the following regulations: In no case shall a student be permitted to carry more than 19 credit hours in one semester; if his honor point average for the preceding semester is less than 1.5 he will not be permitted to take more than 16 credit hours.

#### ELECTIVES

In all curricula administered by the College of Arts and Sciences, registration in elective courses is subject to the approval of the Dean or his appointee.

### GRADUATION WITH HONORS AND HIGH HONORS

For graduation with honors a student must earn an honor point average of 2.2 or greater in the work of the Upper Division.

The regulations for graduation with high honors are administered by a committee of the faculty of the College. This committee administers a high honors examination which students of sufficiently meritorious scholastic record are invited to take. Recommendation for graduation with high honors is based upon excellence in the high honors examination, honor point average, distribution and quality of subject-matter studied, and evaluation of the student by his teachers.

### DEGREES AND CURRICULA

All beginning students are required to enroll in the General College. For information concerning the requirements for admission to the College of Arts and Sciences see Bulletin of Information for the General College.

To enter the College of Arts and Sciences students are required to present a certificate of graduation from the General College and to be certified by the Board of University Examiners as qualified to pursue the work of the College. Transfer students who wish to enter the College of Arts and Sciences are referred to the Board of University Examiners in accordance with the provisions of the section of this bulletin entitled "Transfer Students", pages 275-276.

# THE DEGREES OF BACHELOR OF ARTS AND BACHELOR OF SCIENCE

The curricula which lead to the degrees of Bachelor of Arts and Bachelor of Science are alike in all basic requirements. These curricula give emphasis to subject matter fields which have been the essence of American colleges from the beginning. The requirements for graduation from these curricula are as follows:

- Sixty-four semester credit hours of which 12 must be earned outside the major which is defined below;
- II. sixty-four honor points, and
- III. either a Departmental Major as described in (a), or a Group Major as described in (b).
  - (a) The Departmental Major. Many students desire or find it expedient to specialize in some one subject-matter field. Such students should undertake to earn a departmental major. A departmental major consists of three parts, as follows:

- Concentration consisting of not less than 24 and not more than 32 semester credit hours in one major department (no courses will be counted toward fulfillment of this requirement in which the grade earned is below C),
- (2) a reading knowledge of a foreign language or 6 semester credit hours in foreign language in a course numbered above 100, and
- (3) such subsidiary courses from departments other than the major department as are essential to thoroughness of concentration in the major department.

The work of the major may require and use all of the credits earned in the College of Arts and Sciences except 12, which the student will elect subject only to the restrictions that they must be earned in departments other than those which contribute to the major, and that they must be approved by the Dean or his appointee.

For information concerning the requirements for majors the student should consult the head of the department in which he intends to earn the major. The head of the major department, or his appointee, will act as registration adviser and as councillor for the student who intends to earn this type of major. The student's program of studies will be subject to the approval of the adviser, the curriculum committee, and the Dean or his appointee.

(b) The Group Major. Many students do not need the intensive concentration required in a departmental major. For such students group majors are provided. Any student who is interested in this type of major may secure information concerning his own program from the office of the Dean of the College of Arts and Sciences, or from the head of a department in which he expects to earn at least 12 semester credit hours.

For the group majors the courses offered by the College are divided into three groups. One group consists of the humanities, another group consists of the social sciences, and the remaining group consists of the laboratory sciences and mathematics.

A group major consists of three parts, as follows:

- (1) Courses in one of the three groups with not less than four semester courses totaling at least 12 semester credit hours in some one department of the group and not more than six semester courses totaling not more than 24 semester credit hours in any one department;
- (2) a reading knowledge of a foreign language or 6 semester credit hours in foreign language in a course numbered above 100;
- (3) such subsidiary courses from one or both of the other groups as may be deemed necessary to a complete program of study.

The group major may require and use all of the credits earned for graduation with the exception of 12 which the student shall elect subject only to the restrictions that they must be earned outside of the major group and must be approved by the Dean or his appointee. Each student who intends to earn a group major shall have as his registration adviser the head of a department or his appointee

(1) which offers courses in the group, and

(2) in which the student intends to earn not less than 12 semester credit hours.

The program of courses agreed upon by the student and his adviser will be subject to the approval of the curriculum committee and of the Dean or his appointee.

#### BACHELOR OF ARTS

The degree of Bachelor of Arts will be conferred upon those who fulfill the requirements for degrees with either departmental or group majors in the humanities and social science groups.

#### BACHELOR OF SCIENCE

The degree of Bachelor of Science will be conferred upon those who fulfill the requirements for degrees with either departmental or group majors in the laboratory sciences and mathematics group.

### THE DEGREE OF BACHELOR OF ARTS IN JOURNALISM

Instruction in journalism is intended to provide training for:

- (1) Those who are primarily interested in journalism as a profession, and who seek preparation for careers in such journalistic activities as advertising, free-lance writing, general magazine work, press association and syndicate work, public relations and publicity work, radio newswriting; specialized journalism, such as political writing, foreign correspondence, etc.; trade journalism, such as the business and agricultural press; and weekly newspaper work.
- (2) Those who plan careers in one of the many types of work closely related to journalism, and in which the broad cultural knowledge and training afforded by professional education in journalism will be either a requirement or an essential to success.
- (3) Those who are interested in journalism as a social science, and as a powerful agency for directing civilization's evolving processes, and who realize that an education in journalism, and the life situations with which journalism concerns itself, constitute a liberal education.

Students who are primarily interested in the cultural and intellectual training which the study of journalism affords, rather than in journalism as a profession, may select journalism as a departmental or group major for the degree of Bachelor of Arts, instead of pursuing the curriculum leading to the degree of Bachelor of Arts in Journalism.

Requirements for graduation with the degree of Bachelor of Arts in Journalism are:

I. Sixty-six semester credit hours, in which the student must include from the following courses in journalism those not already completed in the General College: 213, 214, 215, 216, 301, 302, 407, 408, 409, 412, and either option (a) or option (b). Option (a) consists of the three courses in Journalism, 317, 318, and 411, and is designed for those who intend to enter the business side of journalism (publishing and advertising). Option (b) is Journalism 314, and is designed for those who intend to enter the news and editorial and maga-

zine and special writing fields. The remainder of the 66 semester credit hours must be earned in approved electives, subject to the following provisions. Courses taken in any one department must total not less than 6 credits and not more than 18 credits. At least 18 credits must be earned in courses outside of the field of journalism.

- II. Sixty-six honor points.
- III. The head of the Department of Journalism will be the registration adviser for students in this curriculum. The student's program of studies will be subject to the approval of the head of the Department of Journalism and the Dean or his appointee.

#### THE COMBINED ACADEMIC AND LAW CURRICULA

The College of Arts and Sciences offers three curricula in combination with Law. In these curricula it is often possible for capable, industrious students to complete the requirements for admission to the College of Law by one year of work in the College of Arts and Sciences after graduation from the General College or its equivalent.

The requirements for the degrees of Bachelor of Arts and Bachelor of Science in these curricula are basically the same, and may be described as follows:

- Thirty-six semester credit hours and 36 honor points in the College of Arts and Sciences,
- II. twenty-eight semester credit hours and 28 honor points in the College of Law, and
- III. a departmental major or a group major leading to the degree of Bachelor of Arts or Bachelor of Science. (See page 318.)

The requirements for the degree of Bachelor of Arts in Journalism in the combined Journalism-Law curriculum are the same as the requirements for graduation in the curriculum leading to the degree of Bachelor of Arts in Journalism (see page 319), provided, however, that credit must be earned as follows:

- Thirty-eight semester credit hours and 38 honor points in the College of Arts and Sciences, and
- Il. twenty-eight semester credit hours and 28 honor points in the College of Law.

## THE PRE-MEDICAL CURRICULUM

The College of Arts and Sciences cooperates with students who wish to secure training which will fit them to enter upon the study of medicine. All such students are advised to consult medical school bulletins carefully and widely. The program in the College of Arts and Sciences will be planned in accordance with the needs of the individual student. It is strongly urged, however, that pre-medical students follow and complete the curriculum leading to the degree of Bachelor of Science.

Students who are interested in medicine are invited to the Office of the Dean of the College of Arts and Sciences for counsel and advice.

# SCHOOL OF PHARMACY

#### ADMINISTRATION

JOHN JAMES TIGERT, M.A. (Oxon.), Ed.D., D.C.L., LL.D., D.Litt., L.H.D., President TOWNES RANDOLPH LEICH, Ph.D. (Chicago), Acting Vice-President; Dean, College of Arts and Sciences

Bernard V. Christensen, Ph.D. (Wisconsin), Director Harley Willard Chandler, M.S., Registrar

### PHARMACOGNOSY AND PHARMACOLOGY

Bernard V. Christensen, Ph.D. (Wisconsin), Head Professor of Pharmacognosy and Pharmacology

EDWARD J. IRELAND, Ph.D. (Wisconsin), Instructor in Pharmacognosy and Pharmacology

#### PHARMACY

WILLIAM J. HUSA, Ph.C., Ph.D. (Iowa), Head Professor of Pharmacy PERRY A. FOOTE, Ph.D. (Wisconsin), Professor of Pharmacy

# GENERAL STATEMENT

All work offered in the School of Pharmacy meets the highest requirements of pharmaceutical instruction in this country. As a member of the American Association of Colleges of Pharmacy the School receives recognition for its courses from all state boards requiring attendance in a school of pharmacy of membership standard as a prerequisite for examination and registration.

All students are enrolled by the Florida State Pharmaceutical Association as associate members, as per resolution adopted by the Executive Committee in January, 1935. Upon graduation and registration as a pharmacist, full membership in the Association is granted free for one year. "Students' Hour" is a feature of the annual convention of the State Pharmaceutical Association.

The curricula are designed to provide a broad scientific education, to train retail pharmacists, and to provide an opportunity for specialization either in Commercial Pharmacy, in Pharmaceutical Chemistry, or in Pharmacognosy and Pharmacology. Specialization in Commercial Pharmacy should qualify a student for a position as manager in a drug store, prescription clerk, or as a salesman of drugs and chemicals. The work in Pharmaceutical Chemistry is designed to train men for positions in food and drug laboratories, or as manufacturing pharmacists. The completion of the work in pharmacognosy or pharmacology should qualify one to act in the capacity of pharmacognocist or inspector of crude drugs with a manufacturing concern, or with the Federal Customs Service, or as pharmacologist for manufacturing houses or for hospitals. The foregoing are only a few of the many positions open to men who possess training along any of the above lines. The demand for graduates of this school exceeds the supply. These curricula also provide opportunity, through selection of approved electives or options, for the completion of minimum requirements for entrance into certain medical colleges. However, major emphasis is placed on the training of retail pharmacists.

A ten-acre tract has been allotted to the School of Pharmacy for use as a medicinal plant garden, which is used as a teaching adjunct and as a source of supply of fresh material for study, investigation, and classroom illustration.

The General Edmund Kirby-Smith Memorial Herbarium, consisting of 5,600 specimens, with those collected locally, provides a collection of approximately 6,000 plant specimens. Some of these were collected as early as 1846. Specimens from nearly every state and many foreign countries make up this collection. This herbarium provides actual specimens for study of plant classification and for comparison and identification of new species.

The Chemistry-Pharmacy branch of the main library is housed in the Chemistry-Pharmacy building. The library includes text and reference books and several of the American and foreign periodicals on chemical and pharmaceutical subjects.

# REQUIREMENTS FOR ADMISSION

(a) Graduation from the General College or its equivalent as determined by the Board of Examiners, and (b) recommendation of the Board of Examiners.

NOTE: Students planning to study pharmacy are advised to offer General Chemistry for C-7; Pharmacy 223-224 for C-8; and Pharmacognosy 221-222 for C-9. Students of the Superior Group are advised to offer General Chemistry for C-2; Basic Mathematics for C-4; and General Physics for C-7.

### REQUIREMENTS FOR GRADUATION

- (a) Students registered in the University before or during the academic year 1934-35 may meet the requirements of the "Old Curriculum".
- (b) Students entering from the General College, or having equivalent training as determined by the Board of Examiners, must meet the requirements of the Curriculum as outlined below.

# GRADUATION WITH HONORS

Students may receive diplomas of graduation, of graduation With Honors, or of graduation With High Honors. For detailed regulations concerning graduation with honors, see the Bulletin of By-Laws.

## BACHELOR OF SCIENCE IN PHARMACY

The Degree of Bachelor of Science in Pharmacy is awarded on completion of the curriculum as outlined below. Opportunity for specialization in Pharmacy, Pharmaceutical Chemistry, Pharmacognosy, or Pharmacology is provided through choice of electives or options in the senior year. Electives and options are listed after curriculum.

# MASTER OF SCIENCE IN PHARMACY

Courses are offered leading to the degree of Master of Science in Pharmacy. Candidates for that degree must possess the degree of Bachelor of Science in Pharmacy from an institution of recognized standing.

The student must spend at least one entire academic year in residence at the University as a graduate student, devoting his full time to the pursuit of his studies.

For further requirements for the Master's Degree, see the Bulletin of the Graduate School.

#### DOCTOR OF PHILOSOPHY

Courses are offered leading to the degree of Doctor of Philosophy with specialization in Pharmaceutical Chemistry, Pharmacy, Pharmacognosy, and Pharmacology. For further information consult the *Bulletin of the Graduate School*.

## CURRICULUM

The curriculum outlined below became effective September, 1937. To be eligible for the degree of Bachelor of Science in Pharmacy all requirements of the curricula for pharmacy students in both the General College and the School of Pharmacy must be completed. For example, if Pharmacy 223-224 or Pharmacognosy 221-222 are not completed in the General College, these courses must be completed after admission to the School of Pharmacy. However, in such cases these courses may be taken in lieu of an equal number of hours of options.

#### CURRICULUM

OSCAR EDWARD HESKIN, Ph.D. (Minnesota), Assistant Professor of Economics and Marketing Roy Purvis, B.S.B.A., C.P.A. (Florida), Instructor in Accounting

## GENERAL INFORMATION

Instruction in Business Administration is designed to provide analysis of the basic principles of business. Its purpose is to prepare students (1) to become business executives; (2) to assume the increasing responsibilities of business ownership; and (3) to act in the capacity of business specialists.

Business education involves consideration of the following occupational levels: (1) upper levels composed of proprietors and executives; (2) intermediate levels composed of department heads and minor executives; and (3) lower levels composed of clerical and routine workers. The scope of business education includes preparation for all of these levels. While the College of Business Administration has organized its curricula in business administration to prepare students primarily to occupy the upper and intermediate levels, it has not entirely ignored the lower levels.

The College of Business Administration does not profess to turn out finished business managers, executives, department heads, or minor executives. Its curricula provide instruction that will help to shorten the period of apprenticeship for those who expect to enter business occupations.

## SPECIAL INFORMATION

## LECTURES BY BUSINESS EXECUTIVES

It is the policy of the College to invite from time to time prominent business executives both from within and from without the state to address the students in business administration.

### BUREAU OF ECONOMIC AND BUSINESS RESEARCH

The College of Business Administration maintains a Bureau of Economic and Business Research which provides faculty members and graduate students with an opportunity to engage in specific types of research work. Its activities are coordinated with the research activities of the College as a whole.

#### MEMBERSHIP IN NATIONAL AND REGIONAL ASSOCIATIONS

The College of Business Administration is a member of the American Association of Collegiate Schools of Business and of the Southern Economic Association.

#### DEGREES AND CURRICULA

The College of Business Administration offers two types of curricula leading to the degree of Bachelor of Science in Business Administration: the Curriculum in Business Administration Proper, and the Curriculum in Combination with Law.

## ADMISSION

To enter the College of Business Administration and to register for the Curriculum in Business Administration Proper, or the Curriculum in Combination with Law, students are required to present a certificate of graduation from the General College and to have completed the following courses:

CEs. 13.-Economic Foundations of Modern Life

CEs. 15.-Elementary Statistics

CBs. 14.—Elementary Accounting

One additional half-year elective course in the General College.

These courses may be taken for C-7, C-8, and C-9 electives in the General College during the second year.

THE CURRICULUM IN BUSINESS ADMINISTRATION PROPER LEADING TO THE DEGREE OF BACHELOR
OF SCIENCE IN BUSINESS ADMINISTRATION

The maximum credit load of all students registered for the curriculum in Business Administration proper during each of their first two semesters (first year) shall be 15 academic semester hours (6 in summer session) to which advanced military science may be added. However, these students may increase their credit loads to 18 academic semester hours (9 in summer session) during their first semester, to which advanced military science may be added, provided they have graduated from the General College with honors; likewise, they may increase their credit loads to 18 academic semester hours (9 in summer session) during their second semester, to which military science may be added, provided they have attained an honor point average of 2 or more in the preceding semester. The maximum credit load of all students after their first two semesters is limited to 18 academic semester hours to which military science may be added. The minimum requirement for graduation from the College of Business Administration is 66 semester hours with 66 honor

points. To graduate with honors, a student must have graduated from the General College with honors and completed 66 semester hours on which he has earned 132 honor points, or in lieu of graduation from the General College with honors, have completed 66 semester hours on which he has earned 165 honor points. To graduate with high honors, a student must meet the requirements for graduation with honors and, in addition, demonstrate his ability to do independent work and to pass satisfactorily a comprehensive examination on all his courses in business administration. A copy of detailed regulations governing graduation with high honors may be obtained from the Office of the Dean.

Of the 66 semester credit hours required for graduation, not more than six semester credit hours may be earned by correspondence or extension study. Such credit hours, furthermore, must be approved for each individual student in advance by the Committee on Curricular Adjustments.

# THE CURRICULUM IN COMBINATION WITH LAW LEADING TO THE DEGREE OF BACHELOR OF SCIENCE IN BUSINESS ADMINISTRATION

The College of Business Administration combines with the General College and the College of Law in offering a six-year program of study to students who desire ultimately to enter the College of Law. Students register during the first two years in the General College and the third year in the College of Business Administration. When they have fully satisfied the academic requirements of the College of Business Administration, they are eligible to register in the College of Law and may during their last three years complete the course in the College of Law. When students have, after entering the College of Law, completed one year's work in law (28 semester hours and 28 honor points), they may offer this year's work as a substitute for the fourth year in the College of Business Administration and receive the degree of Bachelor of Science in Business Administration.

The maximum credit load for all students registered for the curriculum in combination with law is 18 academic semester hours (9 in summer session), to which may be added advanced military science. To graduate with honors, a student must have graduated from the General College with honors and completed 70 semester hours on which he has earned 140 honor points, or in lieu of graduation from the General College with honors, complete 70 semester hours on which he has earned 175 honor points.

The curriculum in business administration in combination with law consists of 30 semester hours of required courses and 12 hours of elective courses. The requirements are as follows:

Bs. Bs. Bs. Bs. Bs. Bs.	321E-322E 327 335E 351E 407E-408E 404	Accounting PrinciplesFinancial Organization of SocietyPublic FinanceEconomics of MarketingTransportation PrinciplesEconomic Principles and ProblemsGovernment Control of Business	. 6 . 3 . 3 . 6

<sup>\*</sup>Electives are limited to courses in business administration and six semester hours in advanced military science.

# COLLEGE OF EDUCATION

## ADMINISTRATIVE OFFICERS

JOHN JAMES TIGERT, M.A. (Oxon.), Ed.D., D.C.L., LL.D., D.Litt., L.H.D., President TOWNES RANDOLPH LEIGH, Ph.D. (Chicago), Acting Vice-President

JAMES WILLIAM NORMAN, Ph.D. (Columbia), Dean of the College of Education

GLENN BALLARD SIMMONS, Ph.D. (Johns Hopkins), Assistant Dean in Charge of Laboratory School

HARLEY WILLARD CHANDLER, M.S., Registrar

#### FACULTY

JAMES WILLIAM NORMAN, Ph.D. (Columbia), Dean and Professor of Education

ALFRED CRACO, Ph.D. (Iowa), Professor of Educational Psychology and Measurements, and School Psychologist

JOSEPH RICHARD FULK, Ph.D. (Nebraska), Professor of Public School Administration (Special Status)

EDWARD WALTER GARRIS, Ph.D. (Peabody), Professor of Agricultural Education

WINSTON WOODARD LITTLE, M.A., Professor of Secondary Education and High School Visitor Arthur Raymond Mead, Ph.D. (Columbia), Professor of Supervised Teaching and Director of Educational Research

ELLIS BENTON SALT, Ed.D. (New York University), Associate Professor of Health and Physical Education

GLENN BALLARD SIMMONS, Ph.D. (Johns Hopkins), Assistant Dean, and Professor of

BUNNIE OTHANEL SMITH, M.A., Assistant Professor of Curriculum Revision (On Leave of Absence)

JACOB HOOPER WISE, Ph.D. (Peabody), Professor of Education

HARRY EVINS WOOD, M.A.E., Associate Professor of Agricultural Education and Itinerant Teacher Trainer

STAFF OF THE P. K. YONGE LABORATORY SCHOOL

ELIZABETH BLANDING, M.A., Instructor in English Education

JACK BOHANNON, M.A., Assistant Professor of Industrial Arts Education

MARCARET WHITE BOUTELLE, M.A., Assistant Professor of English Education

CLEVA JOSEPHINE CARSON, M.A., Assistant Professor of Music Education

JAMES DEWBERRY COPELAND, M.A., Assistant Professor of Business Education

JOHN BROWARD CULPEPPER, M.A.E., Assistant Professor of Social Science Education

CARROLL FLEMING CUMBEE, M.A.E., Assistant Professor of Core Curriculum Education Elsie Margaret Douthett, M.A., Instructor in Physical Education for Girls

CHARLOTTE DUNN, B.S., Instructor in Kindergarten Education

WILLIAM THOMAS EDWARDS, M.A.E., Laboratory School Psychologist

WILLIAM LOUIS GOETTE, M.A.E., Assistant Professor of Science Education

JAMES DOUGLAS HAYGOOD, Ph.D., Assistant Professor of Foreign Language Education

LILLIAN PAGE HOUGH, M.A., Instructor in Elementary Education, assigned to the Second Grade

HOMER HOWARD, M.A., Assistant Professor of Mathematics Education

KATHLEEN TENNILLE KING, M.A., Instructor in Elementary Education, assigned to the Fourth Grade

GLADYS LAIRD, B.A.E., Instructor in Core Curriculum Education

HAL G. LEWIS, M.A.E., Instructor in Social Science Education

WILLIAM FRANCIS LOCKWOOD, B.A.E., Instructor in Practical and Fine Arts Education

LILLIAN MACUIRE, M.A., Instructor in English Education

IDA RUTH McLENDON, B.A.E., Instructor in Elementary Education, assigned to the Third Grade

INCORIE VAUSE MIKELL, B.M., Assistant Instructor in Kindergarten Education

HAZEN EDWARD NUTTER, B.A., Assistant Professor of Curriculum Revision

BEATRICE T. OLSON, M.A.E., Assistant Professor of Home Economics Education

CLARA McDonald Olson, M.A.E., Assistant Professor of Foreign Language Education

RUTH BEATRICE PEELER, M.A., Instructor in Elementary Education, assigned to the First Grade

EUNICE JEAN PIEPER, B.S., Instructor in Elementary Education, assigned to the Fifth Grade EULA MAE SNIDER, M.A., Librarian and Instructor in Education

BILLIE KNAPP STEVENS, M.A., Instructor in Physical Education for Boys

GRACE ADAMS STEVENS, M.A., Instructor in Elementary Education, assigned to the Sixth Grade

ADAM WEBSTER TENNEY, M.S., Associate Professor of Agricultural Education Marie Wesley, B.S., School Nurse

## GENERAL INFORMATION

Opportunities for educational investigation, student teaching, and observation are provided through the courtesy of the public school authorities of Gainesville and Alachua County. More than a score of accredited elementary and secondary schools are within a thirty-mile radius of the University. The P. K. Yonge Laboratory School increases many times the facilities for the study of educational problems.

## CORRESPONDENCE COURSES

Not more than one-fourth of the credits which are applied toward a degree, nor more than 12 of the last 36 credits which are earned toward a Bachelor's degree, may be taken by correspondence study or extension class. While in residence, the student will not be allowed to carry on correspondence work without the consent of the Dean; this permission will be granted only in exceptional cases. Not more than 9 credits may be earned by correspondence study during the summer vacation period.

## GRADUATE STATE CERTIFICATES

Graduates of the University are granted Graduate State Certificates without further examination, provided three-twentieths of their work has been devoted to professional

training and provided that they have satisfied the requirement of the law as to the Constitution of the United States. It is well for the student to note that a Graduate State Certificate permits him to teach only those subjects listed on such certificate, and that only those subjects will be placed on his certificate in which he has specialized in his college course. This will ordinarily mean that a subject must have been pursued at least three years in college, in addition to credit for all high school courses offered in that subject by a standard high school, before a certificate to teach that subject will be granted. The student who expects to meet the requirements for specialization should familiarize himself with the regulations regarding specialization as printed in the Handbook for Teachers, Section 1, published by the State of Florida, Department of Public Instruction. Applicants for the Graduate State Certificate must apply to Superintendent Colin English, Tallahassee, for application blanks and for further information.

Graduate State Certificates may be converted into Life Certificates by "presenting satisfactory evidence of having taught successfully for a period of twenty-four months under a Graduate State Certificate, and presenting endorsement of three holders of Life State, Life Graduate State, or Life Professional Certificates". Application for a Life Graduate State Certificate must be filed before the expiration of the Graduate State Certificate.

## EXTENSION OF CERTIFICATE

Students enrolled in the College of Education, upon recommendation of the faculty, receive an extension of one year on any or all valid Florida certificates.

## DEGREES AND CURRICULA

For information concerning the requirements for admission to the College of Education, see Bulletin of Information for the General College or page 275 of this bulletin.

## CRADUATION WITH HONORS

Students successfully completing the work of the Upper Division will, according to the character of their work, receive diplomas of graduation, of graduation With Honors, or of graduation With High Honors. For detailed regulations concerning graduation with honors, see the Bulletin of By-Laws.

CURRICULA IN THE COLLEGE OF EDUCATION LEADING TO THE DEGREES OF BACHELOR OF ARTS IN EDUCATION AND BACHELOR OF SCIENCE IN EDUCATION

# REQUIREMENTS FOR ADMISSION

For admission to the College of Education all students will be required to present a certificate of graduation from the General College, or its equivalent, and have the approval of the Admissions Committee of the College of Education.

## ADDITIONAL REQUIREMENTS FOR CERTAIN CROUPS

Certain additional requirements for admission are specified for admission to the curricula in Health and Physical Education, Agricultural Education, and Industrial Arts Education. For these requirements, see the Bulletin of Information for the General College.

#### DEGREES

Only two degrees are offered in the College of Education—Bachelor of Arts in Education and Bachelor of Science in Education.\* The former degrees of Bachelor of Arts or Bachelor of Science in Health and Physical Education, Bachelor of Science in Agricultural Education,

<sup>\*</sup>For the degree of Bachelor of Science in Education the major must be in one of the Natural Sciences.

and Bachelor of Science in Industrial Arts Education have been incorporated in these two degrees.

For either degree the student is required to complete 60 semester hours, with 60 honor points, at least 18 resident hours of which must be in Education and the remaining hours of which will be elected by the student in conference with his advisory committee. In every case, the student must complete at least 24 semester hours in a subject or field of concentration, to be eligible for graduation.

All students except those whose fields of concentration are Health and Physical Education, Agricultural Education, or Industrial Arts Education, will be graduated upon completion of the following curriculum:

## THE COLLEGE OF ENGINEERING

#### ADMINISTRATION

JOHN JAMES TIGERT, M.A. (Oxon.), Ed.D., D.C.L., LL.D., D.Litt., L.H.D., President Townes Randolph Leigh, Ph D. (Chicago), Acting Vice-President Joseph Weil, B.S.E.E., M.S., Dean of College of Engineering Harley Willard Chandler, M.S., Registrar

#### CHEMICAL ENGINEERING

Walter Herman Beisler, M.S., D.Sc. (Princeton), Professor of Chemical Engineering

—————, Assistant Professor of Chemical Engineering

### CIVIL ENGINEERING

Percy Lawrence Reed, M.S., C.E., Head of the Department and Professor of Civil Engineering

THOMAS MARVEL LOWE, S.B., M.S., Associate Professor of Civil Engineering WILLIAM LINCOLN SAWYER, B.S.C.E., M.S., Assistant Professor in Civil Engineering —————, Graduate Assistant in Civil Engineering

## ELECTRICAL ENGINEERING

JOSEPH Weil, B.S.E.E., M.S., Head of the Department and Professor of Electrical Engineering; Head of Engineering Division, State Radio Station WRUF

STEPHEN PENCHEFF SASHOFF, B.S.E.E., M.S.E.E., Associate Professor of Electrical Engineering

EDWARD FRANK SMITH, B.S.E.E., E.E., Associate Professor of Electrical Engineering JOHN WESLEY WILSON, B.S.E.E., M.S., Assistant Professor in Electrical Engineering

## INDUSTRIAL ENGINEERING

PHILIP OSBORNE YEATON, B.S., S.B., Head of Department and Professor of Industrial Engineering

GEORGE OSBORN PHELPS, B.S., M.S., Instructor in Industrial Engineering and Curator of Photographic Laboratory.

## MECHANICAL ENGINEERING

NEWTON CROMWELL EBAUGH, B.E. in M. and E.E., M.E., M.S., Head of the Department and Professor of Mechanical Engineering

WILLIAM WARRICK FINEREN, M.E., Professor of Mechanical Engineering

EDGAR SMITH WALKER, Colonel, U. S. Army (Retired), B.S., United States Military Academy, Professor of Drawing (Special Status)

Albert J. Strong, B.S.M.E., Professor of Drawing

CHESTERFIELD HOWELL JANES, B.S.M.E., M.S., Associate Professor in Mechanical Engineering SILAS KENDRICK ESHLEMAN, M.A., S.M., M.E., E.E., J.D., Assistant Professor of Mechanical Engineering

ROBERT ALDEN THOMPSON, B.S.M.E., M.S., Instructor in Mechanical Engineering J. M. Redgrave, B.S.M.E., Graduate Assistant in Mechanical Engineering

## GENERAL INFORMATION

The curricula of the College of Engineering are planned to give instruction in the technical aspects of engineering, and in the social and economic phases of modern industrial life. They are not designed to turn out technical experts but rather to give students that education which will later enable them to qualify as Professional Engineers after they have had the requisite practical experience.

After a period of general education, well articulated with subjects basic to Engineering in the General College, the student enters the Upper Division work of the Engineering College. Here he is given instruction in engineering and is encouraged to utilize the time allowed for electives for productive activity in non-technical courses. The individual characteristics of the student are given consideration and he is encouraged to develop his initiative and imagination, to devote his spare time to special technical problems in the laboratory, to study the history and trend of engineering practice as related to social and economic developments, and to coordinate his efforts to produce an educated man well grounded in the fundamentals of engineering practice and well equipped to enter the industrial field and to advance himself in his chosen profession.

The student may select curricula which will give him some specialization in the fields of chemical, civil, electrical, industrial and mechanical engineering, the Bachelor's degree being awarded on the basis of such specialization. By choosing elective courses in specialized fields of radio, aeronautics, air conditioning, management, design, etc., a still further degree of specialization can be secured, if he so desires. For each of the curricula, close coordination between departments gives broad engineering training; and systematic planning gives the necessary detailed factual information required of engineering graduates.

## ENTRANCE REQUIREMENTS

To be admitted to the College of Engineering the student should present a certificate of graduation from the General College, and be certified by the entrance committee of the College of Engineering as qualified to pursue a curriculum leading to a degree in engineering. Any student not in the Engineering College may register for any course for which he has the proper prerequisites. Students in the General College must choose the proper prerequisite subjects to secure an engineering degree in four years. Experience has shown that the average student requires five years for graduation. Many students find that they can profitably devote five years to an engineering education and plan their program accordingly. Each student must assume full responsibility for registering for the required courses in their proper sequence and for fulfilling all requirements for his degree.

Upon entering the University, each student who contemplates studying engineering should confer with the head of the department of the engineering course in which he expects to major. The Dean of the College and the various department heads are eager to confer with students pertaining to their studies and will assist them in planning their schedules.

## BACHELORS' DEGREES

The College of Engineering awards the following Bachelors' degrees:

Bachelor of Chemical Engineering Bachelor of Civil Engineering Bachelor of Electrical Engineering Bachelor of Industrial Engineering Bachelor of Mechanical Engineering

#### BACHELOR DEGREE REQUIREMENTS—HONOR POINTS

Students desiring to earn degrees in the College of Engineering must complete the courses outlined in the various curricula and must do work of such quality that the total number of honor points which they have earned in all of their courses will equal the total number of semester hours required for the degree. For information concerning the honor point system, see the *Bulletin of By-Laws*.

#### HONOR STUDENT DESIGNATION

A student who is an applicant for the designation of Honor Student in the College of Engineering must have a certificate of graduation from the General College or its equivalent, and shall have earned twice as many honor points as total class credits in his scholastic work, which must include:

Ml. 181-182 Ps. 205-206-207-208 Cy. 101-102 Ms. 253-254

Honor points from General College courses will be evaluated on the basis of the grades made on the comprehensive examinations.

To be considered for classification as an honor student the applicant must file an application in proper form with the Dean of the College before October 15 and March 15 of each semester. The Dean will then notify the student to appear before a committee which shall have the power to examine the applicant and to pass upon this application.

Honor students, as long as they maintain their high scholastic standing, may be granted by the Dean of the College, upon recommendation by the Head of the Department in which the student is registered, the following privileges:

- 1. Deviation from the prescribed curricula in the Upper Division.
- 2. Permission to be absent from scheduled classes, when the absence is justifiable from the professional point of view.

## GRADUATION WITH HONORS

Upon the recommendation of the faculty a student who has an honor point average of 2 for the entire curriculum or of 2.5 for the courses of the Upper Division may be graduated "with honors".

#### GRADUATION WITH HIGH HONORS

Upon the recommendation of the faculty a student may be graduated "with high honors" provided he meets the following requirements:

- 1. Is designated as an honor student and is eligible for graduation with honors.
- 2. Files written application with the Dean not later than the beginning of his last semester of work.
- 3. Prepares an outline of some independent work he contemplates doing and submits a copy to each member of his advisory committee before the work is done.
- 4. Completes this independent work to the satisfaction of the advisory committee appointed by the Dean.
- 5. Satisfactorily passes a comprehensive examination given him by his advisory committee.

## ENGLISH REQUIREMENT

The responsibility for the correct and effective use of his spoken and written English rests primarily upon the student. Any instructor in the College of Engineering may, at any time, with the approval of the head of his department and the Dean of the College of Engineering, require a student who shows a deficiency in English to elect additional courses, over and above the curriculum requirements, in the Department of English.

## THESIS

Theses are not required of candidates for the Bachelors' degrees in the College of Engineering. However, exceptional students, whom the head of a department believes would be benefited thereby, may be granted permission by the Dean of the College, upon recommendation of the head of the department, to undertake a thesis in lieu of prescribed or elective work in the department in which he is enrolled. Not more than four semester credit hours will be allowed for such thesis work.

# FLORIDA INDUSTRIES' COOPERATIVE PLAN

Several of Florida's industries, under a cooperative arrangement with the College of Engineering, will employ Florida men in industry at regular intervals during the students' course at the University. Students are eligible for cooperative employment after having completed satisfactorily one year in the General College.

During the month of March any student may file an application with the Dean of the College of Engineering for assignment to industry. Placement will depend upon the openings available and the industrial experience of the applicant, his scholarship and personality. Applications may be accepted from men already in industry who wish to complete their college courses and need college credit of one year or more towards a degree.

After assignment to an industry a student alternates with his industrial partner, each six months period, there being two men on a team. During each period in industry each student is paid for his work, which pay should cover necessary living expenses.

Any industry willing to enter or desirous of entering the Florida Industries' Cooperative Plan should write to the Dean of the College of Engineering, University of Florida.

## MASTER OF SCIENCE IN ENGINEERING

The degree of Master of Science in Engineering may be earned through the Graduate School. (See Bulletin of the Graduate School.) A student who holds a Bachelor's degree and the requisite scholastic standing is eligible to major in any department of the College of Engineering. A few graduate assistantships are available from time to time, and those interested in graduate research in any particular department should address the head of that department relative to obtaining an assistantship.

Information concerning graduate fellowships in the Graduate School may be obtained by application to the Dean of the Graduate School. (See Bulletin of the Graduate School.)

## PROFESSIONAL DEGREES

The professional degrees of Civil Engineer, Chemical Engineer, Electrical Engineer, Industrial Engineer, and Mechanical Engineer will be granted only to graduates of the College of Engineering of the University of Florida who have:

(a) Shown evidence of having satisfactorily practiced their profession for a minimum of five years following receipt of the Bachelor's degree, during the last two years of which they shall have been in responsible charge of important engineering work. A graduate

who is a registered engineer in the State of Florida will be accepted as satisfying this requirement.

- (b) Presented a thesis showing independence and originality and of such a quality as to be acceptable for publication by the technical press or a professional society.
- (c) Satisfactorily passed an examination at the University upon the thesis and professional work.

A candidate for a professional degree must make application to the Dean of the College of Engineering prior to March 1 of the year in which he expects to have the degree conferred. If the candidate appears to satisfy requirements listed in section (a) above, the Dean will form a committee of which the head of the department in which the degree is to be earned is chairman. This committee shall satisfy itself that the candidate has fulfilled all requirements for the degree and report its recommendation to the faculty of the College of Engineering, which will have final authority to recommend to the President and the Board of Control the conferring of the degree.

## LABORATORY FACILITIES

#### CHEMICAL ENGINEERING LABORATORIES

The Chemical Engineering Laboratories are arranged to familiarize the student with the design of chemical engineering equipment and to give him experience in operating such equipment. The equipment available illustrates such fundamental operations as distillation, filtration, heat transfer, absorption, size reduction and drying. The aim of the laboratory work is to give practical instruction in the principles upon which the unit operations of chemical engineering are based and to enable the student to test the performance of the equipment.

## CIVIL ENGINEERING LABORATORIES

The Civil Engineering Department has laboratories equipped for work in Surveying, Hydraulics, Sanitary Engineering, Materials Testing, and Hydrology.

The Surveying Instrument Room contains the following equipment: Repeating theodolite, precise levels, base-line measurement apparatus, plane tables, transits, levels, precision pantagraph, current meter, and smaller pieces of equipment necessary for field and drawing room work in elementary and higher surveying.

The new hydraulic laboratory is one of the largest and most modern of its type. It contains apparatus to illustrate the principles of hydraulics, for the study of flow in open channels, for testing hydraulic machinery, for the measurement of flow by use of weirs, and for testing orifices, venturi flumes, and other measuring devices. It also contains a large wave tank for the study of beach and shore erosion problems. It cooperates with various governmental agencies in special experimental problems.

The Materials Testing Laboratory contains one four-hundred-thousand-pound capacity high column Riehle testing machine equipped for both tension and compressive tests; one fifty-thousand-pound low-column machine and apparatus for the usual physical and chemical tests on brick, wood, concrete, steel, cement, asphalt, tars, and oils.

The Sanitary Engineering Laboratory is maintained in conjunction with the operation of the campus sewage disposal plant. It contains all the necessary apparatus and equipment for routine tests in connection with the design and operation of sewerage systems and sewage disposal works. The Imhoff tank trickling filter disposal plant was designed for the dual purpose of laboratory experiments on its operation and for the practical treatment of the campus sewage and laboratory wastes.

The Hydrological Laboratory contains anemometers, rain gauges, recording barometers, recording thermometers, recording hygrometer, water level recorders, and other apparatus

useful in illustrating the fundamentals of hydrology as applied to engineering design and construction.

## ELECTRICAL ENGINEERING LABORATORIES

The *Dynamo Laboratory* contains dynamo electrical machinery of various types. Motorgenerators are used for securing alternating currents of a wide range of voltages and frequencies and for conversion to direct current. Other equipment includes mercury are rectifier units, miscellaneous battery charging equipment, automotive testing equipment, transformers, electro-dynamometers, and a wide range of miscellaneous electrical equipment.

The Precision Laboratory contains special devices and instruments for calibrating and standardizing work and is available to the utilities of the State for the solution of special problems. In addition to the instruments of the Precision Laboratory, there is a special double sine wave alternator for special testing purposes. Miscellaneous instruments of various types, including oscillographs and a klydonograph, are available for performing tests on miscellaneous electrical equipment.

The Communications Laboratory is well equipped. It provides means for testing telephone, telegraph, radio equipment, and electronic devices. In this laboratory will be found a special panel board incorporating cable terminals, line fault equipment, transmission measuring equipment, audio and high frequency oscillators, repeaters, filters, networks, bridges, and a large number of special devices including cathode ray oscilloscopes, field strength measuring equipment, automatic signal recorder, miscellaneous receiving equipment, static recorders, radio goniometers, etc.

State Radio Station WRUF, a 5000-watt Western Electric transmitter, operating at 830 kilocycles, cooperates with the laboratory in courses on radio station operation. These courses are open to students who have attained sufficient knowledge to benefit by this work. Station W4XAD and W4XDO are special experimental radio-telephone stations licensed at 600 watts for frequencies of 2398, 4756, 6425, 8655, 12,862.5, and 17,310 kilocycles, and are used for experimental work in the field of short wave radio communications. In addition to these stations, short wave radio stations W4DFU and W4IX are licensed for operation in the amateur bands.

Students who in general show that they may benefit by additional laboratory work, and who have the necessary educational experience, may be given special permission to carry on individual experimentation and research in these laboratories.

## PHOTOGRAPHIC LABORATORY

The Photographic Laboratory is a model photography laboratory. It contains the following rooms: chemical storage, dark room, film washing, film storage, printing, paper washing and drying, enlarging, paper storage, camera repair, studio, office, and finished film fireproof vault. The laboratory is to be used for experimental research in photography, as a service photographic shop for the University, and for class instruction in photography.

## MECHANICAL ENGINEERING LABORATORIES

The laboratories of the Mechanical Engineering Department include facilities for drawing, design, and production of machinery and equipment; and for the study of the performance of machinery and allied apparatus.

Modern drafting rooms are provided, which are capable of taking care of approximately 100 students.

Laboratory facilities for studying the production of machinery include equipment for casting, forging, welding, and machining of metals, and various types of woodworking machines.

Extensive equipment is available for the study of the strength and behavior of wood, cement, concrete, metals, and other materials used in engineering structures and machines. Coupled with this is the *Metallography Laboratory*, which is arranged for the study of internal crystal structure of these materials.

Facilities are provided for studying the performance and other characteristics of steam engines, turbines, boilers, automobile engines, airplane engines, Diesel engines, refrigeration equipment, air conditioning apparatus, airplanes, and auxiliary equipment used with these machines.

Basic engineering instruments are available for use in connection with special studies and research in any of the foregoing fields.

## CURRICULA REQUIREMENTS

The student should present a certificate of graduation from the General College which will include C-1, C-3, C-5, C-6, X, and Y.

In addition, the following courses must be taken either in the General College or later: Cy. 101-102, CMs. 23-24, Ms. 253-254, Ml. 181-182, Ps. 205-206-207-208 and a special departmental prerequisite of either Cy. 201-202, Cl. 223-226, Ml. 287-288 or Ig. 261-262. (See page 241 of the Bulletin of the General College.)

The student should make every effort to complete these courses before entering the Upper Division, though he may be enrolled in the Upper Division "on probation" until he completes them.

## UPPER DIVISION REQUIREMENTS

In addition to the courses listed above, the courses listed below are required for graduation in the various curricula offered. In the following tables the first column represents courses or credits in the first semester, and the second column represents courses or credits in the second semester.

## FOR THE DEGREE OF BACHELOR OF CHEMICAL ENGINEERING

## Recommended Electives:

Ml. 480, Ml. 485, Ml. 486, Ml. 487, Ml. 488, Ml. 492, Ml. 493, Ml. 494, Ml. 495, Speech, Business Administration, and courses in other engineering departments.

Students having successfully passed C-2 may be permitted a decrease of two hours in their approved electives.

Students having successfully passed C-4 may be permitted a decrease of two hours in their approved electives.

<sup>\*</sup>Courses so marked should be taken in the junior year.
\*\*Students should confer with the Department Head of his major subject on the selection of electives.

## THE GRADUATE SCHOOL

#### ADMINISTRATIVE OFFICERS

JOHN JAMES TIGERT, M.A. (Oxon.), Ed.D., D.C.L., LL.D., D.Litt., L.H.D., President of the University

JAMES NESBITT ANDERSON, Ph.D., Dean of the Graduate School

HARLEY WILLARD CHANDLER, M.S., Registrar

PENELOPE GRIFFIN, B.A., Secretary

## THE GRADUATE COUNCIL

THE DEAN

WALTER HERMAN BEISLER, D.Sc., Professor of Chemical Engineering

TRUMAN C. BIGHAM, Ph.D., Professor of Economics

LEONARD WILLIAM GADDUM, Ph.D., Bio-chemist, Experiment Station

H. HAROLD HUME, M.S., Assistant Dean of the College of Agriculture and Director of Research of the Experiment Station

Townes Randolph Leich, Ph.D., Head Professor of Chemistry and Dean of the College of Arts and Sciences

WINSTON WOODARD LITTLE, M.A., Professor of Secondary Education and High School Visitor, Dean of the General College

James William Norman, Ph.D., Head Professor of Education and Dean of the College of Education

## GENERAL INFORMATION

## ADMINISTRATION

The affairs of the Graduate School are administered by the Graduate Council, which consists of the Dean as *ex-officio* chairman, and certain members of the faculty, who are appointed annually by the President.

## THE MASTER'S DECREE

Degrees Offered.—Master of Arts; Master of Arts in Architecture; Master of Arts in Education; Master of Science; Master of Science in Agriculture; Master of Science in Engineering; and Master of Science in Pharmacy.

#### THE DEGREE OF DOCTOR OF PHILOSOPHY

Departments.—The Doctor's degree is offered in the following departments: Animal Husbandry (Animal Nutrition only), Biology, Zoology, Chemistry, Pharmacy, and Pharmacognosy and Pharmacology.

For general information, including the teaching faculty, all departments offering graduate work leading to an advanced degree and all strictly graduate courses, as well as conditions of admission and requirements for the advanced degrees, see the *Bulletin of the Graduate School*.

## COLLEGE OF LAW

JOHN JAMES TIGERT, M.A. (Oxon.), Ed.D., D.C.L., LL.D., D.Litt., L.H.D., President Townes Randolph Leigh, Ph.D. (Chicago), Acting Vice-President Harry Raymond Trusler, M.A., LL.B. (Michigan), Dean and Professor of Law Harley Willard Chandler, M.S., Registrar Clifford Waldorf Crandall, B.S., Ll.B., LL.D. (Adrian). Professor of Law Robert Spratt Cockrell, M.A., B.L. (Virginia), Professor of Law Dean Slagle, M.A., Ll.B. (Yale), Professor of Law Clarence John Teselle, M.A., Ll.B. (Wisconsin), Professor of Law James Westbay Day, M.A., J.D. (Florida), Professor of Law Huber Christian Hurst, M.A., Ll.B. (Florida), Lecturer on Corporation Finance Ila Rountree Pridgen, Librarian and Secretary Stanley L. West, A.B., Ll.B. (Florida), Assistant Librarian

#### GENERAL INFORMATION

#### ADMISSION

Applicants for admission to the College of Law must be eighteen years of age, and must have received a degree in arts or science in a college or university of approved standing, or must be eligible for a degree in a combined course in the University, upon the completion of one year of work in the College of Law.

Women Students.—Women students who are twenty-one years of age and who fully meet the entrance requirements of the College may enter as candidates for degrees.

Special Students.-Special students are not admitted to the College of Law.

Advanced Standing.—No work in law done in other institutions will be accepted towards a degree unless the applicant passes satisfactorily the examination held in the subjects in question in this College, or unless credit is given without examination. Credit of an average of C from schools which are members of the Association of American Law Schools, of which this College is a member, will be accepted without examination. In no case will credit be given for work not done in residence at an approved law school.

## PURPOSE

The aim of the College, which is a member of the Association of American Law Schools, registered by the New York Board of Regents, and an approved school of the American Bar Association, is to impart a thorough scientific and practical knowledge of the law. It aims to develop keen, efficient lawyers, conversant with the ideals and traditions of the profession. Its policy is characterized by the emphasis of practice as well as theory; pleading as well as historical perspective; skill in brief making, as well as in giving legal information.

#### LIBRARY

The Law Library contains over 12,800 volumes. In it are included the published reports of the courts of last resort in every state in the Union and of the Federal Courts, the full English Reprints, the English Law Reports, Law Journal Reports, Dominion Law Reports, the Canadian Reports, and the Philippine Reports, together with a collection of digests, encyclopedias, series of selected cases, English and American treatises and textbooks, and the statutes of a majority of American jurisdictions including the Federal statutes.

#### ADMISSION TO THE BAR

Upon presenting their diplomas and satisfactory evidence that they are twenty-one years of age and of good moral character, the graduates of the College are licensed, without examination, to practice in the courts of Florida. They are also admitted without examination to the United States District Courts of Florida.

#### PLEADING AND PRACTICE

An intensive knowledge of pleading and practice should be secured by the student, since legal rights cannot be well understood without a mastery of the rules of pleading whereby they are enforced. The College offers thorough courses in criminal pleading and procedure, common law pleading, equity pleading, Florida civil practice, trial practice, and Federal procedure. Thus, the student on graduation is enabled to enter understandingly upon the practice of law. The College endeavors to serve those who intend to practice elsewhere as efficiently as those who expect to locate in this State.

Believing the students obtain in the Practice Court a better practical knowledge of pleading and practice than can be acquired in any other way, aside from the trial of actual cases, the faculty places special emphasis upon this work. Sessions of the Practice Court are held throughout the year. Each student is required to participate in the trial of at least one common law, one equity, and one criminal case, and is instructed in appellate procedure.

## LEGAL RESEARCH

To enable students to specialize in legal problems of particular interest to them, to acquire a grasp of the technique of legal investigation, and to do more creative work than ordinary courses in law permit, a course in legal research (Lw. 601 or Lw. 0601) is offered. Each student taking the course is required to make an original study of the subject he selects under the guidance of the member of the faculty in whose field it falls. Suitable studies will be submitted by the College to law journals for publication.

Applications for the course should be filed with the Secretary of the College at least one week prior to the first day of registration. Students who register for two or three hours will not be permitted to drop the course for the number of hours for which they have registered and continue it for a lesser number of hours, unless they do so within the first two weeks of the term. No more than three credits may be earned by a student in this course in one term, but the faculty may admit a student to the course (Lw. 602 or Lw. 0602) for a second term.

## STANDARDS OF THE AMERICAN BAR ASSOCIATION

The Council on Legal Education and Admissions to the Bar of the American Bar Association requests that attention be called to the Standards of the American Bar Association adopted in 1921 and by it recommended for enactment by all states. These Standards provide in effect that every candidate for admission to the bar, in addition to taking a public examination, shall give evidence of graduation from a law school which shall require at least two years of study in a college as a condition of admission, and three years of law study (or longer if not a full-time course), which shall have an adequate library and a sufficient number of teachers giving their entire time to the school to ensure actual personal acquaintance and influence with the whole student body, and which shall not be operated as a commercial enterprise.

## DEGREES AND CURRICULA

#### BACHELOR OF LAWS

The degree of Bachelor of Laws (LL.B.) is conferred upon those students who satisfactorily complete eighty-five semester hours of law, which must include all of the first-year subjects. Students who have an honor point average of 2 for all the law work offered for graduation will be eligible for the degree of LL.B. With Honors. Those who have an honor point average of 2.5 for all the law work offered for graduation, which work must include Legal Research, will be eligible for the degree of LL.B. With High Honors.

Students admitted to advanced standing may receive the degree after one year's residence, but in no case will the degree be granted unless the candidate is in actual residence during all of the third year and passes in this College at least 28 semester hours of law.

All students are required to complete the last 28 credit hours applied towards the degree during regular residence. This may be varied only upon written petition approved by the faculty of the College of Law.

#### COMBINED ACADEMIC AND LAW COURSE

By pursuing an approved course of collegiate and law studies a student may earn both the academic and the legal degree in six years. Both the College of Arts and Sciences and the College of Business Administration offer such a combined course. For further particulars, see pages 320 and 326 of this Bulletin.

#### CURRICULUM LEADING TO THE DEGREE OF BACHELOR OF LAWS

Students completing the first year as outlined below and a total of 85 semester hours of law credit will be awarded the degree of Bachelor of Laws.

<sup>\*</sup>Offered in alternate years; Lw. 417 offered in 1938-39.

<sup>\*\*</sup>Not offered in 1938-39.

# DEPARTMENTS OF INSTRUCTION

Courses with odd numbers are regularly offered in the first semester; courses with even numbers are regularly offered in the second semester. However, in case the number begins with 0, the reverse is true. In many cases courses are offered both semesters. To determine which courses come in this category the reader should consult the Schedule of Courses.

The number of hours listed is the number of hours a week which the class meets.

The number of credits is the number of semester hours credit assigned a student who receives a passing grade (A, B, C, or D) when the course is completed.

A course designated by a double number (for example, Eh. 201-202) is continued throughout the first and second semesters. Unless otherwise noted, the student must take both semesters of such a course in order to receive credit.

The abbreviations used are, wherever possible, the first and last letter of the first word of the name of the department. Occasionally, a third letter is inserted to distinguish between departments.

Several General College courses are listed under the departments in the same general field. Likewise is listed the credit which will be assigned to Upper Division students permitted to take such courses.

## AGRICULTURAL ECONOMICS

As. 0302.—Agricultural Resources. 2 hours, and 1 hour for discussion of assigned problems. 3 credits. REITZ.

Potentialities and limitations of agricultural production in the various regions of the United States and the world. Development of surplus and deficient agricultural areas.

As. 303.—Farm Records. 2 hours, and 2 hours laboratory. 3 credits. REITZ. Methods and practice of making farm inventories, keeping financial records, and feed and crop records.

As. 304.—Farm Finance and Appraisal. 2 hours. 2 credits. REITZ.

Problems peculiar to financing farmers and farmers' associations. Special attention is given to the Farm Credit Administration.

As. 306.—Farm Management. 2 hours, and 2 hours laboratory. 3 credits. Reitz.

The factors of production; systems of farming, their distribution and adaptation; problems of labor, machinery, layout of farms, and rotation systems.

As. 308.—Marketing. 2 hours, and 2 hours laboratory. 3 credits. HAMILTON. Principles of marketing agricultural commodities; produce exchanges and future trading; auction companies; market finance; market news; marketing of cattle, hogs, milk, cotton and tobacco. One or two field trips at an estimated cost of \$4 each to be paid by the student at the time trips are made.

As. 311.—Rural Law. 2 hours. 2 credits. Hamilton.

Classification of farm property; study of farm boundaries, fences, stock laws, rents, contracts. deeds, abstracts, mortgages, taxes, and laws governing shipping of farm products.

As. 403.—Advanced Farm Management. 2 hours, and 2 hours laboratory. 3 credits, Reitz. Prerequisite: As. 306.

Research and extension methods in farm management; practice in taking farm surveys; study of successful farms in specialized type of farming areas in Florida. Field trips, at an estimated cost of \$10, paid at time trips are made.

As. 405.—Agricultural Prices. 3 hours. 3 credits. Hamilton.

Prices of farm products and the factors affecting them.

As. 408.—Marketing Fruits and Vegetables. 2 hours, and 1 hour for discussion of assigned problems. 3 credits. Hamilton.

Marketing of citrus, tomatoes, beans, potatoes, and other Florida products. Two-day field trip, at an estimated cost of \$10, paid at time trip is made.

As. 409.—Cooperative Marketing. 2 hours, and 1 hour for discussion of assigned problems. 3 credits. Hamilton.

Cooperative buying and selling organizations, their successes and failures; methods of organization, financing, and business management. Two-day field trip, at an estimated cost of \$10, paid at time trip is made,

As. 410.—Agricultural Statistics. 2 hours, and 2 hours laboratory. 3 credits. Reitz.

The principles involved in the collection, tabulation, and interpretation of agricultural statistics.

As. 412.—Land Economics. 2 hours, and 2 hours laboratory. 3 credits. Hamilton.

History of public land policies; land utilization; land reclamation; marginal and submarginal lands; rural land reclamation; and land credit. Particular attention is given to the Land Section of the National Resources Board.

#### GRADUATE COURSES

As. 501-502.—Agricultural Economics Seminar

As. 505.—Research Problems

As. 506.—Farm Management

As. 508.—Land Economics

As. 509.—Citrus Grove Organization and Management

As. 510.—Organization and Management of Truck Farms

As. 511-512.—Research Problems—Marketing Agricultural Products

As. 514.—Advanced Marketing of Agricultural Products

## AGRICULTURAL ENGINEERING

Ag. 301.—Drainage and Irrigation. 2 hours, and 2 hours laboratory. 3 credits. Rogers.

The drainage and irrigation of lands with treatment of the necessity for such in the production of field, fruit and vegetable crops. The cost, design, operation and upkeep of drainage and irrigation systems. Field work in laying out systems.

Ag. 302.—Farm Motors. 2 hours, and 2 hours laboratory. 3 credits. ROGERS. The general principles of operation of the various sources of farm power. The care, operation and repair of electric motors, internal combustion engines, (including automobile, stationary gasoline engines, truck and tractor) and windmills. Laboratory work includes actual operation and repair.

Ag. 303.—Farm Shop. 2 hours, and 2 hours laboratory. 3 credits. ROCERS. The farm shop jobs that are common to the farms of Florida. Carpentry, concrete construction, light forging, soldering, tool care and repair are some of the jobs given special emphasis. Laboratory work includes actual shop practice.

Ag. 306.—Farm Machinery. 2 hours, and 2 hours laboratory. 3 credits. Rogers.

Machines that are used in the production of field, fruit and truck crops. Care, construction, operation and repair, selection of harvesting, picking, seeding, spraying and tillage machinery. Machines provided for laboratory observation and study.

Ag. 401.—Farm Buildings. 1 hour, and 2 hours laboratory. 2 credits. ROGERS.

The arrangement, cost, construction, depreciation, design, location and ventilation of farm buildings.

Ag. 402.—Farm Concrete. 1 hour, and 2 hours laboratory. 2 credits. Rogers. The coloring, curing, mixing, placing, proportioning, reinforcing and waterproofing of concrete for farm use. Consideration of materials suitable for farm concrete work.

Ag. 403-404.—Agricultural Engineering Investigations. 2 hours. 4 credits. ROGERS.

Assigned reading and reports of recent developments in the field of agricultural engineering.

\*Ag. 405.—Horticultural Machinery. 2 hours, and 2 hours laboratory. 3 credits. ROGERS.

Machinery used in the cultivation, harvesting, marketing and refrigeration of fruits and vegetables.

Ag. 406.—Dairy Engineering. 2 hours, and 2 hours laboratory. 3 credits. ROGERS.

The machinery and power used in the manufacture and storage of dairy products. Shop operations necessary to operation of dairy plant considered.

Ag. 408.—Soil and Water Conservation. 2 hours, and 2 hours laboratory. 3 credits. ROGERS, BARNETTE. Prerequisites: Ay. 301, 302.

The social and economic aspects of soil deterioration. Principles involved in soil conservation, and methods of control as applied to Florida, will be carefully developed. Given jointly with the Department of Agronomy.

#### GRADUATE COURSES

Ag. 501-502.—Seminar

Ag. 503-504.—Research

## AGRONOMY

Ay. 301.—Soils. 2 hours, and 2 hours laboratory. 3 credits. BARNETTE. Prerequisites: Cy. 101-102.

The nature and properties of soils with elementary treatment of genesis, morphology and classification. Description, identification and mapping of Florida soils. Soil types and problems in Florida.

Ay. 302.—Soil Fertility. 2 hours, and 2 hours laboratory. 3 credits. ALLISON and SMITH. Prerequisites: Ay. 301, Cy. 203, and credit or registration in Cy. 204.

General principles of soil fertility. The physical, chemical and biological factors affecting soil fertility and crop production. Studies on samples of soil from the home farm; commercial fertilizers, manures, green manures and organic matter maintenance, crop rotations and permanent soil fertility.

Ay. 321.—Field Crops. 2 hours, and 2 hours laboratory. 3 credits. SENN. An intensive study of field crops of southeastern United States. Cotton, tobacco, the grains, sweet potatoes, peanuts, sugar cane, soil conservation crops and crop rotation systems are given special emphasis. Hutcheson, Wolfe and Kipps, Production of Field Crops.

Ay. 324.—Forage and Cover Crops. 2 hours, and 2 hours laboratory. 3 credits. SENN.

Plants that produce feed for livestock and methods of establishing pastures. Consideration of plants suited for cover crops and rotation systems of the South. Laboratory consists of survey work, topic development, and field trips.

Ay. 325.—Crop Judging. 2 hours. 2 credits. SENN.

Designed to fit one to judge competitive farm crop displays. Especially adapted to students preparing for teaching agriculture in high schools, and county agent work. Arrangement of exhibits, assimilation of materials and preparation of premium lists for fairs are considered.

<sup>\*</sup>Not offered in 1938-39.

Ay. 329.—Principles of Genetics. 3 hours. 3 credits. SENN.

A basic course dealing with fundamental principles of heredity, variation and selection, and the application of genetic principles to plant and animal improvement. Snyder, *The Principles of Heredity;* Sinnott & Dunn, *Principles of Genetics*.

Ay. 331.—Laboratory Problems in Genetics. 2 or 4 hours laboratory. 1 or 2 credits. SENN.

Laboratory methods in applying genetic principles, with breeding experiments illustrating the laws of inheritance. Designed to be taken in conjunction with Ay. 329.

Ay. 408.—Soil and Water Conservation. 2 hours, 2 hours laboratory. 3 credits. BARNETTE, FRAZIER ROGERS. Prerequisites: Ay. 301 and 302.

The social and economic aspects of soil deterioration. Principles involved in soil conservation and methods of control as applied to Florida will be carefully developed. This course will be offered jointly with the Department of Agricultural Engineering.

Ay. 0420.—Special Problems in Soils. 4-6 hours laboratory. 2-3 credits. Allison, Gaddum, Smith, Barnette.

Original research problems in (A) Soil Fertility, (C) Soil Chemistry, (D) Soil Microbiology and (F) Land Use for qualified students in all departments of the Agricultural College.

Ay. 422.—Plant Breeding. 3 hours. 3 credits. SENN.

The fundamental principles of crop improvement. Field practice in artificial pollination and hybridization. Hays and Garber, Breeding Crop Plants. Hunter & Leake, Recent Advances in Agricultural Plant Breeding.

Ay. 491.—Soils Seminar. 1 hour. 1 credit. (For undergraduate credit only.) SMITH.

Assigned reading, reports and discussion of recent developments in Soil Science.

Ay. 492.—Crops Seminar. 1 hour. 1 credit. (For undergraduate credit only.) SENN.

Assigned reading, reports and discussion of recent developments in plant sciences.

## ADVANCED UNDERGRADUATE AND GRADUATE COURSES

Ay. 500.-Advanced Soil Fertility

Ay. 502.—Soil Chemistry

Ay. 503.—Soil Microbiology

Ay. 505.—Advanced Soils

Ay. 520.—Advanced Plant Genetics

Ay. 526.—Special Problems in Crop Production

Ay. 528.—Methods of Crop Investigations

#### GRADUATE COURSES

Ay. 601-602.—Research in Soil Fertility

Ay. 605-606.—Research in Soil Chemistry

Ay. 607-608.—Research in Soil Microbiology

Ay. 611-612.—Research in Land Use

Ay. 621-622.—Conference in Soil Fertility

Ay. 625-626.—Conference in Soil Chemistry

Ay. 627-628.—Conference in Soil Microbiology

Ay. 631-632.—Conference in Land Use

## ANIMAL HUSBANDRY

Al. 309.—Fundamentals in Animal Husbandry (Formerly Al. 104). 2 hours, and 2 hours laboratory. 3 credits. WILLOUGHBY.

Types and breeds of farm animals; principles of breeding, selection and management.

Al. 311.—Elementary Nutrition (Formerly Al. 306). 3 hours, and 3 hours laboratory. 4 credits. NEAL.

Elements and compounds, metabolic processes in animal nutrition, biological assays.

Al. 312.—Feeds and Feeding (Formerly Al. 201), 3 hours. 3 credits. Becker. Prerequisite: Al. 311.

Composition of plants and animals; feeding standards and rations for farm animals.

Al. 314.—Livestock Judging (Formerly Al. 307). 1 hour, and 4 hours laboratory. 3 credits. Kirk. Prerequisite: Al. 309.

Special training in livestock judging; show ring methods; contests at fairs.

Al. 322.—Animal Breeding (Formerly Al. 412). 2 hours. 2 credits. WILLOUGHBY. Prerequisite: Al. 309.

Principles of breeding applied to animals; pedigree and record work; foundation and management of a breeding enterprise.

Al. 0411.—Beef Production. 3 hours. 3 credits. WILLOUGHBY. Prerequisite: Al. 309.

Selection, feeding and management of beef cattle; finishing and marketing.

Al. 413.—Swine Production (Formerly Al. 204). 2 hours, and 2 hours laboratory. 3 credits. KIRK and CROWN. Prerequisite: Al. 309.

Selection, feeding and management of hogs; forage crops and grazing; disease and parasite control; slaughtering of hogs on the farm.

Al. 0414.—Horse and Sheep Production. 2 hours. 2 credits. WILLOUGHBY. Prerequisite: Al. 309.

Production methods with horses and mules, sheep and goats; breeds; management in Florida.

Al. 415.—Meat Products (Formerly Al. 303). 1 hour, and 4 hours laboratory. 3 credits. KIRK and CROWN. Prerequisite: Al. 309.

Farm slaughtering and packing house methods; curing and processing of meats.

Al. 416.—World Meats (Formerly Al. 404). 2 hours. 2 credits. WILLOUGHBY. Prerequisites: Al. 309, 411, 413.

Meat production in other countries of the world compared with United States.

Al. 417.—Breed History (Formerly Al. 301). 2 hours. 2 credits. WILLOUGHBY. Prerequisite: Al. 309.

History of breeds of beef, dairy, and dual purpose cattle; pedigree studies and registration methods.

Al. 418.—Breed History (Formerly Al. 302). 2 hours. 2 credits. Willoughby. Prerequisite: Al. 309.

History of breeds of horses, sheep, and swine; pedigree studies and registration methods.

Al. 420.—Market Classes and Grades of Live Stock. 1 hour, and 2 hours laboratory. 2 credits. Shealy. Prerequisites: Al. 309, 411, 413.

Classifying and grading cattle and hogs from the standpoint of marketing.

Al. 422.—Seminar (Formerly Al. 401-402). 1 hour. 1 credit. SHEALY and STAFF.

Seminar will be conducted jointly with Dairy Production and Dairy Manufacturing groups.

#### GRADUATE COURSES

Al. 501-502.—Animal Production

Al. 503-504.—Animal Nutrition

- Al. 505-506.—Live Stock Records
- Al. 508. —Methods in Animal Research
- Al. 509-510.—Problems in Dairy Production and Animal Nutrition
- Al. 511-512.—Problems in Swine Production
- Al. 513-514.—Problems in Beef Production

## ARCHITECTURE

Courses in the Department of Architecture are carried on by means of the problem or project method, and accomplishment is the sole criterion for advancement. Consequently, the courses are of indeterminate duration, and the time listed for each course represents merely the nominal time which the average student will need to complete the work.

Students in the Department of Architecture must complete the various courses in the sequence listed in their respective curricula. Students from other departments may, with the consent of the instructor and the approval of the Director, enroll in courses for which they have sufficient preparation.

## Lower Division

## Ae. 11A.—Fundamentals of Architecture. WEAVER, ARNETT.

A creative introductory course leading the student, through a study of human actions, to devise buildings in which all the arrangements, details, and materials are intended to make such actions both efficient and pleasant. The creation of buildings to meet the requirements of use is emphasized. Drawing of all kinds is taught, not in a formal manner, but as an incidental accompaniment to design. A study of materials and methods of construction is an integral part of the work from the beginning. Nine projects. Nominal time, 9 hours a week for 4 semesters, or 18 hours a week for 2 semesters.

# Upper Division

## DESIGN

This work consists of the design of buildings of the type encountered in contemporary practice. In general, the problems are non-competitive in character and the time for the completion of the solutions is not fixed. Criticisms are given individually, and solutions are in the form of plans, sections, plastic models, and elevations. Other problems which are competitive in character are assigned regularly every four weeks. Such problems are solved without criticism and without references and the solutions are generally limited to nine hours.

## Ae. 21A.—Architectural Design. GRAND.

A continuation of Ae. 11A for students in Architecture. The design of simple residential, commercial, and public buildings in wood, brick, and stone with emphasis on the analysis of human requirements, the consideration of the conditions of environment, and the selection of materials for color, texture, and appropriateness. Preliminary studies, design models, and working drawings. Eight projects correlated with Projects in Architecture 1 to 8, inclusive. Nominal time, 15 hours a week for 2 semesters.

## Ae. 21B.—Architectural Design. REEVE.

A continuation of Ae. 21A for students in Architecture. The design of more complex buildings including a hospital, a bank, a two-story house, a theater, a high school, a hotel, and two other types. Working drawings, and conferences on the theory of composition. Eight projects correlated with Projects in Architecture 9 to 16, inclusive. Nominal time, 15 hours a week for 3 semesters.

#### Ae. 22A.—Architectural Design. GRAND.

A continuation of Ae. 11A for students in Building Construction. Similar to Ae. 21A. Nominal time, 15 hours a week for 2 semesters.

## Ae. 23A.—Landscape Design. GRAND.

A continuation of Ae. 11A for students in Landscape Architecture. The design of small properties with emphasis on the principles of landscape composition. Eight projects correlated with Projects in Landscape Architecture 1 to 8, inclusive. Nominal time, 15 hours a week for 2 semesters.

## Ae. 23B.-Landscape Design. REEVE.

A continuation of Ae. 23A for students in Landscape Architecture. The design of public and private properties including a park, a country club, a high school grounds, a residential development, and two other projects. Six projects correlated with Projects in Landscape Architecture 9 to 14, inclusive. Nominal time, 15 hours a week for 2 semesters.

#### DELINEATION

# Ae. 31A.—Freehand Drawing and Water Color. GRAND.

A continuation of Ae. 11A for students in Architecture and Building Construction. The delineation of form in architecture with charcoal, pencil, colored pencil, water color, and pen and ink. Color theory, and a continuation of the study of perspective. Eight projects correlated with Projects in Architecture 1 to 8, inclusive. Nominal time, 6 hours a week for 2 semesters.

# Ae. 31B.—Freehand Drawing and Water Color. GRAND.

A continuation of Ae. 31A for students in Architecture. Outdoor sketching in pencil and water color. Scale and full size details in pencil and charcoal. Eight projects correlated with Projects in Architecture 9 to 16, inclusive. Nominal time, 6 hours a week for 3 semesters.

# Ae. 33A.—Freehand Drawing and Water Color. GRAND.

A continuation of Ac. 11A for students in Landscape Architecture. Drawing in charcoal, pencil, and water color. Eight projects correlated with Projects in Landscape Architecture 1 to 8, inclusive. Nominal time, 6 hours a week for 2 semesters,

## Ae. 33B.—Freehand Drawing and Water Color. GRAND.

A continuation of Ae. 33A for students in Landscape Architecture. Outdoor sketching in various media. Six projects correlated with Projects in Landscape Architecture 9 to 14, inclusive. Nominal time, 6 hours a week for 2 semesters.

#### HISTORY

## Ae. 41A.—History of Architecture. GRAND.

For students in Architecture and Building Construction. An analytical study of the development of the art of building with emphasis on historical and other influences, materials and methods of construction, and principles of composition and planning. A study of the component parts of buildings including such structural elements as walls, roofs, openings, columns, and piers, and the decorative elements such as mouldings and ornament. Individual research, conferences, and illustrated reports. Eight projects. Nominal time, 6 hours a week for 2 semesters.

## Ae. 41B.—History of Architecture. REEVE.

For students in Architecture, Landscape Architecture, and Painting. A study of Egyptian, Greek, Roman, Early Christian, Romanesque, Gothic, Renaissance, and American architecture. Students in the various curricula will, in their individual research, place major emphasis on their particular field. Six projects. Nominal time, 6 hours a week for 2 semesters.

## Ae. 41C.—Decorative Arts. REEVE.

For students in Architecture and Painting. A study of the decorative use of various materials, especially those used in building, such as stone, ceramic products, textiles, glass, plaster, woo, and metals, Two projects, Nominal time, 6 hours a week for 1 semester.

# CONSTRUCTION AND EQUIPMENT

## Ae. 51A.—Materials and Methods of Construction. HANNAFORD.

A continuation of Ae. 11A for students in Architecture and Building Construction. A study of the materials used in the construction of buildings and of the principles governing the selection and use of such materials. Methods of building construction, the development of construction details, and elementary surveying as applied to building. Eleven projects correlated with Projects in Architecture 1 to 11. inclusive. Nominal time. 9 hours a week for 3 semesters.

## Ae. 53A.—Materials and Methods of Construction. ARNETT.

A continuation of Ae. 11A for students in Landscape Architecture. Methods of constructing walks, steps, terraces, fences, gates, walls, pools, driveways, water supply systems, and the like. Preparation of working drawings, contour maps, and grading plans. Seven projects correlated with Projects in Landscape Architecture 5 to 8, and 12 to 14, inclusive. Nominal time, 9 hours a week for 2 semesters.

# Ae. 51B.—Mechanical Equipment of Buildings. ARNETT, WILSON.

For students in Architecture and Building Construction. A study of plumbing, heating, ventilation, and electrical installations in buildings. The design of simple plumbing systems, selection of types of heating systems, calculation of heat losses and radiator sizes, and the design of interior wiring systems. Three projects correlated with Projects in Architecture 12 to 14, inclusive. Nominal time, 9 hours a week for 1 semester.

#### PROFESSIONAL RELATIONS

## Ae. 51C.—Professional Relations and Methods. WEAVER.

For students in Architecture and Building Construction. Conferences on professional relations and on methods of modern practice. Ethics, law, specifications, and estimates. Two projects correlated with Projects in Architecture 15 and 16.

#### STRUCTURES

The courses in structures presuppose a satisfactory knowledge of trigonometry, algebra, analytic geometry, elementary calculus, and clementary physics. The work consists of a series of projects designed to give the student proficiency in solving the structural problems of buildings.

## Ae. 61A.—Structural Design of Buildings. HANNAFORD.

For students in Architecture and Building Construction. The structural design of the component parts of buildings of wood and masonry construction. The weights of building materials, live loads, and the investigation of the stresses produced in the component parts. Eight projects correlated with Projects in Architecture 1 to 8, inclusive. Nominal time, 12 hours a week for 2 semesters.

# Ae. 61B.—Structural Design of Buildings. HANNAFORD.

A continuation of Ae. 61A for students in Architecture and Building Construction. The structural design of the component parts of buildings in wood, masonry, cast iron, steel, and reinforced concrete. Eight projects correlated with Projects in Architecture 9 to 16, inclusive. Nominal time for students in Architecture, 12 hours a week for 3 semesters; for students in Building Construction, 15 hours a week for 1 semester and 21 hours a week for 1 semester.

## THESIS IN ARCHITECTURE

Ae. 71A.—Thesis. WEAVER and STAFF. Prerequisite: Completion of all other requirements for the degree.

A comprehensive final project in architecture based on a program submitted by the student and approved by the faculty. The program must be approved in time to permit not less than 14 weeks for the study of the problem. The presentation will include the architectural, structural, and mechanical equipment drawings, and portions of the specifications. Models and written descriptions may accompany the solution. One project. Nominal time, 48 hours a week for 1 semester.

# GRADUATE COURSES

Ae. 501-502.—Architectural Design

Ae. 521-522.—Advanced Freehand Drawing

Ae. 525-526.—Advanced Water Color

Ae. 531-532.—Historical Research

Ae. 551-552.—Building Construction

Ae. 553-554.—Structural Design of Buildings

## ASTRONOMY

CAy. 23.—Descriptive Astronomy. 3 hours, and 2 hours laboratory-observing, during one semester. 4 credits. KUSNER.

A survey of the astronomical universe. The earth as an astronomical body; the solar system; stars and nebulae; the galaxy; the constellations; astronomical instruments and their uses; amateur telescope making.

Aty. 302.—Navigation and Nautical Astronomy. 3 hours. 3 credits. KUSNER. Prerequisite: Plane Trigonometry. Recommended: Advanced trigonometry and elementary descriptive astronomy.

The geographical and astronomical principles and practices involved in determination of position at sea and in the air. Instruments of navigation and their use.

#### BACTERIOLOGY

Bcy. 301.—General Bacteriology. 2 hours, and 4 hours laboratory. 4 credits. CARROLL. Prerequisites: Bty. 101, Cy. 101.

Morphology, physiology and cultivation of bacteria and related micro-organisms. Tanner, Bacteriology.

\*Bcy. 302.—Agricultural Bacteriology. 2 hours, and 4 hours laboratory. 4 credits. Carroll. Prerequisite: Bcy. 301.

Bacteria and associated micro-organisms in relation to water, milk, soil, silage, and farm problems.

Bcy. 304.—Pathogenic Bacteriology. 2 hours, and 4 hours laboratory. 4 credits. Carroll. Prerequisite: Bcy. 301.

Recognition, culture, and special laboratory technique of handling pathogens and viruses; theories and principles of immunity and infection. Stitt, Practical Bacteriology, Parasitology, and Blood Work.

\*\*Bcy. 306.—Bacteriology of Foods. 2 hours, and 4 hours laboratory. 4 credits. CARROLL. Prerequisite: Bcy. 301.

Relation of bacteria, yeast, molds, and other micro-organisms commonly found in foods. Tanner, Microbiology of Foods.

Bcy. 0308.—Sanitary Laboratory Practice. 1 hour, and 4 hours laboratory. 3 credits. CARROLL. Corequisite: Cy. 215.

Problems in sewage and public sanitation, designed primarily for sanitary engineers. American Public Health Association and American Water Works Association, Standard Methods for Examination of Water and Sewage.

\*Bcy. 402.—Dairy Bacteriology. 1 hour, and 4 hours laboratory. 3 credits. CARROLL. Prerequisite: Bcy. 301.

Consideration of bacteria and related micro-organisms encountered in milk and milk derivatives; milk spoilage, milk fermentation; bacteriology of butter, ice cream, cheeses; standard methods of milk analysis and dairy inspection. Hammer, Dairy Bacteriology, 2nd edition.

Bcy. 411.—Principles and Practices of Immunology. 2 hours, and 4 hours laboratory. 4 credits. Carroll. Prerequisite: Bcy. 301.

Consideration of preparations and therapeutic uses of biologicals from a bacteriological stand-point. Zinsser, Resistance to Infectious Discases.

\*\*Bey. 412.—Industrial Bacteriology. 2 hours, and 4 hours laboratory. 4 credits. CARROLL.

# GRADUATE COURSES

Bcv. 500. —Seminar

Bcy. 501-502.—Problems in Soil Bacteriology

<sup>\*</sup>Bacteriology 302 or Bacteriology 402 will be offered depending on the demand by students.

<sup>\*\*</sup>Bacteriology 306 or Bacteriology 412 will be offered depending on the demand by students.

Bcy. 503-504.—Problems in Dairy Bacteriology

Bcy. 505-506.—Problems in Pathogenic Bacteriology

Bcy. 507-508.—Problems in Water Bacteriology

Bcy. 509-510.—Problems in Industrial Bacteriology

Bcy. 519-520.—Research

## BIBLE

CBe. 53.—Foundation of Bible Study. 3 hours. 3 credits. Designed for General College students. Prerequisite to advanced courses in Bible. Offered each semester. JOHNSON.

Through selected readings from the Bible and through comment, the student will be introduced to the dominant personalities and historical periods of the Hebrew people in their relations to people of other cultures, and to the rise and extension of Christianity through the first century.

\*Be. 209.—Biblical Geography and History. 3 hours. 3 credits. JOHNSON. An introductory course to a more intensive study of Biblical literature. Emphasis on the

geography of Palestine and its relations to Assyria, Babylonia, and Egypt. Growth of Old Testament literature as affected by these civilizations.

\*Be. 210.—Biblical Geography and History. 3 hours. 3 credits. JOHNSON. The influence of Persian, Greek, and Roman cultures on Jewish religion and the rise of Christianity. A brief survey of the Apocalyptic movement and its literature.

Be. 303-304.—The World's Great Religions. 2 hours. 4 credits. JOHNSON. A study of the world's great religions in their historical development.

Be. 403.—Old Testament Literature. 3 hours. 3 credits. JOHNSON.

A survey of Old Testament writings dealing with histories, laws, and legends of Israel, authorship and composition of books, the united and divided kingdoms and the dominating leaders, showing historical sequence and spiritual affiliation.

Be. 404.—The Prophets of Israel. 3 hours. 3 credits. JOHNSON.

A study of the background, message, and significance of the creative personalities in the Hebrew and Jewish religious life.

Be. 405.—New Testament Writings. 3 hours, 3 credits, Johnson.

A study of the New Testament writings dealing with their background, authorship, occasion, content, and purpose.

Be. 406.—The Life of Jesus. 3 hours. 3 credits. JOHNSON.

An introduction to the main facts in the uie of Jesus and to a general knowledge of the Gospel literature,

## BIOLOGY

(Non-major, project courses that can be offered to a limited number of students interested in special fields of Natural History. Registration by permission of the department only.)

Bly. 51.—The Natural History of Freshwater Fish. 2 credits. CARR.

Bly. 53.—The Natural History of Reptiles and Amphibians. 2 credits. CARR.

Bly. 55.—The Natural History of Mammals. 2 credits. SHERMAN.

Bly. 57.—The Natural History of Local Invertebrates. 2 credits. ROGERS, HUBBELL, BYERS, WALLACE, or HOBBS.

Groups that may be selected include the Crustacea, Spiders, Orthoptera, Odonata, lower Diptera, and aquatic insects.

<sup>\*</sup>Not offered in 1938-39.

(Regular Courses: Required or elective for a major in the Department or the Biology part of a Group Major.)

Bly. 61.—Laboratory Course in General Biology. 2 three-hour laboratories per week. 2 credits. WALLACE and ASSISTANTS.

A laboratory course designed to parallel the lectures and discussions of the General College Course, C-6. Open to the 48 highest applicants from students taking C-6. Satisfactory completion of the work of Bly. 61 together with a final standing in the upper half of C-6 forms an acceptable prerequisite to the second-year courses of the department, in place of Bly. 101-102.

Bly. 101-102.—General Animal Biology. 2 hours, and 3 hours laboratory. 6 credits. BYERS, WALLACE.

An introduction to the morphology, physiology, development and classification of invertebrate and vertebrate animals.

Bly. 209.—Comparative Anatomy of Vertebrates. 2 hours, and 2 three-hour laboratory periods. 4 credits. SHERMAN. Prerequisite: Bly. 101 or C-6 and Bly. 61.

The morphology and classification of chordate animals. Adams, Introduction to the Vertebrates; Hyman, Laboratory Manual of Comparative Vertebrate Anatomy.

Bly. 210.—Vertebrate Embryology. 2 hours, and 2 three-hour laboratory periods. 4 credits. SHERMAN. Prerequisite: Bly. 209.

Bly. 225-226.—Natural History of the Gainesville Region, with Particular Reference to the Arthropods. 2 hours, and 6 hours field and laboratory work. 8 credits. HUBBELL, first semester; ROGERS, second semester. Prerequisites: Bly. 101-102.

The natural history and classification of the insects and other conspicuous animal groups with special reference to their natural habitats and ecological relationships.

Bly. 310.—Mammalian Anatomy and Physiology. 2 hours, and 2 three-hour laboratory periods. 4 credits. SHERMAN. Prerequisite: Bly. 209.

Lectures on the physiology and anatomy of the mammalian body supplemented by individual dissections of the cat. Zoethout, A Textbook of Physiology, 6th edition.

Bly. 316.—Animal Parasitology. 3 hours, and 1 four-hour laboratory period. 4 credits. BYERS. Prerequisite: Bly. 209; Bly. 332 recommended.

The animal organisms, especially the protozoa and worms, producing disease in man and the higher vertebrates. Blacklock and Southwell, A Guide to Human Parasitology.

Bly. 325.—Genetics and Evolution. 3 hours. 3 credits. Rogers. Prerequisite: Bly. 210 or 225-226, or equivalent.

An introduction to the data and methods of genetics with special reference to their bearing on the problems of organic evolution. Sinnott and Dunn, Genetics; Shull, Evolution.

Bly. 332.—Invertebrate Zoology. 2 hours, and 6 hours laboratory. 4 credits. BYERS. Prerequisite: Bly. 61 or Bly. 101-102.

An advanced survey of the morphology, developmental stages and classification of the invertebrate phyla.

Bly. 333.—Insect Biology. 2 hours, and 6 hours laboratory or field work. 4 credits. Hubbell. Prerequisite: Bly. 225-226.

An advanced course in the morphology, classification, and natural history of insects, with special emphasis upon field work on the local insect fauna.

Bly. 411-412.—Individual Problems in Animal Biology. 6 credits. May be taken either or both semesters. Rogers, Hubbell, Sherman, Byers, or Wallace. Prerequisite: Permission of the instructor.

Qualified students may choose a topic or problem for study. Possible topics or problems: the morphology, development, or life history of a selected animal; the taxonomy of an approved natural group of animals; the fauna of a local animal habitat; natural history of a vertebrate or invertebrate group.

#### GRADUATE COURSES

Bly. 505. -History of Biology

Bly. 506. -Biological Literature and Institutions

Bly. 507-508.—Taxonomic Studies

Bly. 509. —Zoogeography

Bly. 510. —Animal Ecology

Bly. 513-514.—Vertebrate Morphology

Blv. 515-516.—Invertebrate Morphology

Bly. 519-520.—Individual Problems

Bly. 521-522.—Natural History of Selected Animals

Bly. 523-524.—Natural History of Selected Animals

Bly. 533-534.—Problems and Concepts of Taxonomy and Nomenclature

Bly. 539-540.—Graduate Seminar

Bly. 651-652.—Research

#### BOTANY

Bty. 101.—General Botany. 2 hours, and 4 hours laboratory. 4 credits. CODY. Structure and life histories of important algae, fungi, mosses and ferns.

Provided for students in forestry, pharmacognosy and others who desire a foundation course in the plant sciences.

Bty. 102.—General Botany. 2 hours, and 4 hours laboratory. 4 credits. Copy. Structure, environment and principles of classification of seed plants.

Provided for students in forestry, pharmacognosy and others who desire a foundation course in seed plants.

Botany 101 and 102, or their equivalents are prerequisites to courses in botany and bacteriology. (Equivalents: C-6; including laboratory.)

Bty. 303.—Advanced Botany of Cryptograms. 2 hours, and 4 hours laboratory. 4 credits. Cody, Carroll.

Special emphasis will be given to the structure, functioning and environment of the more important lower plants.

Bty. 304.—Advanced Botany of Seed Plants. 2 hours, and 4 hours laboratory. 4 credits. Cody, Carroll.

A detailed consideration of the structure and responses and the adjustments of seed plants.

Bty. 308.—Taxonomy. 2 hours, and 4 hours laboratory. 4 credits. Copy. Prerequisites: Bty. 303, 304. Desirable prerequisites: Ay. 301; Bty. 311.

Identification of common seed plants and ferns of the Gainesville region. Gray, New Manual of Plants. Frequent field trips will be made to nearby places and field notes taken.

Bty. 311.—Plant Physiology (Formerly Bty. 301). 2 hours, and 4 hours laboratory. 4 credits. CODY. Desirable prerequisites: Cy. 262; Ay. 301; Ps. 211.

Physiological processes of plants with respect to absorption, assimilation, transpiration, metabolism, respiration, and growth. Mimeographed Outlines on Plant Physiology.

Bty. 401.—Plant Ecology. 1 hour, and 6 hours laboratory. 4 credits. Copy. Prerequisites: Bty. 311, Bty. 308, Ay. 301.

The relation of plants to their environment; plant survey. MacDougal, Introduction to Plant Ecology; Mimeographed Outlines. Maximov, Plant Physiology.

\*Bty. 403.—Advanced Plant Physiology. 2 hours, and 4 hours laboratory. 4 credits. Copy. Prerequisites or corequisites: Bty. 311, Bcy. 301, Cy. 201-202, Cy. 262, Ps. 211-212.

Special attention will be given to the processes of absorption and relation of the plant cell to water and the soil; transpiration and photosynthesis. Miller, Plant Physiology; Mimeographed Exercises.

\*Bty. 404.—Advanced Plant Physiology. 2 hours, and 4 hours laboratory. 4 credits. Copy. Prerequisite: Bty. 403.

Principles of syntheses of carbohydrates, proteins, oils and fats; digestion; respiration and growth. A continuation of Bty. 403. Miller, Plant Physiology; Mimeographed Exercises.

Bty. 431.—Plant Histology (Formerly Bty. 331). 1 hour, and 6 hours laboratory. 4 credits. Copy. Desirable prerequisites: Bty. 403, Cy. 262. Corequisite: Bty. 311.

Methods, and practice in killing, fixing, sectioning and staining of plant tissues and organs. Chamberlain, Methods in Plant Histology (5th ed.); Mimeographed Outlines in Plant Histology.

Bty. 432.—Plant Anatomy (Formerly Bty. 332). 1 hour, and 6 hours laboratory. 4 credits. Copy. Desirable prerequisites: Bty. 431, Cy. 262, and Ps. 211.

Origin, structure, and function of principal tissues and organs of plants. Stevens, Plant Anatomy (4th ed.); Mimeographed Exercises.

## GRADUATE COURSES

Bty. 500. -Seminar

Bty. 501-502.—Problems in Taxonomy

Bty. 503-504.—Problems in Plant Physiology

Bty. 505. —Problems in Plant Histology

Bty. 506. —Research in Plant Histology

\*Bty. 507. —Advanced Plant Anatomy

\*Bty. 508. —Problems in Plant Anatomy

Bty. 509-510.—Research

## BUSINESS ADMINISTRATION AND ECONOMICS

(Courses designed for students in the General College. May be taken for credit by Upper Division students.)

CEs. 13.—Economic Foundations of Modern Life. 5 hours per week throughout one semester. 5 credits. Offered each semester. ELDRIDGE, MCFERRIN and TUTTLE. Prerequisite: C-1.

Emphasis on the functioning of the economic system. Economic organization and institutions as parts of the economic order in their functional capacities. The understanding of economic principles and processes, especially those relating to value, price, cost, rent, wages, profits, and interest, insofar as such knowledge is necessary in understanding the economic situation of the present day. The evaluation of economic forces and processes in terms of their contribution to social well being. Prerequisite for advanced standing in Economics and Business Administration.

CBs. 14.—Elementary Accounting. 5 hours per week for one semester. 5 credits. Offered each semester. BEIGHTS, COGBURN, and others.

Designed to provide the basic training in business practice and in accounting. A study of business papers and records; recording transactions; preparation of financial statements and reports. Prerequisite for advanced standing in Economics and Business Administration.

<sup>\*</sup>Not offered in 1938-39.

CEs. 15.—Elementary Statistics. 3 or more hours per week for one semester. 4 credits. Offered each semester. M. D. ANDERSON, GERMOND.

The statistical method as a tool for examining and interpreting data; acquaintance with such fundamental techniques as find application in business, economics, biology, agriculture, psychology, sociology, etc.; basic preparation for more extensive work in the field of statistics. Prerequisite for advanced standing in Economics and Business Administration.

(Courses Designed for Students in the College of Business Administration)

Courses preceded by Es. are courses in Economics and courses preceded by Bs. are courses in Business Administration.

Bs. 311.—Accounting Principles. 3 hours. 3 credits. BEIGHTS, COGBURN. Prerequisite: CBs. 14 (or its equivalent).

A study of the mechanical and statistical aspects of accounting: books of record; accounts; fiscal period and adjustments; working papers; form and preparation of financial statements; followed by an intensive and critical study of the problems of valuation as they affect the preparation of the balance sheet and income statements.

Bs. 312.—Accounting Principles. 3 hours. 3 credits. Beights, Cogburn. Prerequisite: Bs. 311.

Consideration is given to the legal aspects of accounting and related problems resulting from the legal organization form used by businesses: liabilities; proprietorship; partnerships; corporations; capital stock; surplus; followed by a study of the financial aspects of accounting as disclosed by an analysis and interpretation of financial statements: financial ratios and standards, their preparation, meaning, and use.

Bs. 313.—Cost Accounting. 3 hours. 3 credits. Beights. Prerequisite: Bs. 311.

A study of the methods of collection, classification, and interpretation of cost data; special problems, standard costs, cost systems, uses of cost data in business control. Lectures and problems.

Es. 321-322.—Financial Organization of Society. 3 hours. 6 credits. DOLBEARE, TUTTLE.

An introduction to the field of finance: a study of the institutions providing monetary, banking and other financial services; interrelationships and interdependence of financial institutions; central banking; government control of finance; significance of financial organization to the economic system as a whole.

Es. 327.—Public Finance, 3 hours, 3 credits, CAMPBELL,

Principles governing expenditures of modern government; sources of revenue; public credit; principles and methods of taxation and of financial administration as revealed in the fiscal systems of leading countries.

Es. 335.—Economics of Marketing. 3 hours. 3 credits. HESKIN.

The nature of exchange and the economic principles underlying trade, with particular attention given to interregional trade. The significance of comparative costs, comparative advantages, and comparative disadvantages. The institutions and methods developed by society for carrying on trading operations; retail and wholesale agencies; elements of marketing efficiency; the cost of marketing; price maintenance; unfair competition; the relation of the government to marketing.

Bs. 338.—Problems in Retail Distribution. 3 hours. 3 credits. HESKIN. The fundamental problems involved in retail distribution are analyzed. Particular attention is paid to the scope of the retailing function, to elements of retail costs and profit, types of retail institutions, sales policies, service policies, merchandising, pricing, brand policies, relation with merchandise sources.

Es. 351.—Transportation Principles. 3 hours. 3 credits. BIGHAM, EUTSLER. The economics of transportation, including railroads, inland waterways, highways, airways, and pipe lines, specifically with reference to the development of facilities and service; contribution to social welfare; economic characteristics; regulation; rate principles and structures; valuation and fair return; discrimination; service; coordination.

Bs. 361.—Property Insurance. 3 hours. 3 credits. CHACE. Fire and Marine insurance.

Bs. 362.—Property Insurance. 3 hours. 3 credits. CHACE. Bond, title, and casualty insurance.

Es. 372.—Labor Economics. 3 hours. 3 credits. CHACE.

Labor problems: insecurity, wages and income, hours, sub-standard workers, industrial conflict; attempts to solve labor problems by employees; unionism in its structural and functional aspects; attempts to solve labor problems by employers: personnel management, employee representation, employers' associations; attempts to solve labor problems by state: protective labor legislation, laws relating to settlement of industrial disputes.

Es. 381.—Economic Geography of North America. 3 hours. 3 credits. DIETTRICH.

The principal economic activities in each of the major regions of North America, involving analysis of these activities from the standpoint of their relation to the natural environment.

\*Es. 385.—Economic Geography of South America. 3 hours. 3 credits. DIETTRICH.

A geographical survey of the continent of South America, organized around the growth of trade, exports and imports, trade by countries, and general business trends; the economic conditions that influence commercial advance or decline; the major geographic regions; their importance in supplying export products and in consuming import commodities.

Bs. 401-402.—Business Law. 3 hours. 6 credits. HURST.

Contracts and agency; rights and obligations of the agent, principal, and third party; termination of the relationship of agency. Conveyances and mortgages of real property; sales and mortgages of personal property; the law of negotiable instruments; partnership.

Es. 404.—Government Control of Business. 3 hours. 3 credits. HURST.

A study of the control between government and business; history, theory, purposes, extent, policy and legality of government control, services and agencies which modern governments undertake to provide for business enterprises.

Es. 407-408.—Economic Principles and Problems. 3 hours. 6 credits. ELDRIDGE, BIGHAM, HESKIN.

An advanced course in economic theory with special emphasis on the causes of economic maladjustments arising from the operation of economic forces.

Bs. 411.—Advanced Accounting. Problems. 3 hours. 3 credits. BEIGHTS. Prerequisite: Bs. 312.

A study of specialized accounting problems; mathematics of accounting; statement of affairs; consignments; installments; ventures; insurance; and other related subjects.

Bs. 412.—Auditing. 3 hours. 3 credits. BEIGHTS. Prerequisite: Bs. 312.

A study of auditing theory and current auditing practice; principal kinds of audits and services of the public accountant; professional and ethical aspects of auditing. Lectures, discussions, and problems.

Bs. 413.—Advanced Accounting. Systems. 3 hours. 3 credits. BEIGHTS. Prerequisite: Bs. 312.

Consideration is given to the principles underlying the structure of accounting systems. A detailed analytical study of six or more systems is made. Reports on systems in operation for various industries are made.

Bs. 414.—Income Tax Procedure. 3 hours. 3 credits. COGBURN. Prerequisite: Bs. 311.

A study of the Federal Income Tax Law and Regulations, and related accounting problems; preparation of tax returns for individuals, corporations and fiduciaries.

Bs. 417.—Governmental Accounting. 3 hours. 3 credits. Cogburn. Prerequisite: Bs. 312.

A study of the basic principles underlying fund accounting. Detailed consideration is given to the preparation and use of the budget, system of accounts, special vouchers, records, statements.

<sup>\*</sup>Not offered in 1938-39.

Bs. 418.—Advanced Accounting. C.P.A. Problems. 3 hours. 3 credits. BEIGHTS. Prerequisite: Bs. 312.

A continuation of the study of specialized accounting problems: receiverships; foreign exchange; stock brokerage; estate and trusts; budgets; business taxes; consolidations and mergers; and other problems usually covered in C.P.A. examinations.

Bs. 422.—Investments, 3 hours, 3 credits, DOLBEARE, Prerequisite: Es. 321-322.

The nature of investments; investment policies and types of securities; analysis of securities; the mechanics and mathematics of security purchases; factors influencing general movements of security prices.

Bs. 423.—Commercial Banking. 3 hours. 3 credits. DOLBEARE. Prerequisite: Es. 321-322.

Banking policies, practices, and problems; the relations of the individual bank with other banks, the money market, and other classes of financial institutions.

Bs. 426.—Banking Systems. 3 hours. 3 credits. TUTTLE. Prerequisite: Es. 321-322.

An analytical history of the evolution of the banking system of the United States, and a critical study of the banking systems of Canada, England, France, Germany, etc.

Bs. 427.—Principles of Business Finance. 3 hours. 3 credits. MCFERRIN.

Lectures, discussions, and problems. A study of the economic and legal forms of business enterprise; the instruments of business finance; financial problems as they relate to the ordinary operations of the business involving working capital, income, dividend policy, current borrowing, credit extension, and the business cycle. Considerable attention will be devoted to the financial problems of individuals, and to small and average size businesses.

Bs. 428.—Problems in Corporation Finance. 3 hours. 3 credits. MCFERRIN. Prerequisite: Bs. 427.

A continuation of Bs. 427. The sale of corporation securities; problems incident to growth and expansion; business failures and financial reconstruction; social aspects of corporate financial policy, regulation and control of corporate fiscal policy, and taxation of corporations.

Es. 430.—Problems in Taxation. 3 hours. 3 credits. BIGHAM. Prerequisite: Es. 327.

An intensive study of the problems of taxation primarily related to the following taxes: general, property, income, business, inheritance, and commodity.

Bs. 432.—Market Management. 3 hours. 3 credits. HESKIN. Prerequisite: Es. 327.

Marketing problems from the viewpoint of an administrative head of a business unit; sales administration; purchasing administration; credit administration. Topics covered include product analysis, sales planning, selection of channels of distribution, pricing policy, sales programs, sales organization, supervision of sales force, purchasing procedure, sources of supply, the place of price in the purchasing function, speculative purchasing, purchasing efficiency, credit management, delivery problems.

Bs. 433.—Advertising. 3 hours. 3 credits. HESKIN.

The relation of the principles of advertising to economic theory; psychology of advertising; a study of agencies, media and methods.

\*Bs. 438.—Problems in Sales and Market Analysis. 3 hours. 3 credits. HESKIN. Prerequisite: Es. 327.

Methods used in analyzing the selling, advertising, and merchandising problems of manufacturers, wholesalers, and retailers; the use of market research; the objective of market investigations; planning market investigations; sales survey methods; preparation of reports; quantitative analysis; measurement of market conditions and their effects on sales; market trends.

<sup>\*</sup>Not offered in 1938-39.

Bs. 440.—Trade Horizons in Caribbean America. 3 hours. 3 credits. ATWOOD.

A regional trade course covering the West Indies, Mexico, Central America, Colombia, and Venezuela. The commercial importance of each republic and island as a market for American goods and as a source of raw materials and foodstuffs; Florida's commercial position in such trade as a result of its geographical proximity to this area.

Bs. 442.—Trade Horizons in the Far East. 3 hours. 3 credits. DIETTRICH.

A study of human relationships to natural environment as presented in the economic adjustments in the Far East and in its commercial connections with the Western World; the major geographic regions in the area, their economic significance in production of various raw materials, foodstuffs, and manufactured goods; and the market for western products furnished by this region.

Bs. 443.—Foreign Trade. 3 hours. 3 credits. CAMPBELL.

Problems in foreign trade: promotion of overseas trade; foreign trade surveys; products of international commerce; trade barriers, tariffs, customs; foreign commercial policies; exporting systems and methods; financing of foreign trade; problems of shipment; legal aspects of foreign trade: importing problems: foreign trade of Florida.

Bs. 444.—Ocean Transportation. 3 hours. 3 credits. CAMPBELL.

Problems in ocean transportation: types of ocean carriers; ocean routes; ocean ports; services of ocean freight carriers; ship brokerage and freight brokerage; passenger carriers; steamship combinations and conferences; ocean freight rate-making; vessel and cargo documents; regulation of shipping; government aid to ship-building and operation; shipping of Florida ports.

Es. 446.—The Consumption of Wealth. 3 hours. 3 credits. An economic analysis of the problems involved in determining the extent and trends of consumer demand and in the adjustments of productive processes to that demand.

Es. 454.—Principles of Public Utility Economics. 3 hours. BIGHAM.

The nature, place and development of public service corporations; types of public control, valuation and rate making; regulation of service, accounts, reports, and securities; combinations; public relations; public ownership.

Es. 456.—Problems in Public Service Industries. 3 hours. 3 credits. BIGHAM. An intensive study of the more important problems raised in the introductory courses in transportation and public utilities.

Bs. 461.—Life Insurance. 3 hours. 3 credits. Eutsler.

The functions of life insurance; the science of life insurance and the computation of premiums; types of life companies; life insurance law; the selling of life insurance.

Es. 463.—Problems in Social Security. 3 hours. 3 credits. EUTSLER.

An analysis of the meaning and nature of social security, especially as related to economic security; the distinctions between social and private insurance; the hazards of low income groups; an evaluation of projects and methods for eliminating, reducing, or indemnifying these hazards; the problems of social security in the United States, especially concerning experiences with relief measures, the development of legislation, the problems of financing and administering security programs, and the relationship between economic planning and security.

Bs. 465.—Realty Principles. 3 hours. 3 credits. CHACE.

Fundamentals of realty economics.

Bs. 466.—Realty Management. 3 hours. 3 credits. CHACE.

The organization of realty enterprises; management of real property; handling of rentals; administration of real estate development.

Es. 467.—Economic History. 3 hours. 3 credits. TUTTLE.

A study of the development of the present economic order and its institutions. Variant forms of economic life are surveyed with emphasis placed on capitalism and its culture. Some of the problems that have arisen as a result of capitalistic economy are analyzed.

Es. 468.—Economic History in the Making. 3 hours. 3 credits. DIETTRICH. The era of industrialism; contemporary economic organization in the leading European countries; types of economic reform; capitalism, socialism, communism; fascism; special consideration of current social and economic problems in England, France, Germany, Soviet Russia, and the United States.

Es. 469.—Business Forecasting. 3 hours. 3 credits. ANDERSON.

A survey of the problem of the reduction of business risk by forecasting general business conditions; statistical methods used by leading commercial agencies in forecasting.

Es. 470.—Business Forecasting, Continued. 3 hours. 3 credits. ANDERSON. Techniques employed to forecast the production and price of specific commodities; intensive examination of the more important contributions to the subject in scientific journals during recent years.

Es. 485.—International Economic Relations. 3 hours. 3 credits. ATWOOD. A study of the development of international economic policies; geographic, economic, social, and political factors underlying contemporary international problems; economic and political methods employed by the leading commercial nations to expand their economic interests.

Es. 487.—Economic Geography of Europe. 3 hours. 3 credits. DIETTRICH.

A study of human relationships to natural environment as presented in the economic adjustments in Europe and in its commercial connections with the other continents, especially with North America.

\*Es. 491.—Geographic Foundations of the British Empire. 3 hours. 3 credits. DIETTRICH.

An analytical study of the economic and commercial problems of the world's largest empire; a study of the basic factors which affected the establishment of the empire; and the geographic and economic interrelationships influencing its present position in world economy.

### GRADUATE COURSES

Es. 501-502.—Seminar in Economic Principles and Problems

Es. 505.—The Development of Economic Thought

Es. 506.—The Development of Economic Thought, Continued

Es. 509.—The Development of Economic Institutions

Es. 522.—The Law of Corporation Finance

Es. 524.—Corporation Finance and Investments

Es. 528.—Problems in Money and Banking

Es. 530.—Problems in Taxation

Es. 531.—The Economic Functions of Middlemen

Es. 556.—Problems in Public Service Industries

Es. 565.—Problems in Social Security

Es. 569-570.—Problems in Statistics and Business Forecasting

Es. 572.—Problems in Labor Relations

Es. 585.—International Economic Relations

Es. 589.—Problems in Economic Geography

### CHEMISTRY

## (Including Chemical Engineering)

Cy. 101-102.—General Chemistry. 3 hours, and 3 hours laboratory. 8 credits. HEATH, JACKSON, OTTE.

Fundamental laws and theories of chemistry. Non-metallic elements and their compounds; metals and their compounds and some of their industrial uses.

NOTE: There is a section in General Chemistry, both lecture and laboratory, for students intending to pursue work in Pharmacy, and for students, intending to pursue work in Agriculture, whose curricula do not include Cy. 201 or Cy. 204.

Cy. 201-202.—Analytical Chemistry. 2 hours, and 6 hours laboratory. 8 credits. BLACK, HAWKINS. Prerequisite: Cy. 101-102.

Theoretical principles and laboratory technique involved in the qualitative detection and quantitative determination of the common metals and acid radicals.

<sup>\*</sup>Not offered in 1938-39.

Cy. 203-204.—Analytical Chemistry. 1 hour, and 6 hours laboratory the first semester; and 2 hours, and 3 hours laboratory the second semester. 6 credits. BLACK, HAWKINS. Prerequisite: Cy. 101-102.

A brief course designed primarily for students not majoring in chemistry. Quantitative methods, the first semester; qualitative analysis, the second semester.

Cy. 215.—Water and Sewage. 2 hours, and 3 hours laboratory. 3 credits. BLACK. Prerequisite: Cy. 101-102.

A theoretical and practical study of the examination and treatment of water and sewage.

Cy. 0262.—Organic Chemistry. 3 hours, and 6 hours laboratory. 5 credits. POLLARD. Prerequisite: Cy. 101-102.

A brief elementary course embracing the more important aliphatic and aromatic compounds.

Cy. 282.—Glass Blowing. 1 hour, and 3 hours laboratory. No credit. Thompson.

This course is arranged primarily for the benefit of those who will find it expedient in scientific work to be able to make repairs or construct glass apparatus of average difficulty. The training covers the working of both the soft and thermally resistant glass common in all laboratories. Students must purchase a supply of glass at \$1.

Cy. 301-302.—Organic Chemistry. 3 hours, and 3 hours laboratory. 8 credits. LEIGH. Prerequisite: Cy. 201-202.

Preparation and properties of the various aliphatic and aromatic compounds. Conant, The Chemistry of Organic Compounds; Fieser, Experiments in Organic Chemistry.

Cg. 345-346.—Industrial Stoichiometry. 3 hours, 6 credits. Prerequisites: Cy. 202, physics and calculus.

Industrial processes and calculations.

\*Cg. 363-364.—Chemistry of Engineering Materials. 2 hours. 4 credits. Prerequisites: Cy. 101-102, and college physics.

Production, properties and uses of the ferrous and non-ferrous metals and alloys, cement, and other materials of construction.

Cy. 401-402.—Physical Chemistry. 3 hours, and 3 hours laboratory. 8 credits. JACKSON. Prerequisites: Calculus and Cy. 302; or Corequisite: Cy. 301-302 for engineering students.

Matter in the three states, elementary thermodynamics, solutions, colloids, electricity as applied to chemistry, homogeneous and heterogeneous equilibria, chemical kinetics, photochemistry, introduction to quantum theory.

Cy. 403.—Water Analysis. 1 hour, and 6 hours laboratory. 3 credits. BLACK. Prerequisite: Cy. 202.

Analysis of waters to determine their potability and fitness for steam raising and other purposes. Standard Methods of Water Analysis of the A. P. H. A.

Cy. 432.—Agricultural Analysis. 1 hour, and 6 hours laboratory. 3 credits. BLACK. Prerequisites: Cy. 202 and 262 or 302.

Quantitative analysis of agricultural products. Mahin and Carr,  $Quantitative \ Agricultural \ Analysis$ .

Cg. 443-444.—Chemical Engineering Laboratory. 6 hours. 4 credits. BEIS-LER. Corequisite: Cg. 447-448.

Experiments in chemical engineering operations.

Cg. 447-448.—Principles of Chemical Engineering. 3 hours. 6 credits. Bels-LER. Prerequisites: Cy. 402, physics, calculus.

Fundamental chemical engineering operations. Badger and McCabe, Elements of Chemical Engineering.

<sup>\*</sup>Not offerel in 1938-39.

Cg. 457-458.—Chemical Engineering Design. 1 hour, and 3 hours laboratory or its equivalent. 4 credits. Corequisite: Cg. 447-448.

The design of chemical plants and equipment.

Cy. 462.—Photographic Chemistry. 3 hours. 3 credits. HEATH. Prerequisites: Cy. 262, or 302; college physics, or suitable photographic experience; Cy. 202.

Theory and practice of photographic processes and materials, and their uses.

Cg. 467-468.—Chemical Thermodynamics. 3 hours. 6 credits. Prerequisites: Cy. 402, calculus.

Fundamental applications of thermodynamics to chemistry and chemical engineering.

Cy. 481-482.—Chemical Literature. One-half hour or its equivalent. 1 credit. Pollard. Prerequisite: 3 years of Chemistry. A reading knowledge of French and German is desirable.

A general study of the present sources of published chemical information.

### GRADUATE COURSES

- \*Cy. 501.—Organic Preparations
  - Cy. 504.—Inorganic Preparations
- \*Cy. 0505.—Organic Nitrogen Compounds
- Cy. 506.—Special Chapters in Organic Chemistry
- Cy. 0508.—Synthesis and Structure of Organic Compounds
- Cy. 0509.—Electrochemistry
- \*Cy. 510.—The Phase Rule
- Cy. 512.—Applications of Physical Chemistry
- \*Cy. 0513.—Colloid Chemistry
- \*Cy. 515.—Advanced Inorganic Chemistry
- Cy. 0516.—Chemistry of the Rare Elements
- \*Cy. 525.—Chemistry of the Terpenes
- \*Cy. 526.—Chemistry of the Terpenes
- \*Cy. 0531.—Advanced Qualitative Analysis
  - Cy. 533.—Advanced Quantitative Analysis
  - Cy. 534.—Advanced Sanitary Chemistry
- Cy. 537.—Qualitative Organic Chemistry
- Cy. 538.—Quantitative Organic Chemistry
- Cy. 0542.—Catalysis
- Cy. 545.—Chemical Thermodynamics
- Cy. 561.—Bio-Chemistry
- \*Cy. 563.—Plant Bio-Chemistry
- Cg. 581.—Chemical Technology
- \*Cg. 583.—Distillation
- Cg. 586.—Chemical Engineering Processes
- \*Cg. 588.—Heat Transmission
  - Cy. 601-602.—Chemical Research

<sup>\*</sup>Not offered in 1938-39.

### CIVIL ENGINEERING

Cl. 223.—Surveying. 2 hours, and 3 hours laboratory. 3 credits. REED. Prerequisites: Trigonometry, Basic Mathematics.

The use of chain, level, and transit; balancing of surveys, calculating of areas, contour work, simple curves; elementary practical problems generally included in a short course for students who do not take advanced surveying work. Breed and Hosmer, The Principles and Practice of Surveying, Volume I.

Cl. 226.—Higher Surveying. 2 hours, and 3 hours laboratory. 3 credits. SAWYER. Prerequisite: Cl. 223.

Traverse, triangulation, precise leveling, topographic mapping; city, land, hydrographic, and aerial surveying; practical astronomy, and map projections. Breed and Hosmer, *The Principles and Practice of Surveying, Volume II.* 

Cl. 329.—Higher Surveying. Summer Term. 3 hours, and 40 hours laboratory. 6 weeks. 5 credits, SAWYER, Prerequisite: Cl. 226.

Field and office practice in traverse, topographic mapping, base line measurement, triangulation, practical astronomy, steam gauging and hydrographic surveying, precise leveling and adjustments of instruments. Breed and Hosmer, The Principles and Practice of Surveying, Volume II.

Cl. 331.—Railway Engineering. 2 hours, and 6 hours laboratory. 3 credits. REED. Prerequisite: Cl. 223.

Simple, compound, reversed, vertical, and spiral curves; earthwork; recitation, field and drawing-room work in the principles of railway engineering. Data is obtained in the field for the design work in both Cl. 331 and Cl. 332. Pickles and Wiley, Route Surveying.

Cl. 332.—Highway Engineering. 2 hours, and 3 hours laboratory. 4 credits. REED. Prerequisite: Cl. 331.

Recitations, field and drawing-room work covering the location, design, and construction of highways. Bruce, Highway Design and Construction.

Cl. 325.—Materials Laboratory. 1 hour, and 2 hours laboratory. 2 credits. SAWYER. Prerequisite: Ml. 381. Corequisite: Ml. 383.

Laboratory work in the testing of stone, brick, asphalt, and other road materials; cement, sand, concrete, timber, steel and other materials used in construction. Bauer, Highway Materials.

Cl. 326.—Theory of Structures. 2 hours, and 6 hours laboratory. 4 credits. SAWYER. Prerequisite: Ml. 381. Corequisite: Ml. 382.

The resolution of forces, computation of reactions and stresses in statically determinate structures and the design of simple structures. Shedd and Vawter, Theory of Simple Structures.

Cl. 327.—Hydraulics. 2 hours, and 2 hours laboratory. 3 credits. LOWE. Prerequisite: Ml. 381. Corequisite: Ml. 382.

The principles underlying the behavior of fluids at rest and in motion. The transportation and measurement of fluids. Pumping and power generation. Schoder and Dawson, Hydraulics.

Cl. 420.—Hydraulic Engineering. 2 hours. 2 credits. LOWE. Prerequisite: Cl. 327.

Lectures and recitations on the design and testing of hydraulic machinery. Turbine and pump characteristics, the homologous series. Water hammer, backwater and drawdown curves, critical depth, hydrograph, flow duration curves, storage, spillways, detention reservoirs. Mead, Hydraulic Machinery.

Cl. 425.—Water and Sewerage. 2 hours, and 3 hours laboratory. 3 credits. Lowe. Prerequisites: Cl. 327, Cy. 0215, Bcy. 0308.

The principles underlying the collection, treatment and disposal of sewage. The design of collection system and treatment works. Metcalf and Eddy, Sewerage and Sewage Disposal.

Cl. 426.—Water and Sewerage. 2 hours, and 3 hours laboratory. 3 credits. LOWE. Prerequisite: Cl. 425.

Lectures and recitations on water supply systems. Sources of supply, methods of treatment, the design of a water supply system, including collection, treatment, and distribution. Babbit and Doland, Water Supply Engineering.

Cl. 431.—Hydrology. 2 hours. 2 credits. Prerequisite: Senior rating.

The principles of hydrology, their relations and applications to engineering design. Meyer, Elements of Hydrology.

Cl. 432.—Concrete Design. 2 hours, and 6 hours laboratory. 4 credits. LOWE. Prerequisite: Cl. 326.

Recitations and drawing-room work on the theory and design of reinforced concrete structures. Urquhart and O'Rourke, Design of Concrete Structures; Lord, Handbook of Reinforced Concrete Building Design.

Cl. 435.—Structural Engineering. 2 hours, and 6 hours laboratory. 4 credits. SAWYER. Prerequisite: Cl. 326.

Regitations, lectures, and drawing-room work in the analysis of stresses due to moving loads, design of railway and highway bridges, and mill buildings in wood and steel. Shedd and Vawter, Theory of Simple Structures; Shedd, Design of Structures in Steel.

Cl. 436.—Structural Engineering. 2 hours, and 6 hours laboratory. 3 credits. SAWYER. Prerequisite: Cl. 435.

Recitations, lectures and drawing-room work in the design of foundations, and of bridges and buildings requiring statically indeterminate methods of stress analysis. Shedd and Vawter, Theory of Simple Structures: Shedd. Design of Structures in Steel.

Cl. 437.—Estimating Quantities and Costs. 2 hours. 2 credits. SAWYER. Prerequisite: Cl. 326.

Estimating material quantities and costs; valuation, cost keeping, time schedules, and progress charts for engineering work. Walker, Building Estimator's Reference Handbook.

Cl. 438.—Hydraulic Laboratory. 2 hours laboratory. 1 credit. LOWE. Corequisite: Cl. 420.

Students taking this course will be permitted to choose one or more of the following topics: water power study, flow duration curves, reservoir depletion curves, backwater curve, tests and reports on deep well centrifugal pump, pelton and reaction turbines. The design of long pipe lines for transporting oils, gasoline, and natural gas. Mead, Hydraulic Machinery.

Cl. 439.—Honors Course. Variable credit. STAFF.

### GRADUATE COURSES

- Cl. 521-522.—Advanced Work in Steel Structures
- Cl. 523-524.—Advanced Work in Concrete Structures
- Cl. 527-528.—Advanced Work in Municipal Engineering
- Cl. 529-530.—Advanced Work in Municipal Engineering
- Cl. 533-534.—Similarity and Model Applications to Beach and Shore Erosions

## DAIRYING

Dy. 311.—Farm Dairying (Formerly Dy. 201). 2 hours, and 2 hours laboratory. 3 credits. Thurston.

Composition and properties of milk; sanitary milk production; common dairy processes. For students in general agriculture. Prerequisite to all courses in dairy manufactures.

Dy. 314.—Theory of Dairy Manufacture (Formerly Dy. 304). 1 hour, and 2 hours laboratory. 2 credits. NEAL. Prerequisites: Al. 311, Dy. 311.

Detailed consideration of properties of milk in relation to specific tests with dairy products.

Dy. 316.—Condensed Milk and Dry Milks. 1 hour, and 2 or 3 hours laboratory. 2 credits. Thurston. Prerequisite: Dy. 311.

Principles of condensing and drying milk products, and their relation to the dairy industry.

Dy. 411.—Dairy Herd Management (Formerly Dy. 202). 2 hours. 2 credits. Arnold.

Dairy breeds, selection, breeding and raising of dairy cattle.

Dy. 412.—Milk Production (Formerly Dy. 308). 2 hours, and 2 hours laboratory. 3 credits. ARNOLD. Prerequisite: Al. 311, Dy. 311, 411.

Feeding and management of dairy cattle for milk production.

Dy. 413.—Market Milk and Milk Plant Products (Formerly Dy. 302). 2 hours, and 2 hours laboratory. 3 credits. Thurston. Prerequisite: Dy. 311.

Methods of handling milk and milk products in the commercial dairy; operation of milk plants; sanitary supervision of milk supply.

Dy. 414.—Manufacture of Butter and Cheese. 2 hours, and 2 hours laboratory. 3 credits. Thurston. Prerequisite: Dy. 311.

Principles and practices of butter and cheese manufacture.

Dy. 415.—Ice Cream Manufacture (Formerly Dy. 307). 2 hours, and 2 hours laboratory. 3 credits. Thurston. Prerequisite: Dy. 311.

The ice cream mix; principles and practices of ice cream manufacture and plant operation.

Dy. 416.—Dairy Technology. 1 hour, and 6 hours laboratory. 4 credits. Thurston. Prerequisites: Dy. 311, 314, Bcy. 302.

Advanced laboratory methods and their application in chemical and bacteriological control of milk and milk products.

Dy. 418.—Approved Dairy Practice. 1 to 3 credits. Thurston.

Practical experience in approved dairy plants during the summer preceding, or following, the junior year. Satisfactory work and a written report are the basis of credit allowed.

Dy. 422.—Seminar. 1 hour. 1 credit.

Seminar will be conducted jointly with the regular Animal Husbandry seminar.

### GRADUATE COURSES

Dy. 520. —Advanced Dairy Technology

Dy. 521-522.—Problems in Milk and Milk Products

Dy. 523-524.—Problems in Dairy Production

### BUSINESS EDUCATION

NOTE: The professionalized subject matter courses in shorthand and typewriting are open only to students preparing to be commercial teachers. They are not counted for credit in Education.

En. 81-82.—Elementary Typewriting. 3 hours laboratory. 2 credits. COPE-LAND.

Introduction to touch typewriting; development of skill; application of typewriting to personal problems. Minimum skill for credit: 25 net words per minute with 98 per cent accuracy. This course is for those who have had no instruction in typewriting.

\*En. 83-84.—Advanced Typewriting. 1 hour, and 3 hours laboratory. 4 credits. COPELAND. Prerequisite: En. 81-82. Corequisite: En. 93-94.

Skill development; application of typewriting to office problems; shorthand transcription; methods of teaching. Minimum skill for credit: 40 net words per minute with 99 per cent accuracy on copying tests, and satisfactory skill on shorthand transcription and production tests.

En. 91-92.—Elementary Shorthand. 3 hours. 2 credits. COPELAND. Corequisite: En. 81-82.

Gregg shorthand principles and writing skill developed by the Functional Method.

\*En. 93-94.—Advanced Shorthand. 3 hours. 4 credits. COPELAND. Prerequisite: En. 91-92. Corequisite: En. 83-84.

Review of shorthand principles; development of vocabulary and skill in writing shorthand from dictation; methods of teaching.

<sup>\*</sup>Not offered in 1938-39.

### **EDUCATION**

CEn. 13.—Introduction to Education. 3 hours. 3 credits. NORMAN.

An attempt is made to foreshadow the field of Education so that the student may see the whole field before he studies its detailed and technical parts. Butterwick and Seegers, An Orientation Course in Education.

En. 303.—General Methods of Teaching Vocational Agriculture. 3 hours. 3 credits. GARRIS.

General methods of teaching high school subjects applied to vocational agriculture. Garris, Special Methods in Teaching Vocational Agriculture.

En. 305.—Development and Organization of Education. 3 hours. 3 credits. HOWARD.

An attempt to interpret and evaluate present-day education, and to point out possible developments. Agenda Committee, Citizens' Conference on the Crisis in Education.

En. 306.—Vocational Education. 3 hours. 3 credits. GARRIS.

Development, function, and scope of vocational, agricultural, home economics, trade and industrial, and commercial education as provided for by the National Vocational Education Act of Congress.

\*En. 308.—The Public School Curriculum. 3 hours. 3 credits. SIMMONS.

The curriculum as a group of related problems and projects of vital interest to children. An attempt to formulate a curriculum based on social conditions and social needs.

En. 317.—Tests and Measurements. 2 hours, and 2 hours laboratory. 3 credits. CRAGO.

An elementary course designed to aid the teacher in the use of tests in the improvement of instruction and in the solution of school problems. Boynton, Intelligence—Its Manifestations and Measurement; Greene and Jorgenson, The Use and Interpretation of Educational Tests.

En. 323.—General Methods in the Secondary School. 3 hours. 3 credits. HOWARD. Corequisite: En. 319.

Current conceptions of secondary school procedures.

\*En. 329.—Personality Adjustment. 3 hours. 3 credits. CRAGO.

Problems of adjustment of children and adolescents. A study of methods of properly conditioning children, of the development of wholesome attitudes and normal behavior. Sherman, Mental Hygiene.

En. 371-372.—Directed Observation and Interpretation of the Teaching of Business Education. To arrange. 6 credits. COPELAND.

A functional study of the teaching of business education in the public schools.

En. 373-374.—Directed Observation and Interpretation of Teaching in the Elementary Schools. To arrange. 6 credits. GRACE ADAMS STEVENS.

A functional study of teaching in the first six grades.

En. 375-376.—Directed Observation and Interpretation of the Teaching of English. To arrange. 6 credits. WISE, BOUTELLE.

A functional study of the teaching of English in the public schools.

En. 377-378.—Directed Observation and Interpretation of the Teaching of Foreign Languages. To arrange. 6 credits. HAYGOOD.

A functional study of the teaching of foreign languages in the public schools.

En. 379-380.—Directed Observation and Interpretation of the Teaching of Mathematics. To arrange. 6 credits. Howard.

A functional study of the teaching of mathematics in the public schools.

En. 381-382.—Directed Observation and Interpretation of the Teaching of Science. To arrange. 6 credits. GOETTE.

A functional study of the teaching of science in the public schools.

<sup>\*</sup>Not offered in 1938-39.

En. 383-384.—Directed Observation and Interpretation of the Teaching of Social Studies. To arrange. 6 credits. Culpepper, Lewis.

A functional study of the teaching of social studies in the public schools.

En. 385-386.—The Individual and Education. To arrange. 4 credits. CRAGO. Designed to acquaint the student with child nature. The findings of recent research in the physical and mental growth of children will be studied through outside reading, class discussion, and observation of children of all ages and levels in actual, representative situations.

\*En. 387.—Health Education. 3 hours. 3 credits. SALT.

Conditions that affect the physical and mental vigor of children, youth, and teachers, and relate the school to the health of the home and community; the teacher's health; sanitation of school buildings.

En. 401.—Administration and Supervision of Village and Consolidated Schools. 3 hours. 3 credits. SIMMONS.

Problems peculiar to schools in Florida; the supervising principal, qualifications, relation to superintendent, boards, teachers, pupils, patrons, and community; adapting the school to the child's needs; business practices.

\*En. 402.—Administration Practice. 3 hours. 3 credits. SIMMONS. Prerequisite: En. 401.

The supervision of instruction; visits to schools for the study of administrative and supervising practice; a survey of one school system.

\*En. 0406.—Elementary School Administration. 3 hours. 3 credits. Prerequisites: En. 305 and the required Junior courses.

The problems that usually confront the elementary school principal will be stressed in this course. Reavis, Pierce and Stulken, The Elementary School.

En. 408.—High School Administration. 3 hours. 3 credits. CULPEPPER. Practical management and administration of the modern high school.

En. 409.—Supervised Teaching of Part-Time and Evening Classes in Vocational Agriculture. 9 hours laboratory. 3 credits. GARRIS and TENNEY.

Under supervision, students will assist in organizing and teaching part-time and evening students in the Gainesville area.

En. 410.—Supervised Teaching for All-Day Classes in Vocational Agriculture. 9 hours laboratory. 3 credits. GARRIS and TENNEY.

Under supervision, students will observe and teach all-day classes in vocational agriculture in the P. K. Yonge Laboratory School or in other schools located in the Gainesville area.

En. 411.—Special Methods in Teaching Part-Time and Evening Classes in Vocational Agriculture. 2 hours. 2 credits. GARRIS.

Organization, course content, and methods of teaching applied to adult classes for vocational agriculture. Garris, Special Methods in Teaching Vocational Agriculture.

En. 412.—Special Methods in Teaching All-Day Classes in Vocational Agriculture. 2 hours, 2 credits. TENNEY.

Organization of a long-time teaching program, methods in Future Farmer work, and class management for high school classes in vocational agriculture. Garris, Special Methods in Teaching Vocational Agriculture.

En. 421-422.—Directed Teaching. To arrange. 4 credits. STAFF.

The student is given practice in the art of teaching by actually taking over responsibility for the teaching-learning situation and putting into operation under direction and supervision the theories, methods, materials, and teaching techniques acquired during his junior year through observation and participation.

<sup>\*</sup>Not offered in 1938-39.

En. 491.—Education and the Social Order. To arrange. 2 credits. NORMAN. An orientation into the relationship of society and Education. The school and its function will be studied in the light of social conditions and problems and of recent social trends. Some of the problems to be considered are propaganda and the schools, character education and business ethics, crime and the school.

En. 492.—Educational Conceptions. To arrange. 2 credits. NORMAN.

This course is designed to aid the student in clarifying and crystallizing his thinking about teaching-learning principles into broad educational conceptions on a significant and operative level. Among the concepts to be developed are the nature of experience, nature of growth, and the nature of subject matter.

#### GRADUATE COURSES

### -Graduate Seminar

\*En. 0500.-An Introduction to Educational Research

En. 501.—The Elementary School Curriculum

\*En. 503.—Seminar in Educational Measurements

\*En. 504.-The School Survey

\*En. 506.-Methods of Teaching Farm-Shop Work

\*En. 507.—Seminar in Educational Psychology

\*En. 508.—Democracy and Education Seminar

\*En. 509.—Problems in the Administration of a School System

En. 510.—Foundations of Modern Education

\*En. 511-512.-Methods and Materials in Vocational Agriculture

\*En. 514.—Problems in Adolescence

En. 516.—Character and Personality Development

\*En. 517.—Educational Statistics

\*En. 518.—Special Problems in High School Organization and Administration

En. 519.—High School Curriculum

En. 521.—Business Administration of a School System

En. 0528.—Supervision of Instruction

En. 531-532.—Guided Professional Development in Health and Physical Education

En. 533-534.—Problems of Physical Education

En. 539.—Exceptional Children

En. 541.—Control and Support of Public Education

\*En. 542.—The Curriculum and the Educational Plant

\*En. 543.—The Teacher and the Educand

\*En. 544.—Constitutional and Legal Basis of Public School Administration

En. 562.—Guidance and Counseling

En. 565-566.—Problems in Agricultural Education Seminar

En. 567-568.—Problems in Agricultural Education Seminar

\*En. 569.—Problems in Organizing Part-Time and Evening Classes

\*En. 581.—The Reorganization of Secondary School English

\*En. 603.—Foundations of Method

\*En. 605-606.—Seminar in Public School Administration

\*En. 619.—Child Growth and Development

<sup>\*</sup>Not offered in 1938-39.

## ELECTRICAL ENGINEERING

Radio courses in the Department of Electrical Engineering are given in cooperation with State Radio Station WRUF. Qualified students can secure practical experience in station operation.

El. 341-342.—Elements of Electrical Engineering. 3 hours. 6 credits. SMITH. Prerequisite: One year of college physics, including electricity and magnetism; differential and integral calculus.

Electric and magnetic circuits; electrostatics; electromagnetics; representation of alternating currents by vectors and complex quantities; measurement of power in single phase and polyphase circuits; generation, transmission, and utilization of electrical energy; characteristics of apparatus; selection, testing, and installation of electrical equipment. Dawes, Electrical Engineering, Volume I, Direct Currents; Volume II, Alternating Currents.

El. 344.—Problems in Direct and Alternating Currents. 3 hours. 3 credits. WILSON. Corequisite: El. 342.

Problems on Kirchoff's Laws for Electric and Magnetic Circuits; electrostatics; energy and power; wave form; power in single and polyphase circuit; transients; unbalanced circuits; harmonics. Lyon, Problems in Direct Currents; Lyon, Problems in Alternating Currents; Lawrence, Principles of Alternating Currents.

El. 345.—Electrical Illumination. 2 hours, and 6 hours laboratory. 4 credits. WILSON. Corequisite: El. 341.

Illumination; modern fight sources; reflection, transmission, and absorption; diffusion; refraction; glare; color; application of lighting units to various types of buildings; circuits for lighting; control equipment for lighting; wiring methods; floodlighting. National Electrical Safety Code; Lighting Bulletins.

El. 346.—Electrical Communications. 3 hours, and 3 hours laboratory. 4 credits. WILSON. Corequisite: El. 342.

Speech and hearing; receivers and loud speakers; principles of various systems of wire and radio telegraphy and telephony; elementary tube theory; amplifiers, radio receivers, and transmitters. Albert, Electrical Communication.

El. 349-350.—Dynamo Laboratory. 3 hours laboratory. 2 credits. SMITH. Corequisite: El. 341-342.

Experimental studies and tests on direct current and alternating current apparatus.

El. 440.—Industrial Applications of Electrical Equipment. 3 hours. 3 credits. WILSON.

Application of motors to industry and transportation; electro-chemistry; electric heating; electric welding; starting and speed control; protective equipment; signal systems. Corequisite: El. 447-448.

El. 441-442.—Electrical Engineering Seminar. 1 hour. 2 credits. SASHOFF. Prerequisites: not less than 15 credits in courses in Electrical Engineering.

Discussions on topics from current engineering periodicals, on research projects in progress in the laboratories, and on new developments in industry.

El. 445.—Electrical Instruments, Meters, and Relays. 2 hours, and 3 hours laboratory. 3 credits. WILSON. Prerequisites: El. 341-342, 344.

Design, construction, testing, and application of electrical instruments, meters, and relays. Knowlton, Electric Power Metering.

El. 446.—Electric Power Transmission. 3 hours. 3 credits. SASHOFF. Prerequisites: El. 341-342. 344.

Electric and magnetic field distribution; inductive interference; corona; calculation; performance, electrical and mechanical design of short and long lines. Loew, Electrical Power Transmission.

El. 447-448.—Alternating Current Apparatus. 3 hours. 6 credits. WILSON. Prerequisites: El. 341-342, 344.

Design, characteristics, and operation of alternating current apparatus, particularly transformers, generators, motors, and rotary converters.

El. 449.—Theory of Electric Circuits. 3 hours. 3 credits. SASHOFF. Prerequisites: El. 341-342, 344.

Networks; resonance phenomena; the infinite line; reflection; filters; inductive interference, coupled circuits; impedance matching. Everett, Communication Engineering.

El. 451-452.—Advanced Dynamo Laboratory. 6 hours laboratory. 4 credits. SMITH. Prerequisite: El. 349-350. Corequisite: El. 447-448.

Experimental tests on alternating current apparatus, particularly transformers, synchronous machinery, and induction motors.

El. 453-454.—Radio Station Operation. 3 hours laboratory. 2 credits. SASH-OFF. Prerequisite: El. 346.

Operation, maintenance, and testing of a broadcasting station, under actual operating conditions and under the direction of licensed operators.

- El. 455.—Honors Course. Variable Credit. STAFF.
- El. 543.—Thermionic Vacuum Tubes. 3 hours. 3 credits. SASHOFF. Prerequisites: El. 341-342, 344, 346.

Emission of electrons; practical considerations applied to tube construction; theory of diodes and triodes; theory of multi-element tubes. Chaffee, Theory of Thermionic Tubes.

El. 544.—Applied Electronics. 3 hours. 3 credits. SASHOFF. Prerequisites: El. 341-342, 344, 346.

Vacuum tubes in their application to radio, television, and industry. Gulliksen and Vedder, Industrial Electronics.

El. 545-546.—Electronics Laboratory. 3 hours laboratory. 2 credits. SASHOFF. Prerequisites: El. 341-342, 344, 346.

Special experiments of the students' selection in the field of electronics; high frequency measurements; vacuum tube characteristics; transmitter and receiving set measurements.

El. 550.—Theory of High Frequency Circuits. 3 hours. 3 credits. SASHOFF. Prerequisite: El. 341-342, 344.

Radio frequency amplifiers; modulation and demodulation; vacuum tube detectors; oscillators; radiation phenomena. Everett, Communication Engineering.

El. 551.—Symmetrical Components. 3 hours. 3 credits. SASHOFF.

Calculation of unbalanced faults; constants of synchronous machines and transformers; constant of short and long transmission lines; simultaneous faults; measurement of sequence voltages, currents, and power; unsymmetrical systems.

El. 559-560.—Electrical Laboratory Practice. Variable credit. STAFF. Prerequisite: not less than 15 hours of credit in courses in Electrical Engineering. Special experimental work in Electrical Engineering, which can also be used by honor

students for special credit.

### GRADUATE COURSES

- El. 601-602.—Advanced Experimental Electrical Engineering
- El. 603. —Advanced Electrical Theory
- El. 605-606.—Advanced Course in Communication Engineering
- El. 607-608.—Radio Engineering Laboratory
- El. 609. —Electric Power Plant Design
- El. 611-612.—Thesis Research

### **ENGLISH**

The courses in English, advanced as well as introductory, have one common purpose: to enrich the student's experience by intimate association with those writings in our language, past and present, which contribute most to meaningful living. The central aim is to help men of all vocations acquire some appreciation of our literary heritage, essential to a cultivated outlook on life, and to help men of all vocations acquire greater facility in the knowledge and use of our language. The aim is thus twofold: education for enlightened leisure and for enlightened labor. Bacon's words are pertinent: "Studies serve for delight, for ornament, and for ability. . . . Some books are to be tasted, others to be swallowed, and some few to be chewed and digested."

General College Electives in English.—While CEh. 33 and 34 are designed primarily for students who do not intend to pursue college work beyond the second year, these courses may be taken by any student for elective credit. CEh. 35-36, 37-38, and 313-314 are connective courses, but may be taken by those who do not intend to go on as well as by those who do. These three courses may be taken for credit by students in the Upper Division.

Important.—All of the courses in English are so organized that they may be taken either semester for credit.

Prerequisites.—With the exception of Graduate courses, there are no rigid prerequisites for non-Majors. Non-Majors, however, should consult the department when considering advanced courses. Majors should follow the prescribed order of courses whenever possible.

C-3 (31-32).—Reading, Speaking, and Writing. 3 hours, and 2 hours laboratory; throughout the year. 8 credits. (Replaces Eh. 101-102.) Prerequisite to all advanced courses in English.

Designed to furnish the training in reading, speaking, and writing necessary for the student's work in college and for his life thereafter. This training will be provided through practice and counsel in oral reading, in silent reading, in logical thinking, in fundamentals of form and style, in extension of vocabulary, and in control of the body and voice in speaking. Students will be encouraged to read widely as a means of broadening their interests and increasing their appreciation of literature.

CEh. 33.—Effective Writing. 4 hours. 4 credits. Offered each semester. Prerequisite: C-3, or permission of C-3 Course Chairman.

Designed to aid the student to present his ideas in writing which is not only accurate and clear but pleasing and attractive to the reader. Students are encouraged to do creative work.

CEh. 34.—Reading for Leisure. 4 hours. 4 credits. Offered each semester. Prerequisite: C-3, or permission of C-3 Course Chairman.

Designed to aid the student in planning for himself a well-rounded, leisure-reading program, which will serve to keep him abreast of the best in contemporary thought and literature.

CEh. 35-36.—Literary Masters of America. 3 hours; either semester or throughout the year. 6 credits. CONNER.

The writers emphasized are selected from the most eminent American authors between Irving and Frost, such writers as everyone should or would like to know, regardless of his intended vocation.

CEh. 37-38.—Literary Masters of England. 3 hours; either semester or throughout the year. 6 credits. LYONS.

The most interesting and significant English writers are read and discussed, primarily for an appreciation of their art and outlook on life. Prospective English Majors should elect this course the Sophomore year.

CEh. 313-314.—Masterpieces of World Literature. 3 hours; either semester or throughout the year. 6 credits. CALDWELL, MOUNTS. (ATKIN, HAUPTMANN, BRUNET, BROWN, DEGAETANI, assisting.)

A lecture and reading course designed to acquaint the student with some of the greatest books in the world, books which every educated man should know.

Eh. 221.—Types of Humorous Literature. 3 hours. 3 credits. MOORE.

An approach to the masterpieces of humorous literature, with some attention to the nature and function of humor and to its various types.

Eh. 301-302.—Shakespeare. 3 hours. 6 credits. ROBERTSON.

While the reading of Shakespeare is stressed, the primary design is to increase the student's appreciation and enjoyment of the plays. As an aid to the reading of Shakespeare himself, some of the most interesting features of the earlier drama and the Elizabethan stage are treated briefly. The first semester is devoted chiefly to the romantic comedies and the history plays, including A Midsummer Night's Dream, The Merchant of Venice, Much Ado, As You Like It, Twelfth Night, Richard the Third, and Henry the Fourth. In the second semester the great tragedies are stressed, notably Hamlet, Othello, King Lear, Macbeth, Antony and Cleopatra. Required of Majors.

Eh. 303-304.—Famous English Writers of the Nineteenth Century. 3 hours. 6 credits. FARRIS.

Such writers as Wordsworth, Keats, Shelley, Byron, Ruskin, Carlyle, Tennyson, and Browning are read and discussed more thoroughly than is possible in a rapid survey course.

Eh. 305.—Introduction to the Study of the English Language. (Offered each semester.) 3 hours. 3 credits. ELIASON.

Designed to meet the needs of three types of students: a) For the general student it offers a means of improving his written and spoken English by showing him what "good English" is. b) For the English teacher in the secondary school it provides an adequate minimum knowledge of the English Language. c) For the English Major and beginning graduate student it serves as an introduction to further linguistic study. Primary emphasis is placed, not upon grammatical rules, but rather upon the most interesting features of our language as written and spoken. Required of Majors.

Eh. 399.—Introduction to the Study of Literature. (Offered each semester.) 3 hours, 3 credits, LYONS.

A consideration of the nature of literature, its types, forms, content, and values. The course is designed to provide the student with a better critical understanding of literary art. Lectures, wide reading, and discussion. Required of Majors.

Eh. 401-402.—American Literature. 3 hours. 6 credits. SPIVEY.

A study of American writers from the beginnings to the present. Also, through lectures, a consideration of the emergence and development in America of such literary forms as the novel, drama, essay, short story, and poetry; and a discussion of such pertinent themes as Puritanism, Transcendentalism, Romanticism, the Frontier, Realism, Regionalism, and the relations of literary movements in America to those of England.

Eh. 403-404.—The Novel. 3 hours. 6 credits. FARRIS.

The development of the novel from earlier fiction; the great novels of the eighteenth, nineteenth, and twentieth centuries. Major emphasis upon the modern novel. Wide reading and discussion, with particular attention to the novel as a literary form and as a criticism of life.

Eh. 405-406.—English Drama. 3 hours. 6 credits. ROBERTSON.

This is a survey of the English drama from Dryden to the present day. It presents outstanding plays of the Restoration, the eighteenth century, and the nineteenth century, concluding with the works of Shaw. Such notable plays as Dryden's All for Love, Wycherley's Country Wife, Congreve's Way of the World, Vanbrugh's Relapse; or, Virtue in Danger, Sheridan's School for Scandal, and others of the earlier periods are read. These are treated both as representative of their era and as living drama.

\*Eh. 407-408.—Contemporary Literature. 3 hours. 6 credits.

<sup>\*</sup>Not offered 1938-39.

Eh. 409-410.—Chaucer. 3 hours. 6 credits. LYONS.

Designed to help the student appreciate Chaucer as a story teller, as a wise, humorous, and penetrating observer of human life, and as a great poet. In the first semester the course is adapted especially for undergraduates; the second semester for advanced undergraduates and graduate students. In the second semester, collateral reading (in translation) of interesting and important medieval writings.

\*Eh. 413-414.—The Renaissance in England. 3 hours. 6 credits.

Eh. 0415 .- Milton. 3 hours. 3 credits. CALDWELL.

The special emphasis in this course will fall upon Paradise Lost and upon such other of Milton's writings as point to it. Some attempt will be made to formulate Milton's views, social, educational, religious and philosophical, directly from a consideration of his text. The man in relationship to his age will also be considered.

Eh. 417.—Spenser. 3 hours. 3 credits. MOUNTS.

In this course the purpose is first of all to lead the student to a large familiarity with the text of Spenser (particularly of the *Shepheardes Calender*, the *Amoretti*, and the *Faerie Queene*), and to deal with some of the problems of allusion, structure and style; next, to suggest the poet's relationship to his predecessors and contemporaries, both English and foreign.

Eh. 427-428.—Imaginative Writing. 2 hours. 4 credits. FARRIS.

Designed to help the student develop his capacity for original creative work. Group discussions and individual conferences.

Eh. 433-434.—English Literature from 1660 to 1800. 3 hours. 6 credits. SPIVEY.

A study of English writers from Dryden through Burns, with the major emphasis upon Dryden, Pope, Johnson, and Burns. Also, a consideration of such pertinent themes as neoclassicism, rationalism, sentimentalism, pre-romanticism; and such subjects as the origin and development of the literary periodical and the English novel in the period covered.

### GRADUATE COURSES

Eh. 509-510.—Chaucer

Eh. 511-512.—Old English and Middle English

\*Eh. 513-514.—The Renaissance in England

Eh. 0515. -Milton

Eh. 517. —Spenser

Eh. 519-520.—English Drama

Eh. 521-522.—English Classicism

Eh. 529. -Introduction to the Problems and Methods of Investigation

Eh. 531-532.—The English Conference

### ENTOMOLOGY

Ey. 301.—Introduction to Entomology. Prerequisite to all courses in Entomology. 3 hours, and 2 hours laboratory. 4 credits. CREIGHTON and HIXSON.

An introduction to entomology, based on the structure, classification, life history, recognition, and control of injurious species.

\*Ey. 304.—Advanced Economic Entomology. 3 hours, and 4 hours laboratory. 5 credits. Creighton.

Field and laboratory problem work and insectary work in the rearing of some of the more common Florida insects. Study of natural parasites and the special technique required for professional work in this line.

Ey. 311-312.—Entomology Seminar. 1 hour. 2 credits. CREIGHTON and HIXSON.

<sup>\*</sup>Not offered 1938-39.

Ey. 314.—General Principles of Entomology and Plant Pathology. 3 hours, and 4 hours laboratory. 5 credits. CREIGHTON. For Smith-Hughes students only.

A study of the fundamental principles of Entomology and Plant Pathology, together with the major factors causing pathogenic disturbances in cultivated plants and domestic animals, and their control.

Ey. 405.—Insect and Disease Control. 2 hours, and 2 hours laboratory. 3 credits. CREIGHTON and HIXSON.

A study of all forms of control, including cultural, biological, legal, natural, and chemical control. A detailed study of the more generally used chemical materials, including a study of the methods of application.

Ey. 408.—Insect Morphology. 3 hours, and 4 hours laboratory. 5 credits. CREIGHTON.

A study of the internal and external anatomy of members of the class Hexapoda.

Ey. 411.—Apiculture. An Introduction to Bee Culture. 2 hours. 2 credits. CREIGHTON.

Economic importance of the bee industry; apparatus used; organization of colony; life processes; races of bees; selection of apiary site; manipulation of colony; marketing; nectar and pollen sources; diseases.

Ey. 0420.—Medical and Veterinary Entomology. 3 hours. 3 credits. CREIGHTON and HIXSON.

A study of the Arthropods that are parasitic upon man and domestic animals, including insects and their near relatives.

\*Ey. 430.—Insect Histology and Physiology. 2 hours, and 2 hours laboratory. 3 credits. CREIGHTON.

A study of the histological structure and the functioning of the organs and systems of organs.

\*Ey. 432.—Citrus and Vegetable Insects and Diseases. 3 hours. 3 credits.

A study of the life history and control of the major parasitic enemies of these plants.

\*Ey. 441-442.—Plant Quarantine and Inspection. 2 hours. 4 credits. MONT-GOMERY, GOODWIN, BROWN.

A study of quarantine principles and laws.

### GRADUATE COURSES

Ey. 501-502.—Methods of Research in Entomology

Ey. 503-504.—Problems in Entomology

Ev: 505-506.—Advanced Insect Histology

Ey. 507-508.—Advanced Insect Taxonomy

\*Ey. 509-510.—Advanced Insect Embryology

Ev. 511-512.—Thesis Research

\*Ey. 513. —Advanced Insect Morphology

\*Ev. 515. —Biological Control

Ey. 516. —Insect Ecology

### FOREST RANGER

### First Year

Fy. 101.—Principles of Forestry. 3 lectures. SWINFORD.

A basic course required of all students in Forestry, designed to acquaint them with fundamentals, and a survey of the field.

Fy. 0103.—Forest Influences. 3 lectures. DEVALL.

Factors affecting and controlling the growth and development of forest trees and stands, and effects of forests on environment.

<sup>\*</sup>Not offered 1938-39.

Fy. 0105.—Seeding, Planting, and Nursery Practice. 2 lectures, 1 field. DEVALL.

Methods of growing forest seedlings and principles and ways of transplanting them.

Fy. 106.—Forest Improvement. 2 lectures, 1 field. SWINFORD.

Character and construction of roads, trails, electric lines, lookout towers, and improvements and conveniences.

Fy. 0107.—Forest Protection. 3 lectures. SWINFORD.

The protection from fire, animals, insects, and other enemies.

Fy. 0108.—Forest Reproduction. 2 lectures, 1 field, laboratory. DEVALL. Natural reproduction and improvement of forest crops: application to different types of forests.

Fy. 110.—Local Dendrology. 2 lectures, 1 field. DEVALL. Prerequisite: Bty. 101.

The botanical features of the important Florida trees and shrubs and their identification; the use and construction of botanical keys.

### Second Year

Fy. 202.—Wood Identification. 2 lectures, 4 laboratories. SWINFORD.

The student will have the opportunity of studying the structure of the commercial woods of the U. S. through the microscope and hand lens.

Fy. 206.—Grazing and Wild Life. 2 lectures, 1 field. DEVALL.

Relationship of grazing and forest practices, wild life protection, care, food, shelter, etc. The student will have the opportunity of studying the habits of native animals and their care in the field.

Fy. 207.—Regional Dendrology. 2 lectures. DEVALL. Prerequisite: Fy. 110.

A study of all commercial timber trees of the United States by forest regions; their distinguishing characteristics, uses, range and importance.

Fy. 209.—Logging and Lumbering. 3 lectures. SWINFORD.

Logging practices in the South and neighboring regions; sawmill mechanics and practices; lumber grading, seasoning and storage; preservative treatment of finished lumber.

Fy. 211.—Naval Stores and Forest Products. 3 lectures. SWINFORD.

Naval Stores theory and practice; production of major forest pulpwood; and minor forest products such as chemical wood, distillation wood, rubber and maple sugar.

Fy. 213.—Forest Mensuration. 2 lectures, 1 field. DEVALL.

A practical course in the measurement of felled and standing timber; timber cruising, type mapping, growth studies and pulpwood estimating.

Fy. 216.—Regional Silviculture. 2 lectures. DEVALL. Prerequisite: Fy. 207. The silvicultural practices of handling commercial tree species in all forest regions; method of cutting, and slash disposal; soil requirements and growth; important forest types in which each species is found, with its associates.

Fy. 218.—Forest Finance and Economics. 3 lectures. SWINFORD.

Economics of forest management; financing of forest enterprises and other charges; returns from operations in relation to costs; stumpage appraisals; and camage appraisals.

### FORESTRY

UPPER DIVISION COURSES-B.S. DEGREE

Fy. 220.—Introduction to Forestry. 2 lectures. 2 credits. NEWINS.

Elective for second year General College, Juniors and Seniors.

A basic course designed to acquaint the student with the various phases and fundamental underlying principles of the field of Forestry.

\*Fy. 0301.—Dendrology. 2 lectures, 4 hours laboratory. 4 credits. FRAZER. The botany of trees of the United States, silvical characterization, including general range and local occurrence, field identification.

<sup>\*</sup>Required of Juniors in Forestry.

\*Fy. 0302.—Forest Mensuration. 2 lectures, 4 hours laboratory. 4 credits. FRAZER.

Measurement of products and of logs; measurement of individual trees; measurement of stands of timber; measurement of growth.

\*Fy. 0306.—Forest Protection. 2 lectures. 2 credits. Frazer.

Relation of atmospheric conditions to forest protection. Protections from fires, mechanical injuries, detection and suppression.

\*Fy. 309.—Wood Technology and Timber Physics. 2 lectures, 4 hours laboratory. 4 credits. NEWINS.

Identification of commercial woods of the United States, especially those of Florida, by appearance, structure, use of microscope, hand lens, preparation of wood slides testing for mechanical properties of woods, effect of density on strength, etc.

\*Fy. 310.—Reforestation and Nursery Practice. 1 lecture, 5 hours laboratory. 3 credits. MILLER.

Cleaning, grading, germination tests, plantings in school nursery, cultivation and care of seellings.

\*Fy. 311.—Foundations of Silviculture. 1 lecture, 1 field. 2 credits. MILLER. Foundations of Silvics; theory; principles; primary and secondary factors of tree growth and distribution; seed collection and storage.

Fy. 0312-312.—Game Management. 1 lecture, 4 hours laboratory. 3 credits. MILLER.

Elective for Juniors and Seniors in the College of Agriculture.

The properties of game populations, including fish, birds and mammals; improvement of game range; methods of census; measurement and diagnosis of productivity; predator control; food cover types; and field studies in classification and identification.

Fy. 313-0313.—Farm Forestry. 1 lecture, 4 hours laboratory. 3 credits. FRAZER.

Elective for Juniors and Seniors in the College of Agriculture.

Elementary principles of handling a farm wood lot on a profitable basis, measurement of standing and felled timbers, preservation; growing and care of farm timber lands.

\*Fy. 316.—Introduction to Forest Pathology. 1 lecture, 4 hours laboratory. 3 credits. WEBER.

The aim of this course is to present a conception of (a) Plant Diseases and cause, (b) life cycles and role of fungi, and (c) their economic importance and control.

\*Fy. 318.—Forest Utilization and Products. 3 lectures. 3 credits. ZIEGLER. Rough forest products, poles, piling, logs, cross-ties, posts, pulp-wood, mine timbers, boxes and crates, cooperage, furniture and flooring, veneers and plywood, naval stores industry—field operations, turpentine still and products.

\*Fy. 320.—Silviculture. 1 lecture, 2 hours laboratory. 2 credits. MILLER. Practices of silviculture, methods of cutting to secure natural reproduction, their application, etc.

‡Fy. 407.—Forest Recreation and Landscape Forest. 4 hours laboratory. 2 credits. MILLER.

The student will get practical experience in designing of recreational areas, construction, use, care of, etc., of such areas.

†Fv. 409.—Forest Finance. 2 lectures. 2 credits. FRAZER.

Forests as investments, interest rates, carrying charges, maturity, relation of intermediate to final and net incomes, and forest insurance.

<sup>\*</sup>Required of Juniors in Forestry.

tElective for Juniors and Seniors in Forestry.

<sup>†</sup>Required of Seniors in Forestry.

†Fy. 410.—Forest History and Policy. 2 lectures. 2 credits. FRAZER.

Federal forest policy, development of U. S. Forest Service, Indian Forest Service, federal acquisition policy, timber production, silvicultural, watershed, recreational, grazing, wild life, and educational policies.

†Fy. 412.—Seminar. 1 hour. 1 credit. STAFF.

Round-table discussion of the trends, developments, problems, etc., that are found in forestry from time to time.

†Fy. 413.—Regional Silviculture. 3 lectures. 3 credits. MILLER. Study of silvicultural conditions of the different forest regions of the U. S. as to climate, soil and Biotic conditions; species; cultural; methods; and growing practices.

‡Fy. 414.—Wood Preservation and Seasoning. 2 lectures, 2 hours laboratory. 3 credits. NEWINS.

Decay, preservatives, treating plants and apparatus, methods and costs, objects treated and results, fire proofing, painting and finishing woods, conditioning of wood-storage, stacking, air seasoning, kiln drying, schedules.

†Fy. 416.—Forest Management Working Plans. 1 lecture, 6 hours field.

Application of principles of Forest Management in making working plans for specific forest areas, beginning with the school forest working plans; measures for sustained yield, increase or reduction of growing stock.

- †Fy. 417.—Forest Pathology. 1 lecture, 4 hours laboratory. 3 credits. WEBER. The purpose of Forest Pathology is to acquaint the students with the common and important forest tree diseases and wood rots found in Florida and the U.S.
  - †Fy. 418.—Logging and Lumbering. 3 lectures. 3 credits. MILLER.

Utilization of major forest products; logging engineering, transportation, equipment, costs, lumbering manufacture, plant, milling practice, merchandising products.

- †Fy. 419.—Principles of Forest Management. 3 lectures. 3 credits. ZIEGLER. Principles of forest management, forest organization, management plans, subdivisions of forest area, forest regulations, cutting cycle, normal forest, etc.
- 3 credits. †Fy. 420.—Forest Economics and Administration. 3 lectures. ZIEGLER.

A world survey of forest resources; land economics as applied to forestry; supply, demand, price trends and forest net income, forest taxation, public and private forest administration.

‡Fy. 421-0421.—Kiln Drying of Lumber. 1 lecture, 4 hours laboratory. 3 credits. NEWINS.

Principles and practices of the kiln drying of lumber, temperatures, moisture, etc.

#Fv. 422.—Methods of Research. 2 lectures. 2 credits. FRAZER.

Methods of research in the major field of forestry. Methods used by State and U. S. Forest

- ‡Fy. 423-0423.—Research Problems in Silviculture. To arrange. MILLER.
- ‡Fy. 425-0425.—Research Problems in Management. To arrange. 3 credits. FRAZER.
- ‡Fy. 0426-426.—Research Problems in Economics. To arrange. 3 credits. ZIEGLER.
- ‡Fy. 0428.—Research Problems in Utilization. To arrange. 3 credits. ZIEGLER.
  - 3 credits. NEWINS. Fy. 429.—Industrial Education Forestry. 3 lectures. Industrial Education students only.

Identification of woods, cell structure, seasoning, sap stains, etc.

<sup>†</sup>Required of Seniors in Forestry.

<sup>‡</sup>Elective for Juniors and Seniors in Forestry.

### FRENCH

CFh. 33-34.—The Reading of French. 3 hours a week throughout the year. 6 credits. BRUNET, WALLACE. (CFh. 33 is also offered in the second semester, and CFh. 34 in the first semester.) Open to first-year General College students of the superior group, to second-year General College students, and to Upper Division students. Prerequisite to advanced courses in French.

A beginning course, basic for further study. The main objective is the attainment of the maximum reading ability that can be developed in one year; grammar and pronunciation are subordinated. Reading of easy texts is begun at once.

Fh. 201-202.—Second-Year French. 3 hours a week throughout the year. 6 credits. BRUNET. (Fh. 201 is also offered in the second semester, and Fh. 202 in the first semester.) Prerequisite: One year of college French, or two years of high school French.

Second-year college French. Reading of modern texts; grammar review; translation of simple English into French.

Fh. 305.—Conversation and Composition. 3 hours. 3 credits. ATKIN. Prerequisite: Fh. 201-202 or permission of instructor.

Current vocabulary and phraseology of spoken French.

Fh. 306.—Conversation and Composition. 3 hours. 3 credits. ATKIN. A continuation of Fh. 305.

Fh. 307.—Survey of French Literature. 3 hours. 3 credits. ATKIN. Prerequisite: Fh. 201-202 or permission of instructor.

Historical outline; reading of representative selections from important prose writers and poets.

Fh. 308.—Survey of French Literature. 3 hours. 3 credits. ATKIN. A continuation of Fh. 307.

\*Fh. 403.—Nineteenth-Century French Literature (1800-1850). 3 hours. 3 credits. ATKIN. Prerequisite: Fh. 307-308 or permission of instructor.

Leading authors of the period studied in representative works; literary movements and tendencies.

\*Fh. 404.—Nineteenth-Century French Literature (1850-1900). 3 hours. 3 credits. ATKIN.

A continuation of Fh. 403.

\*Fh. 417.—French Phonetics. 3 hours. 3 credits. ATKIN. Prerequisite: Fh. 305-306 or permission of instructor.

Description of French speech sounds; practice in pronunciation.

\*Fh. 418.—Analysis of Texts. 3 hours. 3 credits. ATKIN. Prerequisite: Fh. 305-306 or permission of instructor,

Selected passages from contemporary French are analyzed in greater detail than is possible in more elementary courses, with reference to problems of vocabulary, syntax and idiom.

Fh. 420.—Contemporary French Civilization. 3 hours. 3 credits. ATKIN. Prerequisite: Fh. 307-308 or permission of instructor.

Land, people, institutions and culture of present-day France. Lectures, reading and reports. The course will be conducted in English, with reading in both French and English.

Fh. 427.—French-English Word Study. 3 hours. 3 credits. ATKIN. Prerequisite: Fh. 305-306 or permission of instructor.

The meanings of French and English words having similar written form in both languages—words imported into English from French and from Latin, or into French from English; comparison of such word pairs, showing how word meanings grow and are differentiated. Should be useful to students and teachers of either language. Previous knowledge of Latin not necessary, though desirable, Lectures and individual word study assignments.

<sup>\*</sup>Not offered 1938-39.

### CRADUATE COURSES

Fh. 505-506.—The French Novel

Fh. 507-508.—Special Study in French

Fh. 517-518.—Old French

Fh. 520. —Contemporary French Civilization

Fh. 527. —French-English Word Study

# **GEOLOGY**

Gy. 201.—Physical Geology. 3 hours, and 3 hours laboratory. 4 credits. Hubbell.

An introduction to geology. Longwell, Knopf and Flint, Textbook of Geology,  $Part\ I-Physical\ Geology$ .

Gy. 202.—Historical Geology. 3 hours, and 3 hours laboratory. 4 credits. Hubbell. Prerequisite: Gy. 201.

Introduction to the history of the earth and its inhabitants. Schuchert and Dunbar, Textbook of Geology, Part II—Historical Geology.

\*Gy. 204.—Physiography of North America. 3 hours, and 3 hours laboratory. 4 credits. Hubbell. Prerequisite: Gy. 201.

Surface features and physiographic regions of the North American continent; their structure, the processes which have formed them, and their stage of geographic development. Fenneman, Physiography of Western North America; Fenneman, Physiography of Eastern America; Fenneman, Physiographic Divisions of North America.

## GERMAN

CGn.-33-34.—The Reading of German. 3 hours a week throughout the year. 6 credits. JONES, HAUPTMANN. Open to General College students in the second year, to students of the superior group of the first year and to Upper Division students. Prerequisite to all other courses in German.

This course is designed to give students an opportunity to attain, without stressing formal grammar, a moderate proficiency in the reading of German. Texts: Schinnerer, Beginning German; Zeydel, A Graded German Reader; Fiedler and Sandbach, A First German Course for Science Students; Koischwitz, Bilderlesebuch.

Gn. 209-210.—Second-Year German. 3 hours. 6 credits. HAUPTMANN. Prerequisite: CGn.-33-34 or equivalent.

Continuation of CGn. 33-34. Study of Grammar, reading of modern texts, practice in conservation and comprehension. Texts: Evans and Roseler, College German; Kaufmann and Balduf, Inductive Readings in German (Book III); Freytag, Die Journalisten.

Gn. 303-304.—A survey of German Literature. 3 hours. 6 credits. JoNES. Prerequisite: Gn. 209-210.

Lectures on the chief literary currents and readings from the most important authors.

Gn. 325-326.—Scientific German. 3 hours. 6 credits. HAUPTMANN. Prerequisite: Gn. 209-210 or permission of instructor.

Reading of German science anthology for the first and selected readings in each student's chosen science the second semester. Texts: Wild, An Anthology of Scientific German; selections from scientific treatises.

Gn. 401-402.—Lessing, Goethe and Schiller in Translation. 3 hours. 6 credits. JONES and HAUPTMANN. Prerequisite: No knowledge of the German language is required. No language credit is allowed for this course.

Designed to afford an opportunity for a detailed study of the works of Lessing, Goethe and Schiller (in translation), together with the cultural background of the German Classical Period.

<sup>\*</sup>Not offered 1938-39.

Gn. 403-404.—Lessing, Schiller, Goethe in the Original. 3 hours. 6 credits. JONES, HAUPTMANN. Prerequisite: Gn. 209-210 or Gn. 303-304 or permission of instructor.

Designed to afford an opportunity for a detailed study of the works of the Classical authors (in the original), together with the cultural background of the period.

Gn. 501-502.—A Special Course in German for Advanced Students. 3 hours. 0 credits. JONES and HAUPTMANN. Open to graduate students, faculty members and seniors who are planning to do graduate work.

A special course for beginners who are primarily interested in meeting the reading requirements for advanced degrees. Texts: Schinnerer, Beginning German; Schinnerer, Continuing German; Cochran, A Practical German Review Grammar.

### GREEK

Gk. 21-22.—Beginners' Greek. 3 hours. 6 credits. Anderson.

Based on a book for beginners. Anabasis Book I with grammar and prose composition. Benner and Smyth, Beginner's Greek Book; Murray, Xenophon's Anabasis.

\*Gk. 101-102.—Xenophon and Plato. 3 hours. 6 credits. Anderson.

Xenophon's Anabasis; Books II, III, and IV. Plato's Apology and other Dialogues. Murray, Xenophon's Anabasis; Seymour, Plato's Apology and Creto.

\*Gk. 103-104.—Grammar and Prose Composition. 2 hours. 4 credits. Anderson. Prerequisite: Gk. 21-22. Corequisite: Gk. 101-102.

An intermediate course in prose composition. A systematic study of Greek grammar.

\*Gk. 201.—Lysias. 3 hours. 3 credits. Anderson. Prerequisite: Gk. 101-102. Selected orations of Lysias or other Attic orators.

\*Gk. 202.—Homer. 3 hours. 3 credits. Anderson. Prerequisite: Gk. 201. Selections from the Iliad and the Odyssey.

\*Gk. 203.—Biblical Greek. 3 hours. 3 credits. ANDERSON. Prerequisite: 6k. 101.

Selections from the Septuagint and New Testament. Conybeare and Stock, Selections from the Septuagint; Hort, St. Mark.

\*Gk. 301.—Herodotus and Thucydides. 3 hours. 3 credits. Anderson. Prerequisite: Gk. 201-202.

Selections from the Greek historians.

\*Gk. 302.—Euripides and Sophocles. 3 hours. 3 credits. ANDERSON. Prerequisite: Gk. 301.

Selections from the Greek dramatists.

### GRADUATE COURSES

Gk. 501-502.—Homer—Iliad and Odyssey

Gk. 503-504.—Historians (Herodotus and Thucvdides)

# HEALTH AND PHYSICAL EDUCATION

HPl. 261.—Football. 3 hours. 3 credits. MCALLISTER.

A consideration of football from the viewpoint of the interscholastic coach, presenting fundamentals in blocking, tackling, kicking, passing, individual position play, appropriate offensive formations and plays, and various defensive formations.

HPl. 263.—Basketball. 3 hours. 3 credits. MCALLISTER.

Fundamentals of basketball for men; dealing with the techniques of shooting, passing, dribbling, stops, and guarding. A consideration of offensive team play, defensive team play, signals, scouting, team strategy, training, practice sessions, selection and placing of players, and other essentials of the modern court game.

<sup>\*</sup>Not offered 1938-39.

HPl. 264.—Track and Field. 1 hour, and 2 hours laboratory. 2 credits. BEARD.

Theory and practice of the standard track and field events.

HPl. 266.—Baseball. 1 hour, and 2 hours laboratory. 2 credits. MC-ALLISTER.

A complete discussion of the rules and a study of the fundamentals as applied to each department of the game.

HPl. 353.—Practice in Conducting an Intramural Program. 2 hours laboratory. 1 credit. SALT.

A laboratory course in which the student is assigned weekly duties by the instructor.

HPl. 361-362.—Physical Education in Schools. 6 hours. 12 credits. SALT. An analysis of the elementary and secondary school physical education program, with emphasis

An analysis of the elementary and secondary school physical education program, with emphasis upon methods of instruction and appropriate procedures necessary to the conduct of such a program.

HPl. 462.—Community Recreation. 6 hours laboratory. 3 credits. SALT.

A laboratory course in which the student is assigned weekly duties on a community play-ground under supervision.

HPl. 463.—Recreational Crafts. 2 hours. 2 credits. Bohannon.

Theory and practice in craftsmanship, including metal, leather, and woodwork. It also covers phases of weaving and the art of making objects that are related to play and life in the open.

### HISTORY

In all the courses offered in this department political, economic, social, religious and cultural aspects are given consideration. Prerequisites: C-1 or Hy. 313-314 (formerly Hy. 101-102) or equivalent.

CHy. 13.—History of the Modern World. 4 hours. 4 credits. Offered each semester. Prerequisite: C-1. Designed for General College students. Prerequisite to advanced courses in History for students entering from the General College.

The historical background of present day civilization is considered insofar as that background has been developed in the fabric of the historical movements since 1815. The political, economic, social, religious, artistic, and cultural aspects of the nineteenth and twentieth centuries are studied.

\*Hy. 301-302.—American History, 1492-1830. 3 hours. 6 credits. LEAKE.

Hy. 303-304.—American History, 1830 to the Present. 3 hours. 6 credits. Leake.

Hy. 305-306.—English History to 1688. 3 hours. 6 credits. PAYNE.

From early times to the Revolution of 1688.

\*Hy. 307-308.—The Renaissance and the Reformation. 3 hours. 6 credits. Leake.

The causes, historical background, and developments of the Renaissance and Reformation.

Hy. 309-310.—The French Revolution and the Napoleonic Era (Formerly Hy. 209-210). 3 hours. 6 credits. Leake.

The period of the French Revolution and the era leading up to it and the Napoleonic period, 1763 to 1815.

\*Hy. 311-312.—English History, 1688 to the Present. 3 hours. 6 credits. PAYNE.

From the Revolution of 1688 to the present.

Hy. 313-314.—Europe During the Middle Ages (Formerly Hy. 101-102). Shours. 6 credits. GLUNT.

The history of Western Europe from 476 A.D. to the Renaissance and Reformation. This course is a prerequisite for other history courses for students who do not enter the Upper Division from the General College.

<sup>\*</sup>Not offered in 1938-39.

\*Hy. 315-316.—Latin American History to 1850 (Formerly Hy. 203-204). 3 hours. 6 credits. GLUNT.

First semester: The discovery, settlement, and early development of South and Central America. Second semester: The discovery, settlement, and early development of Latin America, to 1850.

Hy. 317-318.—Latin American History, 1850 to the Present (Formerly Hy. 205-206). 3 hours. 6 credits. GLUNT.

Hy. 401-402.—Ancient Civilizations. 3 hours. 6 credits. PAYNE. Egyptian, Assyrian, Babylonian, Persian, Semitic, Hellenic, and Roman peoples.

Hy. 403-404.—History of Europe, 1648-1789, from Treaty of Westphalia to the French Revolution. 3 hours. 6 credits. PAYNE.

### GRADUATE COURSES

\*Hy. 501-502.—American History, 1492 to 1830

Hy. 503-504.—American History, 1830 to the Present

Hy. 505-506.—English History to 1688

\*Hy. 507-508.—The Renaissance and the Reformation

Hy. 509-510.—Seminar in American History

\*Hy. 511-512.—English History, 1688 to the Present

\*Hy. 515-516.—Latin American History to 1850

Hy. 517-518.—Latin American History, 1850 to the Present

Hy. 601-602.—Ancient Civilizations

Hy. 603-604.—Europe, 1648 to 1789

Hy. 609-610.—French Revolution and Napoleon

### HORTICULTURE

He. 310.—Pruning and Tree Surgery. 2 hours, and 2 hours laboratory. 3 credits. FLOYD.

Principles of pruning and training; the physiological principles involved; practice in pruning and training fruit and ornamental plants.

He. 311.—Floriculture. 2 hours, and 2 hours laboratory. 3 credits. FLOYD.

The growing of flowers upon the home grounds; pot plants; greenhouse crops and their cultural requirements, including ventilation, watering and heating.

He. 312.—Olericulture (Formerly He. 206). 2 hours, and 2 hours laboratory. 3 credits. Abbott.

Origin, relationship and classification of truck crops; varieties, cultural methods, fertilizing, irrigating, harvesting. Planning the home garden.

A two-day trip will be required; probable cost \$10.

He. 0314.—Principles of Fruit Production. 3 hours. 3 credits. Abbott. Prerequisite: Cy. 101-102.

Principles underlying fruit production, such as water relations, nutrition, temperature, fruit setting, and geographic influences.

He. 315-316.—Citrus Culture.\*\* 2 hours, and 2 hours laboratory. 6 credits. Abbott.

Origin and distribution; climatic adaptations; site and soil selection; preparation, planting and management; selection of varieties and stocks; irrigation and cultural practices; the use of cover crops.

A three-day trip is required each semester; approximate cost of each trip \$12-paid at the time trip is made.

<sup>\*</sup>Not offered in 1933-39.

<sup>\*\*</sup>The first semester course is a prerequisite to the second semester, but may be taken for credit without registering for work the second semester.

He. 317.—Plant Propagation. 2 hours, and 2 hours laboratory. 3 credits. Abbott.

Common practices in the propagation of orchard and garden crops and the relationship of these to physiological and economic factors.

He. 412.—Deciduous Fruits. 3 hours. 3 credits. FLOYD.

Varieties of persimmons, grapes, plums, peaches, pears, and other deciduous fruits; cultural methods, fertilization, and harvesting as adapted to Florida conditions.

He. 413.—Subtropical Fruits. 3 hours. 3 credits. Abbott.

Study of the principal varieties, best cultural methods, and harvesting of the avocado, mango, guava, and other subtropical fruits grown in Florida.

He. 414.—Advanced Citrus Culture. 2 hours, and 2 hours laboratory. 3 credits. Abbott. Prerequisite: He. 315.

An advanced course emphasizing the problems offered by varying sites, soils, climates, stocks, and varieties.

He. 415.—Plant Materials (Formerly He. 304). 1 hour, and 4 hours laboratory. 3 credits. FLOYD. Suggested prerequisite: Bty. 304.

Trees, shrubs and herbaceous plants suited to Florida conditions; their characteristics; land-scape value and arrangement; field trips; planting plans.

He. 416.—Systematic Pomology. 3 hours. 3 credits. Abbott. Suggested prerequisites: He. 315, 412, 413.

Principal species and types of cultivated fruits; their origin, history, and classification; their relationships and adaptations.

### GRADUATE COURSES

He. 503-504.-Horticulture Seminar

He. 505-506.—Horticultural Problems

He. 507-508.—Research Work

He. 509-510.—Special Problems in Refrigeration of Fruits

\*He. 511-512.—Research in Vegetable Production

# INDUSTRIAL ARTS EDUCATION

(See Industrial Arts Curriculum for complete offering in the field of concentration.)

In. 111.—Industrial Arts Mechanical Drawing. 6 hours lecture-laboratory. 3 credits. Bohannon.

Freehand sketching, lettering, orthographic projection, geometric construction, working drawings and blue printing, care and use of instruments. Given in units such that students may be able, in turn, to teach it.

In. 112.—Industrial Arts Mechanical Drawing. 6 hours lecture-laboratory. 3 credits. Bohannon. Prerequisite: In. 111.

Perspective rendering, tracings and blue prints for a small building; different types of letters, machine sketching, and conventions. Suggestions and plans as to the most effective way of teaching a course of this type.

In. 211.—Industrial Arts General Shop. 6 hours lecture-laboratory. 3 credits. Bohannon.

Practice in use of hand tools commonly found in school shops; types of joints, design, wood-finishing; block-printing. Analysis of logical teaching units in projects and problems in the various phases of industrial arts.

<sup>\*</sup>Not offered in 1938-39.

In. 212.—Industrial Arts General Shop. 6 hours lecture-laboratory. 3 credits. BOHANNON. Prerequisite: In. 211.

Use of hand-tools and power-machines, with special emphasis on the speed-lathe; use, parts, and care of machines; shop equipment and construction. In addition to the development of manipulative skills, special emphasis is given to selecting projects, and writing the various types of instruction sheets.

In. 301.—Design and Construction in Sheet Metal. 6 hours lecture-laboratory. 3 credits. BOHANNON and PAUSTIAN. Prerequisite: In. 111-112.

Scope of sheet-metal, various methods of drafting and construction, shop arrangements and equipment, methods of motivation for secondary school students in this phase of work.

In. 302.—General Shop. 6 hours lecture-laboratory. 3 credits. Bohannon. Prerequisites: In. 111, 211, 301.

Units given in machine drawing; bench woodwork, advanced cabinet work, concrete work, sheet metal; in addition, several craft activities presented.

In. 401.—Architectural Drawing for Industrial Arts Teachers. 6 hours lecturelaboratory. 3 credits. Lockwood. Prerequisite: In. 111-112.

A study is made of building materials, sources and prices; landscaping as to orientation; plans, elevations, sections, details, conventions; types and styles of domestic architecture, and a review of the history of architecture.

In. 402.—Methods and Organization. 3 hours. 3 credits. BOHANNON.

Organization and presentation of industrial arts material for the various grades and schools; planning courses of study, selecting and installing equipment, selecting, ordering and caring for supplies; study of aims and objectives of industrial arts programs.

In. 404.—Gasoline Motors. 4 hours lecture-laboratory. 3 credits. ROGERS. A general understanding of the various types of gasoline motors. Lecture and laboratory work on the theories and practical phases of engines; fuel systems, carburation, ignition; starting and generating systems.

## INDUSTRIAL ENGINEERING

Ig. 260.—Summer Shop Course in which 12 weeks' summer work may be offered for three hours electives. 3 credits.

Ig. 261-262.—Introduction to Engineering. 1 hour. 2 credits. WEIL and STAFF.

An introductory study of the engineering profession, its history, development, vocabulary, nomenclature, and chief ideals. This course is given to assist the student in the choice of the particular field of engineering which he proposes to elect as his field of concentration, and to give the elementary language of the profession. Williams, Building an Engineering Career.

Ig. 377.—Elements of Photography. 1 hour, and 3 hours laboratory. 2 credits. PHELPS.

The box camera, exposures, films, paper, developing and printing, pictorial report, lighting, enlarging, copying, lantern slides, and dark-room procedure.

Ig. 378.—Principles of Photography. 1 hour, and 3 hours laboratory. 2 credits. PHELPS. Prerequisite: Ig. 377.

Types of cameras, lenses, mounts, shutters, exposures, stops, films and filters, composition, lighting, trimming and mounting, development, reducers, intensifiers, tones, retouching, etching, stocks and storage and operation and use of dark-rooms.

Ig. 460.—Engineering Practice. 3 hours. 3 credits. Weil, Phelps. Prerequisite: Senior rating in engineering.

Projects selected from the general fields of engineering are solved by the student. His solutions are compared with those actually obtained by the practicing professional engineer. The course involves the principles of design, selection and use of engineering apparatus, plants and systems; engineering finance as applied to public utilities; legal factors as applied to engineering practice; the relations of engineering and the public; engineering ethics. Harding and Confield, Legal and Ethical Phases of Engineering.

Ig. 463.—Specifications and Engineering Relations. 2 hours. 2 credits. REED. Prerequisite: Ml. 382.

Specifications for materials and construction of engineering projects; advertising and letting contracts; agreements and contractual relations. Mead, Contracts, Specifications, and Engineering Relations.

Ig. 469-470.—Plant, Shop, Layout, and Design. 2 hours, and 2 hours laboratory. 6 credits, PHELPS. Prerequisites: CEs. 13, El. 342, Ml. 382.

An intensive study of some industry; its layout, design, machinery, operations, and product. Alford, Management's Handbook.

Ig. 472.—Human Engineering. 2 hours. 2 credits. YEATON. Prerequisite: Ig. 463.

Problems of production engineering and management. The human factors in industry. Tead, Human Nature and Management.

Ig. 477.—Advanced Photography. 1 hour, and 3 hours laboratory. 2 credits. PHELPS. Prerequisite: Ig. 378. Supplementary courses: Ps. 206, Cy. 462.

Theory and operation of moving picture cameras and projectors, types of film, development, titling and editing; photo-engraving; color photography and color separation; preparation of slides and film strips; projects.

Ig. 478.—Professional Photography. 1 hour, and 3 hours laboratory. 2 credits. PHELPS. Prerequisite: Ig. 477.

Selection of lenses, patterns, formulas, and combinations; shutters, location, timing and use; filters, addition and subtraction of color values, combinations, fractional exposures; professional film and paper, density vs. contrast; aerial photography and photogrammetry; cathode tube and high speed photography; photo-micrography; interpretation of photographs.

Ig. 479.—Honors Course. Variable credit. STAFF.

### GRADUATE COURSES

Ig. 661-662.—Advanced Shop Layout and Design Ig. 663-664.—Management Training

### JOURNALISM

Jm. 213.—Public Opinion. 3 hours. 3 credits. EMIG.

A study of newspapers, magazines, the radio, and movies designed to develop a clear understanding of the forces that create and control propaganda and public action. Observance of history in the making, the management and moulding of public thought, the attitudinizing of people, the strategy of the propagandist and symbol-makers in their use of such idea-transmitting agencies as the newspaper, magazine, radio, movies, home, school, church, political parties, groups, recreation, etc. An inquiry into the influences of propaganda on government, war, peace, business, education, law-making, and morality.

### Jm. 214.—Introduction to Journalism. 3 hours. 3 credits. EMIG.

A survey designed to acquaint the student with possible opportunities for a career in such phases of journalism as the newspaper, magazine, movies, and radio, and to familiarize him with the qualifications requisite for the various types of work.

A study of the publishing field, the daily and weekly newspaper, news agencies, press associations, syndicates, free-lancing, advertising, circulation, reporting, political writing, foreign correspondence, etc.; the business and agricultural press; magazines; trade publications; the movies; and the radio.

Jm. 215.—History of American Journalism. 3 hours. 3 credits. EMIG.

The origin and development of newspapers and magazines in the United States, with emphasis on the great journalistic personalities, the problems they encountered, their method of meeting those problems, and their contributions to the nation.

A study of the press, and its editorial leaders and tendencies, from the beginning in England to the present day.

## Jm. 216.—Principles of Journalism. 3 hours. 3 credits. LOWRY.

A consideration of the newspaper producer, the newspaper, and the newspaper reader, and their relationships to publishing. A study of the producer and what he must supply for the reader; of the newspaper and its contents as a product supplied for reader-consumption; and of the reader, his interests in and demands for a journalistic product. Methods, principles, and ethics involved in the preparation of a publication for presentation to the public.

# Jm. 301-302.—Advanced News Writing and Editing. 4 hours. 8 credits. Lowry.

Writing and editing news of local, state, national and international affairs, such as the courts, city hall, police station, county buildings, government, politics, labor, business, finance, science, accidents, sports, reviews, etc.

Actual writing and editing for local purposes and laboratory newspaper.

Jm. 314.—Magazine and Special Article Writing. 3 hours. 3 credits. LOWRY. The preparation of special articles for publication in newspapers and magazines.

# Jm. 317.—Business and Mechanics of Publishing. 3 hours. 3 credits. LOWRY.

The first half of the course consists of study and integration of problems found in editorial management of small publications, touching upon such items as: the field, the policy, collection of news, news writing, county correspondence, farm news, and other types. During the second half of the semester the course deals entirely with printing materials and processes, instruction and practice in newspaper page layout, use of type devices, and recognition and use of various type faces, not in order to turn out printers but rather better newspaper workers.

# Jm. 318.—Newspaper Management. 3 hours. 3 credits. LOWRY.

Designed to develop a clear understanding of the business office of weekly and small daily newspapers and to provide a comprehensive study of retail advertising and instruction in ad layout. The course takes up problems encountered in starting a newspaper; advertising principles, psychology, types, purposes, rates, values, layouts; circulation principles, practice, and promotion; simple systems of bookkeeping and accounting; commercial printing; plant design; industrial relations; and office management and correspondence.

# Jm. 405-406.—Radio News Writing. 1 hour. 2 credits. EMIG. Prerequisite or corequisite: Speech 311.

A study of the technique of preparing news material for regular presentation over WRUF. Instruction in preparing news articles, commentations, and advertising for radio presentation.

Designed for (1) students who plan a journalistic career in radio, (2) students who plan a career in business or public service and desire to supplement other courses with a study of the radio medium, (3) students majoring in journalism who desire more knowledge of the radio phase of journalism, and (4) other students seeking a general knowledge and appreciation of the radio as an idea-distributing agency and social force.

### Jm. 407.—Editorial Writing and Management. 3 hours. 3 credits. EMIG.

Development of the editorial as a literary form; great editorial leaders and masterpieces; editorial thinking, technique, and appeals; analysis of editorial policies; problems of editorial management. Writing of editorials based on current situations.

### Jm. 408.—Advanced Public Opinion. 3 hours. 3 credits. EMIG.

Research dealing with the power and influence of public opinion in modern life with respect to government, politics, education, business, etc.; the technique and strategy of public opinion directors; methods of measuring public opinion; current trends of public opinion.

Non-technical: designed for students in the social sciences as well as journalism majors.

### Jm. 409.—Law of the Press. 3 hours. 3 credits. LOWRY.

Detailed study of such topics as: law courts and legal procedure, libel, contempt of court, right of privacy, constitutional guarantees of freedom of the press, state statutes governing the press, copyright, rights and duties of news-gathering agencies, contracts as applied to the news-paper, and official and legal advertising as a foundation for proper handling of court assignments and successful editorial and business management of the modern newspaper with special attention being devoted to Florida press law.

Jm. 410.—World Journalism. 2 hours. 2 credits. EMIG. Prerequisite: Senior standing, and consent of instructor.

A cultural study of contemporary newspapers as they operate on the broad stage of international affairs, of the processes and influences involved in reporting news of the world, and the viewpoints of people of other countries as revealed in the contents of newspapers. Foreign, non-technical, as well as American newspapers will be studied.

Jm. 411.—Public Relations. 3 hours. 3 credits. EMIG.

Principles, methods, and means of reaching and influencing the public in selling ideas or products. Investigating, planning, producing, and placing in preparing a campaign. Study of the media, newspapers, magazines, radio, movies, pamphlets, leaders, groups, etc.; the public to be reached, market analysis; technique, involving space, type, engraving, costs, radio medium, time, program, etc.; coordination of efforts. Public relations programs will be prepared.

Non-technical: designed for students in the social sciences as well as for journalism majors,

Jm. 412.—Contemporary Journalistic Thought. 3 hours. 3 credits. EMIG. Salient professional problems encountered in the administration of journalistic publications. Problems of human integration, such as practical, legislative, economic, political, educational, with which journalism must concern itself. Integration of knowledge of other fields of learning, and an attempt to focus this integration on current journalistic situations.

Non-technical: designed for students of the social sciences as well as for journalism majors.

### GRADUATE COURSES

Jm. 503-504.—Special Studies in Newspaper Production Jm. 505-506.—Special Studies in Public Opinion

### LATIN

Ln. 21-22.—Beginner's Latin. 3 hours. 6 credits. Based on a book for beginners. Horn, First Latin Lessons.

Ln. 31-32.—Caesar. 3 hours. 6 credits. Prerequisite: Ln. 21-22. Grammar and prose composition. Sanford and Scott, Junior Latin Reader.

Ln. 41-42.—Cicero and Virgil. 3 hours. 6 credits. Prerequisite: Ln. 31-32. Grammar and prose composition. Allen and Greenough, Cicero and Virgil.

Ln. 101.—Ovid. 3 hours. 3 credits. Anderson. Prerequisite: Ln. 41-42 or equivalent.

Selections; review of grammar; prose composition; prosody. Anderson, Selections from Ovid.

Ln. 102.—Cicero or Livy. 3 hours. 3 credits. Anderson. Prerequisite: Ln. 101.

Cicero's De Senectute and De Amicitia, or selections from Livy. Shuckburgh, Cicero—De Senectute; Shuckburgh, Laelius.

Ln. 201.—Pliny's Letters. 3 hours. 3 credits. Anderson. Prerequisite: Ln. 101-102 or equivalent.

Selections from Pliny's letters. Westcott, Pliny's Letters.

Ln. 202.—Horace. 3 hours. 3 credits. ANDERSON. Prerequisite: Ln. 201 or equivalent.

Selections from the satires, epistles, odes, and epodes, with a study of the Horation metres. Bennett and Rolfe, *Horace's Complete Works*.

\*Ln. 203-204.—Grammar and Prose Composition. 2 hours. 4 credits. Anderson. Prerequisite: Ln. 41-42 or equivalent. Corequisite: Ln. 101 or Ln. 201.

An intermediate course in prose composition in connection with a systematic study of Latin grammar.

<sup>\*</sup>Not offered in 1938-39.

Ln. 301.—Juvenal and Tacitus. 3 hours. 3 credits. Anderson. Prerequisite: Ln. 201, Ln. 202 or equivalent.

Selection from the satires of Juvenal and from Histories or Annals of Tacitus. Wright, Juvenal; Davies, Tacitus, Histories (Book I).

Ln. 302.—The Elegy. 3 hours. 3 credits. Anderson. Prerequisites: Ln. 201, Ln. 202 or equivalent.

Selections from Catullus, Tibullus, Propertius, and Ovid. Harrington, The Roman Elegiac Poets.

\*Ln. 303-304.—Advanced Prose Composition. 2 hours. 4 credits. Anderson. Prerequisite: Ln. 203-204 or equivalent. Corequisite: Some advanced course in Latin.

A continuation of Ln. 203-204, open only to those students who have completed Ln. 203-204 or equivalent.

\*Ln. 401.—Plautus. 3 hours. 3 credits. Anderson. Prerequisites: Ln. 301, Ln. 302 or equivalent.

Selected Comedies. Morris, Plautus-Captives and Trinummus.

\*Ln. 402.—Terence and Seneca. 3 hours. 3 credits. ANDERSON. Prerequisite: Ln. 401 or equivalent.

Selected plays.

### GRADUATE COURSES

Ln. 501-502.—Cicero and the Ciceronian Age

Ln. 505.—Virgil

Ln. 0507.—Ovid

Ln. 508.—The Roman Satire

### LAW

Lw. 301.—Torts. 5 hours. 5 credits. Trusler.

History, definitions, and elements of torts; particular torts. Burdick on Torts; Burdick, Cases on Torts, fourth edition.

Lw. 302.—Equity Jurisprudence. 5 hours. 5 credits. Trusler.

Jurisdiction; principles of adjudication; fraud, accident, and mistake; remedies—injunctions, specific performance, interpleader, bills quia timet. Keigwin, Cases in Equity Jurisprudence.

Lw. 303.—Contracts. 3 hours. 3 credits. TE SELLE.

Formation; consideration; object; operation, assignments. Costigan, Cases on Contracts, third edition.

Lw. 304.—Contracts. 3 hours. 3 credits. TE Selle. Prerequisite: Lw. 303. Third party beneficiaries; joint obligations; interpretation of contract; rules relating to evidence and construction; discharge of contract. Costigan, Cases on Contracts, third edition.

Lw. 305.—Criminal Law and Procedure. 4 hours. 4 credits. Cockrell.

Sources of criminal law; nature and elements of crime; particular crimes. Jurisdiction; arrest; preliminary examination and bail; grand jury; arraignment, pleas, and motions; nolle prosequi and motions to quash; jeopardy; verdict; new trial; arrest of judgment; judgment, sentence, and execution. Mikell, Cases on Criminal Law and Procedure, third edition.

Lw. 306.-Marriage and Divorce. 1 hour. 1 credit. Cockrell.

Marriage; nature of the relation; capacity of parties; annulment; divorce; alimony; effect on property rights; custody and support of children; agreements of separation. Vernier, Cases on Marriage and Divorce.

Lw. 308.—Common Law Pleading. 3 hours. 3 credits. Crandall.

Development of the personal actions at common law; theory of pleading and its peculiar features; demurrers; pleas; replication de injuria; duplicity; departure; new assignment; motions based on pleadings; general rules of pleadings. Keigwin, Cases on Common Law Pleading, second edition,

<sup>\*</sup>Not offered in 1938-39.

# Lw. 309.-Property. 2 hours. 2 credits. CRANDALL.

Personal property; possession and rights based thereon; acquisition of title; liens and pledges; conversion. Warren, Cases on Property.

# Lw. 312.—Property. 2 hours. 2 credits. DAY.

Introduction to the law of conveyancing; rights incident to ownership of land and estates therein, including the land itself, air, water, fixtures, emblements, waste; profits; easements; licenses; covenants running with the land. Warren, Cases on Property; Day, Outline on Property.

# Lw. 401.—United States Constitutional Law. 4 hours. 4 credits. SLAGLE.

Distribution of powers; civil rights; impairment of contractual obligations; due process; equal protection; and interstate commerce. Hall, Cases on Constitutional Law.

# Lw. 402.—Evidence. 4 hours. 4 credits. Cockrell.

Judicial notice; kinds of evidence; burden of proof; presumption of law and fact; judge and jury; best evidence rule; hearsay rule and its exception; admissions; confessions; exclusions based on public policy and privilege; corroboration; parol evidence rule; witnesses; attendance in court; examination, cross examination, privilege; public documents. Greenleaf on Evidence, sixteenth edition, Volume I; selected cases.

# Lw. 0403.—Agency. 2 hours. 2 credits. Cockrell.

Nature, creation of the relation; rights and duties of agents; termination, nature, extent, construction, and execution of authority of agents; rights, duties, and liabilities of agents; principal and third persons inter se; particular classes of agents. Mechem, Cases on Agency, second edition.

# Lw. 0404.—Quasi Contracts. 2 hours. 2 credits. CRANDALL.

Origin and nature of quasi contract; benefits conferred in misreliance on rights or duty, from mistake of law, and on invalid, unenforceable, illegal, or impossible contract; benefits conferred through dutiful intervention in another's affairs; benefits conferred under constraint; action for restitution. Woodruff, Cases on Quasi Contracts, third edition.

# Lw. 405.—Equity Pleading. 3 hours. 3 credits. TE SELLE.

Pleading in equity; parties to, proceedings in a suit in equity; bills in equity; disclaimer; demurrers and pleas; answer and replication; preparation of bills, demurrers, pleas, answers. Keigwin, Cases in Equity Pleading, second edition; Rules of the Circuit Court in Chancery in Florida; Rules of the Federal Court; Statutes of Florida.

# Lw. 406.—Private Corporations. 4 hours. 4 credits. SLAGLE.

Creation and citizenship; powers and liabilities; corporations and the state; foreign corporations; practice in forming and conducting corporations, preparing by-laws, electing officers, and in conducting corporate business. Clark on Private Corporations; Canfield and Wormser, Cases on Corporations, third edition.

### Lw. 408.—Legal Ethics and Bibliography. 3 hours. 2 credits. DAY.

Organization of the bar; attorneys and professional conduct; the classes of law books; the location and use of decisions and statutes; the trial brief; the brief on appeal. Arant, Cases on Legal Ethics; Eldean, How to Find the Law, second edition.

## Lw. 409.—Property. 3 hours. 3 credits. DAY.

Titles and conveyancing; the execution of deeds; estates created; covenants for titles; estoppel by deed; priorities among titles. Warren, Cases on Conveyances.

### Lw. 410.—Property. 3 hours. 3 credits. CRANDALL.

Wills; testamentary capacity; revocation; probate; administration of estates. Warren, Cases on Wills. Florida Probate Act.

# Lw. 411.-Florida Constitutional Law. 2 hours. 2 credits. Trusler.

Constitutional guarantees; departments of government; homesteads and exemptions; married women's property. Constitution, Statutes, and Judicial Decisions of Florida.

# Lw. 413.—Florida Civil Practice. 3 hours. 3 credits. Cockrell.

Organization of courts; parties; joinder and consolidation of actions; issuance, service, and return of process; appearance; trial; verdict; proceedings after verdict; appellate proceedings; peculiar characteristics of the common law actions; special proceedings. Crandall, Florida Common Law Practice.

# \*Lw. 415.—Abstracts. 2 hours. 2 credits. DAY. Prerequisite: Lw. 312.

Interpretation of maps and plotting of lots described by metes and bounds; the formal requisites of conveyances in use in Florida; deeds executed by public and judicial officers; liens and contracts for the sale of lands. Florida Statutes and selected Florida cases.

## Lw. 416.—Insurance. 2 hours. 2 credits. TE SELLE.

Theory, significance; insurable interest; concealment, representations, warranties; subrogation; waiver and estoppel; assignees, beneficiaries; creditors. Vance, Cases on Insurance, second edition.

### Lw. 417.—Sales. 2 hours. 2 credits. DAY.

Sale and contract to sell; statute of frauds; illegality; conditions and warranties; delivery; acceptance and receipt; vendor's lien; stoppage in transitu; bills of lading; remedies of seller and buyer. Vold on Sales.

### Lw. 418.—Taxation. 3 hours. 3 credits. CRANDALL.

Legitimate purposes of taxation; the so-called property tax and tax administration; excise taxes; estate and inheritance taxes; income taxes. Magill and Maguire, Cases on the Law of Taxation, second edition.

# Lw. 502.—Damages. 2 hours. 2 credits. TRUSLER.

General principles; sorts; measure in contract and tort actions; avoidable consequences; value; interest; death by wrongful act. Trusler, Florida Cases on Damages.

### Lw. 503.—Public Utilities. 2 hours. 2 credits. SLAGLE.

Nature of public utilities; common carriers; telegraphs and telephones; light, water and gas companies; inns; warehouses; elevators; stockyards; public control; rights and obligations at common law and under federal and state statutes. Welch, Cases on Public Utility Regulation, second edition.

## Lw. 0504.—Municipal Corporations. 2 hours. 2 credits. CRANDALL.

Nature of; creation; control; nature of ordinances; powers; legislative and administrative procedure; home rule; initiative, referendum, recall; officers; merit system; remedies; torts. Seasongood, Cases on Municipal Corporations.

## Lw. 505.—Federal Procedure. 2 hours. 2 credits. SLAGLE.

System of courts created under authority of the United States, jurisdiction and procedure therein, removal of cases from state courts; substantive law applied by federal courts; appellate jurisdiction. Dobie, Cases on Federal Procedure.

# Lw. 506 .- Negotiable Instruments. 3 hours. 3 credits. DAY.

Law merchant; definitions and general doctrines; contracts of the maker, acceptor, etc.; proceedings before and after dishonor of negotiable instruments; absolute defenses; equities; payments; conflict of laws. Britton, Cases on Bills and Notes, second edition.

# Lw. 508.—Conflict of Laws. 3 hours. 3 credits. SLAGLE.

Jurisdiction; sources of law and comity; remedies, rights of action, procedure; rights; inheritance; obligations ex delicto and ex contractu; personal relations; property inheritance; administration of estates; judgments and obligations. Lorenzen, Cases on Conflict of Laws, second edition.

### Lw. 509.—Partnership. 2 hours. 2 credits. DAY.

Creation, nature, characteristics of a partnership; partner's interest, liability; powers, rights, duties; rights and remedies of creditors; termination of partnership. Mechem, Cases on Partnership, Matthews' Revision.

### Lw. 513.—Property. 3 hours. 3 credits. CRANDALL.

Conditional estates; licenses and waivers; reversions and remainders; rule in Shelley's Case, future uses; future interests; executory devises and bequests; vesting of legacies. Kales, Cases on Future Interests, second edition.

### Lw. 0515.-Mortgages. 2 hours. 2 credits. Cockrell.

Nature; elements; discharge; assignment; redemption; foreclosure; injunction and account; extent of the lien; priority between mortgage liens and competing claims; equity of redemption. Keigwin, Cases on Mortgages.

# Lw. 516.—Practice Court. 6 hours laboratory. 1 credit. TE SELLE, DAY.

Preparation of pleadings and trials of civil and equity cases.

<sup>\*</sup>Not offered in 1938-39; offered alternate years.

Lw. 517.—Practice Court. 3 hours laboratory. 1 credit. COCKRELL. Preparation of indictments and informations, and trial of criminal cases.

Lw. 519.—Trial Practice. 3 hours. 3 credits. TE SELLE.

Jurisdiction; process; the jury; instructions; trials; verdicts; judgments; new trials; bills of exceptions; appellate proceedings. McBaine, Cases on Trial Practice.

Lw. 520.—Creditors' Rights. 3 hours. 3 credits. TE SELLE.

Remedies of the unsecured creditor; fraudulent conveyances; creditors' agreements; general assignment for benefit of creditors; equity and statutory receiverships; bankruptcy. Casebook to be selected.

Lw. 521.-Trusts. 2 hours. 2 credits. DAY.

The Anglo-American system of uses and trusts; creation, transfer, extinguishment of trust interests; priorities between competing equities; construction of trust dispositions. *Bogert on Trusts*; selected cases.

Lw. 522.—Admiralty. 2 hours. 2 credits. SLAGLE.

Jurisdiction; contracts; torts, crimes; maritime liens, ex contractu, ex delicto, priorities, discharge; bottomry and respondentia obligations; salvage; towage; general average. Lord and Sprague, Cases on Admiralty.

\*Lw. 524.—Corporation Finance. 3 hours. 3 credits. HURST.

Nature of corporate contract; titular and non-titular management; determination of capital and surplus; common stock; dividends; preferred stock; bonds; investment banking. Berle, Law of Corporation Finance.

Lw. 601.—Legal Research. Private Research. 1 to 3 credits. Prerequisite: Juniors: 1.5 honor point average; Seniors: 1.0 honor point average.

Mature investigation of special problems in substantive or adjective law, jurisprudence or legal history, under the supervision of a member or members of the faculty.

Lw. 602.—Legal Research. Private Research. 1 to 3 credits. Prerequisite: Juniors: 1.5 honor point average; Seniors: 1.0 honor point average.

Mature investigation of special problems in substantive or adjective law, jurisprudence or legal history, under the supervision of a member or members of the faculty.

## **MATHEMATICS**

C-42.—General Mathematics. 4 or more hours per week during one semester. 4 credits. Offered each semester. Designed for General College students.

Designed to acquaint the student with the general nature of mathematics, the manner in which the mathematical mode of thought is used in the world of today, and the role which it has occupied in the development of that world. A survey of some of the fundamental principles and methods of procedure in the main branches of elementary mathematics, with considerable attention being given to the utilization and cultural importance of the subject and its relations to other branches of knowledge.

CMs. 23-24.—Basic Mathematics. 4 or more hours per week throughout the year. 8 credits. Prerequisite: C-42, except for the superior group in Mathematics. Designed for General College students.

In place of the traditional college algebra, trigonometry, and analytic geometry in succession, this course offers a completely new sequence of topics including much of the above plus a liberal amount of the calculus. Thus the student will obtain early a working knowledge of such mathematics as is basic to the study of the sciences and other subjects, and needed for the cultivation of habits productive of clear thinking, writing, and speaking. Moreover, the choice of material is so made as to present mathematics as an integrated whole, and at the same time to show its correlation with other subjects in the curriculum.

\*Ms. 83.—Solid Geometry. 3 hours. 3 credits. Prerequisite: Plane geometry. An elementary course in solid geometry.

<sup>\*</sup>Not offered in 1938-39.

Ms. 215.—Plane Trigonometry and Logarithms. 3 hours. 3 credits. (No credit for those who present trigonometry for entrance.)

The solution of the triangle; practical applications of logarithms; trigonometric analysis.

Ms. 253-254.—Differential and Integral Calculus. 4 hours. 8 credits. Prerequisite: Basic Ms. or equivalent.

Differentiations and integration. Typical problems solved by these methods are calculation of rates of change, computation of areas, volumes, moments of inertia, energy, power, and many others. Various advanced topics of special value to engineers and scientists. Smith, Salkover, Justice, Calculus.

\*Ms. 302.—Plane Analytic Geometry. 3 hours. 3 credits. Prerequisite: Basic Ms. or equivalent.

The algebraic study of the figures of geometry and the plane sections of a cone. Higher plane curves. Systems and transformation of coordinates.

Ms. 308.—Business Mathematics. 3 hours. 3 credits. Prerequisite: Consent of instructor.

Modern mathematical treatment of the problems of banking and business. Derivation and application of numerous formulas of importance in the financial world.

Ms. 311-312.—Advanced College Algebra. 3 hours. 6 credits. Prerequisite: Basic Ms. or equivalent.

The further treatment of some of the material and processes of Basic Ms. and the introduction to more advanced topics. Hall and Knight, Higher Algebra.

Ms. 320.—Theory of Equations. 3 hours. 3 credits. Prerequisite: Basic Ms. or equivalent.

Theorems and methods of solution relating to equations of higher degree. Dickson, First Course in the Theory of Equations.

Ms. 325.—Advanced General Mathematics. 3 hours, 3 credits. Prerequisite: Consent of instructor.

Continuation of the arithmetic and algebraic topics treated in C-42 together with some supplementary material. The deeper meaning of laws underlying number operations. Some properties of positive whole numbers. Equations of various types classified and general solutions given. Higher functional analysis. Valuable to prospective teachers of mathematics and others who wish to continue some mathematical work without becoming specialists in pure mathematics.

Ms. 326.—Advanced General Mathematics. 3 hours. 3 credits. Prerequisite: Consent of instructor.

Continuation of the geometric and trigonometric topics treated in C-42 together with some supplementary material. The nature of a geometric proof. Types of proof. Problems in geometric construction. The generalization of theorems. Trigonometry as an extension of geometry. Analysis of the locus idea in mathematics. Field and laboratory work in geometry and trigonometry.

Valuable to prospective teachers of mathematics and others who wish to continue some mathematical work without becoming specialists in pure mathematics.

May precede, follow, or be taken simultaneously with Ms. 325.

May precede, follow, of the taken simultaneously with Ms. 525.

Ms. 385.—Advanced Trigonometry. 3 hours. 3 credits. Prerequisites: Plane trigonometry and solid geometry, or Basic Ms.

Special emphasis on spherical trigonometry. The first part of the course consists of a recapitulation of the essentials of plane trigonometry and the development of some further topics in that field. Then follows a development of the formulas relating to triangles formed by great circles on a sphere.

\*Ms. 402.—Solid Analytic Geometry. 3 hours. 3 credits. Prerequisite: Consent of instructor.

An introductory course dealing with lines, planes, surfaces, transformations of coordinates, the general equation of the second degree, and properties of quadrics. Snyder and Sisam, Analytic Geometry of Space.

<sup>\*</sup>Not offered in 1938-39.

Ms. 420.—Differential Equations. 3 hours. 3 credits. Prerequisite: Ms. 253-254.

The classification, solution, and application of various equations which contain expressions involving not only variables, but also the derivatives of these variables. Conkwright, Differential Equations.

Ms. 421.—Higher Mathematics for Engineers and Physicists. 3 hours. 3 credits. Prerequisite: Ms. 253-254.

Introduces the student to various mathematical fields. Sokolnikoff, Higher Mathematics for Engineers and Physicists.

Ms. 431.—College Geometry. 3 hours. 3 credits.

The use of elementary methods in the advanced study of the triangle and circle. Special emphasis on solving original exercises. Valuable to prospective high school geometry teachers. Altshiller-Court. College Geometry.

#### GRADUATE COURSES

Prerequisites to the courses numbered above 500 should be ascertained by consultation with the instructor.

- \*Ms. 502. —Vector Analysis
- \*Ms. 511- 512.—Introduction to Higher Algebra
- \*Ms. 518. —Theory of Groups of Finite Order
- Ms. 521. —Empirical Analysis and Curve Fitting
- Ms. 522. —Method of Least Squares, and Statistics
- \*Ms. 524. —Synthetic Projective Geometry
- \*Ms. 525- 526.-Econometrics
- \*Ms. 536. —Foundations of Geometry
- Ms. 551-552.—Advanced Topics in Calculus
- Ms. 555-556.—Functions of a Complex Variable
- \*Ms. 559- 560.—Functions of Real Variables
- Ms. 568. —History of Elementary Mathematics
- \*Ms. 575. —Fundamental Concepts of Modern Mathematics

# MECHANICAL ENGINEERING

Ml. 181.—Engineering Drawing. 1 hour, and 5 hours drawing. 2 credits. STRONG, JANES.

Designed to teach the student how to make and how to read engineering drawings. French, Engineering Drawing.

Ml. 182.—Descriptive Geometry. 1 hour, and 5 hours drawing. 2 credits. JANES, STRONG. Prerequisite: Ml. 181.

The principles of projection and the development of surfaces. Church and Bartlett, Elements of Descriptive Geometry,

Ml. 287.—Mechanism and Kinematics. 2 hours, and 3 hours drawing. 3 credits. FINEREN. Prerequisites: CMs. 23-24, Ml. 181, 182.

Revolving and oscillating bodies, link work, belts, pulleys, gears, and cams; trains of mechanisms and the velocity and directional ratio of moving parts. Schwamb, Merrill and James, Elements of Mechanism.

MI. 288.—Elementary Design. 2 hours, and 3 hours drawing. 3 credits. FINEREN. Prerequisites: MI. 287, Ps. 205-207.

The size and proportions of standard machine parts, screws, threads, bolts, nuts, pipe, pipe fittings, shafts, bearings, tolerances and allowances, riveted and welded joints, springs, lubrication, and design of simple machine parts. Kimball and Barr, Machine Design.

<sup>\*</sup>Not offered in 1938-39.

- Ml. 381-382.—Applied Mechanics. 4 hours, and 2 hours laboratory. 10 credits. YEATON, ESHLEMAN. Prerequisites: Ms. 253-254, Ps. 205-206.
- (a) Statics, equilibrium, centers of gravity, moments of inertia and friction. (b) Mechanics of materials. (c) Kinematics. Seely and Ensign, Analytical Mechanics for Engineers; Seely, Resistance of Materials.
- Ml. 383.—Materials of Engineering. 2 hours. 2 credits. ESHLEMAN. Prerequisites: Ps. 205-206, Cy. 101-102.

The properties, manufacture and testing of brick, concrete, timber, iron, steel, alloys, and non-ferrous metal; heat treatment and modifying processes. Moore, Materials of Engineering.

Ml. 384.—Metallography. 2 hours, and 2 hours laboratory. 2 credits. ESHLE-MAN. Prerequisite: Ml. 383.

The crystal structure of ferrous and non-ferrous metals and their alloys; the iron-carbon diagram, heat treatment, and use of steel and cast iron. Williams and Homerburg, *Principles of Metallography*.

Ml. 385.—Thermodynamics. 3 hours. 3 credits. EBAUGH, THOMPSON. Prerequisites: Ms. 253-254, Ps. 205-206, Cy. 101-102.

Energy equations and availability of energy; gases, vapors, and mixtures; engineering applications in flow of fluids, vapor power cycles, gas compression and refrigeration. Ebaugh, Engineering Thermodynamics.

Ml. 386.—Power Engineering. 3 hours. 3 credits. EBAUGH. Prerequisite: Ml. 385.

Steam and internal combustion engine power plants and their auxiliary equipment. Butter-field, Jennings and Luce, Steam and Gas Engineering.

Ml. 387.—Mechanical Laboratory. 1 hour, and 3 hours laboratory. 1 credit. THOMPSON. Corequisite: Ml. 385.

The preparation of engineering reports, computation aids, and the measurement of length, area, time, speed, pressure, and temperature. Diederichs and Andrae, Experimental Mechanical Engineering.

Ml. 388.—Mechanical Laboratory. 1 hour, and 3 hours laboratory. 1 credit. THOMPSON. Prerequisite: Ml. 387; Corequisite: Ml. 386.

Analysis of fuels, heating value, flue gas analysis, and the testing of boilers, turbines, engines and steam plant auxiliary apparatus. Diederichs and Andrae, Experimental Mechanical Engineering; A.S.M.E., Power Test Codes.

Ml. 397-398.—General Machine Shop and Metal Work. 6 hours lecture-laboratory. 6 credits. JANES.

Recommended for properly qualified students in the College of Education. It consists of classroom study and laboratory practice in pattern work, foundry, forging, welding and general machine-shop operations.

- Ml. 480.—Honors Course. Required for students who expect to graduate with high honors.
- Ml. 481.—Internal Combustion Engines. 3 hours. 3 credits. JANES. Prerequisite: Ml. 385.

Gas and liquid fuel, internal combustion engines, hot-air engines, and gas producers. Automotive, aircraft, and Diesel power plants. Streeter and Lichty, Internal Combustion Engines.

Ml. 482.—Refrigeration and Air Conditioning. 3 hours. 3 credits. EBAUGH. Prerequisite: Ml. 385.

Refrigerating and air conditioning apparatus and their applications to the industrial, commercial and residential fields. Macintire, Refrigeration Engineering; Allen and Walker, Heating and Air Conditioning.

Ml. 483.—Mechanical Laboratory. 1 hour, and 3 hours laboratory. 1 credit. EBAUGH, THOMPSON. Prerequisite: Ml. 387; Corequisite: Ml. 481.

The testing of lubricants, gasolines, automobile engines, aircraft engines, and high and low speed Diesel engines. U. S. Government Specifications, Lubricants and Liquid Fuels; A.S.M.E., Power Test Codes.

Ml. 484.—Mechanical Laboratory. 1 hour, and 3 hours laboratory. 1 credit. EBAUGH, THOMPSON. Prerequisite: Ml. 387; Corequisite: Ml. 482.

Tests of an ammonia ice plant, freon direct expansion air conditioner, air washer, air conditioner, fans, and the study of pneumatic and electric controls, and air distribution. A.S.M.E., A.S.R.E., and A.S.H.&V.E., Test Codes.

Ml. 485.—Aeronautics. 2 hours. 2 credits. THOMPSON. Prerequisites: Ps. 205, 206.

The fundamentals of aircraft with introductory aerodynamics and the engineering requirements of mechanical flight. Chatfield, Taylor, and Ober, The Airplane and Its Engine,

Ml. 486.—Aerodynamic Laboratory. 4 hours laboratory. 1 credit. THOMP-SON. Prerequisite: Ml. 487.

Aerodynamic experimentation on small models. Verification of aerodynamic theory. Methods and equipment used in aerodynamic research. Government publications and N.A,C.A, Reports,

MI. 487.—Aerodynamics. 3 hours. 3 credits. Thompson. Prerequisites: MI. 381-382, 385.

The flow of compressible fluids; the airfoil; propellers; airplane performance; control and surfaces; stability calculations. Wood, *Technical Aerodynamics*.

Ml. 488.—Airplane Design. 2 hours, and 3 hours laboratory. 3 credits. Thompson. Prerequisite: Ml. 487.

Introductory airplane design; layout principles; weight and balance analysis; the aerodynamics and preliminary design of a selected type of airplane. Department of Commerce Specifications, N.A.C.A. Reports. Wood. Airplane Design.

MI. 489-490.—Manufacturing Operations. 1 hour, and 4 hours laboratory. 6 credits. JANES. Prerequisite: Ml. 382.

Machinery, materials, and methods used in manufacturing. Subjects covered include casting, forging, heat treatment, welding, cutting and machining of metals with applications of time study and cost analysis. Roe and Lytle, Factory Equipment.

Ml. 491.—Machine Design. 3 hours, and 3 hours drawing. 4 credits. FINEREN. Prerequisites: Ml. 288, 381-382, 383.

The calculation, proportioning and detailing of machine parts, shop and mill layout, and the design of machines to perform certain functions.

Ml. 492.—Advanced Machine Design. 2 hours, and 3 hours drawing. 3 credits. FINEREN. Prerequisite: Ml. 491.

A continuation of Ml. 491 with advanced problems in design.

\*Ml. 493-494.—Mechanical Design. 3 hours, 6 credits, EBAUGH and STAFF.

\*MI. 495.—Power Plant Design. 2 hours, and 3 hours laboratory. 3 credits. EBAUGH. Prerequisite: MI. 386.

The selection of power plant equipment to meet given load conditions. Heat balances and layout are included. '.

MI. 497-498.—Mechanical Engineering Seminar. 1 hour. 2 credits.

#### GRADUATE COURSES

MI, 580. —Thesis Research

Ml. 581-582.—Advanced Mechanical Design

Ml. 583-584.—Mechanical Research

Ml. 585. —Advanced Air Conditioning

Ml. 586. —Advanced Engineering Thermodynamics

Ml. 587. —Advanced Aerodynamics

Ml. 589-590.—Advanced Mechanical Laboratory

<sup>\*</sup>Not offered in 1938-39.

# MILITARY SCIENCE

My. 101-102.—Freshman Infantry. 2 hours theory, and 3 hours practical. Instructor to be appointed.

Military fundamentals; discipline; sanitation; first aid; organization; map reading; leadership; weapons; rifles and rifle marksmanship. War Department, Training Regulations.

My. 103-104.—Freshman Artillery. 1 hour theory, and 4 hours practical. EDMONSON and KEATINGE.

Military fundamentals; discipline; sanitation; first aid; organization; leadership; field artillery instruction.

My. 201-202.—Sophomore Infantry. 2 hours theory, and 3 hours practical. Instructor to be appointed. Prerequisite: My. 101-102.

Military fundamentals; military history; leadership; weapons—automatic rifle; characteristics of infantry weapons; combat training. War Department, Training Regulations.

My. 203-204.—Sophomore Field Artillery. 1 hour theory, and 4 hours practical. PASCHALL, to be appointed. Prerequisite: My. 103-104.

Field Artillery instruction; leadership; transport; care of animals; driving and draft; equitation; stable management; fire control instruments; battery communications.

My. 301-302.—Junior Infantry. 3 hours theory, and 4 hours practical. 4 credits. Instructor to be appointed. Prerequisite: My. 201-202.

Military fundamentals; aerial photograph reading; leadership; weapons—machine gun; howitzer company weapons, pistol; review of rifle marksmanship; combat training. War Department, Training Regulations.

My. 303-304.—Junior Field Artillery. 3 hours theory, and 4 hours practical. 4 credits. DODD. Prerequisite: My. 203-204.

Reconnaissance, selection and occupation of position; leadership; gunnery; transport; equitation; driving and draft; service of the piece.

My. 401-402.—Senior Infantry. 3 hours theory, and 4 hours practical. 4 credits. BARKER. Prerequisite: My. 301-302.

Military fundamentals; military history and policy; military law; company administration and supply; O. R. C. regulations; leadership; weapons—tanks; mechanization combat training. War Department, Training Regulations.

My. 403-404.—Senior Field Artillery. 3 hours theory, and 4 hours practical. 4 credits. LUCAS. Prerequisite: My. 303-304.

Military history and policy; manual for court-martial; leadership (work as instructor in all practical basic field artillery subjects). Tactics.

#### MUSIC

Students registered in the College of Arts and Sciences and students receiving special permission from their Deans in other colleges may obtain one semester hour credit for each course offered by the Division of Music. No more than two credit hours toward any degree will be allowed.

Msc. 101-102.—Orchestra Music. 1 hour. 2 credits. Brown.

Msc. 107.—Sight Singing. 1 hour. 1 credit. DEBRUYN.

Designed to equip the student with an adequate understanding of, and a working ability in, the reading and singing of notes. Some attention will be given to the technic of voice.

Msc. 108.—History and Appreciation of Music. 1 hour. 1 credit. DEBRUYN. Designed to create in the mind of the student a working outline that will be advantageous to a further cultural investigation of the art of music. Contact with the salient facts of history, with lesser stress on appreciation. The student should have taken the Comprehensive Course C-5 or its equivalent.

# PAINTING

Courses in the Department of Painting are carried on by means of the problem or project method, and accomplishment is the sole criterion for advancement. Consequently, the courses are of indeterminate duration, and the time listed for each course represents merely the nominal time which the average student will need to complete the work.

Students in the Department of Painting must complete the various courses in the sequence listed in their respective curricula. Students from other departments may, with the consent of the instructor and the approval of the Director, enroll in courses for which they have sufficient preparation.

#### Lower Division

# Pg. 11A.—Fundamentals of Pictorial Art. DOOLITTLE.

A comprehensive introductory course to the fields of painting and commercial art, carried on by means of a coordinated series of beginning projects emphasizing the principles of creative design. Problems in line, pattern, and color, followed by the development of pictures or commercial layouts. The study of light and shade, and color; drawing from the cast, model, and landscape; painting from still life. Acquaintance with various media including water color, pencil, charcoal, and oil. Six projects. Nominal time, 9 hours a week for 4 semesters, or 18 hours a week for 2 semesters.

# Upper Division

# COMPOSITION

# Pg. 21A.—Pictorial Composition. DOOLITTLE.

A continuation of Pg. 11A for students in Painting. The study of principles, technique, and media. Fully developed pictures in oil, designs for mural decorations in water color, book illustration, and small compositions. Nine projects correlated with Projects in Painting 1 to 9, inclusive. Nominal time, 9 hours a week for 3 semesters.

# Pg. 21B.—Pictorial Composition. DOOLITTLE.

A continuation of Pg. 21A for students in Painting. Development and completion of larger pictures in oil, designs for murals, and small compositions. Six projects correlated with Projects in Painting 10 to 15, inclusive. Nominal time, 15 hours a week for 2 semesters.

# Pg. 22A.—Commercial Design. DOOLITTLE.

A continuation of Pg. 11A for students in Commercial Art. The study of principles, technique, and media. The design of posters, wallpaper, rugs, and the like. The processes of duplicating graphic material, and a study of lettering. Six projects correlated with Projects in Commercial Art 1 to 6, inclusive. Nominal time, 9 hours a week for 2 semesters.

# Pg. 22B.—Commercial Design. DOOLITTLE.

A continuation of Pg. 22A for students in Commercial Art. Magazine covers, fixtures, book plates, magazine advertisements, book jackets and covers, illustrations, and the artistic development of an advertising campaign. Six projects correlated with Projects in Commercial Art 7 to 12, inclusive. Nominal time, 18 hours a week for 2 semesters.

# DRAWING

# Pg. 31A.—Freehand Drawing. DOOLITTLE.

A continuation of Pg. 11A for students in Painting. Studies for projects and supplementary drawing from models. Nine projects correlated with Projects in Painting 1 to 9, inclusive. Nominal time, 18 hours a week for 3 semesters.

# Pg. 31B.—Freehand Drawing. DOOLITTLE.

A continuation of Pg. 31A for students in Painting. Studies for projects and supplementary drawing from models. Six projects correlated with Projects in Painting 10 to 15, inclusive. Nominal time, 12 hours a week for 2 semesters.

# Pg. 32A.—Freehand Drawing. DOOLITTLE.

A continuation of Pg. 11A for students in Commercial Art. Studies for projects, sketches from models, and studies in perspective. Six projects correlated with Projects in Commercial Art 1 to 6, inclusive. Nominal time, 12 hours a week for 2 semesters.

# Pg. 32B.—Freehand Drawing. DOOLITTLE.

A continuation of Pg. 32A for students in Commercial Art. Studies for projects and supplementary drawing from models. Six projects correlated with Projects in Commercial Art 7 to 12, inclusive. Nominal time, 12 hours a week for 2 semesters.

#### HISTORY

# Pg. 41A.—History of Painting. DOOLITTLE.

For students in Painting. The history of painting with special attention to the principles of design as applied by painters of the past and present. Individual research, conferences, and illustrated reports. Six projects. Nominal time, 6 hours a week for 2 semesters.

#### PAINTING

# Pg. 51A.—Oil Painting. DOOLITTLE.

A continuation of Pg. 11A for students in Painting. Painting of still life and the head. Six projects correlated with Projects in Painting 1 to 6, inclusive. Nominal time, 15 hours a week for 2 semesters.

# Pg. 51B.—Oil Painting. DOOLITTLE.

A continuation of Pg. 51A for students in Painting. Painting of the head and figure. Nine projects correlated with Projects in Painting 7 to 15, inclusive. Nominal time, 15 hours a week for 3 semesters.

# Pg. 52A.—Oil Painting. DOOLITTLE.

A continuation of Pg. 11A for students in Commercial Art. Painting of still life, landscapes, heads, and the figure. Six projects correlated with Projects in Commercial Art 1 to 6, inclusive. Nominal time, 12 hours a week for 2 semesters.

# Pg. 52B.—Water Color. GRAND.

A continuation of Pg. 52A for students in Commercial Art. Still life and simple landscapes in water color. Six projects correlated with Projects in Commercial Art 7 to 12, inclusive. Nominal time, 9 hours a week for 2 semesters.

# THESIS IN PAINTING

# Pg. 61A.—Thesis. DOOLITTLE, GRAND. Prerequisite: Completion of all other requirements for the degree.

A final comprehensive problem in painting presented as a representative piece of professional work in the student's particular medium and field with full preliminary studies and cartoon. The subject must be approved by the faculty in time to permit not less than 12 weeks for the development of the problem. One project. Nominal time, 48 hours a week for 1 semester.

#### PHARMACOGNOSY

# Pgy. 221-222.—Practical Pharmacognosy. 6 hours laboratory. 6 credits. IRELAND.

Sources of crude drugs and a systematic classification of the vegetable and animal drugs of the United States Pharmacopoeia and National Formulary. Youngken, Textbook of Pharmacognosy; United States Pharmacopoeia and National Formulary.

Pgy. 242.—Drug Plant Histology. 4 hours laboratory. 2 credits. IRELAND. Internal structure of medicinal plants. Cellular elements and types of tissues used as diagnostic characters in identification and detection of adulterations.

Pgy. 342.—Microscopy of Drugs. 4 hours laboratory. 2 credits. IRELAND. Prerequisite: Pgy. 242.

Microscopic structure and characteristics of types of drugs, methods of identification of powdered drugs and food products, and of detecting adulterations.

Pgy. 442.—Commercial Methods. 2 hours, and 2 hours laboratory. 3 credits. IRELAND.

A study of the economics of the crude drug industry. Sources of supply, importations, preparation and commercial distribution.

#### GRADUATE COURSES

Pgy. 501. —Advanced Histology and Microscopy of Vegetable Drugs

Pgy. 521-522.—Special Problems in Pharmacognosy

Pgy. 525-526.—Drug Plant Analysis

Pgy. 533-534.—Seminar in Pharmacognosy

Pgv. 551-552.—Pharmacognosy Research

# PHARMACOLOGY

Ply. 351.—Pharmacology. 3 hours. 3 credits. CHRISTENSEN. Prerequisite: Pgy. 221-222.

The manner of action, dosage, therapeutic uses, and toxicology of official and non-official drugs and poisons. Sollmann, A Manual of Pharmacology; United States Pharmacopoeia and National Formulary.

Ply. 362.—Pharmacological Standardization. 2 hours, and 4 hours laboratory. 4 credits. CHRISTENSEN. Prerequisite: Ply. 351.

Biological assaying, employing the official methods of the United States Pharmacopoeia. Sollmann, A Manual of Pharmacology; United States Pharmacopoeia and National Formulary.

Ply. 451.—Principles of Biologicals. 3 hours. 3 credits. CHRISTENSEN. Prerequisite: Ply. 362.

Advanced study of the pharmacology of drugs and pharmacological standardization with special reference to toxins, antitoxins, serums and vaccines.

Ply. 452.—Principles of Biologicals. 3 hours. 3 credits. CHRISTENSEN. A study of gland products and vitamins with reference to action, standardization and uses.

Ply. 455-456.—New Remedies. 2 hours, and 2 hours laboratory. 6 credits. FOOTE. Prerequisite: Phy. 353 or 354.

A brief history of the organization, policies and accomplishments of the Council on Pharmacy and Chemistry of the American Medical Association. The pharmacology of new remedies accepted and placed on the market.

#### GRADUATE COURSES

Ply. 512. —Advanced Pharmacology

Ply. 517. —Clinical Methods

Ply. 535-536.—Seminar in Pharmacology

Ply. 551-552.—Special Problems in Pharmacology

Ply. 571-572.—Pharmacology Research

# PHARMACY

Phy. 211.—Inorganic Pharmacy. 3 hours, and 4 hours laboratory. 5 credits. HUSA. Prerequisites: Cy. 101-102, Phy. 223-224.

The inorganic compounds used in medicine; their Latin titles, origin, and physical, chemical, and physiological properties; their preparation and use in compounding remedies.

Phy. 223-224.—Galenical Pharmacy. 2 hours, and 3 hours laboratory. 6 credits. HUSA. Prerequisite or corequisite: Cy. 101-102.

Galenical preparations, such as syrups, spirits, tinctures, extracts, emulsions. The preparation of these materials extemporaneously on a small scale, and their manufacture in larger amounts.

†Phy. 353-354.—Organic and Analytical Pharmacy. 3 hours, and 6 hours laboratory. 10 credits. FOOTE. Prerequisites: Cy. 262; Pgy. 222; Phy. 223-224.

The chemistry and pharmacy of natural and synthetic organic drugs, including qualitative and quantitative drug analysis.

Phy. 361-362.—Prescriptions and Dispensing. First semester: 2 hours, and 3 hours laboratory. Second semester: 1 hour, and 4 hours laboratory. 6 credits. HUSA. Prerequisite: Phy. 211.

Training for practical and efficient work at the prescription counter; prescription reading, translation of prescription Latin, accepted methods of checking and filling prescriptions, and prescription pricing. Husa, *Pharmaceutical Dispensing*.

Phy. 372.—Commercial Pharmacy. 4 hours. 4 credits. HUSA. Prerequisite: Phy. 211.

The management of the retail pharmacy; business management, including merchandise information, retail buying, advertising, salesmanship, and accounting.

Phy. 381.—Pharmaceutical Jurisprudence. 2 hours. 2 credits. FOOTE. Prerequisite: Phy. 211.

National, state, and local laws and regulations governing the practice of pharmacy; the pharmacist's liability, both criminal and civil, for his own violation of laws and for violation on the part of his agents.

Phy. 402.—Pharmaceutical Arithmetic. 2 hours. 2 credits. FOOTE. Prerequisite: Phy. 354.

Calculations used in pharmaceutical work with emphasis on practical problems.

Phy. 432.—Advanced Drug Analysis. 1 hour, and 6 hours laboratory. 3 credits. FOOTE. Prerequisite: Phy. 353-354.

The more difficult analytical methods of the  ${\it United~States~Pharmacopoeia}$ , supplemented by other methods.

\*Phy. 453.—Pharmaceutical Formulas. 1 hour, and 6 hours laboratory. 3 credits. FOOTE. Prerequisite: Phy. 353.

The classes of formulas such as are used in cosmetics, hospitals, dental work, veterinary practice, insecticides, fumigants, et cetera. Pharmaceutical Recipe Book.

# GRADUATE COURSES

Phy. 502.—Selected Topics in Pharmacy

Phy. 503.—Advanced Pharmacy

Phy. 504.—Advanced Galenical Pharmacy

Phy. 541.—Manufacturing Pharmacy

Phy. 553.—Synthetic Pharmaceuticals

Phy. 554.—Advanced Pharmacy

#### PHILOSOPHY

CPp. 54.—Introduction to Philosophy. 3 hours. 3 credits. ENWALL.

This course attempts to serve as a broad survey of philosophic problems and especially modern philosophic problems, such as evolution, the moral consciousness, progress, the principles of aesthetics, and the meaning of religion. It is a foundation course.

Ppy. 301.—Ethics. 3 hours. 3 credits. ENWALL.

The ethical problems are presented in their logical as well as in their historical perspective. The following topics are samples: God and Evil, Happiness, Duty, Freedom, and Personality.

<sup>†</sup>The first semester of this course is a prerequisite to the second semester, but may be taken for credit without enrolling for the work of the second semester.

<sup>\*</sup>Not offered in 1938-39.

Ppy. 302.—The Philosophy of Religion. 3 hours. 3 credits. ENWALL.

An endeavor to evaluate the religious consciousness. Readings and discussions will center around theism, agnosticism, naturalism, and humanism.

\*Ppy. 401-402.—Advanced Logic Seminar. 2 hours. 6 credits. ENWALL. Prerequisites: Ppy. 409, 410.

Theories of thought and knowledge.

Ppy. 403-404.—Philosophy of Nature Seminar. 2 hours. 6 credits. ENWALL. Prerequisites: Ppy. 409, 410.

Man's relation to nature. The various philosophical doctrines: materialism, pantheism, realism, agnosticism, humanism, idealism, et cetera.

Ppy. 407.—The Philosophic Conceptions of the Great English Poets. 2 hours. 3 credits. ENWALL. Prerequisites: Ppy. 409, 410.

Selected plays from Shakespeare; the philosophic poems of Wordsworth,

Ppy. 408.—The Philosophic Conceptions of the Great English Poets. 2 hours. 3 credits. ENWALL. Prerequisites: Ppy. 409, 410.

The philosophic poems of Browning and Tennyson.

Ppy. 409.—History of Ancient Philosophy (Formerly Ppy. 303). 3 hours. 3 credits. ENWALL.

The development of philosophic thought from its appearance among the Ionic Greeks to the time of Descartes.

Ppy. 410.—History of Modern Philosophy (Formerly Ppy. 304). 3 hours. 3 credits. ENWALL.

A continuation of Ppy. 409. Special attention given to the works of Descartes, Spinoza, Leibnitz, Hume, and Kant.

\*Ppy. 412.—Outstanding Personalities and Problems in Philosophy. 2 hours. 2 credits. ENWALL. Prerequisites: Ppy. 409, 410.

This course is intended, primarily, for those students who desire to acquaint themselves with the more fundamental problems of philosophy, but are unable to take the time required for Ppy. 409, 410.

#### GRADUATE COURSES

Ppy. 501-502.—Advanced Logic, Seminar

Ppy. 503-504.—Advanced History of Philosophy

\*Ppy. 505-506.—Philosophy of Nature, Seminar

\*Ppy. 507-508.—Hume and Kant, Seminar

# PHYSICAL EDUCATION

Pl. 101-102.—Physical Education. 3 hours of instruction and activity.

The program is designed to present training and instructional opportunities in the following sports: ping pong, shuffle board, field sports, tumbling and apparatus, wrestling, boxing, water sports, golf, tennis, horse shoes.

Pl. 201-202.—Second-Year Physical Education. 3 hours.

Advanced techniques in the work offered in Pl. 101-102.

<sup>\*</sup>Not offered in 1938-39.

# **PHYSICS**

For the benefit of those who are interested in courses in applied electricity, attention is called to the courses offered in the Department of Electrical Engineering of the College of Engineering. These courses may be approved for students majoring or minoring in Physics.

†Ps. 101-102.—Elementary Physics. 4 hours. 6 credits. BLESS, PERRY, KNOWLES, GAUTIER. Prerequisite: C-2, or consent of instructor. Corequisite: Ps. 103-104.

A course in General Physics for science students.

†Ps. 103-104.—Laboratory for Ps. 101-102. 3 hours laboratory. 4 credits. BLESS and STAFF. Corequisite: Ps. 101-102.

†Ps. 205-206.—Theory of Mechanics, Heat, Sound, Electricity, and Light. 4 hours. 6 credits. PERRY, SWANSON. Prerequisite: One year of college mathematics. Corequisite: Ps. 207-208 and Ms. 253-254.

General Physics, designed primarily for engineering students.

†Ps. 207-208.—Laboratory for Physics 205-206, and 211-212. 3 hours laboratory, 2 credits, PERRY and STAFF. Corequisite: Ps. 205-206 or 211-212.

†Ps. 211-212.—Elementary Physics. 5 hours. 8 credits. WILLIAMSON. Prerequisite: CMs. 23-24. Corequisite: Ps. 207-208.

Designed to meet the needs of students majoring in Physics and others who are qualified and desire to cover more material and more problem work than are possible in Ps. 101 to 104.

Ps. 221.—The Latest Advances in Physics and Their Implications. 3 hours. 3 credits. BLESS. Prerequisite: C-2.

A cultural, non-mathematical course for the general student who does not major in the Physical Sciences, but who desires to have an understanding of the science of Physics as a part of his cultural training. It is hoped that this course will enable the student to follow intelligently the advances in the sciences as they appear in the press.

Contents: Historical development; the electrical age; discovery of the electron; X-rays, radio-activity; quantum physics; relativity; wave mechanics; nuclear physics; implications and applica-

tions of the new physics.

Ps. 224.—Sound and Its Applications, with Emphasis upon Music. 2 hours. 2 credits. WILLIAMSON. Prerequisite: C-2.

A course for the general student, not majoring in the sciences, but interested in various phases of sound.

Contents: Sound waves; sources of sound; reception and recording; musical instruments; the voice and hearing; radio transmission and reception; depth sounding; supra-sonics.

Ps. 292.—Meteorology. 2 hours, and 2 hours laboratory. 3 credits. Perry. Prerequisite: C-2.

A brief general course, designed to give the student an insight into the physical processes and laws underlying the phenomena of weather and climate. It is to satisfy the interested curiosity of the general student as well as to furnish a foundation for further study on the part of those, such as aviation students, who are interested from the practical standpoint.

Ps. 303-304.—Experimental Physics. 6 to 9 hours laboratory. 4 or 6 credits. STAFF. Prerequisite: One year of Physics.

Experiments of a more advanced type than those of the elementary courses, together with study of the theory of the experiments and assigned reading, designed to meet the needs and interests of the individual student,

<sup>†</sup>First semester prerequisite to second semester, but may be taken for credit without enrolling for second semester.

Ps. 307.—Heat. 2 hours, and 3 hours laboratory. 3 credits. SWANSON. Prerequisite: One year of Physics. Corequisite: Calculus.

An intermediate treatment, with experiments to illustrate.

Temperature and its measurement; specific heats; expansion; conduction; radiation; change of state; first law of thermodynamics.

\*Ps. 0309.—Light. 2 hours, and 3 hours laboratory. 3 credits. WILLIAMSON. Prerequisite: One year of Physics. Corequisite: Calculus.

An intermediate treatment with experiments to illustrate.

Lenses; optical instruments; interference; diffraction; dispersion; polarization; emission of spectra and Bohr theory.

Ps. 311-312.—Electricity and Magnetism. 2 hours, and 4 hours laboratory. 8 credits. KNOWLES. Prerequisite: One year of college physics and calculus. An intermediate treatment with experiments to illustrate.

First semester: magnetism; electrostatics; potential; Kirchhoff's laws applied to direct current circuits; measurements of current, resistance and potential; currents and magnetic fields; ballistic galvanometer; iron and the magnetic circuit.

Second semester: varying currents in circuits containing inductance, capacity, and resistance; alternating current circuits containing inductance, capacity, and resistance; solution of A.C. circuits using complex algebra; the transformer.

\*Ps. 315.—Demonstration Physics. 2 hours. 1 credit. STAFF. Prerequisite: One year of physics. Offered only in the summer session.

Demonstration experiments designed primarily for teachers.

Ps. 316.—Spectrochemical Analysis. 2 hours, and 3 hours laboratory. 3 credits. WILLIAMSON. Prerequisites: One year of Physics.

For students of Chemistry and Physics interested in chemical analyses carried out by spectrographic means.

Lenses and spectrographic instruments; emission and absorption spectra and nomenclature; discharge in vacuo, arc and spark; qualitative spectrochemical analysis; quantitative spectrochemical analysis; absorption methods.

Ps. 320.—X-rays and the New Physics. 2 hours, and 3 hours laboratory. 3 credits. BLESS. Prerequisite: One year of college physics. Desirable corequisite: Calculus.

A companion course to Ps. 321. Also of interest to students wishing some knowledge of X-rays and their applications.

The discovery of X-rays and radioactivity; the Bohr theory; photoelectric effect; X-ray spectroscopy; biological applications of X-rays; the neutron; positron; high voltage production and phenomena; cosmic rays.

Ps. 321.—Advanced General Physics. 3 hours. 3 credits. BLESS. Prerequisite: One year of college physics. Corequisite: Calculus.

Particularly suitable for those who wish to obtain a better understanding of the whole of the science and of the philosophic tendencies of the present day physics, as well as for students of mathematics who may be interested in physical applications.

More quantitative treatment of some of the most fundamental laws of physics, including among other topics kinetic theory of gases, alternating and oscillating current phenomena, radio and television.

Ps. 405-406.—Theoretical Mechanics. 3 hours. 6 credits. BLESS. Prerequisites: Two years of college physics, calculus.

Statics of systems of rigid bodies. Motions of particles and of rigid bodies under constant and variable forces. (The same recitations are held for Ps. 405-406 as for Ps. 505-506. Graduate students are required to solve problems of a more advanced character.)

<sup>\*</sup>Not offered in 1938-39.

Ps. 423-424.—Chemical Physics. 3 hours. 6 credits. WILLIAMS. Prerequisites: Two years of physics and two years of chemistry. Either semester may be taken without the other.

For students of Chemistry and Physics who are interested in the application of physical methods to chemical problems, as well as in the phenomena in the border regions between Chemistry and Physics.

First semester: osmosis; kinetic theory of gases; concentration of isotopes; specific heats and heats of combustion; mass spectrography.

Second semester: molecular dipole moments as determined from dielectric measurements; molecular structures as determined from band spectra, Raman spectra, and X-ray and electron diffraction.

# GRADUATE COURSES

Ps. 503. —Kinetic Theory of Gases

Ps. 505-506.—Theoretical Mechanics

\*Ps. 508. —Thermodynamics

Ps. 510. —Physical Optics

\*Ps. 513-514.—Advanced Experimental Physics

\*Ps. 517-518.—Modern Physics

\*Ps. 521-522.—X-Rays

\*Ps. 523-524.—Seminar in Modern Theory

Ps. 527-528.—Colloquium

Ps. 551-552.—Thesis

# PLANT PATHOLOGY

Pt. 302.—Introduction to Plant Pathology. 2 hours, and 2 hours laboratory. 3 credits. CREIGHTON, HIXSON.

A study of the principal causal agents that produce disease in plants. Diagnosis and treatment of plant diseases.

# POLITICAL SCIENCE

CPl.-13.—Political Foundations of Modern Life. 4 hours. 4 credits. Offered each semester. Prerequisite: C-1. Designed for General College students. Prerequisite to advanced courses in Political Science.

An examination of the principles and practices of our political institutions; how government functions in the United States; what information can be drawn from the practices of other countries.

Pcl. 309-310.—International Relations. 3 hours. 6 credits. DAUER.

The nature of international relations, nationalism, imperialism, militarism, armaments; history of international relations; foreign policies; function and problems of diplomacy; international organizations; the League of Nations and the World Court.

Pcl. 311-312.—American State and Municipal Administration (Formerly Pcl. 203-204). 3 hours. 6 credits. CAWTHON.

A critical study of state administration with problems embracing that of Florida.

Pcl. 313-314.—American Government and Politics (Formerly Pcl. 101-102). 3 hours, 6 credits. PAYNE.

First semester: A study of the structure and function of the federal government. Second semester: A study of state, county, and municipal governments. This course is a prerequisite for other courses in Political Science for students not entering the Upper Division from the General College.

Pcl. 401-402.—American Constitutional Law (Formerly Pcl. 301-302), 3 hours. 6 credits. Leake.

A very complete study and analysis of the Federal Constitution, with study and briefing of leading cases in constitutional law.

<sup>\*</sup>Not offered in 1938-39.

\*Pcl. 403-404.—International Law (Formerly Pcl. 303-304). 3 hours. 6 credits. DAUER.

The law of peace; case study of the application of international law in national courts; the subjects and objects of international law. Case study of the so-called law of war and the law of neutrality.

Pcl. 405-406.—History of Political Theory (Formerly Pcl. 305-306). 3 hours. 6 credits. CAWTHON.

History of ancient, medieval, and modern political theories.

Pcl. 407-408.—Comparative Government (Formerly Pcl. 307-308). 3 hours. 6 credits. DAUER.

Governments of England, the British Commonwealth, and the countries of Northern Europe. Governments of France, Germany, Italy, Spain, Russia, the central European countries, Japan, and China.

Pcl. 409.—American Foreign Policy (Formerly Pcl. 202), 3 hours. 3 credits. LAIRD.

Introduction to international politics through a survey of American foreign policies.

Pcl. 410.—Public Administration. 3 hours. 3 credits. LAIRD.

#### GRADUATE COURSES

Pcl. 501-502.—American Constitutional Law

\*Pcl. 503-504.—International Law

Pcl. 505-506.—History of Political Theory

Pcl. 507-508.—Comparative Government

Pcl. 509-510.—International Relations

Pcl. 511-512.—American State and Municipal Administration

\*\*Pcl. 513-514.—Seminar

### POULTRY HUSBANDRY

Py. 312.—Incubation and Brooding. 2 hours, and 2 hours laboratory. 3 credits. ANDERSON.

Study of different types of equipment, systems of management, and methods of handling the details in the incubation and brooding of baby chicks.

Py. 313.—Poultry Judging. 1 hour, and 2 hours laboratory. 2 credits. ANDERSON.

Origin, history and development of breeds and varieties. Study of classification and points of excellence. Theory and practice of judging fowls for egg production and exhibition.

Py. 314.—Poultry Feeds and Feeding. 2 hours, and 2 hours laboratory. 3 credits. ANDERSON.

Principles of poultry nutrition and their application to poultry feeding, physiology of digestion, absorption and elimination. Nutritional requirements for different ages: feeds suitable, balancing rations and practical feeding methods.

Py. 316.—Poultry Housing and Equipment. 1 hour, and 2 hours laboratory. 2 credits. ANDERSON.

Theory and practical application of poultry house and equipment: construction as to systems, types, methods and materials that are adaptable to various state and local conditions.

Py. 317-318.—Poultry Practices. 2 hours laboratory. 2 credits. Mehrhof, Anderson.

Special laboratory course designed for Smith-Hughes students only: culling, caponizing, egg candling, killing and dressing, packing, and other practical poultry skills.

<sup>\*</sup>Not offered in 1938-39.

<sup>\*\*</sup>Offered only if demand warrants

Py. 413.—Turkey Production. 2 hours. 2 credits. ANDERSON.

Origin and development of the turkey; growth of the commercial industry; best methods of turkey breeding, hatching, brooding, rearing, management of adult flock, and marketing.

Py. 415-416.—Poultry Management. 2 hours, and 2 hours laboratory. 6 credits. MEHRHOF. Prerequisite: 2 or 3 hours in any other poultry husbandry course.

Systematic study of poultry farming: types, farm lay-outs, successful poultry farms; cost of production, factors relating to cost; pullet production; baby chick production; expenses and receipts. Field trips to poultry farms and commercial plants.

Py. 417.—Marketing Poultry Products. 2 hours, and 2 hours laboratory. 3 credits. ANDERSON.

Preparation of eggs and poultry for market: grading, packing and storing of eggs and poultry. Study of egg quality; judging eggs.

Py. 418.—Poultry Breeding. 2 hours. 2 credits. ANDERSON.

Principles of genetics applied to poultry; the laws of heredity governing standard and production characters in poultry. Methods and practices of breeding and analysis of records.

Py. 420.—Problems in Poultry Breeding. 2 or 4 hours laboratory. 1 or 2 credits. ANDERSON. Corequisite: Py. 418.

Practical problems in poultry breeding; breeding experiments; review of literature. Designed to be taken in conjunction with Py. 418.

Py. 421-422.—Poultry Research and Seminar. 1 hour. 1 credit. MEHRHOF.

#### GRADUATE COURSES

Py. 531-532.—Advanced Poultry Management

Py. 533-534.—Poultry Research Problems

# **PSYCHOLOGY**

Psy. 201.—General Psychology. 3 hours. 3 credits. HINCKLEY, WILLIAMS, MOSIER.

Fundamental facts and theories of psychology; sensation, perception, learning, retention, emotion, volition, and the self. Ruch, *Psychology and Life*. Dockeray, *General Psychology*. Prerequisite to all other courses in Psychology.

Psy. 203.—Physiological Psychology. 3 hours. 3 credits. WILLIAMS. Prerequisite or Corequisite: Psy. 201.

Lectures and laboratory work on the nervous system; sense organs, muscles, glands, reflexes, instincts, emotions, simple habits. Freeman, Introduction to Physiological Psychology.

\*Psy. 206.—Business Psychology. 3 hours. 3 credits. Mosier. Prerequisite: Psy. 201.

Applications of the principles and the methods of psychology to the major problems of commerce and industry. Selection of personnel, job analysis, time and motion analysis, effect of conditions of work, and method of work on productivity. Problems of personnel, individual differences, motivation, psychological factors in advertising, methods of appraising advertising. Applications of psychotechnology to selling. Psychological problems, principles and methods in market research. Jenkins, Psychology in Business and Industry.

Psy. 301.—Systematic Psychology. 3 hours. 3 credits. WILLIAMS. Prerequisite: Psy. 201.

An advanced critical and constructive consideration of the major controversial topics in the field of general psychology; methods, systems, mind-body relationship, consciousness, intelligence, nervous structure, nervous behavior, mental processes, affection, emotion, volition, learning, self.

<sup>\*</sup>Not offered in 1938-39.

Psy. 304.—Experimental Psychology. 1 hour, and 4 hours laboratory. 3 credits. WILLIAMS. Prerequisite or Corequisite: Psy. 201.

Methods of psychological investigation; collection and treatment of data, individual differences, reactions, work and fatigue, sensations, perceptions, illusions, images, memory, attention, learning, judgments. Foster and Tinker, Experiments in Psychology.

Psy. 305.—Social Psychology. 3 hours. 3 credits. WILLIAMS. Prerequisite: Psy. 201.

Influence of the social environment upon the mental, social, moral and emotional development of the child, the adolescent, and the adult. General orientation, physiological basis of behavior, inherited and learned activities, feelings and emotions, social stimulations, responses to social stimuli, social attitudes, social self, social consciousness, social adjustments, social behavior in relation to society. Allport, Social Psychology.

Psy. 307.—Legal Psychology. 3 hours. 3 credits. MOSIER. Prerequisite: Psy. 201.

Applications of the principles and methods of psychological thinking to problems in the legal field. Effect of sensation, perception, attention, memory, suggestion on the validity of testimony. Methods of obtaining and evaluating testimony. Psychological methods of detecting guilt. Mental disorder and mental defect in relation to legal problems of responsibility and crime. Problems in the psychology of delinquency. The judge, jury and lawyer as psychological individuals. Burtt, Legal Psychology.

Psy. 309.—Theories of Personality. 3 hours, 3 credits. HINCKLEY. Prerequisite: Psy. 201.

The more inevitable problems of human life with their normal and abnormal solutions; the origin and modification of behavior; processes of motivation and adjustment; varieties of adjustive behavior; personality traits and their measurement; organic factors in personality; development of personality traits; theories of personality; techniques of mental hygiene. Shaffer, Psychology of Adjustment.

Psy. 310.—Abnormal Psychology. 3 hours. 3 credits. HINCKLEY. Prerequisite: Psy. 201.

Symptoms and causes of mental disorders; disorders of sensation, perception, association, memory, emotion, and intelligence; sleep and dreams; suggestion and hypnosis; hysteria; regressive, compensatory and episodic disorders; treatment and prevention. Morgan, Psychology of Abnormal Pcople.

Psy. 312.—Psychology of Problem Children. 3 hours. 3 credits. WILLIAMS. Prerequisite: Psy. 201.

A study of the causes, types, characteristics, and treatment of retarded, feeble-minded, psychoneurotic, psychopathic, delinquent, gifted, and other types of exceptional and mentally peculiar children. Scheidemann, *Psychology of Exceptional Children*.

Psy. 314.—History and Systems of Psychology. 3 hours. 3 credits. WILLIAMS. Prerequisites: Psy. 201 and 3 other hours in Psychology.

A critical survey of the historical development of psychology from the early Greek period, with special emphasis on the contributions of the Germans, the French, the English, and representative writers as Aristotle, Descartes, Hobbes, Locke, the Mills, Fechner, Wundt, Binet, James and many others. The more recent trends, schools and systems as Structuralism, Functionalism, Behaviorism, and Gestalt Psychology. Pillsbury, History of Psychology.

Psy. 405.—Theory of Psychological Measurement. 2 hours, and 2 hours laboratory. 3 credits. MOSIER. Prerequisite: Psy. 201.

Quantitative methods of experimental psychology; collection and treatment of data; correlation; prediction. History of testing, nature of measurement, characteristics of groups, reliability of tests and the concept of correlation, validity, item analysis. Practice in the construction of mental tests.

Psy. 406.—Psychological Tests. 2 hours, and 2 hours laboratory. 3 credits. HINCKLEY. Prerequisites: Psy. 201, Psy. 405.

Tests of general intelligence, special aptitudes, personality traits, and business ability; organization and administration; methods and results; theory of test construction and scoring; practical uses of tests.

Psy. 408.—Comparative Psychology. 3 hours. 3 credits. WILLIAMS. Prerequisites: Psy. 201 and 3 other hours in Psychology.

A review of the psychological experiments in which animals were used as subjects with an attempt to trace the phylogenetic development of human behavior and intelligence. Innate and learned behavior. Motivation, individual differences, social conduct and ideational activities. Moss, Comparative Psychology.

Psy. 421.—Learning. 3 hours. 3 credits. HINCKLEY. Prerequisites: Psy. 201, Psy. 304.

Experimental study of factors influencing learning and retention; analysis and explanation of the learning process; transfer of training; retro-active inhibition; explanation of retention.

Psy. 422.—Space Perception. 3 hours. 3 credits. HINCKLEY, Prerequisites: Psy. 201, Psy. 304.

Critical examination of the experimental literature on perception of space; visual localization of distance and direction; auditory localization of distance and direction; perception of size, shape, and motion; spatial coordination of the senses. Carr. Space Perception.

\*Psy. 424.—Sensation. 3 hours. 3 credits. HINCKLEY. Prerequisites: Psy. 201, Psy. 304.

The general nature of sensation; physical nature of the nerve process; the psychophysiological relationships between changes in the afferent arc and changes in consciousness in visual and auditory sensation. Troland, Sensation.

Psy. 425-426.—Honors Course. 3 hours, 6 credits. STAFF.

# GRADUATE COURSES

Psy. 501-502.—Readings in Experimental Psychology

Psy. 505. —Advanced Statistical Methods

Psy. 506. -Psycho-Physical Theory in the Construction of Tests

\*Psy. 508. —Advanced Comparative Psychology

Psy. 509. —Studies in Personality

Psy. 510. —Readings in Abnormal Psychology

Psy. 514. -Readings in History and Systems of Psychology

# SOCIOLOGY

CSy. 13-14.—Sociological Foundations of Modern Life. 2 hours each semester. 4 credits. MACLACHLAN. Prerequisite: C-1 or extra reading.

Sociological as contrasted with other foundations of modern life; the product of life in association—CULTURE; problems of maladaptation growing out of life in association in a changing world; social processes and sociological principles; the behavior of persons in groups. Visits to state institutions and private philanthropic agencies.

Sy. 301-302.—Outlines of Sociology. 3 hours. 6 credits. BRISTOL and STAFF. Prerequisite: C-1 or extra reading.

Sy. 301 is practically identical in content with CSy. 13 so is not open to those having taken that course. The second semester will amplify the study of sociological principles and laws, giving chief emphasis to a consideration of progress in the attainment of social goals, the philosophy of social values and social progress and to the practical application of sociology to education, social work, business, medicine, journalism, organized religion and vocational guidance. This course is required of all majoring in the department and is prerequisite to all 400 courses except by special permission.

\*Sy. 311.—Problems of Child Welfare. 2 hours. 2 credits. BRISTOL. Prerequisite or Corequisite: Sy. 301 or equivalent.

Problems growing out of the physical and social maladjustments of the child; child labor; treatment of dependent and delinquent children; community organization for delinquency prevention.

<sup>\*</sup>Not offered in 1938-39.

Sy. 316.—The Field of Social Work. 2 hours. 2 credits. BRISTOL and special lecturers.

Administrative and promotional social work. Case work: child welfare, family, medical, psychiatric, probation and parole, protective. Group social work: boys' and girls' clubs, recreational, social settlement, scouting, etc. Social research and investigation.

Sy. 332.—Public Health and Sanitation. 3 hours. 3 credits. BRISTOL and special lecturers.

Of particular value to those planning for medicine or social work.

\*Sy. 337.—Social Anthropology. 2 hours. 2 credits.

\*Sy. 338.—Race Problems. 2 hours. 2 credits.

Sy. 344.—Marriage and the Family. 3 hours. 3 credits. BRISTOL, BEATY.

The nature and development of domestic institutions. Conditions affecting the American family; marriage adjustments; the arrested family; child training; the broken family. Social problems related to marriage and the family.

Sy. 415.—Social Legislation. 2 hours. 2 credits. BRISTOL. Prerequisite: Sy. 301-302 or consent of instructor.

The fields of social legislation; history of social legislation, especially in Florida. Principles of social legislation; study of welfare aspects of our State Constitution and Compiled General Statutes as compared with those of some other states. Suggested changes.

Sy. 421.—Rural Sociology. 3 hours. 3 credits. MACLACHLAN. Prerequisite: Sy. 301-302 or consent of instructor.

Development of rural society; types of communities; characteristics and movements in the rural population; backward and anti-social classes; rural health and sanitation; rural communication, recreation, leadership, religion. Rural surveys. Community planning.

Sy. 423.—Social Pathology. 3 hours. 3 credits. BRISTOL. Prerequisite: Sy. 301-302 or consent of instructor.

The pathology of the individual, of domestic relations, of social organization and of cultural relations. Methods of treatment and prevention.

Sy. 424.—Criminology. 3 hours. 3 credits. BRISTOL. Prerequisite: Sy. 301-302 or consent of instructor.

Nature and causes of crime; punishment; treatment; prevention. Sociological aspects of criminal law and procedure.

\*Sy. 426.—Urban Sociology. 3 hours. 3 credits. Prerequisite: Sy. 301-302 or consent of instructor.

Modern urbanization; urban as contrasted with rural conditions and problems; congestion, transportation, housing, crime areas, recreation, health and sanitation. City planning. Suburban development.

\*Sy. 441.—Advanced Social Theory. 3 hours. 3 credits. BRISTOL.

\*Sy. 442.—Applied Sociology. 3 hours. 3 credits. BRISTOL. Prerequisite: Sy. 301-302.

Theories developed in previous courses applied to a long-term program of improvement. Social investigation as the basis of planning. Regional studies and planning. Outstanding achievements in Europe and America.

\*Sy, 447-448.—Social Research and Investigation. 3 hours. 6 credits.

# GRADUATE COURSES

Sy. 511. -Problems in Child Welfare

Sy. 515. —Social Legislation

<sup>\*</sup>Not offered in 1938-39.

# **SPANISH**

CSh. 33-34.—The Reading of Spanish. 3 hours. 6 credits. DEGAETANI, HATHAWAY. Open in the second year to General College students; open in the first year to General College students of the superior group, and to Upper Division students.

Designed to give students an opportunity to attain, without stressing formal grammar, a moderate proficiency in the reading of Spanish. Texts: Espinosa, Conchita Arguello; Hendrix, A Cultural Spanish Reader; Leavitt and Stoudemire, Elements of Spanish.

Sh. 209-210.—Second Year Spanish, 3 hours. 6 credits. HATHAWAY. Prerequisite: CSh. 33-34 or equivalent.

Review of fundamental forms and uses, with some advance over those of the first year; some written and oral practice in simple Spanish and the use of common idioms; stress on the readings of modern Spanish. Texts: Seymour and Carnahan, A Short Spanish Review Grammar; Baroja, Zalacain, cl aventurero.

Sh. 303.—Survey of Spanish Literature. 3 hours. 3 credits. DEGAETANI. Prerequisite: Sh. 209-210.

Historical outline; reading of representative selections. Romera-Navarro, Antologia de la literatura espanola.

Sh. 304.—Survey of Spanish Literature. 3 hours. 3 credits. DEGAETANI. Prerequisite: Sh. 303.

A continuation of Sh. 303. Romera-Navarro, Antologia de la literatura espanola.

Sh. 309-310.—Advanced Syntax and Reading (Third Year Spanish). 3 hours. 6 credits. HATHAWAY. Prerequisite: The first two years of Spanish or equivalent. The first semester of this course may be taken for credit without taking the second semester of it.

Grammar and syntax, vocabulary growth through word and idiom study, written exercises, and reading from modern classics.

\*Sh. 313.—Advanced Composition and Conversation. 3 hours. 3 credits. DE-GAETANI. Prerequisite: Permission of instructor.

Attention paid to details of pronunciation and style.

\*Sh. 314.—Advanced Composition and Conversation. 3 hours. 3 credits. DE-GAETANI. Prerequisites: Sh. 313 and permission of instructor.

A continuation of Sh. 313. La Calle, Curso avanzado de composicion.

Sh. 323-324.—Commercial Spanish. 3 hours. 6 credits. DEGAETANI. Prerequisites: Any 200 course or permission of instructor. Sh. 323 is a prerequisite for Sh. 324, but may be taken for credit without the completion of 324.

Writing of business letters, circulars and advertisements; study of commercial documents and business practices, stress being placed upon those of Spanish-America.

<sup>\*</sup>Not offered in 1938-39.

\*Sh. 403.—Literature of the Golden Age. 3 hours. 3 credits. HAUPTMANN. Prerequisite: Sh. 303-304.

Study of the leading dramatists and prose writers of the sixteenth and seventeenth centuries. Special attention paid to stylistic peculiarities. Lope de Vega, Amar sin saber a quien; Calderon, Alcalde de Zalamea; Alarcon, Las paredes oyen; Tirso de Melina, Marta la piadosa.

\*Sh. 404.—Literature of the Golden Age. 3 hours. 3 credits. HAUPTMANN. Prerequisite: Sh. 403 or permission of the instructor.

A continuation of Sh. 403. Cervantes, Novelas ejemplares; Quevedo, Buscon.

\*Sh. 405.—Contemporary Spanish Literature. 3 hours. 3 credits. HAUPT-MANN. Prerequisites: Sh. 303, 304.

Lectures and readings on the leading authors of the later nineteenth century and the beginning of the twentieth. Valera, Pepita Jimenez.

\*Sh. 406.—Contemporary Spanish Literature. 3 hours. 3 credits. HAUPT-MANN. Prerequisites: Sh. 303, 304.

A continuation of Sh. 405. Marquina, En Flandes se ha puesto el sol; Quintero, Dona Clarines; Benavente, Los intereses crcados.

Sh. 413-414.—Phonetics. 3 hours. 3 credits. HAUPTMANN. Prerequisite: Permission of instructor.

Phonetics, theory and practice. Navarro, Pronunciacion espanola,

#### GRADUATE COURSES

Sh. 501-502.—Old Spanish

Sh. 503-504.—Golden Age

Sh. 505-506.—Contemporary Spanish Literature

Sh. 507-508.—Spanish-American Literature

#### SPEECH

In addition to the courses listed below the Department of Speech maintains a Speech Clinic which offers individual assistance to students desiring aid in overcoming speech defects. Applicants for this service should communicate as soon as possible with Professor Constans.

CSc. 33.—Effective Speaking. 4 hours. 4 credits. Offered each semester. Prerequisite: C-3. Prerequisite or Corequisite to advanced courses in Speech.

Designed to aid the student through demonstration and practice to talk effectively to a group.

Sch. 301.—Advanced Public Speaking. 3 hours. 3 credits. Constans. Prerequisite: CSc.-33.

Structure, style, and delivery of speeches for formal occasions, with special emphasis on the psychology of audience persuasion. Practice in speaking before off-campus audiences.

Sch. 303.—Argumentation and Debating. 3 hours. 3 credits. HOPKINS. Prerequisite or corequisite; CSc.-33.

A study of the principles of argumentation and their application to issues of current public interest, with special reference to the national varsity debate question. All students expecting to join the debate squad should take this course.

Sch. 304.—Argumentation and Debating. 3 hours. 3 credits. HOPKINS. Prerequisite: Sch. 303.

A continuation of Sch. 303. This course is devoted to meeting the practical problems of debate,

\*Sch. 307.—Interpretation of Literature. 3 hours. 3 credits. HALE. Prerequisite or corequisite: CSc.-33.

Voice training: exercises for developing the effectiveness of the body and voice; oral reading of short stories and narrative poetry.

<sup>\*</sup>Not offered in 1938-39.

\*Sch. 308.—Interpretation of Literature. 3 hours. 3 credits. HALE. Prerequisite: Sch. 307.

Advanced oral interpretation of lyric poetry, dialect readings, novels, plays; arrangement and presentation of public programs.

Sch. 311.—Speech Training for the Radio. 3 hours. 3 credits. HALE. Prerequisite or corequisite: CSc. 33 and consent of instructor.

Study of vocal considerations for all uses of the microphone; writing and presentation of announcements, addresses, and radio continuity; preparation of radio drama.

Sch. 312.—Courtroom Speaking. 3 hours. 3 credits. CONSTANS. Prerequisite: CSc.-33.

Reading and analysis of courtroom speeches by famous lawyers, and presentation of original arguments based upon hypothetical cases. Designed primarily for students who contemplate entering Law. Hicks, Famous American Jury Speeches.

Sch. 314.—Types of Public Discussion. 2 hours. 2 credits. HOPKINS. Prerequisite: CSc.-33.

Study and practice in the methods of group discussion. Special attention given to panel and open-forum discussion. How to use parliamentary procedure.

Sch. 403.—One-Act Play. 3 hours. 3 credits. CONSTANS. Prerequisite: CSc.-33.

The one-act play as a type of drama; the reading and criticism of the best one-act plays by contemporary writers; the technique of play-writing.

Sch. 404.—Dramatic Production. 3 hours. 3 credits. HALE. Prerequisite: CSc.-33.

Consideration of voice, line reading, and the principles of character interpretation; the problem of directing, stage equipment, costuming, lighting, and make-up. Rehearsal of one-act plays.

Sch. 405.—Famous American Speakers. 3 hours. 3 credits. HOPKINS. Prerequisite: Sch. 301.

Speeches of the greatest American authors studied against the background of their lives and the issues of their times, with special emphasis on present political speeches.

\*Sch. 406.—Famous British Speakers. 3 hours. 3 credits. HOPKINS. Prerequisite: Sch. 301.

Speeches of the great British authors studied against the background of their lives and the issues of their times,

# VETERINARY SCIENCE

Vy. 301.—Veterinary Anatomy and Physiology. 2 hours, and 2 hours laboratory. 3 credits. SHEALY and BECKER.

The skeleton; articulations; muscles; circulatory, digestive, urinogenital, respiratory, and nervous systems; endocrine glands; special senses.

Vy. 401.—Livestock Diseases and Farm Sanitation. 2 hours. 2 credits. SHEALY.

Control of the principal diseases of farm animals; dehorning, castration, restraint, and practical methods of farm sanitation.

Vy. 402.—Poultry Diseases. 2 hours. 2 credits. EMMEL.

Causes, symptoms, methods of prevention, and treatment of diseases of poultry.

# REPORT OF THE PRESIDENT OF THE UNIVERSITY

To the Honorable Board of Control of State Institutions of Higher Learning of Florida.

GENTLEMEN: I have the honor to submit herewith the report of the University of Florida for the biennium which has just closed. This report, including detailed statements by the deans, administrative officers, heads of departments, and others, gives a complete picture of all of the activities which have been carried on at the University in the two-year period. I shall attempt to set out high lights and general matters that appear to me to warrant emphasis and special attention. I hope that members of the Board will find time, however, to go over the detailed reports of the other officers.

# GROWTH OF THE UNIVERSITY

The University of Florida has continued to grow and expand in spite of economic recession and more careful selection of students for admission, and without solicitation, either through agents or advertisements. The enrollment steadily increases from year to year, and the percentage of increase becomes greater. Demands on all the agencies of the University and opportunities for services arising therefrom have become greater from year to year. The tendency of many state universities is to become so large that quantity replaces quality as an objective. It is regrettable that the University of Florida has been unable to secure additional facilities and personnel that would enable it to keep pace with the growth of enrollment and other demands.

The expansion seems to be natural and inevitable and in accord with the trends of modern times. Student attendance at the University, exclusive of those in extension and correspondence courses, has mounted from 135 in 1905, when the University was reorganized at Gainesville, to 5,909 students in 1937. There were approximately 4,000 students in 1930, but by 1937 there was an increase in student clock hours of almost exactly 35 percent over this figure. In extension and correspondence courses, the total enrollment has exceeded the preceding biennium by a total of 4,531. Taking formal and informal instruction during the two years were 16,421.

Not only have thousands of students knocked unsolicited at the doors, but the state and its citizens have continued to make new demands for service. For example, without recommendation from the administration of the University, the last Legislature established a School of Forestry and made available a continuing appropriation of a considerable amount in addition to the small sum that had been appropriated for the beginning of this work at the University. It is really surprising that a service

of this kind has been so long delayed in Florida.

There are numerous other desirable public services yet unsupplied. In the last year or two, there has been inaugurated an ambitious program of social security by the co-operation of the Federal Government and the states. The Florida Legislature very appropriately took steps in this matter and a Social Welfare Board is now function-

ing, but there is no place in the state where social workers can be trained.

Naturally, there have been increasing strains put upon the physical plant of the University. Unfortunately, the state has not been able to supply a complete building of any proportions in a period of more than seven years, and a building fund of several hundred thousand dollars, which was borrowed from the University, has never been returned. However, through gifts, Federal funds, earnings and increased valuation the physical plant has been enhanced since 1931 to the extent of \$1,390,-697.54. Of this amount, \$348,476.86 was realized from state appropriations, of which the principal items were \$200,000 for the College of Education and Yonge Laboratory School, matching a gift of the General Education Board, and approximately \$100,000 for the Seagle Building, which today is valued at \$402,000. During this period, the University has received \$513,479.30 from the Federal Government, \$237,682.23 from gifts of a private nature, \$126,452.60 from earnings, and \$164,606.55 from increased valuation. These statements have reference to the plant on the main campus at Gainesville and do not include additions to the agricultural experiment stations. A new Potato Experiment Station was established at Hastings at a cost of \$10,000, and an addition to the Experiment Station at Lake Alfred involved a similar sum of money. Additional farm lands have been acquired through Federal funds.

The growth in the number of students is remarkable in view of the comparatively meagre amount of funds which are available for loans and scholarships to needy students. State scholarships that were hitherto available are no longer tenable because of lack of funds. The Office of the Dean of Students has been successful in providing an unusual number of work positions, considering the small community in which the University is located. Approximately 1,800 students now hold jobs of some kind at the University. Of these, 250 are National Youth Administration scholarships. The Rotary Clubs of Florida have accumulated a revolving fund of \$32,156.89, which has enabled a good many boys to have the advantage of an education. Recently Sears, Roebuck, and Company has established 25 scholarships at the University of Florida, which make available \$100 each, annually; the United States Sugar Corporation established a scholarship as a memorial to the late Senator Fletcher, which pays \$500 annually.

Last year the University suffered one of its greatest personal losses in many years in the passing of the Dean of Students, B. A. Tolbert. His extensive service to the students and their full appreciation have resulted in a memorial of tangible form. The students of the University have established a Tolbert Loan Fund, which began under another name in 1934 with a total of \$300. Chiefly by their own efforts, the students have brought this fund to \$4,800 in 1938.

Inability to provide adequate personnel, books, or other needs of the Graduate School has not retarded student enrollment, which increased from 108 in the fall of 1935 to 158 in the fall of 1937. The degree of Doctor of Philosophy is now offered in Animal Husbandry, Pharmacy, and Chemistry. The growth of enrollment in the summer has been even greater than that in the regular session, on account of the presence of many teachers, seeking additional training. In the first term of the Summer Session of 1936, 119 students registered in the Graduate School. By way of contrast, the number registered in the first term of the 1938 Summer Session was 266.

# **EDUCATIONAL PROGRESS**

A large community of students and an ample plant do not insure scholarship or educational quality. The major objective of the University of Florida for the past ten years has been to improve the character of the work of the students and the efficiency of the instruction of the faculty.

The General College, which has been the outstanding feature of the University's work for several years, has continued to develop; and the transition from the old traditional program to the new has been made smoothly. Furthermore, experimentation is in progress, attempting to present practical and meaningful material rather than to lay foundations in specialized subject matter, to fit the program to the individual student, to offer individual direction and guidance, and to provide experienced and talented teachers for beginning students.

The work of the General College continues to attract the interest of the educational foundations and other agencies dedicated to the study and development of educational processes. Many educationalists from distant points visit the University of Florida and sometimes remain for considerable periods of time, inspecting in detail the operation of the General College.

The Co-operative Plan of Engineering Education, described in some detail in my last report, has been working satisfactorily and there are now eleven industries involved in it. Such a plan of education not only permits alternation of practical experience with the acquisition of theory but offers the possibility of training to students without sufficient funds by enabling them to make some money while they are getting their education. This plan has received favorable attention not only from the various industries of Florida but has also been recommended by engineering educators in other parts of the country. The plan was inaugurated at the University of Cincinnati some years ago and has been operating effectively in Pittsburgh and other places.

Probably there has been no more significant recognition of quality of scholarship at the University of Florida than the granting of a charter and the establishment of a chapter of the oldest and most esteemed of all scholastic fraternities, Phi Beta Kappa. The vote of the 119 chapters, represented in the Triennial Council that gathered in Atlanta last year, was almost unanimous for a chapter at the University of Florida. The formal installation of the chapter took place in February, at which time the President and six Senators of the fraternity and numerous distinguished personages from chapters in various parts of the country participated. Perhaps we have never had such a large group on the campus, interested purely in better and more liberal scholarship.

During the entire history of the University, funds have been inadequate for the developing of the kind of library which is required for the best achievements. Inadequate libraries are the principal reason that we have only three universities in the southern states that have attained membership in the American Association of Universities. Scholars cannot be expected to push back the horizons of learning, if they do not have at hand the results of the efforts of their predecessors and contemporaries. Recently, the accretions to the University Library have been greater but are still incapable of keeping pace with our growth and needs. It is encouraging that there has been organized a voluntary group, who call themselves "Friends of the University of Florida Library," intent upon increasing the facilities and varieties of service. At the end of the biennium, we had the total of 140,884 volumes, of which 101,225 were in the Main Library. The principal branch libraries are the Law, Agricultural Experiment Station, General Extension, Chemistry, and Yonge School libraries.

# NEW ADDITIONS TO THE PHYSICAL PLANT

Reference has been made to general expenditures from several sources in developing the plant. The most important addition during this biennium was the John F. Seagle Building, an eleven story structure, off the University campus and in the business section of Gainesville, which was made possible by the combined contributions of Miss Georgia Seagle, the city of Gainesville, the P.W.A., and the state. The total amount invested is a mere fraction of the value of the completed building. Several hundred thousand dollars had already been expended on the project before the property was acquired at the nominal figure of \$40,000. Into this building have been transferred many of the non-instruction activities thus relieving much needed space on the main campus for classrooms, offices and laboratories.

The University Museum, which had been stored for the most part on account of lack of space, has three floors in the Seagle Building. In time, it should be possible to make a rather creditable display in the new location. Other activities transferred to the Seagle Building include the General Extension Division, the State Plant Board (not a part of the University), the State Mapping Project (an activity of the W.P.A.), the University Board of Examiners, the County Agent and Home Demonstration Agent of the Agricultural Extension Service, a recording laboratory for the Radio Station, and electrical laboratories.

A much needed lecture room, accommodating over 300, has been added to the Chemistry Building, largely through W.P.A. funds.

An important addition has been made to the Agricultural College in the building of a Dairy Products Laboratory, which was made possible through a grant from the P.W.A., supplemented by a sponsor's contribution from earnings at the University. This building is well equipped with the latest and most scientific apparatus and fills a long felt need. It should be the beginning of a group of laboratories dealing with related subjects. A new Poultry Laboratory has also been constructed in the Agricultural College.

The Austin Cary Memorial Demonstration Forest under the auspices of the School of Forestry has been extended to over 2,000 acres, which is the minimum amount required for an accredited School of Forestry. In passing, attention should be called to the fact that it will require a number of years to secure an accredited School of Forestry. There is none now in the southern states, and the accrediting agency does not give a great deal of encouragement. This is mentioned because an impression has been developed that an accredited School of Forestry could be secured by complying with purely mechanical standards in securing certain appropriations, providing for a forest and floor space, and other quantitative factors. These tangible elements are all necessary but the ultimate accrediting of the School of Forestry will depend upon results and the quality of work accomplished. It will require some years to test these latter.

In the Engineering College, an hydraulic laboratory has been erected and is nearing completion. This is one of the most substantial structures on the campus and will constitute a complete and valuable asset to the University and the state. The cost of the building was approximately \$70,000 and it has been erected with W.P.A. funds.

A University dining room, which has been in process of construction through relief agencies for the whole biennium, is almost completed. This room connects the Florida Union and the kitchen and offers a suitable place for formal dinners and luncheons. At other times it is used by students for recreational purposes. For the past year a shortage of large classrooms has required its use for lectures.

Numerous other minor additions have been made to the plant which are described in detail in the reports of the Deans and other administrative officers.

# CHANGES IN THE CURRICULA

In an era of social and economic revolution, there is placed upon educational institutions an insistent, if not imperative, demand for readjustment of courses of instruction. Heraclitus, the ancient Milesian, could find no better justification of his doctrine of change than the world in which we live today. Most of the changes have been precipitated by factors that are beyond control. For example, the changing agricultural economy of the United States is inevitable because of different relations to other nations affecting world markets, the loss of the open frontier, the

dwindling in the size of farms, as well as the wearing out and erosion of lands, to mention only a few of the factors involved.

In the field of social sciences, we are facing the most severe test of adjustment. Governments have been subjected to crucial tests, and more apprehension exists concerning government than has existed in centuries. Many scholars have been driven out of their sequestered haunts and have abandoned contemplation of classical and historical problems for a vigorous attack upon contemporary social and economic situations. Unquestionably, numerous causes contribute to the protracted economic depression, political instability, and social unrest that has beset us in recent years. Whatever the various causes may be, certainly the universities are confronted with one of the gravest responsibilities of all time in seeking answers to the perplexing questions that are being propounded.

The curriculum of the General College at the University of Florida is woven around the vital and challenging situations that belong to contemporary life. Furthermore, the reorganization of the General College curriculum has necessitated modifying the curricula of the colleges of the Upper Division for purposes of articulation and satisfactory results. Changes have been worked out in most of the advanced courses which we believe are in harmony with most recent educational philosophy. Finally, many changes have been made to meet demands made upon us. already mentioned, and to widen the services of the University and meet the needs of

challenging conditions of a transforming social and economic era.

# AGRICULTURE

Agriculture has always played a foremost part in the welfare of Florida. Just now it is involving increased application of research, and we are confronted with a complexity of problems greater than those of the past. The Federal Government in its present budget is expending one billion, six hundred million dollars through the Department of Agriculture. The new action programs which are being put into effect by the present administration at Washington have created the necessity of working out future correlation and co-operation between the United States Department of Agriculture and the states and, particularly, the Land-Grant Colleges. The President of the University at present is a member of the Executive Committee of the Association of Land-Grant Colleges and Universities. During recent months the Executive Committee has held frequent conferences with the Secretary of Agriculture and other officials of the Department, and a plan of co-operation has been developed that should have a very salutary effect on the future of agriculture.

The Agricultural Experiment Station and the Agricultural Extension Service have carried on with increased energy during the biennium. The Experiment Station has investigated one hundred and eighty-two major agricultural problems in Florida. Several studies in agricultural economics have been completed and further studies

are in progress.

A service that has been extended and which we believe to be peculiarly valuable to the farmers of Florida is the weather forecast which is now made available for the whole peninsular region.

The extension programs are now carried on in all the counties in Florida, except seven. Some counties have County Agents but do not have Home Demonstration Agents.

Another important part of the agricultural program has been the education carried on over the University Radio Station. Three hundred and thirteen Florida Farm Hour programs have been given in the past year and in February the 2700th anniversary program was celebrated. Radio has just begun but it has already proved itself to be the most effective, instantaneous medium of general communication that we have. The Florida Farm Hour programs are built around Florida agricultural problems, since the National Farm and Home Hour is not adapted to Florida conditions. We have peculiarities of climate, crops, soils, diseases, and many other things that are not common to other parts of the country. An effective solution of problems growing out of these characteristic conditions can only be worked out by our own Agricultural services, and the State and University Radio Station is the only available medium for prompt communication.

In view of the increasing importance of agriculture, it is planned to strengthen the entire agricultural set-up and particularly the teaching division of the College of Agriculture. Plans have been made for this program and we hope for real progress in

the immediate future.

# RADIO STATION, WRUF

We have already cited the value of the Radio Station to our agricultural services. A word should be said about the general value of radio in education and particularly the many benefits accruing to the state and University by the operation of Station WRUF. Educational radio stations have operated under great handicaps because radio in this country is largely dominated and controlled from the commercial point of view. Various attempts have been made to deal with the situation. Most of the educational radio stations, however, have been driven out. Money making, as elsewhere in American life, enjoys the right of way on the air. Education, public welfare, and other matters of moral and intellectual significance have had to give way. For example, educational stations are not permitted night time because this constitutes the most valuable period for advertising and sponsored programs. Education has been compelled to take what is left when the most valuable hours have been sold. Repeated attempts have been made under the leadership of the Commissioner of Education, the American Council on Education, National Council on Education by Radio, National Education Association, and other organizations interested in educational broadcasting to secure special wave lengths or increased opportunities for educational programs. These efforts have been thwarted in the past but are now beginning to gain some headway with Congress. President Roosevelt recently appointed Mr. McNinch, who is going over the entire situation and apparently is aware of the educational and moral aspects of radio.

The operation of Station WRUF constitutes a dilemma in that some persons feel that being as powerful and as well-located as any station in the state, it should be independent of state appropriations, while others, particularly those interested in other stations, feel that no sponsors should be sought and the station should be operated entirely from state funds. Such a conflict appears to be inevitable in all matters where states are brought into competition with municipalities or private agencies. WRUF has been in operation for ten years, and I have no hesitancy in saying that it has been of incalculable value to the University and the state. Operated as a commercial station, it would still have value but most of the benefits which

now accrue to the University would disappear. Some of these are:

1. An agency for the dissemination of facts and truth without bias of any kind would be superseded, and the station would become the medium for the dissemination of propaganda, misrepresentation and statements colored in the direction of the desires of the sponsors. Products such as patent medicines, alcoholic liquors, etc., would seek to be exploited, as on other commercial stations. The nature of these programs would complicate student life at the University.

- 2. As already indicated in connection with the agricultural programs, only the least desirable time would be made available for educational broadcasting and the best hours would be sold for advertising.
- 3. Programs adapted to the needs of Florida, such as the Florida Farm and Home Hour, would necessarily be replaced by other programs which are not suited to the people and conditions of our state.
- 4. Station WRUF is a very important asset to the College of Engineering, particularly to those students who are studying in the fields of electricity, radio, and kindred subjects. It provides for these students laboratory facilities that are exceptional and which would be lost if the station is taken away from the University.
- 5. Closely related to its laboratory functions is the value that arises from the station as a work shop and school, producing experts in practical radio broadcasting. More outstanding announcers have been trained in WRUF than in any other station in the country. Students trained here are now found in leading stations throughout the country, including New York, Washington, Chicago, Cincinnati, Louisville, Dallas, and other places. The Florida men scattered over the country in radio stations are an indirect and imperceptible but powerful asset to the state and the University.
- 6. WRUF has been operated for a small sum of money in comparison with stations of similar power and character. This is made possible because the faculty, students and organizations of the University, such as the Glee Club, Band, and Orchestra, are available without cost or at very nominal amounts.
- 7. WRUF is now operated in an attempt to promote the best interests of the state and its people. If control is taken over by some other agency, there is no guarantee that it will be operated in the future for these purposes, particularly if this control goes beyond the borders of Florida.

#### PRESENT NEEDS OF THE UNIVERSITY

It would require much space to catalogue the specific needs of the University at this time. The rapid growth of the student body; new demands for research, created by modern problems; the comparative lack of wealth in the region served by the University; and financial difficulties encountered in the state government are among the principal reasons why a great many unsatisfied wants have developed in recent years. The inability of the state to provide for adequate plant expansion has already been cited and prodigious efforts have been made to escape from the consequences of this situation, yet there are whole colleges on the campus with no place that they can call home. The College of Business Administration, for example, second in size and enrollment, has no building in which to center its activities. Its classrooms and offices are scattered through the buildings of other colleges and even dormitories.

As bad as the building situation appears, it is not comparable to the need of personnel. As a result of reduced appropriations in recent years, a large part of the faculty and staff have been sent away. At one time, more than one hundred positions were abolished. During the biennium, there have been some restorations but not sufficient to bring the University to the point where it was before retrenchment began. At the present time, the members of the faculty are carrying teaching loads which on the average are one-third heavier than other colleges of the United States and are paid salaries that are on the average one-third less. In no period of the University's existence have so many of its staff left it for more lucrative and attractive positions as during the biennium just closed. Restorations and increases

in the staff and salaries should be made with all possible speed, if the present quality of work is to be maintained. Florida produces a great deal of superior natural talent. At present much of this superior talent is being drained to other parts of the country because of insufficient encouragement and support here. This, I regard to be the most crucial situation that now confronts us.

The satisfaction of needs of the University can only be secured through additional funds. It will be contended by some that additional funds are unreasonable in our present situation. A few words in general might be revealing. Contrary to general belief, the amounts of money which are expended on education are small in comparison to some other things which are not only less valuable but in some instances might me regarded as harmful. For example, more money is expended on tobacco than on education. One would hesitate to challenge expenditures on the improvement of beauty, but more is spent upon cosmetics and related adjuncts to make feminine appeal than is expended upon education.

It is natural that when depression strikes and expenditures are reduced our people begin to cut off at the points where they normally spend the least. The first cuts are made on the churches, benevolences, community chests, and education. In 1936 the national income was 61% greater than in 1932. This enabled the American people to increase their expenditures in certain directions, some of which were as follows: jewelry, 25%; Army and Navy, 30%; theatres, 41%; cigarettes, 48%; automobiles, 203%; whiskey, 220%; steel production, 248%; radio, 302%; and beer, 317%. While these increases were taking place, there were certain decreases among which were churches, 30%; benevolences, 29%; community chests, 24%; and colleges and universities, 18%. I am not passing judgment on comparative values involved in these expenditures but I contend that these facts and figures, furnished by most reliable agencies, show that our people are able to spend more for education, religion, and some of the things that have to do with the spiritual and moral welfare of society.

I offer these figures on a national basis because complete figures for the state of Florida are not available. What we have shows, unquestionably, the trends are similar in the nation and in Florida. In a recent study, Wealth, Children and Education by Norton and Norton, the relative ability of the state of Florida to finance education, based on its potential revenue under a modern tax system and the number of children of school age, is .81 as compared with 1.00 for the United States as a whole. Florida is thus seen to be below the average state in its ability to support education, but is much more able than most of its neighbors. For example, the index figures for North Carolina are .42; Georgia, .36; South Carolina, .33; Alabama, .31; and Mississippi, .30 as compared with 1.00 in the United States.\*

The study also reveals comparative efforts being made by the states in proportion to the ability they possess to support education. Florida ranks low in the effort that is being made to support its school system. Using 1.00 as an index for the United States, Florida's effort is .91. The states mentioned with much smaller potential ability are making efforts correspondingly greater: North Carolina, 1.12; Georgia, .84; South Carolina, 1.08; Alabama, 1.05; and Mississippi, 1.31.†

A study made by President H. C. Byrd of the University of Maryland, recently, shows cost per student in state supported colleges and universities. Average cost per

<sup>\*</sup> Norton, John K. and Norton, Margaret Alltucker. Wealth, Children and Education. New York, Bureau of Publications, Teachers' College, Columbia University, 1937, p. 34.

<sup>†</sup> Ibid., p. 54.

student in state institutions for the United States is \$301 per student; at the University of Florida it is \$224. There are only two state universities with a per capita cost below Florida.

#### BUDGETARY REQUIREMENTS

Before closing this report, a brief summary of the financial requirements of the University in the immediate future would seem enlightening and helpful. largest appropriation which the University has received at any time from the state was in 1930-31. In that year the total appropriated by the Legislature for the operation of the University proper was \$851,384.50. This is exclusive of the Experiment Station, Agricultural Extension Service, and the Radio Station. Subsequently we were compelled to take severe cuts with the onset of the depression. In 1933-34 the appropriation was \$561,000. At the beginning of the present biennium, an effort was made to restore appropriations approximately equal to those of 1930-31, but this was not quite consummated. In the year just closing the appropriation for the University was \$810,000, exclusive of a special continuing appropriation for the establishment of a Department of Forestry by the last Legislature, for which purpose \$32,500 was appropriated. We have made long and careful study of our needs and economies, and we believe that an appropriation of \$945,000 is the least that could be appropriated in the next biennium without sacrificing the quality of work now being done at the University or without abandoning some of the activities or departments. would be an increase of approximately  $16\frac{1}{2}\%$  over the present appropriation. Operating on this amount would mean that we would have about 14% increase over what we had in 1930-31, although at the present time the enrollment is 59% over that of 1930-31 and probably will be even greater in the next biennium, and the plant, upon which approximately \$1,500,000 has been expended since 1930-31, is 30% greater than it was at that time, thus involving considerably more cost of operation, maintenance, heating, lighting, janitor service, etc.

I cannot urge too strongly the importance of restoring the salaries of the faculty at the earliest possible moment, if we are to prevent the continuous drag of our people out of the state. A study made by a qualified committee indicates that during the period from 1930-31 to the present, salary increases at the University have not

kept pace with the increases in the cost of living.

The demands made upon us for solution of problems of research and for new fields of study are increasing each year. The School of Forestry was added without request. The reorganization and strengthening of the College of Agriculture is imperative, or I feel that we are going to face a great deal of dissatisfaction and criticism at this point. As previously indicated, there is great need of provision for a training school for social workers at the University of Florida, there being no school of this kind in the state. These are only a few of the new services needed for the development of the state's welfare.

For the Agricultural Experiment Station we received an appropriation of \$381,-895 in 1930-31. At the present time, the annual appropriation is \$414,040. Recent Legislatures have shown a disposition to establish new branch experiment stations in various parts of the state and to increase appropriations for branch stations and field laboratories with the result that the Main Station at Gainesville, through which all the sub-stations and laboratories are fed, has been sacrificed and its appropriations reduced. Unless these trends are checked, the future for agricultural research has the appearance of wasting a considerable amount of money. I strongly recommend that no more branch stations or field laboratories be created and that the Main Station at Gainesville be put on its feet. The building in which the Station has been located has

been condemned for twelve years and all attempts to secure relief from the Legislature have been futile. I recommend that an annual appropriation of \$441,929 for the Agricultural Experiment Station be made for the next biennium. This would be about 16% above the amount available in 1930-31 and 6.7% above the present appropriation.

In 1930-31, the Agricultural Extension Service received an appropriation of \$89,352.25 from the state. At the present time, it is \$88,000. I would recommend an increase to take care of demands made upon us by the greatly enlarged program, necessitated by co-operation with the Federal Government, as well as other needs, of \$101,608. This would be about 14% over the amount available in 1930-31 and

15 1/2 % increase over the present appropriation.

In conclusion, I wish to express my appreciation of the continued confidence and support of the Board of Control and the Board of Education, without which I think I would have before now relinquished the task of attempting to build a University amid so many discouraging circumstances. I wish to speak of the high morale and evident co-operative attitude on the part of the faculty and staff. Perhaps the most encouraging of all factors in a trying situation is the improvement in the spirit of the student body. After all, an institution of learning lives, moves, and has its being in the student body. This is the final and supreme test of progress and, so measured, I doubt if any University has progressed more satisfactorily in these crucial times than has the University of Florida.

Respectfully submitted,

JNO. J. TIGERT,
President, University of Florida

#### REPORT OF THE DEAN OF STUDENTS

To the President of the University.

SIR: During the past biennium the Office of the Dean of Students has had some changes of personnel on account of the sudden and lamentable death of Dean B. A. Tolbert. After Dean Tolbert's death I served in the capacity of Acting Dean until May, 1938, at which time I was made Dean of Students. Mr. J. Ed. Price, who served as Acting Assistant Dean of Students during the year 1935-36, became Assistant Dean upon the appointment of a permanent Dean; and Mrs. B. A. Tolbert, who was for several years Secretary to the Dean of Students, resumed her position after the death of Dean Tolbert.

The activities of the office have continued with the same objectives as initiated and carried on for a number of years under the direction of Dean Tolbert. Briefly stated, an attempt has been made to secure the co-operation of students and faculty in improving conditions under which the most effective education may take place. These conditions have had to do with the relationship between students and faculty in attempting to create an *esprit de corps* and morale conducive to wholesome student life. As a result of the depression a great deal of time and effort has been spent in helping students work out financial problems in the form of employment, loans, scholarships, and various kinds of self-help.

A majority of the time spent in the Office of the Dean of Students is spent in dealing with students in personal conferences concerning matters that students do not ordinarily feel they can take up with instructors or the deans of the colleges in which they are registered because they have to do with matters outside of the classroom. Our records indicate that approximately half of the members of the student body

come in for conferences at some time during the year. These problems vary, but all are important to the student and merit patient and careful consideration on the part of someone. Council, guidance, and information are given, but the attitude is maintained that the problem is, after all, the student's and that his own effort must provide the solution. The student is made to feel that when he entered college he undertook a job that demanded the best of his own resources.

Perhaps the next important function of the Office of the Dean of Students has to do with student organizations. Of these, the most important is the student government organization, which consists of the student body President, the Executive Council, and the Honor Court. This organization touches every student in some way. It exercises a very significant influence upon the entire University community. The principles upon which it operates have become traditional, and the student body has been most successful in selecting high-grade representatives to carry on the duties of this organization. The student body leaders have shown a splendid attitude of co-operation with the University Administration in carrying out the policies of the University and in propogating public-spirited policies on the campus and in the community of Gainesville.

The social fraternities have shown a slightly proportionate decrease in their membership during the past two years. The 1935-36 report of the Dean of Students stated that slightly less than half of the students held membership in some social fraternity; at the present time, slightly more than one-third of the student body holds membership in some social fraternity. This decrease can perhaps be accounted for by the depression. Social fraternities have a very definite place on the University of Florida campus. They co-operate with the Administration in many helpful ways, and as a group exert a helpful and wholesome influence, not only as social organizations but also from the standpoint of scholarship and guidance to their members. A major part of all student social activities of the University are conducted by these organizations, and all matters pertaining to the social life on the campus are handled by the Office of the Dean of Students and the Committee on Student Social Affairs. The Office of the Dean of Students this year is making some studies in an attempt to co-operate more closely with the fraternities in their financial program. In this study we have interviewed a large number of fraternity leaders on the campus, faculty advisers, national traveling secretaries, and deans and advisers of men in other institutions and have made a rather detailed scrutiny of the financial advisory assistance in operation on other campuses. We do not believe it is wise for the Administration to attempt to take over the financial program, but we do believe that the Administration ought to make available council and guidance in an attempt to help the fraternities work out their financial programs.

An increasing number of professional and honorary fraternities are being organized to appeal to definite groups of students. There has been a tendency towards over-organization and overlapping in this field. The Committee on Fraternities, Societies, and Clubs, of which the Dean of Students is chairman, has investigated each organization asking for admittance to the University campus in an attempt to check this over-organization and overlapping. Two or three have been denied admission this year because the Committee felt that the field was over-crowded.

As mentioned above, one function of the Office of the Dean of Students concerns employment, self-help, scholarships, and loans. Approximately 1,800 students at the University have held some kind of a job during the past year. These jobs vary all the way from campus laborers to graduate assistants. The National Youth Administration has appropriated funds that have made it possible to employ approximately

250 students during the year 1937-38. All of the appointments, time sheets, and payrolls for the N.Y.A. are handled by the Office of the Dean of Students. More than three applications are received for every possible N.Y.A. job. This involves a great deal of investigation in an attempt to find the most needy and deserving boy for the job. The policy has been established that no student shall be employed on any job or given any help in a financial way unless he is making satisfactory academic progress.

During the past biennium the student loan fund has more than doubled. Starting out in 1934 with \$300, it has grown to a total of \$4,800 during the past year. A total of 270 different loans amounting to \$6,550 were granted during the year 1937-38. These loans ran all the way from \$5 to \$50, and in many instances the granting of these small loans determined whether or not a student would be able to remain in school. During the past year the students through their own efforts raised \$1,250 for this loan fund. Plans are being worked out by various student organizations to continue to increase this fund during the coming year. Since the fund was originated by the late Dean B. A. Tolbert and the Interfraternity Conference, it has been named the Tolbert Memorial Loan Fund.

On account of the lack of dormitory space for housing students, the matter of inspecting and furnishing information concerning rooming houses has become an important function of the Office of the Dean of Students. In co-operation with the State Hotel Commission an effort has been made this year to make a more careful inspection of the places where students live. Some pressure has been brought to bear in an attempt to raise the standard of rooming houses. A careful inspection is made three times a year, and conferences with landlords and landladies on the problems of conduct take place frequently.

Much of the work of the Administration is carried on through various kinds of committees. The Dean and the Assistant Dean of Students hold membership on thirteen committees. It is through this committee work that contacts are made and maintained in the various phases of university life.

With the establishment and operation of Florida Union, student activity life has been very much simplified. The Dean of Students is a member of the Board of Florida Union and is able to help direct in an advisory capacity much of the student activity life.

Contrary to the belief of many people, the Office of the Dean of Students is not primarily a disciplinary office. Only a small part of the work of this office is punitive. It is rather remarkable that with a student body of over 3,200 the Discipline Committee of the University met only once during the year 1937-38 and only one student was involved. We believe that, as a result of the intimate contact with individual students and student organizations, much of what might be negative and disciplinary conduct is avoided by substituting a positive program of student activity. As a rule most of the disciplinary trouble is caused by a very small number of students. It is our belief that, if we can locate this small number, we can either influence them to positive conduct or have them resign from the University.

In closing permit me to say that whatever success the Office of the Dean of Students may have in dealing with students is due in a large measure to the co-operative attitude on the part of other administrative officers and to the President of the University, who has always shown a sympathetic and understanding attitude towards both students and faculty.

Respectfully submitted,

R. C. BEATY, Dean

#### REPORT OF THE BUSINESS MANAGER

To the President of the University.

SIR: I have the honor to submit herewith a report of the Business Office and its subsidiary activities for the biennial period ending June 30, 1938.

This report includes a complete financial statement and balance sheet for all colleges and departments of the University, the Agricultural Experiment Station and Agricultural Extension Service, as well as such auxiliary activities as the Cafeteria, dormitories, and the Bookstore and Soda Fountain. More detailed reports are printed annually as exchange publications, and a limited number of copies are available for general distribution.

Budget recommendations for the Business Office and Maintenance Department for the biennium ending June 30, 1941, have been submitted to you with explanations as to small increase for salaries, upkeep, and plant maintenance. The amount is small in comparison with the increased cost of living. The additional help needed to operate the buildings on the campus is noted elsewhere in the report. Our records show an increase of approximately \$725,000.00 in plant investment for lands, buildings, and improvements secured during the past two years.

#### **BUSINESS OFFICE**

On account of increased enrollment and changes and improvements in all colleges and departments of the University the Business Office has had increased duties imposed upon it. This additional work has been required in collection of student fees, rentals, etc., purchasing of supplies, and preparing the necessary vouchers for payment of all bills. Additional help has been provided in the budget for the last half of the biennium and by student assistants secured from N.Y.A. funds.

The two-term summer school, with enrollment larger than the regular session, has made top-speed operation necessary throughout the year.

In order to assist in the vast amount of detail, improvements have been made in the accounting system, and steps are being taken to place a portion of this work upon the punched card system of accounting provided by the International Business Machines Corporation. This is being done in accordance with suggestions of the Auditor to the Board of Control, and in such a manner that the system will meet all of the requirements of the National Committee on Standard Reports. When completed we believe this arrangement will materially assist in furnishing prompt and accurate information for the numerous reports and budgets this office is called upon to prepare.

#### MAINTENANCE DEPARTMENT

#### BUILDINGS

With increased funds available for this department during the past year of the biennium, much has been accomplished.

The construction of the John F. Seagle Building was completed, making more adequate and modern quarters for the following departments:

Engineering Experiment Station General Extension Division The Museum Radio Remote Control Studio Florida Mapping Project.

Science Hall, the former site of the Museum, has been remodeled into class rooms and offices.

Unfinished buildings, which were being used while still under construction during the previous biennium, have been completed as noted:

University Banquet Hall, by expenditure of	-	_	-	\$12,456.14
Florida Union Auditorium, by expenditure of	-	-	-	1,522.70
Cafeteria Kitchen, by expenditure of	_	-	-	1,333,30

Through a P.W.A. grant the Dairy Products Laboratory was erected. This is a one-story, brick structure costing \$58,000.00 and is fully equipped to carry on research in manufacturing of dairy products.

Also W.P.A. building projects have been approved for construction of new buildings and additions to others as follows:

Auditorium in Chemistry-Pharmacy Building, seating 325 students, approximate cost - \$50,000,00

A Hydraulic laboratory for Engineering College is nearing completion, costing Small brick laboratory, adjoining the Central Heating Plant, to take care of equipment	70,000.00
purchased from Drake Estate, approximate cost	8,000.00
Other improvements include:	
Remodeling Section A and Section F Thomas Hall, @ \$15,000.00 each	\$30,000.00
Partitions and other necessary installation on 10th and 11th floors of Seagle Building -	2,000.00
Construction of Faculty Dining Hall at Cafeteria	4,000.00
Construction of astronomical observatory	200.00
Fourth floor of Horticultural Building completed to furnish classrooms and offices to	
house the School of Forestry	10,000.00

Other less extensive improvements include painting, plastering, and installation of linoleum and tile floors in the Law Library and hallways and basement rooms of Language Hall.

For the Experiment Station we report building and improvements on campus and branch stations as follows:

Flastings Potato Disease Laboratory Building -	-	-	\$10,000.00
Citrus Station, Laboratory Building Addition -	-	-	10,000.00
Land, Bankhead-Jones, Farm Work	-	-	3,300.00
Drying Shed, Pump House, Poultry House, etc.	-	-	1,200.00

#### GROUNDS

To this department has fallen the responsibility of landscaping the grounds around the recently completed Florida Union Building and the Cafeteria kitchen and the beautification of those sections of the campus where building activities had been carried on. The patio of Florida Union Annex has been landscapped with exotic plants and grass, and colored tile has been laid, making an effective improvement.

One of the major improvements was the addition of five acres north of the Dairy Products Laboratory. A water system and walks were laid and this entire area landscaped; approximately 1,000 trees and shrubs were set out and the entire plot planted in grass.

Sidewalks, either the cement or the crushed stone type, have been laid around the Chemistry Building, Student Union Building, Dairy Laboratory and Horticulture Department offices, the Post Office, and the Barracks and from the Agriculture Building to Science Hall.

Miles of hedge and other shrubbery have been put out on the campus, particularly in the vicinity of the Chemistry Building, the Infirmary, Science Hall, P. K. Yonge Building, the Radio Station, and around Florida Field. Live Oaks, slash pines, azaleas, and bamboo clumps have been placed advantageously to beautify the campus. Most favorable comments have been made by visitors on this important development.

To provide more adequate watering system, noted in my last report, plans and specifications for an underground sprinkling system have been drawn up and work as

a W.P.A. project is now under way. The water for this sprinkler system will be pumped from nearby campus sinks.

#### ELECTRICAL MAINTENANCE DEPARTMENT

The department has maintained all electrical equipment on the campus. Through careful inspection, proper lubrication, and adjustment, and by giving instruction in correct operation, the cost of repairs has been very small. Even more important than this is the fact that the electrical service has been adequate and continuous, and hazards have been reduced.

The addition of new equipment and some improvements in lighting facilities have caused an increase of approximately 100,000 kilowatt hours of electricity used in 1937 over that used in 1936. The amount paid for the current, however, is still more than \$4,000.00 less than was paid in 1930.

The electrical installation made by relief agencies has been operating very satisfactorily. Only a very small percentage of the expense of the department is required for maintaining this portion of the electrical plant. Recommendations:

Many of the buildings need rewiring.

The telephone service is continually becoming slower on occount of the overload on the

present operators and the need of additional equipment.

The continued increase in the use of electricity indicates the increase of electrical equipment in use. It is far cheaper to continue in the policy of keeping equipment properly adjusted and lubricated than to neglect it. The continued increase of equipment means that additional maintenance electricians are necessary.

#### MILITARY PROPERTY

Certain recent changes in the Military Supply property room have materially increased the efficiency in handling the U. S. Government property. Uniforms and equipment are now being issued more systematically and with practically no loss because of the records set up and kept by the Assistant Military Property Custodian.

To provide greater comfort for the students, the basic wool uniforms have been changed to cotton khaki. The Officers' dress uniforms have been changed from wool to army regulation white twill. The change goes into effect this fall.

Recently the four types of horse-drawn 75's formerly used in the Military De-

partment have been replaced by twelve motor trucks.

Government ordnance, uniforms and supplies in our keeping now amount to approximately \$218,500.00.

New sheds and target ranges have been constructed for pistol practice.

#### **CAFETERIA**

The University Cafeteria has, since the completion of the much needed sanitary kitchen, rendered more efficient and economical service to the students.

For several years this department has operated at a loss due to insufficient patronage. During the past year with a new ruling requiring students living in the dormitories to purchase not less than four \$15.00 meal tickets per semester, we have been able to give better service and better quality food without acquiring a deficit. The increased volume was sufficient to absorb the average overhead expense.

We feel that the Cafeteria is rendering a great service to students who do not take their meals there, because it has a tendency to hold prices charged for board to a minimum in the majority of off-campus boarding houses. With probably the largest number of students in the history of the University working their way, partially or wholly, through school, increased costs for sustenance would create a hardship and

compel many of them to withdraw from school.

The success of this type of service is due largely to the efficiency of the dietitian in charge. She has a background of training both in college and commercial cafeteria work that has ably fitted her for the success attained since taking over the management, January 1, 1937. She has as her assistant a graduate of the Florida State College for Women. I have no recommendations for improving this department. If the W.P.A. loan and grant projects for six additional dormitory units now applied for are approved, however, we will need an addition to the dining room and counter space for satisfactory service.

During this biennial period we have added nearly \$3,000 in equipment to the

Cafeteria

The walls and wood-work throughout the Cafeteria have been redecorated, and the window openings have been changed for installation of more satisfactory screens.

We have about 50 or 60 students employed as waiters and bus boys, for which service they are allowed board. These students are selected with the co-operation of the Dean of Students, who is Chairman of the Self-Help Committee, on the basis of their financial need and scholastic average. Every student worker must maintain a C average if he is allowed to render such service in this department.

#### DORMITORIES

For the past several years it has been impossible to meet the demand for dormitory rooms. All of the sections in Thomas Hall have been rehabilitated into modern fireproof rooms from funds which have accumulated from rentals, with the exception of Section F, which is now being remodeled and will be ready for occupancy at the beginning of the fall term.

Additional dormitory facilities are being provided by W.P.A. projects, which have been approved and pending. This takes care of a very serious need, which was mentioned in my last report. With the completion of these projects, the University will have facilities to accommodate approximately 1,100 students. This will provide the additional dormitory space required to meet the demands of incoming freshmen—a

need stressed in previous reports.

This year we have employed Mr. H. E. Brunson as Dormitory Supervisor. His duties are to supervise all janitor service and other necessary work, as well as the repairs, replacements, etc. Each section of the dormitory is in charge of a monitor under the administration of a head monitor, who is the president of the Student Body and is directly responsible to the Dean of Students. The morale of the students living in the dormitories has been much improved under this set-up.

The dormitories are under the care of three housekeepers and twelve colored maids,

who make the beds and clean the rooms daily.

During the summer the dormitories are used exclusively by women students, with preceptresses in charge of each section directly responsible to the Dean of Women, who has her living quarters in the new dormitory.

We also have two units of Government Barracks secured from N.Y.A., housing

approximately twenty-five students at a very nominal cost.

#### BOOKSTORE AND SODA FOUNTAIN

This department is operated on a non-profit basis, supplying text books, stationery, and other supplies to students at the lowest possible cost. By close co-operation with the faculty, it is possible always to have on hand sufficient quantities of textbooks,

thus avoiding the inconvenience of delay when registration is completed and class

work begins.

The bookstore is also co-operating with the students in the purchase of and re-sale of second hand books, paying higher prices than could be secured elsewhere. The soda fountain and lunch room add to the service of this department, employing about 20 students, who are selected on the basis of financial need and scholastic ability. Since taking up quarters in the Banquet Hall Annex to Florida Union, we are able to serve more efficiently the students using the recreational facilities of this building.

To correct irregularities and to improve the morale and service, changes have been made in the personnel. We have employed, on a part time basis, Mr. Harold Riker, M.A., of the University, who will serve as Administrative Assistant as well as Assistant Director of the Florida Union. With this appointment and the employment of a new experienced lunch and fountain expert, we feel that this department is placed on a firm footing and will be in position to render greater service to our student body.

#### DUPLICATING DEPARTMENT

Under the careful management of Mr. Charles Wimer, the Duplicating Department continues to render an economic service to all University departments and organizations at cost plus a small overage for replacement of equipment. Much of the mimeographing work in the entire institution has been centralized in this department at a considerable savings both in cost of operation and quantity purchase of supplies.

The department also produces work by use of multigraph and multilift machines,

many University forms being printed thereon.

During the past year \$2,000.00 has been expended to secure some high grade camera equipment in connection with reproduction work by a photo off-set method.

To provide for additional office space in Language Hall, this department has been moved to the old Barracks Building. This change has provided some room for expansion in the department, but does not fully meet its requirements because of the increasing amount of work they are called upon to do.

In conclusion let me call attention to the figures showing increase to plant investment since the last report of \$725,000.00, including the Seagle Building the greater

part of this amount being available from earnings and W.P.A. funds.

It appears our drastic need for dormitories will be taken care of by the W.P.A.

projects approved and pending.

We need a new Administration Building and more class room space for the constantly increasing student enrollment. The graph indicates the per cent of increase of enrollment as compared with the per cent of increase in funds from state and other sources.

I also submit herewith a graph showing how the operating dollar of the University was provided and spent during the first year of this biennial period. The figures for the second year will be approximately the same.

Respectfully submitted,

K. H. Graham, Business Manager

1937-38	-	- †3761	148	857,500.00	100.4	1	,083,807.00	116.5

<sup>\*</sup> The adjusted enrollment each year is the sum of one-half the number enrolled the first semester plus one-half the number enrolled the second semester plus one-fourth the number enrolled each summer term. This is a very conservative method of computing enrollment, and gives a smaller figure than obtained by the usual method of counting the aggregate number of individuals registered.

† This figure was arrived at by assuming the same enrollment for the 1938 Summer Session as that for 1937. Applications now on hand are in excess of those for the 1937 Summer Session by about 600. The enrollment for the year 1937-38 will probably be approximately 3900.

#### REPORT OF THE REGISTRAR

To the President of the University.

SIR: As Registrar of the University of Florida I have the honor to submit the following report for the regular sessions of 1936-37 and 1937-38 and the summer sessions of 1937 and 1938. In compiling this report I have included only the most pertinent information for the periods mentioned and a summary of enrollment and graduation figures for the entire period of the University's operation in Gainesville.

As in the last two reports the outstanding feature of the statistical data submitted is the increase in enrollment and teaching loads. During the past year the Office of the Registrar has begun a study of instructional costs. While a lack of comparable data for preceding years prevents a detailed analysis of trends, one important fact is revealed by the study where comparable information was available. This concerns the index of cost per student credit hour and is shown in Table IV.

#### ENROLLMENT

In the following tables the enrollment by schools and colleges is shown. In making comparisons with former years one should remember that with the inauguration of the General College in 1935-36 Freshman and Sophomore students were not included in enrollment figures for the other colleges as before.

TABLE I. ENROLLMENT FOR THE BIENNIUM

	1935-36	2,983	1936	1,706	4,689
	1936-37	3,069	1937	2,136	5,205
	1937-38	3,278	1938	2,631	5,909
		.,,	1000	2,001	

<sup>\*</sup> These figures include the enrollment in the demonstration school, except for the Summer Sessions of 1933, 1934, 1935, 1936, 1937, and 1938.

#### TEACHING LOADS

The trend in student clock hours taught at the University from 1930-31 to 1937-38 is shown in Table III. It will be observed that the load has increased nearly 35% during the period for which data is available.

TABLE III.	TREND IN STUDENT	CLOCK HOURS	
Regular	Total Student	% Increase Over	% Increase Over
Session	Clock Hours	Previous Year	Base-Year 1930-31
1930-31	79,981		
1931-32	83,875	4.8	4.8
1932-33	86,259	2.8	7.8
1933-34	76,406	12.8*	4.4*
1934-35	88,615	15.9	10.7
1935-36	103,262	16.5	29.2
1936-37	103,125	0.1*	29.1
1937-38	107,915	4.6	34.9

#### INSTRUCTIONAL COSTS

\* decrease

TABLE IV. COMPARISON OF THE INDEX OF INSTRUCTIONAL COST PER STUDENT CREDIT HOUR FOR THE YEARS 1931-32 AND 1937-38

			1	nde:	x of Cost	Index of Cost
Type of Course				1	93I-32	1937-38
Comprehensive Courses		r	ion	e of	fered	1.00
Departmental Courses	-	-	-	-	3.00	3.44
Total—All Courses	-	-	-	-	3.00	2.44

This table shows that for each \$3.00 spent for the instructional unit (the student credit hour) in 1931-32, only \$2.44 is now being spent, an economy in instructional cost of approximately 16%. This illustrates, perhaps better than any other method possible, the economies that have been possible through the inauguration of the General College comprehensive courses.

#### DEGREES CONFERRED

Because of numerous requests for such information, the following table summarizing the number of degrees conferred by the University since 1905 has been prepared. In the column headed "Diplomas & Certificates" is grouped the number of all awards made upon the completion of curricula of less than four years duration.

TABLE V. DIPLOMAS, CERTIFICATES, AND DEGREES CONFERRED 1905-1938

In the above table, degrees conferred in the Summer Session are included in the figures for the year immediately preceding the Summer Session considered. (c.g. The 1937 Summer Session graduates are included in the totals for 1936-37.)

At the end of the last biennium data concerning some of the activities of the Board of University Examiners was included in the Registrar's report. Because the work of the Board has expanded considerably it appeared desirable to submit a separate report. Accordingly I have asked the University Examiner to prepare a summary of the more important studies made by the Board and am attaching it hereto.

Respectfully submitted,

H. W. CHANDLER, Registrar

#### REPORT OF THE UNIVERSITY EXAMINER

To the President of the University.

SIR: The Board of University Examiners, established in 1935 along with the General College, has jurisdiction over admissions to the University and comprehensive examinations. Its work is integrated closely with that of the Registrar's Office and the General College.

#### ADMISSIONS

The admission policies are fully set forth in the *Bulletin of Information of the General College*. It is felt that these policies are as sound and logical as those practised by any state university. The details of admissions are handled through the Registrar's Office.

The Board of Examiners administers the placement tests required of all students entering the General College. Many of these tests are given in the high schools throughout the state under the sponsorship of the Florida Association of Colleges and Universities.

Persons standing low in their placement tests and their high school achievement are informed of their meagre possibilities of succeeding in college work and advised not to undertake college work without additional preparation. (Of 81 students who stood low in their placement tests in 1935 and 1936 only one made a satisfactory record in his college work during his freshman year.) Likewise persons standing high on their tests and school achievement are urged to continue their education.

#### COMPREHENSIVE EXAMINATIONS

All of the comprehensive examinations given in the University have been handled entirely by the Board of Examiners. The first comprehensive examinations were given in February 1936. From this time through the spring of 1938 over 60,000 three-hour examination booklets have been produced and over 30,000 have been given and scored.

An increasing attempt is being made to study the comprehensive examinations with an inquiry into their technical validity. Average validity indices varying from 1.3 to 5.7 have been found for the various examinations. (An index of 2 is considered satisfactory.) The index is a measure of the extent to which the items on the examination separate the high-scoring students from the low-scoring students. The results of these investigations are reported to those making the examinations to enable them to improve both their examinations and their teaching procedures.

The number of progress tests given in the various comprehensive courses has shown a steady increase. The Board of Examiners co-operates in the printing, giving and scoring of these examinations.

#### GENERAL COLLEGE STATISTICS

The Board of Examiners has made several statistical studies concerning the General College students. A brief summary of one of the more important studies covering the status at the beginning of the first semester 1937-38 of the 888 General College freshmen of 1935-36, is given below.

			% of Entire	Number w Associate	
Number in the Upper Division,			888	Arts	000
University of Florida	_	278	31.3	276	31.1
Number in the General College,			20.0	0.0	9.4
University of Florida	-	206	23.2	30	3.4
Number not at the University of Florida		404	45.5	36	4.0
Offiversity of Florida	-		40.0		
TOTAL	-	888	100.0	342	38.5

This table shows that, of the 888 freshmen who entered the General College in 1935-36, 342, or 38.5 per cent, had received their Associate of Arts certificate by the end of the 1937 summer school, two years and one summer after entrance. Two hundred and seventy-eight, or 31.3 per cent, entered the Upper Division in September 1937; 206, or 23.2 per cent, were still enrolled in the General College, and 404, or 45.5 per cent, were not long at the University.

#### ·RECOMMENDATIONS FOR IMPROVEMENT

In the past the Board of Examiners has been confronted with marked seasonal variations, with the bulk of the work in preparing examinations confined to the period from April 1 to May 20. The rush during this period becomes so acute that work which should be done leisurely and carefully checked is done hastily and inadequately checked. So long as the preparation of the examinations is delayed until near the completion of the course this congestion is certain to continue. Possibly it could be alleviated by compiling the examination throughout the year as the course progresses. Or, it is conceivable that the examination, covering the material which the course purports to convey to the students, might be made out entirely in advance of the instructional work. Thus the examination itself would serve to guide the

channels of instruction. This latter alternative, however, should not be adopted without thorough consideration.

Respectfully submitted,

JOHN V. McQuitty, University Examiner

#### REPORT OF THE DEAN OF THE GRADUATE SCHOOL

To the President of the University.

SIR: There have been some important and far-reaching changes in our requirements for the master's degree. Some of our departments are still adhering closely to the old requirements, but other departments are taking advantage of the possible modifications of the former strict regulations. The language requirement may be waived on the recommendation of the Supervisory Committee in any particular case. A good many students in education and some in agriculture and engineering have decided it wise to waive the language requirement. Formerly students were required to complete their work within the period of seven years. Any credits that had been earned beyond the seven-year period were not counted towards graduation. Under the new regulations, it is possible to have the seven-year period extended. According to the regulations of the Conference of Deans of Southern Graduate Schools, the period was fixed at six years, and many schools have even a shorter period. The University of Florida is more liberal than other institutions in this respect. It is also easier now than formerly to admit a student from a non-accredited institution or with poor undergraduate record, practically on the same basis as students from accredited institutions or with excellent records.

The requirements for the degree of Doctor of Philosophy have remained unchanged, but our field of study has been recently expanded a little. Beginning with the session 1938-39, it will be possible to offer the degree of Doctor of Philosophy in the Department of Animal Husbandry, but only in the branch of animal nutrition. Previously the doctor's degree was limited to the departments of Chemistry, Pharmacy, and Biology.

Each candidate has a problem and project of his own, and we have now accumulated a considerable number of theses and dissertations. We have now granted 417 master's degrees and 19 doctor's degrees. This includes the graduates of May, 1938. As soon as possible the University of Florida should publish a complete list of those who have earned higher degrees here. This publication should contain the name of the student, the degree earned, the year in which it was earned, the title of the thesis, and a synopsis of the thesis. A list without synopsis was compiled but not published a few years ago. This list may be found in the library and might be used for a basis of this proposed publication. After this material is published, the data should be kept up to date by an annual or a quinquennial publication.

With the assistance of our small graduate research fund we are gradually adding some valuable equipment for our libraries and laboratories. The numbers in the Graduate School have continued to grow. Perhaps it will be a sufficient indication of our growth to compare the last year of the previous biennium with the last year of the present biennium. For the first semester of 1935-36, we registered 108 students. For the first term of the summer session of 1936, we registered 119 students. Contrast with these numbers the following: number of students registered in the Graduate School for the first semester of 1937-38, 158; number registered in the first term of the 1938 summer session 266. It may be interesting to contrast with these

figures the number of graduate students we had in the year of 1909-10, which was the first year in which I had charge of the graduate work at the University of Florida. In that year only seven students were enrolled, and one master's degree was conferred. Perhaps the growth in numbers has been a little more rapid than the increase in our facilities. It is quite a serious problem now to take care of our graduate students in the summer session. We are not offering many graduate courses, except in the Department of Education, but the most serious difficulty of all is in providing satisfactory committees when so many of our regular professors are absent.

Respectfully submitted,

JAMES N. ANDERSON, Dean

# REPORT OF THE DEAN OF THE COLLEGE OF ARTS AND SCIENCES

To the President of the University.

SIR: I have the honor to submit the following report on the College of Arts and Sciences for the biennium ending June 30, 1938, together with recommendations for the biennium beginning July 1, 1939. As on previous occasions, I shall first report upon the activities of the College of Arts and Sciences proper and append the report on the School of Pharmacy, which is administered by the College, just before making my recommendations for the whole organization.

Since the purpose and policies of the College of Arts and Sciences were presented in detail in my last biennial report, they need not here be repeated. The aim of the College remains the same, but the manner of accomplishing its purpose has been slightly altered in several cases to meet changing conditions, as evidenced by new courses, methods, and programs that have been adopted during the last two years. During this time the progress of the College, educational and otherwise, has been highly satisfactory. The recent granting of a chapter of Phi Beta Kappa represents a strong endorsement of the policies and scholastic standing of the College.

#### CURRICULAR REVISION

Two years ago I reported that the biennium then closing had been remarkable for the improvements that had been made in the curricula of the College, the most important of which were: (1) that the quality of the requirements for graduation had been improved by a reduction in the number of credit hours required for a degree; and, (2) that a candidate for graduation had the choice of the completion of either a departmental major or a new group major. These changes and other considerations have caused the departments composing the College to study critically their respective course offerings, which has resulted in many revisions for the betterment of the College. The program has been systematized by having the Syllabus Committee and the Curriculum Committee of the College study carefully all new courses which a department desired to offer and alterations in the content of old courses it proposed to make.

A number of the more important of these curricular modifications that have been

approved and adopted during the present biennium will now be presented.

A curricular problem arose from the need to utilize the training given in the General College as a basis for more advanced work in biology. This has been solved (1) by assisting in planning and developing course C-6, which is chiefly concerned with biological subject-matter and concepts, and (2) by promoting an elective laboratory

course designed to supplement C-6 and, together with it, provide an adequate foundation for Upper Division work in biology. The condensing of the sequence of advanced courses in biology into the junior and senior years has necessitated certain changes in prerequisites as well as the modification of the content and presentation of the courses themselves.

A special committee has given prolonged study to the course in general chemistry and has greatly improved it. Several of the graduate courses in chemistry have also been revised and new ones added, e.g., bio-chemistry and plant bio-chemistry, both of which are offered by staff-members of the Experiment Station, by special arrangement. The curriculum of chemical engineering has been built on the recommendation of the Engineers' Council for Professional Development and the American Institute of Chemical Engineers. A course in chemical physics has been introduced, dealing with a great amount of information concerning structure which has been obtained from various fields of physics such as X-rays, infra and visible spectroscopy, Raman effect, dielectric measurements, etc. Not much change has been made in the courses in mathematics since our last report, except the addition of two new courses and the co-ordination of offerings.

The Department of English has maintained a standing committee on curricular modification which, during the past year, has helped to accomplish many desirable reforms, both in the work designed primarily for General College students and in the program arranged especially for Upper Division students. The committee will continue its systematic efforts to accomplish the best possible program for students in all three levels: General College, Upper Division, and Graduate. The Department of Speech has been offering, during the two years covered by this report, an elective course, Effective Speaking, and is now offering a new course in Speech Training for the radio. In French, the first- and second-year courses have been adjusted to new conditions created by the new policies of the University, and two new courses of more general and practical interest have been arranged to take the place of two other courses formerly offered. Beneficial modifications have also been made in the courses in German and Spanish; certain new courses have supplanted the old grammar-drill courses. These courses provide an introduction to these languages and at the same time they are basic courses requisite for more advanced study. In addition, three new courses in German have been adopted.

The course in general psychology has been altered to form a departmental comprehensive course in the General College, and a new course has been organized to meet the needs of those students who wish to continue their study of psychology. An improved sequence of courses for a departmental major has also been arranged. Two new courses in history, one new course in political science, and two new courses in philosophy have been developed and offered. The entire set-up of Bible courses has been revised in order to lay an adequate foundation for students who will later attend schools of religion, and to give some of our public school teachers and other students an intelligent conception of Christian literature. The courses in journalism have been revised to provide in a better manner three sequences: (1) business, publishing, and advertising; (2) news and editorial; and (3) magazine and special writing.

#### IMPORTANT PROBLEMS AND PROJECTS

In addition to the improvement of its course offerings, the College has studied general and specific educational problems relative to its program; and as a consequence better methods of instruction have been applied. Some of the chief problems and projects of the various departments will here be mentioned.

The Department of Biology and Geology has undertaken to share with the School of Forestry the utilization of the Welaka area for study in wild-life conservation in Florida. This Department is also engaged in the reconnaissance of Florida aquatic and terrestrial habitats and is steadily adding to the accumulation of specimens and data for future work.

The naval stores research, under the Department of Chemistry, is of both a fundamental and practical nature, having in view the enrichment of the state by the finding of new or improved uses for naval stores products. During the last two years several important investigations have been undertaken, the progress or results of which have been reported to the President monthly.

It is our desire that the work in chemical engineering be approved by the Engineers' Council for Professional Development. This will require additional space for chemical engineering instruction, additional laboratory equipment, and a larger staff. Plans are now under way which we hope will make it possible to construct a

chemical engineering building which will provide suitable space.

Among the important problems of the Department of English are those involving its relationship with other colleges. The library also remains a major problem in English. The program of the English Club, an undergraduate organization, has included play-reading and talks and discussions by the faculty members and a number of well-known literary persons. The scope of the Language and Literary Club has been broadened to include all language departments, as well as English. The Southern Folklore Quarterly is gaining rapidly in national recognition under the leadership of members of our English Department.

The problems and projects confronting the foreign languages are often similar, but in certain cases they are different. In the year 1937-38, for the first time in the history of the University no Latin or Greek was given. Through the co-operation of our French Department the Florida Chapter of the American Association of Teachers of French has been organized, with the head of our department as a member of the Executive Committee of the Chapter. A complete list of all available German and Spanish books has been compiled and is being used in assigning outside reading. The members of the Spanish staff are working with the Committee on Latin-American Affairs to promote a Pan-American Fair to be held at the University at an early date, with the hope that the Fair may lead to the establishment of scholarships for study in South America. The meeting at the University next fall of the South Atlantic Modern Language Association, an organization in which several of our professors are performing excellent service, promises to be a significant event for our literature and language departments.

One of the chief problems of the Department of History and Political Science and some other departments, besides inadequate library facilities, is the centralization of the class-rooms and offices in the same building. At present the meagre collection of maps and charts suffers from having to be carried from one building to another.

The urgent problems of the Department of Journalism are: (1) the establishment of laboratory facilities and a departmental library; (2) the establishment of closer contacts with publishers and editors; and (3) the raising of the standard of the department. During the biennium the department's projects included: (1) producing an unpublished newspaper; (2) requiring students to work a few days on state papers; (3) making weekly news broadcasts over WRUF; (4) covering sessions of noted societies; (5) resuming of the High School Press Conference; and (6) preparing for a journalistic tour of Cuba in 1939.

The members of the Department of Mathematics have continued special services

and studies, and have, during the biennium, published several papers and presented others before societies.

The Department of Psychology has sponsored trips to state institutions where special clinics were arranged, and has participated in the organization of a proposed curriculum in social administration for the training of social workers. The Bureau of Vocational Guidance and Mental Hygiene, which is administered by the Department of Psychology, has extended its activities and services during the past two years by the addition of several new tests and by the better standardization of some of the tests previously used.

The Department of Speech continues to take an active part in many extra-curricular projects, such as inter-fraternity and inter-collegiate debates, dramatics, and

speech clinics.

The performance and progress of the various student organizations sponsored by the different departments of the College have been very praise-worthy.

#### **NEW FACILITIES**

Several new facilities have been added since our last report. More space has been made available for the department of Biology and Geology, but it can not be used to the best advantage until considerable remodeling has been done. A room has been procured in Peabody Hall for the X-ray laboratory, which affords marked improvement. The construction of a new lecture room with its two adjoining preparation rooms in the Chemistry-Pharmacy Building is now nearing completion. Improvements and repairs have been made in several of the laboratories. A moderate amount of permanent equipment and apparatus has been added, some of which was made in the L. M. Drake Memorial Laboratory at a considerable saving.

#### FACULTY PERSONNEL

Since the last biennial report some of our faculty members have been promoted to the rank immediately higher than that previously held by them. All these advancements were well deserved and have produced gratifying results. A relatively large number of the younger men of our faculty have pursued graduate work either in the summer or in the academic year while on leaves of absence. A few have achieved the

degrees of Doctors of Philosophy.

Owing to the lack of funds practically no new positions have been added. The new teachers who have entered the faculty represent, usually, the replacement of those who have resigned or who have been granted leaves of absence. One replacement was occasioned by the death of Professor A. S. Green, a valued member of the Department of History and Political Science. Two members of the faculty are now on part-time special status. One has been made Professor Emeritus. An increasingly large number of our professors have been active in their respective professional organizations—international, national, regional and state. Many of them have held office and served on important committees and made valuable contributions. For example, the Dean served on the American Council on Pharmaceutical Education and on the Board of Directors of the American Chemical Society. The amount and the quality of the research work accomplished by the faculty during the present biennium have been gratifying.

#### SCHOOL OF PHARMACY

This report on the School of Pharmacy represents the report by the Director, with only very slight changes.

The policies governing the operation of this School are formulated and administered to serve three groups, namely, the training of practical pharmacists, research workers, and teachers. Since a majority of the graduates become retail pharmacists, this type of training is emphasized. The curriculum provides for a broad scientific and professional training, as well as an opportunity for specialization and advanced

study in the several branches of pharmacy.

It is essential that the number of graduates be increased in order to meet the needs of the state for registered pharmacists; therefore bulletins have been sent to high schools and libraries and talks given before various groups to emphasize this need. There is a distinct need for extension education in pharmacy in order to enable pharmacists in service to gain information concerning new developments. Hence, a short course for pharmacists has been held for the past two years in co-operation with the University Extension Division and the Florida State Pharmaceutical Association. This has attracted national interest and a number of states have followed our example.

The members of the faculty have devoted considerable attention to professional improvement in order to vitalize and improve instruction. All members have carried out research projects, and some twenty papers have been published in scientific journals. All members have attended meetings of state and national professional associations, participated in programs, and served on committees. In addition, faculty members have visited and inspected physical and teaching facilities of a number of colleges of pharmacy, thus obtaining new ideas for practical application in improvement of instruction.

A model pharmacy is necessary to provide facilities for practical training in drug store operation. Proprietors and managers of drug stores of today expect the clerk to be properly trained to render competent service from the beginning of employment.

#### RECOMMENDATIONS

I shall here list my principal recommendations for the coming biennium: (1) the granting of the budget of the College as submitted; (2) the allocation of funds to the Department of Biology and Geology so it may assist in carrying out the Welaka Project, as submitted for the Welaka Budget; (3) the building of a laboratory for Chemical Engineering; (4) the erection of a building for the Department of Physics; (5) the allowance of additional funds for travel for professors attending professional meetings; (6) the increasing of the appropriation for books, journals, and other literature; (7) the granting of additional space to the psychology laboratory; (8) the establishment of a model pharmacy; (9) the meeting of the requirements for admission to the American Association of Schools and Departments of Journalism; (10) the appointment of a Professor of Geology at as early a date as finances will allow; (11) the creation of additional instructorships in departments having excessive teaching loads, just as soon as funds are available.

Respectfully submitted,

Townes R. Leigh, Dean

# REPORT OF THE DEAN OF THE COLLEGE OF AGRICULTURE

To the President of the University.

SIR: I respectfully submit the following report of the Teaching Division of the College of Agriculture for the biennium ending June 30, 1938.

The College of Agriculture endeavors to make additions and changes in curricula as seem necessary to meet changing interests and attitudes.

A course in soil conservation given by the Department of Agronomy jointly with the Department of Agricultural Engineering has been added because of the increased interest in this subject.

The Department of Animal Husbandry has added approved dairy practice and problems in poultry breeding.

Industrial bacteriology has been added in that department.

Systematic pomology has been added in horticulture.

The graduate work has been strengthened in some departments by assistance being given by research workers in the Experiment Station chiefly by helping plan research problems and examine candidates for degrees.

The outlines for courses in animal science and plant science for students in second year General College have been carefully re-written, co-ordinated, and better adapted to use as preparation for the specialized studies of the departments of the College of Agriculture.

The Live Stock Show and Rodeo put on by the Block and Bridle Club of the Animal Husbandry Department, assisted by members of the faculty and neighboring

stockmen, every spring is growing in interest and value year by year.

Sears, Roebuck and Company made available at the beginning of the session of 1937-38 \$2,500.00 to aid 25 first year students in agriculture who had already on the farm made achievement records in some phase of agricultural work. These were selected with the aid of county agents, vocational agricultural teachers, and progressive farmers. The ten who have done best work during the year will be continued, others will be selected to begin next year.

The U. S. Sugar Corporation in 1937-38 established the Duncan U. Fletcher Agricultural Scholarship of \$500.00 per year for four years. This was awarded to a high school graduate with high record. He has ranked this year among the highest

students of the University.

The Dansforth Foundation Fellowships continue to be offered to a junior of our College as well as to juniors of twenty-two other agricultural colleges. The selection is based on scholarship, leadership, and religious activity. It is a highly prized opportunity for appropriate formula of the control of the

tunity for summer study and recreation.

There is also offered by this Foundation a two-weeks fellowship at American Youth Foundation Camp on Lake Michigan to the outstanding Freshman among the 23 colleges. J. Lester Poucher of the University of Florida won this award in 1937. He was also elected President of the National Future Farmers of America at their annual meeting in Kansas City, Missouri, in the fall of that year.

A Youth's Leadership Conference, made up of members of the Agricultural Club and the College 4-H Club girls of Florida State College for Women was held at the University Union Building in February, 1938. This marks the beginning of an annual meeting for future agricultural leaders for discussions, training, and counsel

from those prominent in leadership today.

A Dairy Products Laboratory was completed during 1937. Courses in butter, cheese, and ice cream making are being offered, using the latest modern equipment.

A Poultry Laboratory building, increased number of houses and runs, and a larger acreage for growing feeds have become available during the biennium. This is a joint Experiment Station and Teaching Division enterprise covering 15 acres.

The former restricted poultry location has been planted in an orchard containing leading varieties of the most important deciduous fruit trees grown in this section.

In the space made available in the Agricultural Building by the moving out of instructors to the new quarters provided elsewhere, entomology and horticulture have been provided with enlarged laboratory space and better facilities for efficient work. The agronomy laboratory also received additional much needed equipment and supplies.

The former head of the Agronomy Department resigned during the summer of 1937 to accept a commercial position. A reorganization of the Department was effected, Dr. R. V. Allison being made head of the combined department in Experiment Station and Teaching Division, and Dr. F. B. Smith employed as new Professor

of Agronomy.

Dr. Homer Hixson has been added as instructor in the rapidly growing Department of Entomology and Plant Pathology.

Funds were not available for a much needed instructor in botany. A graduate assistant was provided who relieved the situation somewhat.

Three of the younger professors are, during the summer, continuing work for Ph.D. degrees.

Most members of the faculty belong to their respective national, regional, and state professional organizations and take an active part in them.

An increasing number of the graduates each year are securing fellowships in older

northern institutions to do work toward advanced degrees.

A steady, healthy increase in attendance has been made each year; students are growing more studious and earnest. The moderate increase in appropriations received has aided much in improving the physical equipment and quality of teaching. There are still conspicuous places where increased expenditures are much needed.

#### SCHOOL OF FORESTRY

The School of Forestry of the College of Agriculture still retains the two curricula, (1) Semi-Professional or Ranger Course and (2) Degree Course, but in 1937 departmental additions were made in the Degree Course affording the degree Bachelor of Science in Forestry. Heretofore the degree offered was Bachelor of Science in Agri-

culture with a major in Forestry.

The rapid expansion of the School of Forestry from the original Department of Forestry, established in 1935, presents the problem of adequately providing classroom and laboratory space for the students. An accredited school of forestry requires 20,000 square feet of space; the School at present has but 500 square feet. faculty is being developed with a head for each major department. The Professor in charge of forest economics was appointed in 1937. Organization problems have been satisfactorily handled in connection with the Works Progress Administration (Statewide project), Southern Shade Tree Conference (affiliated with National Shade Tree Conference), committees for Southeastern Section of Society of American Foresters, and Austin Cary Memorial Committee of the Society of American Foresters, and friends. Extra-curricular projects have been developed in connection with the Forestry Club of the University in providing technical and social programs in the Club headquarters and in the field. The Club instituted the first annual Field Day in 1937 during Forest Fire Protection Week upon the Austin Cary Demonstration Forest of the University. Also, during 1937, the honorary forestry fraternity, Tau Alpha Nu, was organized as sponsored by the Forestry Club. Special lectures have been given within the state upon the request of different service clubs. Special studies have been carried on in the ecology of the slash pine, some aspects of the cellulose and naval stores industries of the South, wood preservation, and dry kilns.

The laboratory and classroom facilities have been expanded in 1937 but are not now adequate. The Austin Cary Memorial Demonstration Forest of the University is being extended from 1,559 acres to more than 2,000 acres and affords excellent opportunity for local field work. The Sophomore Forestry Summer Camp of six weeks has completed a reconnaissance of the Welaka Forestry Project, of the Farm Security Administration. The Junior Forestry Summer Camp of six weeks will make forestry studies in Georgia, the Carolinas, Tennessee, and the Applachian region.

The School has developed from one faculty member to a staff of one Director, two

Professors, two Assistant Professors, and two Fellows.

Respectfully submitted,

WILMON NEWELL, Dean

# REPORT OF THE DEAN OF THE COLLEGE OF BUSINESS ADMINISTRATION

To the President of the University.

SIR: I beg to submit herewith the following report on the activities of the College

of Business Administration for the biennium ending June 30, 1938.

The College of Business Administration, at the beginning of the last biennium, became a two-year professional college of the Upper Division. The number of students registered in this college in 1936-37, the first year of the biennium, was 356 and the number of graduates was 61. Of the number of students registered, 113 were seniors, 172 were juniors, and 70 were sophomores still under the old four-year curriculum. In 1937-38, the second year of the biennium, the number of students registered was 283 and the number of graduates was 103. Of the 283 students registered, 127 were seniors and 156 were juniors. While the total number registered decreased 20 per cent from 1936-37 to 1937-38, the decrease was due to the fact that there are no longer any sophomores registered under the old curriculum. The number of Upper Division students registered each year remains virtually the same.

The number of graduates, however, increased from 61 to 103, or 69 per cent. I predict that this increase will continue. The number of graduates for the first year of the next biennium will not be less than 130 and for the second year, not less

than 150.

The College of Business Administration offers all courses in general economics as well as all courses in business administration. It serves not only its own students but also students of other instructional divisions of the University. The aggregate number of students in all courses has greatly increased during the past biennium. This may be shown by the increased teaching loads of the faculty. The increase in these loads was 28 per cent in 1936-37 over 1934-35 and 7 per cent in 1937-38 over 1936-37. The increased loads arise out of increased enrollments in Upper Division courses. The aggregate enrollments in courses in accounting during the past two years, for example, increased from 100 to 150 per cent. While, in 1935-36 and 1936-37, certain other Upper Division courses and sections of the same course ranged from 15 to 30; in 1937-38, they jumped in many instances to as high as 60 or more per course or per section. A large number of these courses, we feel, should be held down to not more than 30 students per section or course. While many examples could be given, perhaps the citation of two courses might not be amiss. Both Bs. 401 and Bs. 402— Business Law and Bs. 407 and Bs. 408—Economic Principles and Problems, which are required senior courses, represent courses in which we have had four sections

each. Each section of each course has averaged 50 students or more. The courses are such that they should be kept around 30 in order to use the discussion method and to get the best instructional results. We have reached, therefore, the point where we must either restrict the number of students registered in the College of Business Administration or greatly increase the number of faculty members.

The faculty of the College of Business Administration during the past biennium has functioned in the General College as well as in the Upper Division. One member of the staff is Chairman of C-1—Man and the Social World, and four other members assist with the teaching of this course. Likewise, one staff member gives half-time to the teaching of C-2—Man and the Physical World. There are three connective courses offered in the General College by staff members in the College of Business Administration. These courses are Elementary Accounting, Elementary Statistics, and Economic Foundations of Modern Life; they are half-year courses and are offered each semester. They are of direct interest to students who expect to enter the College of Business Administration, since they are required for admission. They are also of direct interest to students who expect to major in economics in the College of Arts and Sciences, and of indirect interest to students in two or three other colleges. Each course during the past year has had approximately 250 students every semester.

The College of Business Administration, during the past biennium, has made two or three slight revisions in its curricula. It has increased the number of hours in the Business Administration Curriculum Proper from 60 to 66. In the Curriculum in Combination with Law, the number of hours has been increased to 70. Hitherto, the number of hours in each curriculum has been too small. This was particularly true of the Curriculum in Combination with Law. To finish this curriculum, students after graduating from the General College must spend one year and one summer term in the College of Business Administration. Of the 70 hours required, 42 are in business administration and 28 are in law. After a student completes the 42 hours in the College of Business Administration, he enters the College of Law. When he finishes one year in that College (28 hours and 28 honor points), he may secure the Bachelor of Science in Business Administration.

Several permanent changes have occurred in the faculty of the College of Business Administration during the past biennium. Two new staff members were added at the beginning of the past year. John B. McFerrin, Ph.D., University of North Carolina, was appointed Assistant Professor of Economics; and Roy Purvis, B.S.B.A., C.P.A., was appointed Instructor in Accounting. In February, 1938, Purvis was made Auditor of the State Board of Control. In his place, Wesley Fly, B.S.B.A., University of Florida, was appointed. Dr. W. T. Hicks, at the beginning of last year, resigned to become economist for the United States Forestry Service. In his place Dr. Kenneth Dameron of Ohio State University was appointed for the first semester as visiting professor. At the beginning of the second semester, Oscar E. Heskin, Ph.D., University of Minnesota, was permanently appointed as Assistant Professor of Economics and Marketing. Professor James E. Chase, during the past year, was given a leave of absence to complete his doctor's degree at the University of Chicago. Charles M. Anderson was appointed acting assistant professor in his place.

The faculty members of the College of Business Administration, during the past two years, have engaged in many activities looking toward their professional improvement. Five faculty members have completed books. Several other faculty members have written scientific articles of various kinds. An increasing number of

faculty members have appeared as special lecturers both in and out of the state. On the whole, the faculty of the College of Business Administration has rapidly improved both in character and in distinctiveness. At present there are six professors, four associate professors, six assistant professors, and one instructor. Of the seventeen, there are ten with doctor's degrees, five with master's degrees, and only two with bachelor's degrees. Of the two with bachelor's degrees, one has completed all the residence work for a doctor's degree. Of the five with master's degrees, one has a degree in law, one will soon have his doctor's degree, and the other three have had three or more years of graduate training.

The Bureau of Economic and Business Research has continued to function in a limited way during the past biennium. If that Bureau were adequately financed, it could be of great service to the business interests of the state. It has never had sufficient funds to operate in any large way. It has hardly been more than a paper organization. The needs of Florida for economic facts are increasing. No longer can either the economic system of the state or particular business enterprises function on the basis of fancies and opinions. They must have the facts, all of the facts, and then act thereon. The Bureau of Economic and Business Research, if provided with funds, could gather the facts, interpret them and participate in the working out of sound individual as well as state-wide industrial and commercial programs.

The College of Business Administration has made unusual progress in the field of accounting. Enrollment of students in courses in this field has increased with great rapidity. While standards have been kept high, each year has seen an increased number of students pouring into these courses. There are three full-time men teaching such courses. Two of them have C.P.A.'s—the professional equivalents of doctor's degrees. One has a doctor's degree. Until one of the instructors resigned to become Auditor of the State Board of Control, there were three C.P.A.'s on the staff. While his successor does not have a C.P.A., he will probably have one by the end of the

next academic year.

The needs of the College of Business Administration are of two varieties: First, needs pertaining to personnel; and second, needs pertaining to quarters. As has already been indicated, increased numbers of students have greatly increased teaching loads. Additional personnel will be needed during the next biennium to carry these increased loads. At least one assistant professor, one instructor, and four graduate assistants must be added. In 1932, when it was necessary to cut budgets, the College of Business Administration had to eliminate its graduate assistants. At that time there were four. During the next biennium it is imperative that these graduate assistants be restored. Their restoration will not only greatly facilitate the development of graduate work, but will also provide some relief, through the reading of papers and otherwise from the heavy teaching loads of faculty members.

The College of Business Administration has reached the point where it needs to expand its graduate program. It has not been able to push this department of its work in the past. So many undergraduate students have come to us that we have been forced to concentrate on our undergraduate program. That program has been brought to a fair degree of perfection, but we cannot stop there. It is necessary that we go further; we must embark on and develop a graduate program that will be equal to our undergraduate program. To achieve this end, additional faculty members and graduate assistants, as well as continued expenditures for library facilities, must be forthcoming.

It is imperative that the salaries of faculty members in the College of Business Administration be increased at the beginning of the next biennium. At present,

existing salaries are low and teaching loads are high. These loads must be reduced and salaries must be raised. Most of our staff members are young men. With the exception of the Dean, all of them are under forty years of age. They have come to us fresh from graduate schools. It is highly necessary that they be encouraged by increases in salaries and by promotions, if opportunity is to be given to them to make of themselves what they want to become and at the same time to assist in making the College of Business Administration what the University of Florida wants it to become.

I wish to renew the recommendation which I have made in several former biennial reports, concerning our needs for new quarters. Even though the College of Business Administration was established twelve years ago, it has never had a building of its own. The Dean's offices and certain classrooms and offices for certain faculty members are in Language Hall; whereas the remainder of our quarters are in Science Hall and Peabody Hall. This separation of quarters interferes greatly with our efficiency both in instruction and in administration. The quarters assigned to us have always been woefully inadequate. Almost every semester we lose the first week by shifting classes from rooms that are too small to larger rooms. We should have a building especially adapted to our needs where we can concentrate all our activities. A building of our own would not only meet the urgent expanding demands of the College of Business Administration, but it would also relieve the pressure upon existing buildings. New quarters for us would mean larger quarters greatly needed by other divisions and departments.

Respectfully submitted,

WALTER J. MATHERLY, Dean.

# REPORT OF THE DEAN OF THE COLLEGE OF ENGINEERING

To the President of the University.

SIR: I have the honor to submit to you the following report of the College of Engineering of the University of Florida for the biennium June 30, 1936, to June 30, 1938.

Outstanding, even to the casual observer, is the excellent *esprit de corps* that exists in the College of Engineering among students and faculty, and the close cooperation that occurs with the alumni and the industries of the state. This is as it should be in a professional school that has for its main purpose the training of men for a life of service. An engineering education would fail in one of its most important functions if it did not inculcate in the student an ability to work harmoniously side by side with his fellow man.

Particular attention should be called to the work of the students in connection with the Engineers' Fairs, which were again put on in 1937 and 1938. We were particularly honored this year in having as our guest the Governor of our state on this occasion. There have been many new exhibits and probably the attendance at each of these fairs has been well over 4,000. This activity was made possible only by the close co-operation of the students through their professional and honor societies.

It has been interesting to note that in spite of the unsettled economic conditions the students graduated in engineering are employed. We know of less than five per cent of our graduates who are today unemployed or who are working for relief agencies.

Many gifts were received during the past two years. For the most part these have come from the United States Government, through Works Progress Administration and the Navy Department. Many industries, including the Western Electric Company, the General Electric Company, the Public Service Electric and Gas Company of New Jersey, and several of the industries of Florida have contributed valuable apparatus, bringing about improved laboratories.

A friend of the University, who requests that he remain anonymous, has established a \$500 loan fund in memory of Dr. J. R. Benton, who held the position of Dean of the College of Engineering from the establishment of the College until his death in 1930. This loan fund is to be used primarily for assisting needy students during

their junior and senior years.

A similar loan fund established in memory of the late Dr. John A. Murphree has

assisted thirty-one students during the past eight years.

In 1937 a committee of the Engineers' Council for Professional Development visited the University of Florida and studied the curricula and facilities of the College of Engineering. On the basis of this investigation the curricula in civil, electrical, industrial, and mechanical engineering were approved. The curriculum in mechanical engineering was provisionally accredited, subject to the installation of additional equipment. Most of this has now been obtained. In addition to other recommendations which were made by the visiting committee, the lack of sufficient space in our laboratories was forcefully brought to our attention.

During the past year, the College of Engineering abolished the degree of Bachelor of Engineering Science, which has been offered during the past two years. The nomenclature of the other degrees awarded has been changed in accordance with recommendations made by the Engineers' Council for Professional Development. The degree as now conferred is Bachelor of Civil Engineering, instead of Bachelor of Science in Civil Engineering; similar changes in the other degrees have been made.

In this technological age many come to college desiring an engineering education who do not feel that they ever will practice the engineering profession. Well-balanced engineering curricula should, therefore, enable these men to prepare themselves for useful citizenship and for service in many vocational fields after graduation.

Furthermore, the engineering profession has for many years recognized the importance of emphasizing certain non-technical subjects in engineering education. More and more does the engineering educator believe that it is not the purpose of the engineering college to train men as technicians, but rather, that curricula must be designed broadly to educate men properly into a modern profession. This seems to be the present trend in engineering education. The Society for the Promotion of Engineering Education had for its general theme at its 1938 convention "The Cultural and Professional Phases in Engineering Education."

The College of Engineering of the University of Florida during the past few years has made many changes in its curricula. These changes have not produced a decrease in the amount of technical information basic to professional engineering, nor have courses considered fundamental to the profession been omitted. In the new curricula, however, there is a marked decrease in courses which were formerly used to develop manual dexterity and also in courses which might be considered as highly specialized branches of engineering. Our present curricula are planned in the belief that the successful engineer of today must not only know how to handle materials but must also know how to handle men and money as well.

In general, unless students of engineering receive an understanding of the basic

principles of sociology and economics, and unless they receive an education which will enable them to associate and be at ease with men of other professions, they cannot be successful in their chosen profession. Our new curricula, therefore, build upon the broad educational foundation received in the General College and not only give technical training, but also enable the students to elect courses which round out their technical training so that they become educated men rather than technicians.

Considerable attention has also been paid during the past year to the organization and content of the courses which constitute the curricula for the various degrees offered. More consideration is being paid to the technique of instruction in these courses so that the student's achievement can be more adequately measured. Emphasis is being placed on accomplishment rather than on mere classroom attendance. Furthermore, in many of the courses, particularly those in drawing and in laboratory work, an effort is being made to develop methods so that superior students may progress more rapidly than others. It is expected that this will result in instructors being able to give more time to students who need additional individual attention and that superior students will be encouraged to take an advanced type of work which should be more beneficial and certainly more interesting to them. During the coming year more study will be given these various phases of engineering teaching.

It is the policy of the College of Engineering to do a few things well rather than to extend itself into many fields. Therefore, while there have been demands for many new courses, the College has felt that it is more important to develop the existing courses than to attempt to inaugurate new ones. Although new courses in photography have been added, this was done primarily to serve other branches of the University rather than the College of Engineering.

In 1936, the Florida Industries' Co-operative Plan was established. Much progress has been made in this course, and it has received much favorable attention not only from the various industries of Florida but also from engineering educators in general. At the present time there are eleven industries co-operating with the University of Florida and thirty-six students are enrolled.

Short courses were given for metermen and radio service men in 1937, and for metermen in 1938. These courses were well attended and many requests have been received for their repetition.

The Summer Camp Surveying which has been required of the Civil Engineering students since 1935 is progressing very satisfactorily. The more intensive work which can be done by bringing to the campus for a period of six weeks those students directly interested in this phase of engineering and letting them work under conditions similar to those ordinarily found in engineering practice is producing very much better results than formerly resulted under ordinary classroom conditions during the regular teaching year.

There have been several changes in plant facilities. The new Hydraulic Laboratory is rapidly nearing completion. This laboratory when equipped will be one of the outstanding laboratories of its type in the nation. It was made possible by the Works Progress Administration and the state road department. Furthermore, it will give to the state of Florida facilities which have never been available before for conducting tests pertaining to hydrological problems, beach erosion, drainage, filtration, and other problems pertaining to the flow of water.

The electronics division of the Electrical Engineering Department now has a very excellent laboratory. This has been built up almost entirely through assistance received from various governmental agencies, particularly the United States Navy

Department, the United States Weather Bureau, and the Works Progress Administration.

During the past year the Works Progress Administration has made it possible to make improvements on the 11th floor of the Seagle Building, and it is here that apparatus necessary for the experimental work in the location of hurricanes is being constructed. It is regretted that funds are no longer available for actively continuing this experimental program.

Many of the exhibits which have been used during the annual Engineers' Fair have been constructed on a permanent basis and now are available for inspection by visitors to the Seagle Building. Here, also, experimental work in television is conducted and experiments in the general field of electronics are being carried on.

Additional equipment has been secured for the Mechanical Engineering Department. A mezzanine floor has been built and the general laboratory has been improved.

The Photographic Laboratory has not only been of value in connection with courses of instruction, but also has been of outstanding service in making its facilities available to other departments of the University.

In May, 1937, Dean Blake R. Van Leer resigned from his position as Dean of the College and Director of the Engineering Experiment Station, and Joseph Weil, Head of the Electrical Engineering Department, was then selected to fill the vacancy, the appointment being made permanent in March, 1938.

Professor G. O. Phelps was appointed Instructor in Industrial Engineering for the year 1937-38 and has now been made Assistant Professor in this department.

Professor N. C. Ebaugh has written a book on thermodynamics which has received much favor. Professors W. W. Fineren and S. P. Sashoff have presented papers before engineering societies. Other members of the faculty have also been called upon for talks before various organizations.

Faculty members have received many honors. They have served as officers and on important committees and have taken an important part in the activities of the state and national engineering societies. Three members of the faculty (Sawyer, Thompson, and Janes) have received their Master's degrees during the past two years. Two members of the faculty (Fineren and Weil) have been appointed by the Governor to serve as members of the State Board of Engineering Examiners.

In connection with campus engineering problems, material assistance has been

given by Professor Ebaugh and Professor Wilson.

Professor Sashoff has contributed a great deal in the design of the electronics equipment. Professor Lowe has worked diligently on the design of the Hydraulic Laboratory. Other members of the faculty have assisted in making possible some of the new improvements which appear on the campus, such as the Chemistry Building addition, the floodlighting of the stadium, sprinkler system, and improvements at the stadium. Many of the faculty have co-operated with industrial concerns in attempting to find solutions to several industrial and engineering problems.

#### ENGINEERING EXPERIMENT STATION

While the Engineering Experiment Station has received no funds from the state for its operation, it nevertheless has been engaged in some work. It has been called upon for consultation and experimentation and the faculty have assisted to the limit of their available time.

Two bulletins were issued during the past two years: one on the Locating of Tropical Storms by Means of Associated Static, and the other on a Study of Beach Conditions at Daytona Beach, Florida, and Vicinity.

The faculty of the College of Engineering has co-operated with many branches of the State and Federal Government in furnishing engineering services. It has also assisted the University authorities in securing several Works Progress Administration grants and in the construction of these projects. These include during the past two years the following on the campus of the University of Florida:

1. The Hydraulic Laboratory

2. The Chemistry Building Addition

3. The Stadium Floodlights

4. Improvement of Recreation Facilities

5. Installation of Sprinkler System

6. Development of Hurricane Location Apparatus

7. Completion of Underground Electrical System

Other projects in which the College of Engineering has assisted are the Statewide Mapping Project and the Statewide Radio Network for Aviation of the Works Progress Administration.

Research activities have been carried on in the fields of electronics and air conditioning. As a result of this work papers have been presented before state and na-

tional societies, and bulletins for publication are now being prepared.

The industrial development of Florida would unquestionably be accelerated materially by the establishment of an adequate Engineering Experiment Station. Engineering Research differs from all other types of research in that it makes available in the immediate present the results of its efforts. It is a known fact that the stock holders of many large organizations receive dividends primarily on the basis of developments of the research laboratories of big business. Similarly, would not the tax payers and the small industries of Florida secure material dividends and benefits through a state operated engineering experiment station? Research workers would be able to study Florida's resources in an attempt to utilize Florida materials in the development of products and in the formation of new industries unique to Florida. From a single discovery in such a laboratory, there may result financial gain far greater than the total appropriations which might be made for years to come. The Engineering Experiment Station would give impetus to the industralization of our state; as such it would help every citizen, but particularly would it help the agriculturist and the engineer.

# RECOMMENDATIONS

- 1. As soon as possible the Department of Chemical Engineering should be made physically and academically a part of the College of Engineering. Until this is done we cannot function as a well integrated unit.
- 2. An outstanding need of the state of Florida and the College of Engineering is an adequate Engineering Experiment Station with its accompanying research workers, equipment, and laboratories. Forty thousand dollars (\$40,000) per year expended primarily for the employment of expert research workers in engineering should be made available. Such an investment would return dividends far beyond reasonable anticipation.
- 3. It is expected that through proposed new construction the difficulties due to our present over-crowded conditions will be obviated. Many members of our staff are underpaid and many are seriously over-loaded. It is recommended that as soon as possible this be corrected.

Respectfully submitted,

JOSEPH WEIL, Dean

# REPORT OF THE DEAN OF THE COLLEGE OF LAW

To the President of the University.

SIR: The two years since my last report have been a period of good teaching and effective functioning for the College of Law. In a school unhampered by excessive enrollment there can be more personal contacts promotive of better professional outlooks, prides, and traditions. It is pleasing to observe throughout the country a growing acceptace of the idea of smaller and better law schools, not bigger and noisier ones. It is pleasing also to note from current legal writings a wider acceptance of certain fundamental principles upon which our work has been based; for example, the slow and confining nature of the exclusive case system of instruction, the emphasis of substantive law to the neglect of procedural law, and the unhappy confinement of undergraduate study to a small part of the legal field, due to the elimination of shorter courses, are being questioned as we have questioned them. Gratifying as this may be, the faculty is not omitting to consider curriculum adjustments that might prove beneficial; and the summer session furnishes an opportunity to try out new courses.

# ATTENDANCE AND DEGREES

During the regular session of 1936-37 we enrolled 55 law students in the first year class, 32 in the second year class, and 48 in the third year class, a total of 135, which was 4.4% of the total University enrollment. The following year we had 73 law students in the first year class, 40 in the second year class, and 30 in the third year class, a total of 143, which was 4.36% of the total University enrollment. While we gained eight students, our percentage of growth was less than that of the University as a whole. Among the state university law schools of the eastern section of the Southern states (North Carolina, South Carolina, Georgia, Alabama, Mississippi, and Florida), in 1936-37 our attendance held fourth place; in 1937-38, second place. Law school attendance in the United States reached its peak in 1929 and since has been steadily decreasing. We are not relatively a small law school; yet when our attendance is compared with that of some of the larger law schools for 1937-38 (e.g., Michigan, 616; Texas, 753; George Washington, 966; New York University, 1,055; Harvard, 1,390), there is no reasonable basis for the thought that an undue number are studying law in Florida. Comparison of the total law school attendance in the state of Florida with that in other states strikingly confirms this statement. In the United States for 1937-38, the total registration in non-Association law schools exceeds that in the Association schools whereas in Florida the registration in Association schools is almost double that in others.

For the season of 1936-37, there were 15 law graduates the first semester, 32 the second semester, and 5 in the summer, a total of 52. The following year 5 graduated the first semester, 19 the second semester, and there are 6 candidates for degrees this summer.

### **FACULTY**

The faculty of six men remains unchanged. They are members of many important University committees. They have served, too, on committees of the Association of American Law Schools and the American Bar Association. Also, as a part of their duties, legal opinions have been given to various University officials and law alumni. During each of the past two years law lectures have been given in the short course conducted for the fish and game wardens of the State. The faculty has met in joint

session with the State Board of Law Examiners. Upon request the faculty has made recommendations in reference to the new rule adopted by the Supreme Court for bar examinations. Professor Day has contributed a chapter to the Sixth Yearbook of School Law; he also has written an Outline of Property designed especially for use here, but which has attracted favorable attention elsewhere. Adrian College has given Professor Crandall the honorary degree of LL.D.

# STUDENTS AND ALUMNI

Our students have continued to be outstanding in campus achievements. Law men for the past two years have held the presidency of the student body, the presidency of Blue Key, and the general chairmanship of Homecoming. The John Marshall Debating Club for the third consecutive time has won the intersociety debating cup and ended a contest that has raged for almost a quarter of a century.

The fine spirit of our students is illustrated by the inauguration by the Class of 1938 of a loan fund for needy and meritorious law students; and it is hoped that this gift will increase by further contributions to proportions of substantial usefulness.

The two law fraternities have brought many distinguished men to the University, including both United States Senators from Florida. Lectures by our alumni have included consideration of the jury system by Judge H. L. Sebring, social security by J. C. French, and title insurance by Hart McKillop.

At the close of the regular session in May, 1938, 1007 students had graduated from the College since its organization. Most of them have remained in Florida, ranking high in the professional and judicial life of the state. Those who have left Florida have been remarkably successful in passing the bar examinations of other states. Few, if any, law graduates have been unemployed for any substantial period of time. During the past biennium R. E. Sadtler, Law '34, has compiled *Patent Forms and Cases on Patent Law*, and W. E. Arnow, Law '33, has annotated *Rules and Practice for the Government of Courts of Florida*.

# HONORS AND PRIZES

Sufficient prizes to stimulate every one are open to law students. In 1937 the Redfearn prize was won by Walter W. Woolfolk of Lake Wales; in 1938 by Paul Helliwell of Tampa. The topic for 1939 is: "Should the Pre-Trial Procedure in the New Federal Rules be Adopted in State Practice?" The first year prize of the Harrison Company was won in 1937 by Guy Race; in 1938 by S. O. Carson. The senior prize offered by this Company was won in 1937 by Arnold Ross; in 1938 by Fred S. Gilbert, Jr. Perhaps the most attractive of other available prizes is the one of \$100 offered, as a memorial to the late Nathan Burkan, by the American Society of Composers, Authors, and Publishers.

### LIBRARY

The library today plays an increasingly greater part in a law school. July 1, 1938, our library had 12,825 volumes. Compared with 432,000 volumes at Harvard and 204,000 at Columbia, our library is indeed small; yet small as it is, lack of library space has been for years one of our most difficult problems. Our books, however, have been well selected. N.Y.A. assistance has enabled us to keep them in good condition; and students have been taught to use them. Perhaps the most conspicuous of our book additions, fully meeting the requirements of the Association of American Law Schools, are the statutes of Connecticut, Delaware, Georgia, Kansas, Kentucky, Illinois, Iowa, Maine, Massachusetts, Michigan, Minnesota, Mississippi, Missouri,

Nebraska, New York, North Carolina, Ohio, South Dakota, Tennessee, Texas, Utah, Vermont, and Virginia.

In 1936-37 we began card cataloging the law library, the work being done by Stanley West with the co-operation of the General Library. The law librarian of Columbia calls Mr. West "one of the best prospects as a law librarian whom I have seen for years." We have employed him as librarian, he having turned down an offer of twice what we pay him here. He also can aid us in certain statistical studies and later in a slight amount of teaching. This is real progress in the development and maintenance of an effective library service.

The library will continue to enjoy the oversight of Mrs. Ila R. Pridgen, whose extraordinary skill therein has greatly increased its effectiveness and multiplied its use. She will direct, too, the statistical studies whereby our work and the standing of our students will be better shown. She will more closely check the work and courses of students and assume a greater portion of administrative details for which her talents and knowledge of the law especially fit her, and for these reasons I recommend that her title be changed to that of executive secretary.

# BUILDING IMPROVEMENTS

The Law Building, constructed twenty-four years ago, has long been, as often reported, inadequate for our needs. Recently structural defects appeared, walls cracked, and floors weighted with books sagged badly. Some repairs have been made, foundations strengthened, a floor covering laid in the main library, and lights and book stacks rearranged. At this writing efforts are being made to secure federal aid for the construction of a fire-proof library annex and some alterations of the old building. Such improvements will give us greatly needed relief, and it is earnestly hoped that they will soon materialize. A small allowance for replacement of worn out furnishing and equipment and for other needed assistance is included in our budget request for the next biennium.

Respectfully submitted,

HARRY R. TRUSLER, Dean

# REPORT OF THE DEAN OF THE COLLEGE OF EDUCATION

To the President of the University.

SIR: I have the honor to submit herewith my report of the College of Education for the biennium ending June 30, 1938.

Fifteen or twenty years ago, those expecting to go into teaching were certificate minded. That is, their interest at the time was concerned with the state teachers' examinations for first, second, and third grade certificates. Few were interested in degrees, or even in a college education. At that time students, especially those in the Summer Session, busied themselves with preparation for the state teachers' examinations.

This period passed, and we ceased to offer courses designed to prepare for the examinations. A new period came, in the late twenties and early thirties. Students became interested in the two-year degree called the Normal Diploma. Numbers of these were granted each year, but not yet had the bachelor's degree become prominent on graduation day.

This period is now passing, and today more bachelor's degrees are granted than

Normal Diplomas. Since January 1, 1937, the Normal Diplomas have numbered 123, the bachelor's degrees 169. It seems that those preparing to be teachers are becoming degree conscious.

This, then, seems to be the trend, and it would seem reasonable to expect that within ten years the bachelor's degree will be a requirement in all of our high schools and in many of our elementary schools. With this experience in mind it would seem wise, therefore, to take a long view of possible development in the field of teacher education.

It seems certain that this upward trend will continue, and is even now under way. For the number of graduate students, as pointed out in the report of the director of the Summer Session, is rapidly increasing. In 1934, there were 96 registrations in the Summer Session; in 1938 there were 497. At least 80 per cent of these are now teachers in service or plan to be teachers. Even in the winter session, when our Summer Session students are employed, more than twice as many students major in Education as in any other department. We may certainly expect a thousand or more graduate students majoring in Education within five or ten years if we can only be wise in our course offerings and other provisions for graduate study. As pointed out in the report of the director of the Summer Session, these are our most advanced teachers, principals, and supervisors. These are the ones who plan to stay in teaching, the ones through whom we must build a profession of education, if it is to be done.

The great problem of the College of Education in the near future will, therefore, it seems certain, be to capitalize the opportunities offered us in the advanced study of the problems of education in the junior, senior, and post-graduate years. We should move as expeditiously as possible toward this goal.

# ORGANIZATION

The work of the College of Education may be listed under six headings:

I. Instruction:

1. Education

2. Agricultural Education

3. Health and Physical Education

4. Industrial Arts Education

5. Business Education

II. Bureau of Educational Research

III. Laboratory School

IV. Employment Bureau

V. High School Visitation

VI. Doe Museum

#### INSTRUCTION

The purpose of the department of Education, as its name indicates, is to teach courses in education. These courses are designed to prepare students to teach the general, non-specialized, subjects such as English, history, mathematics, and the like,

in elementary and secondary schools.

The purpose of Agricultural Education is specialized and designed to do one task only, namely, to prepare teachers of vocational agriculture for Smith-Hughes schools. This department, in addition to teaching its courses, has numerous contacts with the schools and communities of the state. Two members of the department devote their entire time to itinerant teacher training, visiting every teacher of vocational agriculture in Florida several times during the year. One member devotes his time mainly to teaching college courses in Agricultural Education, another member teaches vocational agriculture in the Laboratory School, and a fifth member gives most of his time to supervised student teaching and the development of day and evening classes

in communities near enough to the University to make such work possible. The work of this department has been greatly extended and seemingly improved during

the past biennium.

The department of Health and Physical Education has as its purpose the development of the play and recreational facilities of the public schools, including the development of health. In this department the methods of teaching and the subject matter of teaching are perhaps more closely bound together than in any other department of the college. Theory is studied in the classroom and immediately following an attempt is made to put this theory into practice on the playground, using the Laboratory School and other facilities of the city. This department is co-operating with the State Department of Public Instruction in working out a program for elementary and high schools of Florida.

Recently the College started a venture that it is hoped will prove of much benefit to the schools of the state, namely, the development of industrial arts. Until quite recently, at least 95 per cent of the teachers of industrial arts in Florida had to be brought in from other states. An attempt is being made to develop some of our own young men to do this work, and the number of those interested has been increasing during the biennium. Before long a number will be prepared to undertake this work in the schools of the state. In addition to this work the department is constantly being called upon by the high schools of the state to assist with the inauguration and development of industrial arts work. In this way the college is already rendering a direct service to the schools of Florida even before the first students to register for this work have been graduated and have taken their places in the schools.

In the department of Business Education teachers of the business subjects are being prepared. Just as we have seen what other departments are doing, so we see that this department is also rendering assistance to schools in the establishment and the development of classes in business education.

Thus it seems that the college, through its various departments, is rendering a service to the state far in excess of the mere preparation of students for teaching.

# BUREAU OF EDUCATIONAL RESEARCH

In order that the college may at all times be ready to lend assistance to the cause of Education, a few years ago the Bureau of Educational Research was established. The director of the Bureau reports that more than thirty-five projects are either completed or are now under way. So far as possible the Bureau is making its findings available to the school people of the state. Problems pertaining to curriculum materials, economic status of teachers, supervision, and similar subjects have been undertaken. Perhaps the most ambitious project of the Bureau is a "Longtime Study of Child Growth and Development." This is being done in co-operation with five other laboratory schools, namely, those of William and Mary College, the Georgia State College for Women, and the universities of Michigan, West Virginia, and Kentucky. It is planned to make this study over a period of twelve years to determine whether or not these laboratory schools are realizing their objectives. This has been to some extent subsidized by the General Education Board, though the schools themselves are bearing most of the expense of the actual investigation.

# THE LABORATORY SCHOOL

The Laboratory School, as its name indicates, is used by the College of Education as a laboratory for study, investigation and experimentation in the field of education. The kinds of service rendered may be divided into two parts: (1) service to students in the College of Education and (2) service to school people of this and other states.

(1) Service to Students: Students who are preparing to become teachers may observe in the school the best practices in schoolroom procedure that it has been possible to develop, and they may themselves take advantage of the opportunities offered to do practice teaching under the guidance of experienced supervisors. In this way students are able to bring theory and practice much more closely together than was formerly the case, when during their four years in college they were in classes in the theory of education but had to wait until they were graduated for adequate practice in teaching.

(2) Service to School People: The service that is rendered to school people is of many kinds:

(a) Studies are constantly being made both by students and faculty members. The more significant of these studies are then made available either in printed or in mimeographed form to teachers in service. Included among such studies so far completed are: Creative Music, An Integrated Program in the Primary Grades, Creative Verse, and Creative Writing.

(b) Several times during the year the school is operated on Saturdays so that those who wish to visit the school to observe it in operation may do so. During the biennium just closed from fifteen hundred to two thousand people, mostly teachers, have visited the school one or more times. The benefit received by these visitors is evident by letters received from them and by requests for available literature. The policy of the school from the beginning has been

first, to discover the truth, and, second, to make it available to others.

(c) It is the policy of the school to lend members of its staff, where possible, to other schools or other agencies. During the year 1937-8, two of the faculty were away on leave in service at other places in the educational system; one member acted as elementary supervisor for the schools of Jackson County, Florida, and another served on the faculty of Mary Hardin-Baylor College, Belton, Texas. Several members of the staff have at various times taught in summer schools in other parts of the country.

(d) Sundry activities: The staff of the school have participated in many activities aside from their classroom duties. They have met more than 140 speaking engagements; they have served on numerous state and national committees; they have represented the College of Education at twenty-two different conventions one or more times; they have answered many requests for information on the work of the school; and, finally, they have written a score or more of articles for educational magazines.

At present the Laboratory School is co-operating with the State Department of Public Instruction in two ways:

(1) In September of the current year, in co-operation with the State Department, a study of curriculum problems will be initiated and later the results of this investigation will be tried out in various schools in other parts of the state. It is hoped that eventually these curriculum studies will be of benefit to all schools in Florida.

(2) The State Department of Public Instruction, in the fall of 1937, asked the Laboratory School to co-operate with them in developing the library facilities and practices of the state. The regular librarian was, therefore, released from part of her duties in the school in order that she might devote about half of her time to service in the schools of the state. This service was rendered in co-operation with the State Department.

# EMPLOYMENT BUREAU

The Employment Bureau is operated throughout the year for the benefit of students who are graduating or who are unemployed, and for the benefit of the school people of the state who need teachers. This is a constant service which the college has maintained for many years, without charge either to employers or to those placed.

# HIGH SCHOOL VISITATION

Our high school visitor has for almost twenty years now, served as chairman of the State Committee of the Southern Association of Secondary Schools. Through this agency the college has kept in close contact with the schools of Florida and has rendered a great deal of service in standardizing their work.

# THE DOE MUSEUM

The Doe Museum, composed largely of birds and eggs, is housed on the third floor of the Yonge Building and has become a valuable aid in the activities of the Laboratory School. Classes are frequently held in the museum and pupils from nearby schools have on a number of occasions visited it. Recently the St. Petersburg Historical Society sent its officers on a tour of inspection to obtain ideas for their own

museum. During the course of the year many visitors from all parts of the United States are received. Although the museum is already crowded, nevertheless new specimens are constantly being added, notably during the past year a display of butterflies and moths and a collection of Florida sea shells.

# ADVANCED STUDY BY FACULTY MEMBERS

It is the policy of the faculty of the College of Education and of the Laboratory School to have some of its members away on leave of absence in order to keep the whole staff abreast with the thinking that is being done along educational lines. Many of the staff, too numerous to mention by name, have at one time or another been away on leave during the biennium. Twelve of them have taken advanced degrees. It seems to be certain that this policy of continued study will be very potent in the advancement of the program of the college.

### CONCLUSION

It is planned to continue the services enumerated above and to extend them where possible. As we look back over the twenty-five years of service which the College of Education has rendered to the state, there is cause for much satisfaction. In all parts of the state the graduates of the college are serving as principals, supervisors, college professors, and officials in the State Department of Public Instruction. And the teachers who have had instruction in the college now run into the thousands.

We hope that the future may see a great increase in the service which may be rendered.

Respectfully submitted,

J. W. NORMAN, Dean

# REPORT OF THE DIRECTOR OF THE SUMMER SESSION

To the President of the University.

SIR: I have the honor to submit herewith my report of the Summer Sessions for the biennium ending June 30, 1938.

# INCREASE IN ENROLLMENT

The enrollment in the Summer Session of 1934, the last year in which an eight weeks' term was held, was 1,275. In 1935, the first year in which two terms were offered, 1,328 were enrolled the first term (a number that was slightly more than the year before), and 804 were enrolled for the second term. This gives the total number of registrations for the two terms of 2,132. Of this number, 530 were registered in both terms. Thus we see that 1,602 different persons were served by the Summer Session that year.

This upward trend has continued to the present. In 1937 there were 1,783 registered in the first term and 1,204 the second, a total number of registrations of 2,987. Of this number 851 were registered in both terms, leaving a total of 2,136 different persons served by the Summer Session.

The first term of 1938 showed a similar increase, there being 1,990 registered in the first term and 1,356 the second, a total of 3,346 for the two terms. Of this number 964 attended both terms, leaving a total of 2,392 different persons in attendance during the session.

Thus we see that the total number of registrations has increased from 1,275 in

1934 to 3,346 in 1938, or a total increase of 2,071 within the five-year period from 1934 to 1938. The following table shows the enrollment in detail:

TABLE I.

# INCREASE IN ENROLLMENT IN THE SUMMER SESSION OVER A FIVE-YEAR PERIOD

### 1934-1938

Year					First Term	Registration Second Term	Total	Total Number
1934	_	_	_	_	1.275	*	1.275	Persons Served 1,275
1935	_	_	_	_	1,328	804	2,132	1,602
1936	_	_	_	_	1,428	907	2,335	1,708
1937	_	_	_	_	1.783	1,204	2,987	2,136
1938	_	-	-	-	1,990	1,356	3,346	2,392

<sup>\*</sup> Last year of a single term.

# INCREASE IN ENROLLMENT IN GRADUATE SCHOOL

The enrollment in the Graduate School has shown an even larger percentage of increase. In 1934, 96 persons were enrolled in the Graduate School. In 1935 there were 148 enrolled in both terms; in 1937 there were 394, and in 1938, 497, an increase of 401 in the five-year period. The following table shows the enrollment in the Graduate School in detail:

TABLE II.
INCREASE IN GRADUATE SCHOOL ENROLLMENT IN THE SUMMER SESSION
OVER A FIVE-YEAR PERIOD 1934—1938

						Registration		
					First	Second		Total Number
Year					Term	Term	Total	Persons Served
1934	-	_	-	-	96	神	96	96
1935	-	-	-	-	116	32	148	119
1936	-	-	-	-	119	120	239	180
1937	-	-	-	-	212	182	394	292
1938	-	-	-	-	265	232	497	†

<sup>\*..</sup>Last year of a single term. † Figures not yet compiled.

It is manifest that this increase in enrollment affords a great opportunity. At the same time, it constitutes a major problem. A large majority of those who enroll in the Summer Session are teachers or those who plan to go into teaching. A still larger proportion, perhaps as high as 80 per cent, of those enrolled in the Graduate School are teachers. These are our most advanced teachers, supervisors, and principals; these are the ones who plan to stay in teaching—the ones through whom we must build a profession of education if it is to be done. It would be a calamity if we should fail to recognize our opportunity, or fail to meet it after it has been seen.

This increase in enrollment, it is believed, is due to the fact that there has been much improvement in the general situation during the summer. Regulations in the Graduate School have been greatly improved; a lecture series has been offered each summer of the biennium, for which we have been able to secure outstanding lecturers; it has been possible to bring to the Summer Session some of the prominent teachers from institutions like Teachers College, Columbia University, especially in the field of elementary education. It is obvious, also, that the teachers of the state are degree minded and are making every effort possible to secure advanced degrees.

# SCHOOL OF TRADE AND INDUSTRIAL EDUCATION

In April of this year the University of Florida, in co-operation with the State Department of Public Instruction, announced the first session of the School of Trade and Industrial Education. This school is part of the University of Florida

Summer Session and confines its offerings to subjects pertinent to trade and industrial education. The school was held at Daytona Beach, from June 13 to July 22. It was planned for the most part by Robert D. Dolley, State Supervisor of Trade and Industrial Education, representing the State Department, and the Director of the Sum-

mer Session, representing the University of Florida.

While the school was held in Florida, it was planned to serve the entire South. The organization of schools in special subjects to serve a larger area than a single state is in line with the best thought at the present time. For it is realized that there are some specialized fields in which those interested are so few that most of our states would not be justified in establishing schools to serve them. By establishing a school in one center and all states co-operating to make it a success, the venture would prove to be feasible. This is exactly the reason for the opening of the School of Trade and Industrial Education at Daytona Beach. By doing it in this way a comprehensive group of courses could be offered and at the same time a high class faculty could be employed to offer them.

From all reports, the school was an outstanding success. There were 212 registered in the first term of three weeks, and 192 in the second term of three weeks. Students were enrolled from all states in the South. The state supervisors of trade and industrial education in the Southern Region, headed by C. E. Rakestraw, Southern Regional Agent of the U. S. Office of Education, served as a supervisory committee, and from all indications they were well pleased with the venture. It is confidently believed that not fewer than 600 will avail themselves of these opportunities if offered another year. Thus we see that the University of Florida and the State Department of Public Instruction have an opportunity of serving an entire region in an effective manner. It is recommended that the school be continued another year.

Respectfully submitted,

J. W. NORMAN, Director

# REPORT OF THE DIRECTOR OF THE SCHOOL OF ARCHITECTURE AND ALLIED ARTS

To the President of the University.

SIR: I submit herewith the biennial report of the School of Architecture and Allied Arts for the period ending June 30, 1938.

# **CURRICULA**

The revised curricula as reported fully in the biennial report ending June 30, 1936, has not been altered and has met with the success which we then anticipated. Furthermore, we have evidence that other schools of architecture consider our project method a forward step in architectural education, and this division of the University has been put in a leading position, thereby, in the United States.

# PROBLEMS AND PROJECTS

As teaching is of major importance an effort has been made this biennium to draw the faculty together in a common objective. The method used is to have the entire faculty—in a group—judge the designs of the students of each instructor. The group also votes the student's grade. This procedure arouses discussion as to methods and objectives, and where a friendly spirit prevails great benefits are derived. Students are anxious to receive the results of faculty group criticism, and we believe there is

more professional spirit prevailing among the Upper Division students, and faculty

also, as a result of this procedure.

The faculty members' serving the University and the public as lecturers, jurors of exhibitions, and officers and members of professional organizations and civic boards keeps them more in touch with the times and strengthens their teaching as well as serving, within their fields, the supporting public.

The preservation and restoration of Florida's invaluable historic residences is a project which we are attempting to promote. So far this movement is only in its incipiency, but historic house museums should prevail in Florida as in Virginia and

elsewhere.

We have contributed our part to Short Courses when called upon.

An outstanding award to the School this biennium was the granting of a scholar-ship by the American Institute of Architects. Only one scholarship was given to the schools in the states south of Pennsylvania and east of the Mississippi River. The amount of the scholarship was \$750. The selection of our school, from among all the Southern schools, for this award by the National organization, we believe is an indication of the high standing our school enjoys in professional circles.

During the biennium one of our graduates was appointed associate editor of the

leading architectural magazine, published in New York City.

All other graduates are employed or are in practice for themselves, either as professional artists or architects.

# **NEW FACILITIES**

No new facilities, other than files and cases have been received during the biennium.

# **FACULTY**

On account of resignations, two new men were secured during the biennium. Both have had excellent training and experience as well as a background of travel, both in America and Europe.

# RECOMMENDATIONS

At present our work is not on as broad a basis as it should be. We could serve both the University as a whole and our own students in a vital way if we had a large room where we could exhibit teaching material in our field of the various visual arts.

In order to strengthen our work in architecture, we need a room for use as a building material laboratory where the student may actually handle the hundreds of materials and devices which go into buildings. We have much of this equipment now in storage but have no place in which the student may have it available.

Advanced students who are doing creative work have no place at present where they can pursue their studies. Such work cannot be carried on successfully in a

crowded studio or drafting room full of younger students.

Relief from the danger of a non-fireproof and over crowded attic cannot be over stressed.

Respectfully submitted,

RUDOLPH WEAVER, Director

# REPORT OF THE DEAN OF THE GENERAL COLLEGE

To the President of the University.

Sir: I beg to submit the following biennial report of the General College for the years 1936-37 and 1937-38:

With the 1938-39 term the General College begins its fourth year. For the first time, all regular Upper Division students at the University will be graduates of the General College.

It is too early yet to evaluate in a very objective way this program of general education. In the first place, the program is dynamic; it is not a static thing which can be set down in permanent form and accurately measured. Moreover, the vital program of the General College cannot be measured with tests that ask for mere information about the Punic Wars, the Odes of Horace, or the paintings of Reynolds. The final test of the program will be determined by what it contributes to the lives of the students who attend the General College. And since a student's stay at college is only one of many experiences that go to make up his life, present tests are inadequate. Probably time alone will be able to reveal the validity of any program.

Some observations, however, may be permitted. The transition from the old to the new has been made with very little disruption. The men in charge of the various schools and departments have not held rigidly to certain academic theories and refused to make practical adjustment. The fundamental conceptions of general education appear to be as valid as ever; in fact, they appear even more desirable as time goes on.

The General College program is experimental in the same way that other college programs, old or new, are experimental. For instance, we do not know whether certain men have succeeded in the past because of college attendance, or in spite of college attendance. It appears, however, that the General College is more nearly experimental in the attitude with which the curriculum is approached.

Since the change at the University of Florida is not a simple surface change, perhaps it is well to point out differences. We still have college men who study college textbooks, and they are taught by college teachers. The new program constitutes a change in point of view and an experimental approach, instead of a revolution. The old program emphasized pure science. Frankly, we are trying to get meaning and significance into the picture. The titles of the General College courses, such as "Man and the Social World" and "Man and the Biological World," may indicate a bit of impurity, but the old order has failed to see that freshmen and sophomores have never had pure or complete concepts as a result of one year's study. On the surface it appears valid to present material and let the student draw his own conclusions, but the results indicate individual deformities and monstrosities. No longer do we "lay foundations" in specialized subject matter—foundations that are meaningless to the three-fourths of the students who do not continue in these subjects. We try to get material that is significant and meaningful to the student at the present time. It makes no difference whether it comes from ancient or modern times; the guiding principle is that it must enter immediately into the student's thinking to guide him in the "next steps" he must make. If we can create the proper understanding of, attitude toward, and respect for, our social organizations and cultural heritage, the men who elect to go on to the professional work of the Upper Division will have very little difficulty there.

Under the old system we talked in terms of subject matter. Our regulations concerning majors, minors, credits, honor points, time, and grades were primary. We appeared to be trying to make the individual fit the program. Under the new system we are trying to make a program for the individual and to make due provision for differences. We do not require a great mass of material of all students. For instance, English is required of a freshman in the great majority of the colleges of the country. For good students, the General College makes only one addition to this—social

science. Further, the General College requires only two subjects of sophomores the humanities and biology. In other institutions it is common to find a language and a science or mathematics in the required list of subjects. So, from a quantity

standpoint, the programs do not differ widely.

Under the old system we tried to have a rule or regulation for everything; then we sat back and let the system run. Today we have very few rules and regulations; we attempt to follow broad principles and help or guide students as individuals. This guidance work has been an important part of the General College program. Guidance is attempted not only through testing, placement, and advice, but through the very material which makes up the comprehensive courses. In addition to this, effort has been made to smooth the way from the General College into the colleges and schools of the Upper Division through guidance conferences. In order that the guidance program might be more effective, the original plan was changed after the first year. There has now been worked out a plan whereby students, both freshmen and sophomores, fill out a pre-registration card at the end of the year. Freshmen come to the General College office for advice, while the sophomores consult with the dean of the college in which they expect to register upon finishing the General College program. Students are thus called upon to put down in concrete form whatever vague ideas they may have had previously.

Formerly, the most experienced teachers were reserved for Upper Division and Graduate students. Too many inexperienced instructors were assigned to freshmen. Today, the freshmen have a fair share of the best teaching talent the University has. We have borrowed from all parts of the University some of the most experienced and most successful teachers. In direct contrast to common practice in other universities, we have tried to secure the best teachers for the beginners. We believe the

whole University will profit by this policy.

Faculty-student relationships have been greatly improved under the new plan. Formerly, a student studied the personal idiosyncrasies of the instructor about as much as he considered the subject at hand. Today examinations are administered by a board of examiners, and the student's final grade does not depend upon a whim of the instructor. In the past, many instructors were petty tyrants, or, at best, benevolent despots, and they enjoyed their privilege. Today, the instructors do not have personal whips to hold over the students. The old disciplinarians do not like this; they wish to "make" students "do things" and to force them to outward conformity. In no sense has the faculty responsibility decreased, but with the new plan the instructor is under obligation to get the student to advance under his own volition. In a very distinct way, the General College places more responsibility on the student. In some instances this responsibility is not used in the wisest way, but, on the whole, there appears to be little doubt that we should continue this plan. We have too many college graduates who are unable to take the initiative in a responsible manner when thrown upon their own resources after graduation.

One achievement of the General College which can be measured accurately is the cost of instruction. The following table is taken from a study prepared by the Regis-

trar.

# UNIVERSITY OF FLORIDA A STUDY OF TEACHING COSTS BASED UPON THE TEACHING DEPARTMENT WITHIN A COLLEGE

College or School	Salary per Teaching Unit	Cost per Student Course Enrollment	Cost per Student Credit Hour	Cost per Student Clock Hour	Amount of Upkeep per Student Course Enrollment	Administrative Expense per Enrollment
Agriculture	\$2,728	\$31.45	\$10.33	\$8.55	\$5.94	\$ 80.56
Arch. and Allied Arts -	2,221	38.36	10.81	3.60	.33	130.77
Arts and Sciences	2,680	24.17	7.57	6.43	3.10	45.20
Business Administration	2,598	10.32	2.96	2.90	.19	24.76
Education	2,939	25.02	8.94	6.89	.14	70.58
Engineering	2,829	24.58	9.69	6.25	4.15	35.28
Forestry	2,188	40.64	13.57	9.42	6.91	176.22
General College	2,352	8.94	2.20	2.08	.32	6.43
Law	3,990	21.22	7.26	7.04	1.97	24.03
Pharmacy	2,825	42.91	13.76	9.00	7.05	88.21

Since certain subjects are required of all freshmen and sophomores, the number involved enables us to avoid classes of two or three students, or even half-filled sections. However, the plan of using large lecture sections to present material is, in the main, the reason why fewer instructors are needed, and the cost per pupil is far below that of the other colleges. About 12 additional instructors would be required if we did not use the presentation lectures. However, the General College does not attempt to do the major part of its teaching in the large lecture sections. These sections meet only once or twice per week to present the topics of study and discussion. Small class sections, discussion sections, laboratory sections, and clinic sections follow to complete the study.

Obviously, economy beyond a certain point is undesirable. We believe that further reduction would only cheapen what we are trying to do. At the present time about 70 instructors teach part-time in the six comprehensive courses of the General College; an additional number teach in the connecting courses. Of all these, only about 10 receive the major part of their salaries from the General College budget and consider the General College work their primary interest. It does not appear desirable to have all, or even half, of the General College teaching force in the General College budget, but it is essential that we have a small corps in each of the subject fields to work continually to vitalize the materials of the course. In some cases men borrowed from other departments have added our work to their primary interest. Their cooperation has been splendid, but now departmental work is again claiming their attention. We are in agreement with the deans of the Upper Division colleges that we should add a small corps in each of the comprehensive courses and gradually release some of their men to resume their departmental work. It is suggested that this plan could be used to meet the increasing University enrollment.

The General College is actively working on the problem of teaching freshmen and sophomores. College teaching, as a rule, is of poor quality. We cannot afford, however, to be dogmatic or make too many generalizations about the effectiveness of this method or that method: the value of the lecture method over the discussion method;

or of the demonstration method over the individual laboratory method. The assumptions are questionable, and there are many variables. We are using lecture method, demonstration method, laboratory method, discussion method, clinic method, and other means available to help the students. The general comprehensive examinations and the fact that everything done in a course is subject to the evaluation of a number of instructors, make for considerable objectivity and validity.

After three years we believe the broad, flexible plan of general education is a sound one. We feel that we are on safe ground. We are not satisfied, however, with our progress in carrying out the principles. Our present energies are directed in an effort to smooth out difficulties, meet practical situations, and make the program really

effective. We have much to do.

Respectfully submitted,
WINSTON W. LITTLE, Dean

# REPORT OF THE DEAN OF THE GENERAL EXTENSION DIVISION

To the President of the University.

SIR: I beg to submit herewith the ninth biennial report, covering the activities of the General Extension Division for the period July 1, 1936, to June 30, 1938.

# INFORMAL INSTRUCTION

SHORT COURSES

The General Extension Division is offering informal instruction to numerous groups in order that individuals may rehabilitate or improve themselves to meet competition in a rapidly changing economic and social order. This instruction, for the most part, has been given through short courses, and the development of this work has been the outstanding achievement of the biennial period. (See Table I.)

At Camp Roosevelt in 1936-37, with adequate physical facilities, funds, and

At Camp Roosevelt in 1936-37, with adequate physical facilities, funds, and personnel, there was developed a program for adults, many of whom the University had never before been able to reach. Back at the University in 1937-38, without these facilities, the Division has found it necessary to curtail the program without making certain groups of adults feel that the University is no longer interested in them. To afford the educational opportunity which the men and women of Florida now expect from the University, the Division needs dormitory accommodations, increased personnel, and funds for short course programs.

Five general classes of short courses were given: professional, business, labor and

vocational, civic, and the arts and crafts.

No fees were charged at Camp Roosevelt, but for the work carried on at the University, it was necessary to charge students fees sufficient to pay instructors not on the University of Florida staff.

#### CAMP ROOSEVELT

On July 5, 1936, Camp Roosevelt, which was built (three miles south of Ocala) for construction headquarters of the Atlantic Gulf Ship Canal, was turned over to the University of Florida for a School of Adult Education at the suggestion of the President of the University and upon the recommendation of Lieutenant Colonel Brehon Somervell of the United States Engineering Department.

This Camp is a modern village. There are 154 acres in the reservation. Assigned to the University were 100 buildings, providing accommodations for 300 students, and including 78 modern houses, 2 dormitories, lecture halls, offices, laboratories, and

a dining hall.

The President of the United States made available for one year's operation an adequate grant of Federal funds, administered through Works Progress Administration. The U. S. Engineers maintained the buildings and grounds.

Instead of confining its efforts to the rehabilitation of one group of 300 individuals for a period of one year, the University enlarged its short course program and extended its instruction to include many groups. The Camp was opened for instruction

<sup>‡</sup> One student from Cuba.

October 5, 1936, and was closed October 14, 1937, for lack of additional funds. Following is a summary of the work accomplished:

L. R. Alderman, Director of Education for the Works Progress Administration, visited the School of Adult Education and reviewed its educational policies and accomplishments. In a statement for press release, he said the program was "a real demonstration of the most practical kind, which will be copied. I find myself exceedingly enthusiasite about what is being done in Florida through the General Extension Division at Camp Roosevelt for all sorts of people."

# FORMAL INSTRUCTION

### CORRESPONDENCE STUDY AND EXTENSION CLASSES

Formal instruction, through correspondence study and extension class work, with many adaptations, continues to meet the requirements of adults, particularly those interested in work on the college level for credit. (See Table II.)

#### SUMMARY OF INSTRUCTION

Informal Instruction Formal Instruction		_	-	1,100
Total for Biennuim	_	_	_	16,421

# CO-OPERATION WITH GOVERNMENTAL AGENCIES

Many governmental agencies operating in the State have appealed to the Division for assistance in training their personnel. Materials were lent, programs were planned, and 33 short courses were conducted during the biennium. The agencies affected were: Civilian Conservation Corps, Southeastern Peace Officers Educational Association, National Youth Administration, Works Progress Administration, State Commission of Game and Fresh-Water Fish, State Road Department, State Industrial Commission, State Department of Public Instruction, State Board of Health, State Board of Examiners of Nurses, State Board of Barber Examiners, Florida League of Municipalities, and the Association of County Commissioners.

#### CITIZENSHIP TRAINING

Each year the Dean of the General Extension Division, as State Civilian Aide to the Secretary of War, has carried on a procurement campaign for the Citizens Military Training Camps, because of the value of the educational program and citizenship training given in the camps. Prominent citizens were selected to act as county aides. As usual, Florida's procurement quota, 557, was exceeded, and its training quota, 446, was promptly filled.

# SERVICE FUNCTIONS

# DEPARTMENT OF SENSORY AIDS TO INSTRUCTION

As a result of the two short courses and a conference held at Camp Roosevelt, totalling 14 days and attracting 159 persons, a State Association for Visual Instruc-

tion was organized. The department was particularly active in securing the organization's inclusion as a section of the Florida Educational Association and in arranging for its second annual meeting in March, 1938.

Films: The film service of the Division, which was abandoned several years ago, has been resumed. Since no funds were available for film purchase during the biennium, the Division inaugurated a film library in cooperation with the public schools, following the Illinois plan. Circulation of films was begun in September, 1937, and 641 reels have been lent for 1211 showings, and 153,657 pupils in 24 counties have been instructed by them.

Slides: The Division's entire collection of slides has been revised, and a new bulletin, listing 225 sets, was printed. A collection of photographic negatives on industries and other aspects of Florida life was begun, and a slide production project, set up at the School of Adult Education, produced 28 sets of slides. The biennial loan of slides totalled 953 sets, containing 41,170 individual slides. They were shown to 301,974 persons in 49 counties of Florida.

Prints, Charts, and Posters: Prints, charts, and posters numbering 2,007 were lent during the biennium to borrowers in 26 counties of the State. Added to the collection were 1,200 photographic prints.

Talking Machine Records: For music appreciation classes and rhythmic activities in the schools and for programs of clubs and other organized groups in 43 counties, the department lent 1,765 talking-machine records during the biennial period.

# PUBLIC INFORMATION AND LIBRARY SERVICE

Package Libraries: A total of 1,698 packages, containing 20,924 magazine articles, pamphlets, reprints, etc., has been lent to borrowers in 63 counties this biennium. Emphasis is being placed on the assembling of occupational material for use in vocational guidance work particularly with high school seniors.

Reference Books: Reference book service was increased 63 percent during the present biennium. Requests for the service came from every county in the State again this biennium, and 14,216 books were lent. The number of requests received from persons other than correspondence and extension class students continues to increase, and indicates the widening use of the facilities of the Department. The service added 574 books to its collection, of which 259 were new titles.

Traveling Libraries: Chests of books for children in the various grades of the public schools were circulated in 35 counties, totalling 488 collections, containing 10,334 books.

Plays, Recitations, Special Occasion Materials: Materials totalling 4,494 pieces were lent in 63 counties. A total of 555 new plays, of which 553 were new titles, were added to the files by courtesy of the publishers.

### HIGH SCHOOL CONTESTS

The Interscholastic Contest program, suspended in 1933, was partially reinstated in 1937-38 with the holding of competition in debating, one-act plays, and publications. This reinstatement was made possible by the co-operation of the colleges of Florida, which took charge of the preliminary competitions.

### PUBLICATIONS

A total of 56 bulletins, containing 348 pages, all describing the various activities of the Division, were published during the biennium. The total number of copies printed was 449,400.

#### CONCLUSION

With an increase of 4,531 enrollments in formal and informal instruction over the preceding biennium, it is quite obvious that the Division cannot continue to carry this additional load without funds which will permit an increase in its personnel, library, and other instructional facilities.

Respectfully submitted,

B. C. RILEY, Dean

# REPORT OF THE ACTING UNIVERSITY LIBRARIAN

To the President of the University.

SIR: I have the honor to submit to you the following report on the Library of the

University of Florida for the biennium June 30, 1936, to June 30, 1938.

In 1906, when the University was established in Gainesville, the Library had about 3,000 volumes. In 1938 the libraries of the University have 140,884 volumes, 101,-225 being in the Main Library. Our growth within the thirty years has accompanied the growth of the University, yet the rate of expansion has been so rapid in the last few years that the Library has had difficulty in keeping pace. Especially has this been so in the last four years, when the change in the curriculum and in methods of instruction has put great emphasis on widespread reading and constant use of the Library resources. A generous increase in income granted for the biennium of 1937-39 has helped us meet the situation. It has meant an increase in number of books bought, in professional and student staff, in periodical subscriptions, and in binding. Departments have studied their collections and bought those works which are essential to a graduate and undergraduate working collection. In the College of Arts and Sciences the Shaw List was followed and 108 additional titles purchased. Bibliographies and reference works of important technical periodicals, of society transactions, of historical and literary magazines have been made. Binding income increased by one-third has allowed us to return to the shelves documents and books long held out of circulation.

Two additions have been made to the trained staff: an Order Librarian and an Assistant in Circulation. The help of the Assistant in Circulation has perhaps been felt most directly, since Miss Davis comes in contact with the majority of the students and those members of the faculty who have reserve books. Her training and previous experience have given her a knowledge of books and how to deal with readers needing guidance. She has been able to give much aid to the General College students particularly. In the fall of 1937 an Order Department was created consisting of a trained librarian, Mrs. Amy Fetzer, and two student assistants. Its efficient and systematic work has pervaded and strengthened every department of the Library. It has brought closer relationships with members of the faculty and established itself

in the program of careful planning and buying.

There have been several changes in the staff, additions and losses. The Librarian, Miss Cora Miltimore, resigned October 1, 1937, because of ill health. She had been with the Library from the fall of 1919, when it was housed in one large room and consisted of about 20,000 volumes. In her place the Assistant Librarian, who was also head of the Reference Department, has been Acting Librarian. Miss Anne Richardson of Columbia University Library School has been ably filling the position of Acting Reference Librarian. Miss Mary Hause of the University of Illinois Library School is Acting Cataloger for the year 1937-38, while Miss Marian Youngs is on a leave of absence for further study.

Books in the Reserve Room for the use primarily of students in the General College now total 3,831 volumes. Two changes have been made in the handling of this collection. A two year trial of open shelves with free access and exit to and from the room showed the method impractical. Losses of books were far too high. In the fall of 1937, a person was placed at the door to examine the books of all those who left the room. Inventory taken in the spring shows that the system practically did away with losses. General College books, like reserve books, are checked out only over night or over the week-end. It is the desire of the course in Reading, Writing, and Speaking to encourage reading. Since a comfortable chair at home and unlimited time add to the enjoyment of reading, a three-day checkout was allowed for the books in the C-3 collection. The checkout was instituted on February 28, 1938. The size of the average daily checkout with no student permitted to take more than one book has proven the value of the change.

The N.Y.A. furnished 22 workers in the year 1936-37 and 17 in 1937-38. The boys have worked under the direct supervision of experienced librarians. We have found them efficient and willing, and have so learned to lean upon the help of N.Y.A. that we could no longer get along without it. Many projects have been undertaken such as: sorting and tying newspapers; making a bibliography of biographies of Floridians; making a checklist of duplicate magazines; marking for library holdings of the Essay Index; taking an inventory of the Main Library, the Chemistry-Pharmacy Library, Architecture Library, and the Florida Union Reading Room Library. The boys themselves have benefited. They have learned systematic methods and gained an interest in and a knowledge of literature.

With the increase in buying has come a double increase in the amount of material borrowed from other libraries. Half of that requested was for the use of the faculty. Our increased buying of new material may have stimulated the desire for research, as enthusiasm for individual work is growing in the University. The number of volumes borrowed in 1936-37 amounted to 57, in 1937-38 to 103. The number loaned by us in 1936-37 was 29, in 1937-38 was 32.

The use of microfilm has begun to play its part in our Inter-Library Loan System. Two sets of film were ordered for graduate students; one was a very rare book published during the War of 1812, the other of 67 political letters in a newspaper.

A Friends of the University of Florida Library group started in the fall of 1937 was initiated by an interested member of the English Department. Announcements and bulletins were sent out to individuals on the campus, in the city, and throughout the state to interest them in the organization, which was formed to foster interest in the needs and work of the Library. Two hundred and fifty-three members enrolled. Through their aid 385 gifts were received. Among the gifts donated by Friends were a few rare books, some well bound sets of foreign authors, three scarce volumes of Florida laws, and a collection of manuscripts.

Gifts to the Library have been numerous and have been received gratefully. The outstanding gift, probably, is the original manuscript of the book, *Tom Watson:* Agrarian Rebel, presented by Mr. C. Van Woodward, assistant professor in the University. The Florida Historical Survey and State Archives Division has undertaken several projects which have meant much to us. One volume of everything it has copied or compiled has been deposited in the University Library. We have received copies of about 50 letters and manuscripts, discovered in out-of-the-way places by its workers; catalogs of the private libraries of Mr. Yonge and Mr. Wentworth, both of Pensacola, Mrs. Collins of Tallahassee, Mr. Dike of Orlando, and Mr. Hoskins of

Panama City; and inventories of the County Records of Duval and Collier counties.

We appreciate very much being the recipient of these publications.

Space has now come to be the chief need of the Library—space for readers, for the books, and for the staff. The Reserve Room seats 276. During this last year on two nights the attendance registered 271. There are 38 carrels for the use of graduate students and faculty. During the summers of 1937 and 1938 all were in use and several requests denied. Every department is crowded for space, the cataloging room and the office of the secretary especially. Stack space will last possibly one or two more years; duplicate government documents and periodicals are already being piled on the floor.

Classes in teaching the students, especially the graduate students, how to use the Library should be given. The lack of such knowledge leads many students to waste much time in searching and hinders them from using all the material that is available.

Respectfully submitted,

HENRIE MAY EDDY, Acting Librarian

# REPORT OF THE PROFESSOR OF MILITARY SCIENCE AND TACTICS

To the President of the University.

SIR: I respectfully submit the following report on the progress of the Department

of Military Science and Tactics for the years 1936-37 and 1937-38.

No material changes have been made since the last biennial report in the basic methods of operating the Military Department. The Department has continued to stress more and more the importance of leadership not only in the military profession but also in every profession the students may choose. To this end the Department is constantly increasing the responsibilities placed on R.O.T.C. students, and the results have been most gratifying.

The following improvements and additions to the military plant have been made

since the last report:

IMPROVEMENTS: 1. Installed sprinkler system for watering the drill field.
2. Rebuilt sheds and butts on 50 ft. rifle and pistol range.

3. Rebuilt corral and riding pen fences.

Additions: 1. Necessary motor equipment for converting one horse-drawn battery to a motor-drawn battery.

2. Extension of roof on stables to accommodate motor vehicles.

3. Additional acreage for enlargement of corral.

This opportunity is taken to express my appreciation of the co-operative spirit shown by all departments of the University in our relations with them.

During the past two years there have been frequent changes in our officer personnel due to War Department withdrawals and replacements. These changes, after periods of service in the Department, are somewhat of a handicap; but it is preferable to have, as has been the case, alert, efficient officers, even if their tours here be shorter, than to have possibly poorer material for longer periods.

After two years of observing, I feel that the students do not have a sufficient number of required hours to cover fully the theoretical and practical work necessary to train them to carry on properly where we leave off. To meet this difficulty without an additional hour being assigned the Department, I have decided that the parade hour each week will be utilized for additional theoretical and practical, or laboratory, instruction. It is unfortunate that this parade or review ceremony should have to be

discontinued, for it not only gives the public an opportunity to see the results attained by the department but gives the student an opportunity to command larger units and become familiar with one or two ceremony maneuvers.

Earnest recommendation is made that, whenever it is felt that such a thing is

possible, an extra period be assigned for one ceremony a week.

Respectfully submitted,

WM. S. BROWNING, P.M.S. and T.

# REPORT OF THE ACTING DIRECTOR OF THE INSTITUTE OF INTER-AMERICAN AFFAIRS

To the President of the University.

SIR: I beg to submit herewith the following report on the activities of the Institute of Inter-American Affairs for the biennium ending June 30, 1938, together with

general recommendations for the biennium beginning July 1, 1938.

During the last biennium the Institute of Inter-American Affairs has been increasingly active in the following fields: the orientation of foreign students attending the University of Florida, the arrangement of exchange scholarships and fellowships for Florida students and faculty members for study in foreign countries, the distribution of information regarding Latin American countries to the schools of the state of Florida, arranging for special lecturers on international topics to speak at the University of Florida as well as other institutions of higher learning within the state, and the preparation of special inter-American radio broadcasts presented over radio station WRUF.

In addition to these activities, a special inter-American educational exchange program has been developed, which includes a large number of the colleges and universities located in the southeastern states and numerous universities in the Latin American Republics. This program is to be carried on by the University of Florida in conjunction with the University of Havana. Briefly, the program includes the following major objectives:

1. To assemble and distribute pertinent information, including books, articles, and such other materials considered valuable in developing a closer and more sympathetic understanding of mutual problems and conditions in the Americas. To include the translation and publication of such materials whenever possible.

2. To promote and arrange inter-American exchange lecture tours between the universities

in the countries of the Western Hemisphere.

3. To promote and arrange inter-American exchanges for professors and other officials and persons connected with the educational developments of the various countries of the

4. To promote, arrange, and administer inter-American university and college exchange

scholarships for students in the countries of the Western Hemisphere.

5. To promote research work in the various countries and lend such assistance to research organizations as is consistent and possible with the organization of the Institute of Inter-American Affairs.

In connection with this program the Institute arranged and administered the first inter-American exchange lecture tour in co-operation with the South Atlantic Modern Language Association. Fourteen universities, located in the southeastern states, together with the University of Havana, took part in this program. Three professors from the University of Havana visited the universities in the United States and gave lectures in English and Spanish and led round-table discussions at each university. In order to make possible the exchange arrangements, the University of Havana and

the Cuban Department of Education invited three men from the University of Florida to visit Cuba and give lectures and round-table discussions in English and Spanish at various institutions in Cuba. This part of the program was financed entirely by the University of Havana and the Cuban Department of Education.

The number of Latin American students attending the University of Florida has considerably increased during the last biennium. No special attempts have been made, however, to get more students, and we have used extreme caution in choosing those who are admitted. Due to the unsettled conditions in Europe, the exchange scholarships with European countries have been limited. These scholarships, handled through the Institute of International Education in New York City, provide free board, lodging, and tuition, or the equivalent, for one academic year.

The Institute has continued its co-operative research program with the Carnegie Institution of Washington; and during the last year, the completed report on the economic and cultural geography of the Mayan Indians of Guatemala was completed

and is in the process of publication.

The Institute has increased its services to the teachers of the state of Florida in the preparation of special programs dealing with the countries of the Western Hemisphere and the supplying of information regarding these countries. Special Inter-American educational radio programs have been arranged with the co-operation of radio station WRUF, and more extensive plans are being made for the next biennium.

Respectfully submitted,

ROLLIN S. ATWOOD, Acting Director

# REPORT OF THE DIRECTOR OF THE FLORIDA STATE MUSEUM

To the President of the University.

SIR: I beg to submit herewith my report of the general activities of the department in my charge for the biennium of July 1, 1936, to June 30, 1938, together with

recommendations for the following biennium.

The past biennium has been one of most unusual activities, with the packing, moving, and reinstalling the Museum in its new quarters in the Seagle Building. The contents of nearly six hundred large packing cases, boxes, and cartons had to be distributed to storage cases in a classified order, but first of all we had to build 67 storage cases. These cases are all filled, but a considerable amount of material has to wait for more storage cases and more room in which to place them. We have used all

available space on the third floor.

The entire third floor, termed as storage quarters, is just now completed at this date, July 14. It has been necessary to get the Museum material arranged in the storage cases before starting work on the exhibits. We can now readily go through the storage cases and select material for our exhibits, which will be about four per cent of what we have, as that is about all the exhibition space will admit. We now have several exhibition cases about ready to be filled but are hardly far enough advanced to set a date for the admittance of the public. My plans, however, are to open the first floor to the public in advance of finishing the second floor and to make the date of the opening of the first floor and the date of the dedication of the building the same event. This is considered best for the reason that, if we dedicate the building and have a crowd, people will be constantly coming back with expectation of admission.

Sixty-nine accessions (Numbers 3296 to 3364) have been received during the past biennium, all of which are of importance and value to the state. The perpetual inventory of all materials, both specimens and equipment, has now been taken, and the inventory may be kept up to date henceforth. There are now 338,624 specimens in the Museum, valued at \$353,320.71.

# RECOMMENDATIONS

In the face of these facts, I cannot refrain from making the plea for more room, and I believe above all other departments the State Museum is justified in this request; therefore, I suggest that due consideration be given to this feature of this report.

In reconstructing the building the architects prepared for a stairway going to the basement, but on my advice at that time, the stairway was not put in as the basement was deemed very inadvisable for storage quarters, and in that this objection still exists, but the main portion of the basement can be made into exhibition space, and we have plenty of material on hand that can be exhibited therein without injury. This arrangement would call for moving the old boats into the basement, and a great many other large exhibits which we now have, then extending the room in which the boats are now installed on the north to the limits of the building. While this probably will seem visionary, I am free to state that if done, the space will be readily absorbed by the material on hand and that it will then be but a beginning of a great State Museum.

I wish to here express my sincere thanks to you, to the members of the Board of Control, and to all who have had to do with the moving and the rehabilitating of the State Museum. I wish especially to thank the members of my staff for their loyalty and whole heartedness in their various capacities in which I could not have hoped for accomplishment without their aid.

Respectfully submitted,

T. VAN HYNING, Director

# REPORT OF THE DIRECTOR OF THE DIVISION OF ATHLETICS AND PHYSICAL EDUCATION

To the President of the University.

SIR: The following report from the Department of Athletics and Physical Education is respectfully submitted.

In the Department of Physical Education an advance lecture section for sophomores has been added. Formerly there was only one lecture section for both freshmen and sophomores.

In the Intramural Department five sports have been added to the program. At present between seventy-five and eighty per cent of the entire student body, with the exception of special students, participate in the various intramural sports.

In the past biennium an effort has been made to establish closer relations with the high schools of the state. With this thought in mind, free coaching clinics for the benefit of the high school coaches of the state have been conducted by the staff of the Athletic Department. Most of the high schools have been visited—many of them several times—by various members of the Department.

The physical plant has been added to by the construction of buildings at the north end of the stadium that will house ticket booths, concession booths, and rest rooms. This has been done through a W.P.A. project. A complete lighting system has been

installed so that the stadium can be used for night exhibitions of all types. This was made possible through a W.P.A. project, together with a generous gift of Miss Georgie Seagle. Miss Seagle's gift was used as the sponsor's donation for the project. Through the further co-operation of Miss Seagle, a building has been provided near the campus in which the members of our various athletic teams can be quartered. Adequate dining room facilities have also been provided in this building for those quartered there.

Approximately twelve acres of land, lying west of the R.O.T.C. Parade Ground, have been transferred from the Experiment Station to this Department to be developed into athletic fields for the use of both the intercollegiate and intramural programs.

Two members of the staff have resigned. They have both been replaced.

Plans are being formulated that, when completed, will provide an adequate plant

for the handling of both our indoor and outdoor programs.

The greatest need is to clear the debt that the Department has had for a number of years and which has been gradually reduced by strict economy. At the same time a full program in all branches of the Department should be maintained. Above all relations and contacts with various interests in the state should be maintained and broadened.

Respectfully submitted,

Josh Cody, Director

# REPORT OF THE DIRECTOR OF PUBLICITY

To the President of the University.

SIR: The Department of Publicity has operated again this biennium similarly to the way it has operated for several years. As in the past, its full opportunity for service and important and desirable work in behalf of the University has not been possible largely because of

1. Lack of adequate personnel and

2. Responsibilities of directing the Alumni Association in connection with the work of this office.

The latter function is not altogether undesirable as an adjunct of the program and operation of a University Department of Publicity, provided there is adequate personnel to carry on the manifold duties and responsibilities of the two fields of activity.

During the first year of the 1937-39 biennium, we were able to inaugurate rather successfully a closer relationship with a number of newspapers. We developed a system of student correspondents working in constant co-operation with this office with the result that University news was more widely disseminated than under our previous system, where we did not have quite the personal contact as was provided

through the medium of home town correspondent.

Robert F. Sikes, President of the Florida Press Association, generously awarded a handsome trophy to be given at the end of the year to that student doing the most consistent and best all-around job of interpreting the University to the readers of his particular paper. This particular trophy, limited to correspondents of the weekly newspapers, was won by L. E. Vause, Jr., Williston. Three correspondents received special mention and three, honorable mention from the rather extensive field of student writers.

During the year, I was accorded a signal honor of being invited to address the National Association of State Universities meeting in Washington, the expenses of

which trip were paid in full by the American College Publicity Association. The reactions from this speaking engagement seemed to reflect well on the University.

As the year closes, we are very happy to report the official installation of fortyfour University of Florida Alumni clubs. While this is primarily in the field of alumni work, there is no question but that the University has received considerable favorable publicity as result of the development of this far-reaching alumni club

I have made no attempt in this report to enumerate the manifold activities that naturally come within the scope of this department, but I am pleased to report that we have continued, to the extent of our ability, an aggressive policy of the best possible interpretation of the University. I am confident that people of this state have a far better understanding of the University now than at any previous time, and the many favorable editorials which have appeared in the past year on the University indicate beyond question the great appreciation of this University and of its leadership. Press commendation of President Tigert has been extremely favorable and

The installation of the Phi Beta Kappa chapter at the University this year was an important event, but the extent of the general news and editorial space which we were able to secure in connection with that significant event at the University far

exceeded the expectations of those most concerned with it.

Respectfully submitted, Frank S. Wright, Director of Publicity

# REPORT OF THE UNIVERSITY PHYSICIAN

To the President of the University.

widespread this year.

SIR: There continues to be an increasing number of patients among the summer school students who are ill as a result of fatigue, which becomes apparent with the strenuous schedule of the summer school; and each year brings an increase in the number of students from the northern states who are sent to this institution in order that they may benefit from the climate, particularly asthmatics and those suffering

recurrent upper respiratory infections.

The general health of the student body, however, shows much improvement over former years. This improvement, no doubt, is partially due to the fact that freshmen are having an increasing amount of corrective work done before they enter the University. That the general health of the student body is good is evidenced by the comparatively small number of hospital admissions and dispensary treatments for the period. There has been no epidemic of note, but pneumonia has been more frequent than in former periods, since the epidemic of three years ago. Malaria, contrary to general belief, is seldom found among the student body; only fifteen cases were seen during the first year of this biennium and two cases during the second year.

In April, 1937, a student suffered a fractured vertebra received in an automobile accident near Palatka, from which point he was brought to the Infirmary and died a few hours after admission. In October, 1937, two deaths occurred in the Infirmary, one from a meningeal infection following a sinus infection, the other from an acute streptoccocic meningitis occurring six hours after the patient was brought to the Infirmary by his father from his home in west Florida. Of these deaths only one can

be classed as an institutional death.

Physical examinations of the freshman class and of all athletic teams, including

intramural teams, have been made. Regular sanitary inspection of the dormitories, cafeteria, swimming pool, and campus have been made, as well as physical examinations of the kitchen help.

The Infirmary has been annually awarded a "Fully Approved Hospital Certificate"

by the American College of Surgeons.

Dr. Fred Mathers, after a service of three years as resident physician, resigned October 1, 1937, and Dr. W. Rasmussen, a graduate of the University of Minnesota and recipient of a fellowship in medicine from the Mayo Foundation, was appointed to the position for one year. The nursing staff, which remains unchanged, has rendered efficient service.

There has been no equipment purchased during this period except necessary re-

placements.

Respectfully submitted,
GEORGE C. TILLMAN, University Physician

# REPORT OF THE DEAN OF THE COLLEGE OF AGRICULTURE

To the President of the University.

SIR: I respectfully submit the following report of the University of Florida Agricultural Experiment Stations and the Agricultural Extension Service for the biennium ending June 30, 1938.

# AGRICULTURAL EXPERIMENT STATION

The closing of the biennium marks the fiftieth anniversary of the Florida Agricultural Experiment Station. During that half-century period the history of the state's agriculture has been a record of steady and pronounced advancement, and in this achievement the experiment station has had no small part. The history of better livestock, higher quality fruits and vegetables, reduced costs of production, introduction of new crops and superior varieties, improvement in plant and animal nutrition, control of pests and diseases, and other farming betterments is largely a register of results or research and experimentation. Space does not permit the listing of even outstanding station accomplishments of those fifty years; but it may be emphasized that no phase of agricultural activities has been neglected, and each bears strongly the imprint of application of research findings.

Wide diversity of soils and crops, climatic differences within the state, and the more recent changing economic conditions wherein problems of agriculture have multiplied in number and complexity have necessitated enlargement and widening of the scope of experiment station investigational work. To meet these demands, four branch stations and eight field laboratories, in addition to the eight research departments of the Main station, are now functioning. All field stations are integral parts of the Main station under unified administration, and each conducts experi-

mental work dealing with specific needs of the area where located.

During the biennium 182 major agricultural problems have been under investigation. Among these projects were several carried in active co-operation with the United States Department of Agriculture, other state agencies and organizations, and neighboring experiment stations. All phases of cattle, poultry, and forage crop investigations at the federal West Central Florida Experiment Station at Brooksville are co-operative and correlated with the work of the Florida stations.

Substantial and gratifying progress has been made in all research lines, the work resulting in the accumulation of much new information of which the greater part has been given almost immediate application. Detailed information covering the scope, types, and findings of this experimental work for the biennial period is available in published form in the annual reports for the years 1937 and 1938.

# NEW FACILITIES

New buildings constructed during the biennium consisted of a dairy products laboratory, financed in part by a grant from the Public Works Administration, and an implement shed at the Main station, a field laboratory for the potato disease work at Hastings, and an addition to the laboratory building at the Citrus station.

A tract of about 91 acres was added to holdings at the Main station, these lands to be used mainly for pasture improvement investigations.

### **EDITORIAL**

Demand has continued unabated for Station publications, and it has been difficult to maintain a supply. From 80,000 to 100,000 bulletins are sent out annually, mostly by special request. Twenty-three new bulletins ranging in size from 12 to 84 pages, and 31 press bulletins, two pages in size, were printed during the biennium.

Articles by the research staff appearing in farm magazines, scientific journals, and proceedings of scientific societies totaled 67 for the first year and 112 for the second. Articles prepared by the editors were printed in national farm journals, Southern farm magazines, and Florida farm papers.

The weekly clipsheet of the Agricultural Extension Service, sent to all Florida weeklies and some dailies, contained numerous releases about Station work. Special agricultural news stories sent direct and through the Associated Press supplied material widely reprinted in state papers.

Station workers played an important part in Florida Farm Hour programs over radio station WRUF at noon daily, preparing and delivering 317 talks in the two-year period. Copies of 57 of these talks were forwarded to other stations throughout the state for use in their farm flash broadcasts.

# HORTICULTURAL PROTECTION SERVICE

In the last year of the biennium the frost forecasting service, conducted in cooperation with the United States Weather Bureau, was enlarged to cover the whole of the peninsular section of the state. Temperature survey records were secured from 289 stations maintained by the Service and specialized frost forecasts were issued for a network of 77 stations covering the citrus and truck areas. Daily temperature forecasts for the past season were 98 per cent accurate within two degrees. Forecasts were made available through 14 radio stations, press service, railroad private wires to their stations, and by private telegraph and telephone service. Research and educational work on frost protection problems have been continued.

# AGRICULTURAL ECONOMICS

During the biennium information covering farmers' co-operatives was completed, data on Florida truck crop competition summarized, and the study of Florida citrus prices concluded. Citrus cost of production and grove organization records are secured and summarized annually.

Price data are being accumulated on all important Florida farm crops, animals,

and animal products over a 28-year period to arrive at a farm price index for Florida agriculture and to make price analyses of individual commodities.

A study is in progress covering production credit needs and the adequacy of such credit for citrus and vegetable growers.

### AGRONOMY

General crop variety testing, introduction and trial of new grasses, grains, and forage plants, cultural and fertilizer requirements of farm crops, and their improvement by breeding and selection have been given major attention.

Fertilizer requirements of several crops have been under investigation, and the tests show a wide difference in kinds and amounts of fertilizers required for maximum yields and the essential need by some of the trace elements, such as magnesium and zinc.

Plant breeding and selection have developed rust-resistant oats of good yielding ability, superior varieties of both sweet and field corns, high-yielding, disease-resistant syrup canes, an improvement over the Seabrook variety of Sea Island cotton, disease-resistant strains of Napier grass, and improved peanuts through hybridization with newly introduced Brazilian and other varieties. A perennial peanut recently has been found that will thirve when grown with grass or other pasture plants.

Silage crop studies have shown corn, sorghum, sugar cane, and Napier grass to be best suited, the ranking yield of feed produced being in the order given.

Pasture investigations have been expanded to include all phases of establishment and management and the determination of the relative values of the many pasture plants under different environmental conditions. Means of development of winter clover pastures has been a significant finding.

### ANIMAL HUSBANDRY AND VETERINARY MEDICINE

Research in animal husbandry included work in the divisions of dairy husbandry and animal nutrition, beef cattle, sheep and swine, poultry husbandry, and veterinary medicine. The recently completed dairy products laboratory has provided facilities for research with dairy products.

Further studies in mineral deficiencies of livestock have shown a marked shortage of cobalt in forage grown in certain areas, and field tests have proven definitely that this deficiency may be overcome by the addition of only a trace of this element to mineral supplements.

Preliminary results from a two-year feeding trial indicate that dried citrus pulp is a satisfactory feed for dairy cattle and that this feed may be substituted economically for dried beet pulp. Grapefruit meal is being used in a feeding trial as a ration for growing pigs. Field cases and feeding tests with swine have established that peanuts are very deficient in calcium. Affected animals in advanced stages develop posterior paralysis, a condition that may be corrected and prevented by using a mineral mixture containing calcium.

In the hemorrhagic septicemia investigations, some predisposing agents have been shown as necessary before the organisms of the *Pastuerella* group become pathogenic.

Commercial shark liver oil, a Florida product, has been tested as a source of Vitamin A for poultry. Comparisons between this product and cod liver oil and cod liver oil concentrate were made. The shark liver oil was found to be two to three times as potent in Vitamin A as either of the cod liver oils.

### CHEMISTRY AND SOILS

Reorganization of this department has necessitated a revision and coordination of its research, teaching, and extension activities. As now constituted and as a basis for development, the field of the department comprises the following six major divisions: soil chemistry and biochemistry, soil physics and biophysics, soil microbiology, soil fertility, hydrology, soil mechanics and land use. Projects have been organized and initiated in all but hydrology, soil physics, and soil mechanics.

Quantitive spectrographic methods for determination of copper have been extended and a new method developed for the photocolorimetric determination of iron.

Quite wide variation has been found in the iron content of some of the produce grown on different soils, and in the trace-element studies somewhat larger proportions of these elements were found in citrus soils of the more poorly drained series than of the higher sandy Norfolk and related series.

Further studies were made of the Vitamin C content of Florida fruits and vegetables, "quick methods" for determining soil fertility, effect of cover crops on soil composition, chlorosis of field crop plants, and of celery nutrition.

# ENTOMOLOGY

Work of this department covered investigations with root-knot, rodents and insects attacking farm, truck, fruit, nut, and ornamental crops.

Further progress was made in the selection of varieties of vegetables resistant to root-knot attack, and experiments were continued on methods of control of the nematode on perennial plants.

The Chinese ladybeetle, which destroys the citrus aphis, was established in two additional counties. Summer food of this insect, when aphids are scarce, was found to be the honey dew of the lantem fly which infests Napier grass and corn.

A new and very effective bait for the control of the gladiolus thrips has been perfected, and the study of the life history of this thrips concluded. Onion sets secured through common commercial channels were found to be an important source of infestation of onion thrips in the fall months. In the continuation of the study of Florida aphids and flower thirps many new hosts and several species were added to the known lists.

Biology and control studies were initiated on the lubberly locust, a particularly destructive pest on blubs in the flatwoods areas.

# HOME ECONOMICS

In nutritional studies with rural children, surveys in some areas have shown the prevalence of anemia, vitamin deficiencies, and general malnutrition caused by inadequate and unbalanced diets. Co-operating with health officers, we have attempted to correct these conditions.

A convenient and accurate method of diagnosing a lack of Vitamin A in human beings was demonstrated in the differential white blood cell count correlated with outward visual symptoms.

The Vitamin C content of home canned tomatoes and juice, preserved according to the recommendations of Florida Home Demonstration Agents, was found to be as high as that of standard commercial brands. The principal honeys of the state were demonstrated to be satisfactory substitutes for glucose in infant feeding, as was also cane syrup.

### HORTICULTURE

Horticultural investigations for the biennium included citrus storage, citrus maturity, citrus juices, cultural requirements of vegetables, fruit and nut trees and ornamentals, and fumigation of horticultural products.

Citrus storage experiments have developed methods for the determination of carbon dioxide in stored fruit, means of using iodine vapors in the prevention of storage decays, and ways of storing, handling, and utilizing of tree-frozen fruit. Specific freezing temperatures and length of time required at several critical temperatures to freeze the different commercial varieties of citrus fruits were determined.

Physiological gradients in the chemical and physical constituents were determined for citrus fruit and these correlated with quality and maturity. Changes in composition during the life cycle of citrus fruit from various soil types and locations have

been determined for important varieties.

Experiments have been conducted to determine the effects of cover crops, methods of fertilizer application, use of manganese and other minerals, and the degree of soil acidity on the production of vegetables. Variety and breeding work has been carried on with several truck crops and some preliminary storage experiments made in relation to the handling of vegetables.

A rather common type of chlorosis affecting many varieties of ornamental plants was found to be a manganese deficiency that can be corrected with manganese sul-

phate applied either to the soil or as a foliage spray.

In fumigation research, a portable instrument was devised for analyzing hydrocyanic acid gas. Studies of different fumigants on seeds, nursery stock, and other horticultural products and of the insects affecting them were continued.

# PLANT PATHOLOGY

Some 20 major plant diseases, as well as several problems of lesser importance, have

been under investigation.

Both protracted flooding of the soils and soil applications of calcium cyanamid were developed as means of destroying the resting bodies of the celery pink rot fungus. The source of bacterial wilt and soft rot of potatoes in the Hastings area was traced to certain seed stocks in Maine and these sources excluded from the market

which has prevented further like losses in Florida potato plantings.

Two new tomato varieties have been produced through breeding that are not only of good commercial quality but more resistant to wilt than any now being grown commercially in the state. Progress has been made in breeding varieties of cantaloupes and cucumbers resistant to downy mildew, a disease now limiting their successful production. Seed of the station-developed Leesburg watermelon were not generally available in 1937, but this year some 500 acres were planted in Florida. Other strains of watermelons, resistant to both wilt and anthracnose, are in process of development.

Marked advances were made in the treatment of gumming diseases of lime trees,

and identification of species of the fungus Diplodia has been simplified.

Numerous additions have been made to the herbarium, which has recently been rated as the fourth largest in the southern states and selected as one of 15 depositories for authentic specimens of economic trees of the United States.

# **BRANCH STATIONS**

NORTH FLORIDA STATION

Research here is conducted for the northern part of Florida in animal husbandry,

farm crops, horticulture, and plant diseases. Through the co-operation of the Works Progress Administration the work has been advanced materially, federal funds during the biennium approximating one-third the allotment for operations from other sources.

A wide veriety of farm crops, sugar canes, pasture grasses, and legumes are under trial. Excellent results and high yields have been obtained particularly in variety trials, breeding and selection of oats and corn for disease resistance and general adaptability. A ten-acre pecan orchard for variety, cover-crop, and fertilizer studies has been planted.

Steer feeding experiments and swine grazing tests are being conducted to determine the economic utilization of home-grown roughages and concentrates. Investigations have continued with purebred and grade Angus cattle and with native, grade, and Columbia sheep. Fleece weights for the Columbias have averaged three times those of the native sheep, while fleece weights for the grades have averaged over twice.

Methods have been demonstrated for control of the blue mold disease of tobacco. Plant-bed fertilizer studies and tobacco breeding for disease resistance continue. All commercial acreage of wrapper tobacco is now planted to varieties originated by this station, which annually supplies a large part of the seed.

#### SUBTROPICAL STATION

The work of this station is restricted mainly to crops grown in the extreme southern portions of the state and to tests of newly introduced plants that may be of worth to that region.

Plantings of the citrus and avocado blocks have been completed as originally planned, with further plots of oranges and limes for specific cultural treatments added this year. The grounds have been made much more attractive by ornamental plantings.

Grove research has included studies of fertilizers, rootstocks, and control of diseases with avocados, mangoes, and several kinds of citrus. For Tahiti limes, now coming into bearing, the rough lemon has been the most satisfactory rootstock both for yield and juice content, with the Cleopatra mandarin rating second.

Research with truck crops has covered studies of varieties, fertilizer requirements, cultural methods, and disease control of those vegetables now being commercially produced or having commercial possibilities in the area. Shipping tests have been made of these vegetables, especially to get market reactions, and data have been secured on the picking and packing of tomatoes after they show a pink color, rather than green as is now the common practice.

The Board of County Commissioners of Dade County has continued its co-operation in supplementing state funds so that the scope of vegetable investigations could be increased.

# **EVERGLADES STATION**

Low water levels in the Everglades are having a severely destructive effect upon the muck soils of that area through losses by fire, subsidence, and oxidation. Water table studies, to determine the effect of different soil water levels upon factors causing soil subsidence and upon the growth of different crops, are showing that soil subsidence and oxidation are proportional to the depth the water level is held below the soil surface. Most crops have thrived where the water level was high enough to check excessive subsidence.

Plant disease control and cultural experiments have been continued with the

major vegetable crops of the area, and methods of control of insect pests of these crops and sugar cane have also been given major attention.

Sugar cane breeding has resulted in the propagation of thousands of seedlings which are now undergoing selection tests. Syrup making studies are being carried on with varieties of cane selected for and grown in the North Florida, Gainesville, and Everglades regions.

Further information has been gathered on the growth habits and cultural requirements of new crops, among them ramie and imported grasses. Several of these grasses now have an established place in Everglades agriculture. Many field crops are included in various tests.

Feeding trials were conducted with steers during each of the past two years, and the study of nutritional problems with cattle, peculiar to the area, was undertaken. The herd of Devon cattle has been maintained.

#### CITRUS STATION

Additions to the laboratory and equipment have greatly facilitated investigational work at the Citrus Station. About 20 acres of citrus have been planted recently, and an irrigation system installed during the past year.

Significant contributions have been made in the different research fields with citrus. The cause of a speckled condition of mature fruit, heretofore confused with melanose, was determined to be due to rust mites and control measures were demonstrated. The leaf symptoms of manganese deficiency were identified, and information made available concerning its character and occurrence as a guide in manganese application.

A chemical study of the soils in over one hundred groves representing most of the common citrus soils showed an extreme variation in soil composition. Most were found to be very low in exchange capacity and consequently subject to serious leaching problems. These findings have been of value as a basis for determining properly adapted fertilizer programs. As a result of the investigations with zinc, this element is now being used universally throughout the citrus belt in the control of "frenching" of the foliage.

## AGRICULTURAL EXTENSION SERVICE

Agricultural Extension programs have been in progress in all of the counties of Florida except Collier, Monroe, Indian River, St. Lucie, Martin, Franklin, and Flagler. It is a requirement of the Extension service that counties desiring co-operation bear

a proportionate part of the cost.

In the 60 counties that are co-operating, 57 have county agents, 38 have home agents, and 13 have negro agents. Each co-operating county has county programs. These are approved by the Agricultural Extension Service and are set up on the basis of recommendations made through its supervisory and specialist staff. The county programs constitute the basis for the state program, which is in turn approved by the

Office of Extension Work in Washington.

State and county programs are necessarily made to correspond with recommendations by the U. S. Department of Agriculture, since the department contributes more than 50 percent of the funds used by the Florida Agricultural Extension Service. For the most part, such changes are enlargements of the programs dealing with agricultural adjustment, rural electrification, surplus commodity purchases, marketing agreements, and correspond with recommendations made by the bureaus of the Department of Agriculture.

Annual reports issued for the calendar year give in detail the accomplishments of

the Extension Service and are reported by projects. State programs have been set up under 16 projects, five of which are classified as relating directly to home demonstration work and the remaining 11 classified as bearing more directly on men's work. Since 4-H Club work involves programs for boys and girls, it is included in all 16 projects. All programs are co-ordinated in a working plan for each county and are correlated with a State Extension program for agriculture and home economics. They are set up for the primary purpose of improving conditions of the farm and home. These programs provide the basis for the extension work, including the services rendered by negro extension workers.

The major programs have dealt with agricultural conservation, agricultural economics, citriculture, dairying, animal husbandry, 4-H Club work, agronomy, vegetable production, and home demonstration work in its various phases.

In addition to these state-wide projects, the following are special undertakings:

- A. County Program Planning: County planning councils have been set up in 12 counties for developing programs for agriculture and home economics through leadership from farmers, farm women, vocational teachers, county agents, civic clubs, county commissioners, and school boards. These councils are organized to promote state and Federal programs so that they may be adapted to local conditions. Councils are organized around the offices of the county extension representatives, who furnish statistical subject matter supplied by the Agricultural Extension Service. This subject matter has been worked up on a county-wide basis and on recommendation to be considered by the county planning councils.
- B. Screw Worm Control: The Bureau of Entomology and Plant Quarantine completed its educational program on screw worm control on June 30, 1937. Since the Florida Legislature did not make further appropriations for this activity, further work in control of the screw worm was left to the Agricultural Extension Service, working with the owners of livestock through the county extension agents.
- C. Sea Island Cotton: Efforts to restore the Sea Island cotton industry in some 20 north Florida counties have been undertaken jointly by the Extension Service, Experiment Station, and U. S. Department of Agriculture. State campaigns to maintain pure seed lines and to control the boll weeth have been the basis for this program. The area planted to Sea Island cotton in 1938 is approximately 20,000 acres, some of which is planted in South Florida counties where cotton has previously been grown only to a limited extent.

The 1937 State Legislature enacted a law making it possible for any county to determine by referendum whether it would exclude all varieties of short staple cotton in order to prevent mixing of varieties and thereby establish a better grade and staple for the Sea Island cotton industry.

- D. Soil Conservation: The 1937 State Legislature enacted a law providing for the establishment of soil conservation districts. The Act established a State Committee, consisting of the director of the Experiment Station, vice-director of the Extension Service, and the soil conservationist of the College of Agriculture. Provisions of the Act have been carried out in one district, established in Jackson and Holmes counties, and known as the Holmes Creek Soil Conservation District. The law provides that the districts shall have supervisors and that their programs be coordinated with those of the Soil Conservation Service and Agricultural Extension Service.
- E. Tobacco Blue Mold Control: The Extension Service, Experiment Station, and State Plant Board co-operated in a program before the 1938 planting season to control blue mold in tobacco seedbeds in north Florida counties. In 1937 this disease had been unusually destructive and the growers were inexperienced in the methods of control.
- F. Agricultural Conservation: The Agricultural Conservation program is established with the Extension Service at the University of Florida. In the county, the program is under the direct supervision of the county agent and its headquarters are in the county agent's office. The program involves control measures affecting cotton and tobacco. It involves payments to farmers for adjustments in the interest of soil conservation and thereby affects all counties. Each county has one or more conservation committees, the county agent being secretary. Association members are elected and their committees make recommendations to the state office regarding contracts and assignments of individual farmers as required by law. This involves an increased clerical staff in the county agent's office and has greatly increased his responsibilities and duties.

The Agricultural Adjustment program also provides for commodity marketing agreements and for surplus commodity purchases.

Expenses for such programs are financed from Agricultural Adjustment Administration funds and allotted through the Extension Service.

On July 1, 1937, 16 assistant agricultural conservation agents were appointed to help county agents, largely to handle adjustment programs. These men also assist in some instances in 4-H club work and field work insofar as their time will permit. Men selected for these positions are graduates of the College of Agriculture and have other qualifications which fit them for county agent duties. These men have been employed only in counties having sufficient farming operations to justify their service. In other counties with less work, clerical services are allotted to the county agent's office.

## OFFICE AND EQUIPMENT FOR COUNTY WORKERS

Additional office space has been allotted to county extension agents. Some offices, formerly located in courthouses, are now housed in rented buildings, the cost being borne by the county boards. Additional office equipment has been provided by the Extension Service and the Agricultural Adjustment Administration.

In St. Johns, Duval, Columbia, Bay, and Leon counties office space has been provided in Federal buildings. Additional office space has been requisitioned in other postoffice buildings now approved for construction. Many offices are inadequate and poorly located for extension work and provision of adequate space in Federal buildings would be a substantial improvement over present conditions. These enlarged programs have made it necessary in some cases to establish the home demonstration agents in separate building.

## PERSONNEL CHANGES

Dr. Frank W. Brumley, economist in farm management, resigned September 1, 1937, to accept a similar position in Louisiana State University and was succeeded by Mr. C. M. Hampson.

Mr. D. Gray Miley was appointed as assistant economist in farm management.

Dr. R. V. Allison was appointed soil conservationist of the Agricultural Extension Service. Joint programs in agriculture, soil conservation, and related subjects have an important place in Extension work and are applicable to a large part of Florida's farming area.

Miss Mary E. Keown was appointed state home demonstration agent in the summer of 1936, succeeding Miss Flavia Gleason, who resigned. Miss Ethyl Holloway, former Leon county home agent, was appointed district agent for north and east Florida counties October 1, 1937, succeeding Miss Keown as district agent in that territory.

Beulah Shute was appointed district agent in negro home demonstration work to supervise the programs of negro home demonstration agents.

There are relatively few changes in personnel in counties. Most of the changes were promotions from positions as assistants to those of county or home agents. All recent county agent appointees are graduates of the University of Florida College of Agriculture.

In negro work, three agents have been appointed, two of them being graduates of the A. & M. College, Tallahassee.

#### EXTENSION FINANCES

For the first year of the biennium the Extension finances are shown below in tabular form. There is no change in this for the year beginning July 1, 1938, except such changes as may be made by county boards in their appropriations applying to the salaries of county extension workers.

### RECEIPTS—JULY 1, 1937-JUNE 30, 1939—ANNUAL BASIS

U. S. Department of Agriculture -	_	\$219,399.72	Percentage of Total 51.7 percent
State of Florida County Appropriations	-	92,000.00	21.7 percent 26.6 percent
county repropriations		\$424 399 72	20.0 percent

Distribution of these funds to projects and detailed expenditures is shown in the 1937 Extension Annual Report.

Attention is called to the percentage of funds from three sources and in particular to the relatively large appropriations by the counties as compared with the state appropriation. Funds appropriated by the U. S. Department of Agriculture are approved by Congress and are a part of the total allotments to all states. These funds are allotted with limitations which require off-set funds in part, limitations on purchase of equipment, limitations on the training of personnel to be employed and an actual accounting according to budgets approved for all expenditures. These requirements also apply to funds which are provided as off-sets.

## 4-H CLUB WORK

An additional 4-H club camp with accommodations for 125 persons has been built in Madison county on the property of the Cherry Lake Farms. Construction was undertaken in July, 1937, and the camp turned over to the Extension Service June 30, 1938. A 15-year lease on the property, with optional renewal privileges, has been secured. The Cherry Lake Farms Corporation also donated a quantity of lumber obtained from buildings erected for temporary purposes. It also donated the use of trucks for hauling materials and supplied roofing, water pipes, and pressure tank at a reduced cost, in addition to other liberal contributions toward the building of the camp. Other contributions for roofing, hardware, and other materials were made by county boards and business firms in Madison and nearby counties. The National Youth Administration provided a foreman to supervise the construction and allotted N.Y.A. labor for the clearing of grounds and construction work.

This camp has been named "Cherry Lake 4-H Camp," and is located on the north shore of Cherry Lake. It covers 10.3 acres and has a shore line of 1117 feet. There is one dining hall with kitchen and equipment and storage facilities, 12 cottages, one auditorium with a seating capacity of 250, one control cottage for use of persons in charge, two swimming docks, sanitary lavatories and toilets, and one well 180 feet deep. Electrical lighting and power equipment is available. The estimated cost for completion, exclusive of camp site, is \$8,500.

The Extension Service now has three 4-H club camps that are providing camping facilities for practically all Florida counties. These camps are used between June 15 and September 15 and approximately 2,000 4-H club members receive training at them during this period. The programs are conducted by extension specialists, county and home agents, and other appropriate assistants.

## AWARDS DONATED FOR THE ENCOURAGEMENT OF 4-H CLUB WORK

These awards consist of scholarships in the University of Florida and Florida State College for Women; expenses for trips awarded to 4-H club boys and girls in the counties to the National 4-H Club Camp, Washington, D. C. and the National 4-H Club Congress in Chicago; expenses for attendance at short courses at the Florida State College and University of Florida; and incidental honors to 4-H members. These scholarships are awarded by business organizations and individuals for the purpose

of encouragement of Extension work among 4-H club members. Total amount of awards, \$17,673.

## EDITORIAL AND MAILING SECTION

Bulletins printed since July 1, 1937, total 16. Other publications include 14 record books, 11 circular and miscellaneous items—a total of 410,625 copies. The informational section also included letter enclosure folders on timely farm subjects. In the mimeograph section an average of 200 stencils per month was made and over 50,000 sheets printed. This news and publicity service is generally accepted by the State press which uses a considerable amount of farm news originating in the offices of the Extension Service at Gainesville and in the counties.

#### RADIO BROADCASTING

There were 313 Florida Farm Hour presentations over WRUF with a total of 1,009 talks and other features. The programs were furnished largely by representatives of the Extension Service (State and County) and members of the Experiment Station staff and State Plant Board, with accasional contributions from other departments of the state government. Other radio stations were supplied with the Farm Flashes for use over their respective stations.

## FLORIDA NATIONAL EGG-LAYING CONTEST

Reports covering the 11th contest, which ended September, 1937, showed there were 92 entries. These consisted of 21 pens of heavy breeds and 71 pens of light breeds.

Egg production for the 51 weeks averaged 204.2 eggs per bird, with a point value of 203.2. The largest production was from a Florida single-comb white leghorn produced on Pinebreeze Farm, Callahan, Florida. The production of this bird was 312 eggs with a value of 326.65 points.

Florida hens, in comparison with those from outside the state, had 8 percent lower mortality and laid 62 more eggs per hen. The total feed consumption for 51 weeks was 94.50 pounds per bird for the heavy breeds and 86.76 pounds per bird for the light breeds, an average of 89.59 per bird for all breeds. The average amount of feed required to produce one dozen eggs was 5.21 pounds. The average net price received for eggs was 25.4 cents per dozen.

#### HOME DEMONSTRATION WORK

Home demonstration work has just completed twenty-five years of service in Florida. During these years 101,459 women and 149,159 girls have participated in home improvement programs affecting the farm people of this state. Two counties, Leon and Hillsborough, have maintained extension work without interruption since 1912.

The major projects have included garden and orchard, poultry, dairying, nutrition, food conservation, meal planning and cookery, clothing, house furnishings, beautification of home grounds, home management, sanitation, and community activity programs.

## PROBLEMS AND RESULTS

Each county follows a definite program for home demonstration work with immediate and long-time goals. The following data have been compiled from two years' records:

Result Demonstrations: A total of 15,787 women and 20,086 girls were enrolled to conduct definite

demonstrations. These established demonstrations conducted in farm homes were visited by 44,221 people; as a result of these demonstrations many improvements in family and country life were made.

17,872 home gardens were grown with sales of garden products totaling \$16,063; 913 home orchard plantings were made; 3,056 demonstration poultry flocks produced products used and sold with an estimated value of \$125,000; home dairy cows owned by 4,396 families supplied ample dairy products for each member of the family; 3,384,167 quarts of vegetables and fruits, and 273,285 quarts of meat were preserved and canned; 2,191 buildings were constructed or remodeled; 603 water and light systems installed; 1,399 home grounds improved; 4,238 families following a clothing program at an estimated saving of \$116,759. Home industries brought a return in cash of \$361,683. Negro women and girls produced and preserved farm products for home use and sale valued at \$42,319.

Home agents conducted 15,463 method demonstrations with an attendance of 247,313. There were 44,109 telephone calls; 63,293 letters were written; 5,489 newspaper articles were published; and 108 radio talks made.

Record books are furnished to women and girls by the state office. These are summarized and used as a basis for study by organized clubs. Much assistance from local leaders makes it possible for home agents to extend their programs to many people who could not otherwise be reached. A record for the two years shows that 2,537 women and girls gave voluntary assistance to home demonstration agents in their various programs.

Rural home demonstration councils were organized in 27 counties. There were 526 4-H clubs and 317 rural womens' clubs developed for Extension programs. These councils develop state wide uniform plans suited to a variety of conditions which exist in many counties and have sponsored scholarship funds totaling \$2,000 to be used by 4-H members to enable them to attend college.

Enrollment of girls in 4-H clubs shows an increase of 1,159 over the last biennium. Seventy per cent of all girls enrolled completed the required work that would entitle them to compete for scholarships and other state-wide awards. Ninety-four 4-H club girls entered the Florida State College for Women in 1937. An organization, known as the "College 4-H Club," made up of members of county 4-H club girls, contributes to many useful activities. This club contributed much toward the first Rural Youth Conference in Florida and the Jubilee 4-H short course held in Tallahassee in 1937. Four former Florida 4-H club girls are now employed as county home demonstration agents.

Ten county and home agents have enrolled for special study courses for Extension workers.

## RECOMMENDATIONS

On account of the increased responsibilities placed on county extension agents, additional assistance should be provided for carrying out 4-H club programs, for the management of the district 4-H camps and other 4-H activities, and for more clerical assistance and more efficient office equipment in the counties.

On account of the increased demands for pulp wood to supply pulp mills, Extension Forestry work has now reached a stage where conditions require intensive educational work to assist in constructive forestry work; otherwise, timber which could be protected by constructive educational programs will be destroyed or wasted. The program should be coordinated with the School of Forestry of the College of Agriculture.

It is recommended that greater emphasis be placed on soil conservation programs and projects set up to carry out educational programs through the Extension Service, with competent supervision coordinated with the College of Agriculture program. This program, when established, will be a co-operative one between districts, the Federal Soil Conservation Service, and the Agricultural Extension Service.

It is further recommended that Negro Extension work be enlarged to include six or eight additional counties where there are a substantial number of farms owned and operated by negro farmers.

It is again emphasized that the system of financing extension work in the counties remains complicated and uncertain, and the responsibility for county finances should be assumed by State and Federal institutions.

Increased research work covering incomes and nutrition of farm families.

Facilities for the training of home demonstration workers, by special courses in the University curriculum.

A plan for retirement, with some financial security for Extension workers.

Respectfully submitted,

WILMON NEWELL, Director

## REPORT OF THE DIRECTOR OF RADIO STATION WRUF

To the President of the University.

SIR: In the past reports it has been the policy of the Director of WRUF to set forth the multifarious activities carried on by the State and University of Florida Radio Station: those that deal with the educational undertakings of the people of this state; those that save the farmers and growers of Florida tremendous sums of money—the Florida Farm Hour programs, the market reports, weather forecasts, and other similar services; those that provide a substantial assistance to the law-enforcing agencies—the sheriff and police reports; and those that afford primary radio service to an area not cared for by any other radio in the state. In this report, however, I shall not deal with these well-known functions of WRUF; they have been continued, of course, and their value is universally recognized. Instead, I shall briefly mention some of the less apparent, but no less important, ways by which the station serves the University and the state.

Since radio is one of the most rapidly advancing industries in our nation, a radio station is now considered an indispensable part of the equipment of a modern university. It is an essential laboratory for the training of electrical engineers and for the training of men and women who are to produce programs. WRUF has become known not only for training radio engineers but also for developing talent in the fields of production, announcing, and continuity writing; WRUF also serves as a laboratory for the speech department of the University. Universities all over the world are recognizing the fact that they must teach courses in radio. Realizing this, they are entering this field without the necessary equipment to train young men properly. Florida, fortunately, has the equipment in WRUF. The operation of WRUF, therefore, is worth more than it costs the state in that it provides the young men of Florida an opportunity for education in this field of radio equal to, if not greater than, that afforded by any state. WRUF bears the reputation of being one of the best training grounds for men who wish to follow radio work as a vocation in this country or any other country. We receive many applications for WRUF-trained operators and production men. One of the greatest tributes that could be paid to WRUF is the fact that every student who has worked at the radio station has, upon graduation, immediately found a position in some department of radio work.

Another service which cannot be measured in dollars and cents is that of advertising the state of Florida and its products. With certain changes and improved equipment WRUF would be in a position to be of tremendous advertising value to the

state, aside from the many activities that are already carried on.

The commercial stations would naturally oppose the increase in power for WRUF. They are opposed to WRUF now because no commercial station could hope to render the great service that WRUF renders the people of the state and remain solvent. The desire of the commercial people to obtain the sale or lease of WRUF each legislative year is one of the greatest arguments for the retention of the station. If commercial radio knows its value and desires to buy or lease it, then it must be of positive value to the state of Florida.

Radio Station WRUF is one of the best known educational radio stations in our whole country; in fact its reputation extends throughout the world. Many representatives of foreign stations and systems have come here to study our methods of broadcasting. It is true that the greater number of our entertainment programs, because of the lack of funds necessary for live talent, are transcribed programs. It is likewise true that this station operates on \$42,000 a year, while a commercial station of the same size would require over \$200,000.

As a source of information and entertainment for the listeners, as a means of saving money for the growers and farmers, as an aid to our law-enforcing agents, as a station providing primary radio service for a large area of Florida, as an intricate part of the training for students studying radio, and as an advertising medium for the state

of Florida, WRUF is one of the state's most valuable assets.

Respectfully submitted,
Garland Powell, Director of WRUF

D. K.

NOTICE TO STUDENTS: If your address and telephone number are not listed correctly, please notify the Office of the Registrar, 110 Language Hall.

The information below is given in the following order: Name -College or School - Gainesville Address - Telephone Number - Fraternity - Home City

## Colleges and schools are designated as follows:

A --- School of Architecture and Allied Arts

AS --- College of Arts and Sciences

AG --- College of Agriculture

B --- College of Agriculture
B --- College of Business Administration
E --- College of Engineering
ED --- College of Education
FY --- School of Forestry
G --- Graduate School

GC --- General College L --- College of Law

P --- School of Pharmacy

### THE DAVID LEVY YULEE LECTURE

University of Florida April 20, 1938

Vol. XXXIII, Series I No. 11 November 1, 1938

Published monthly by the University of Florida, Gainesville, Florida

Entered in the post office in Gainesville, Florida, as second-class matter,
under Act of Congress, August 24, 1912

Office of Publication, Gainesville, Florida

The Record comprises:

The Reports of the President to the Board of Control, the bulletins of information, announcements of special courses of instruction, and reports of the University Officers.

These bulletins will be sent gratuitously to all persons who apply for them. The applicant should specifically state which bulletin or what information is desired. Address

THE REGISTRAR,
University of Florida,
Gainesville, Florida

Research Publications.—Research publications contain results of research work. Papers are published as separate monographs numbered in several series.

There is no free mailing list of these publications. Exchanges with institutions are arranged by the University Library. Correspondence concerning such exchanges should be addressed to the University Librarian, University of Florida, Gainesville, Florida. The issue and sale of all these publications is under the control of the Committee on Publications. Requests for individual copies, or for any other copies not included in institutional exchanges, should be addressed to the University Library, University of Florida, Gainesville, Florida.

THE COMMITTEE ON UNIVERSITY PUBLICATIONS
University of Florida
Gainesville, Florida

#### FOREWORD

The lectureship under the terms of which the following address was delivered is fittingly designed to perpetuate the memory of an eminent and revered Floridian. It was established through the generosity of Mrs. Nannie Yulee Noble, who bequeathed to the University of Florida a sum of money, the income from which should be used as a memorial to her father, Senator David Levy Yulee. Under this bequest the David Levy Yulee Lectureship was made possible. As a permanent contribution to the University's intellectual life, its object is to bring annually before the faculty and student body of the University of Florida some distinguished speaker to deliver an address on the general theme of "The Ideal of Honor and Service in Politics".

No more appropriate tribute could have been designed for him whose memory is thus honored. The name of David Levy Yulee remains ever fresh in the minds of the people of Florida, for it is writ large in the early annals of the commonwealth. Coming to Florida in 1824, David Yulee quickly gained local distinction at the bar. Soon, however, abandoning law for politics, he was successively Clerk to the Territorial Legislature, Territorial Delegate, and United States Senator. His lengthy service in the Senate, beginning with Florida's admission to the Union in 1845 and terminating with the dignified retirement of the Southern members in 1861, was conspicuous for fidelity, tact, and energy. His services to his state, moreover, were not confined to the duties of public office. As planter and railroad builder, Senator Yulee was in the truest sense a pioneer, who by his dauntless courage and foresight helped to hew out of a frontier region our modern State of Florida.

This year's lecturer was Ruth Bryan Owens Rhode. Mrs. Rhode received her education in Illinois and Nebraska, and has been the recipient of several honorary degrees. She served as a nurse in the Voluntary Aid Detachment of the British Army during the World War. Mrs. Rhode is well known as a Lyceum and Chautauqua lecturer who for two years occupied the Chair of Professor of Public Speaking at the University of Miami. She is the author of "Elements of Public Speaking" and "Leaves from a Greenland Diary".

In the realm of statesmanship, Mrs. Rhode has been accorded many honors. She was a member of the 71st and 72nd Congresses of the United States representing the fourth Florida district. In 1933 she was signally honored by being appointed United States Minister to Denmark, which position she resigned in 1936. She is well known for her keen interest in political problems and her unswerving devotion to the ideals of democracy.

The present address, "Democracy at Work in Denmark", was delivered at a special convocation of the students and faculty of the University of Florida on April 20, 1938. It furthers the purposes of the David Yulee Lectureship by presenting in graphic narrative form the large measure of success that has been attained in the Democracy of Denmark, and it appeals to our American Youth to adhere firmly to the ideals of a democratic form of government.

DAVID LEVY YULEE LECTURESHIP COMMITTEE

### Democracy at Work in Denmark

By

#### Ruth Bryan Owens Rhode

T IS SINGULARLY APPROPRIATE that the life and services of a distinguished citizen of our State should be immortalized in these annual gatherings dedicated to the study of Government. And I deeply appreciate the privilege of delivering the Yulee Lectureship address on this occasion.

As a prelude to our discussion of governmental matters, I wish to share with you an experience which was mine during my service as United States Minister to Denmark,—the opportunity to observe a laboratory demonstration in legislative enactments.

The difficulty about the study of most economic questions is that they are too large for the individual to observe conveniently. It is so seldom that they can be reduced to laboratory dimensions. I have often wished that it was possible to make a microscopic slide of International Banking and study it. Or if we could make a culture of Supreme Court and then see what would happen if we were to change the mixture . . . but it is difficult to reduce these large questions to dimensions which can be examined. When one studies governmental problems in Denmark one has laboratory conditions. The country is small. One could put three Denmarks into New York State and twenty Denmarks into Texas, (but Texas would hold twenty of anything! One ought never use Texas as a basis for comparison). The Danes are a homogeneous people. Their country is agricultural rather than industrial.

My first introduction to Denmark was before my appointment as Minister, when I was traveling through that country in an American trailer with a party of four young people.

I will never forget the first visit we made to a Cooperative Farm. We had stopped for the night to camp in the field, and my children hurried to play with the farmer's children, and in a little while my daughter came back and said,

"I wish you'd come in this farm and see the cleanest pigs you have ever seen in your life. 'You never saw pigs like these."

It was true I never had seen pigs just like them. They were pure white to begin with, and they were in a whitewashed room on white straw. And they were actually cleaner than my children were at the time. I noticed that with a little embarrassment. I remember saying to the farmer,

"This must be an exceptional farm you have." His reply was,

"It is in no way exceptional."

He explained that when the Danish farmer is permitted to put the mark of the Cooperative on his product, his methods of production must be identical with those of all the other farmers in the Cooperative, that every pig in Denmark has just the same social background.

The idea of this complete organization so interested me that I began to question the farmer, little realizing that this conversation was to lead my mind

#### DEMOCRACY AT WORK IN DENMARK

along long paths of thought about education and bring me finally to the cross roads of civilization.

I asked the farmer,

"How have you managed so completely to organize your farms?"

"Well," he said, "it wasn't my generation that did it."

He explained that unorganized farming is as far back in Danish experiences as the horse and buggy days are to us.

"My father was a Cooperating farmer," he said.

"When the war between Germany and Denmark ended in defeat for Denmark, Germany put an embargo on the Danish hogs. So Denmark had to find a new market. As Bishop Grundtvig said, 'What you lose on the outside, you have to make up on the inside.' We lost the market for our hogs. We had to make up for this in ingenuity. We couldn't send our hogs into Germany. We wanted to send them to England, but while the Germans had demanded a large, fat hog's bacon, the English market preferred a long, lean hog, so you see we had to change the dimensions of our Danish hog, and this required organization." When I looked at that bouquet of white pigs, it seemed to me they were a particularly unyielding type of animal. I realized that it had required both organization and ingenuity, to "Burbank" them. The farmer explained the method of organization. When the farmers in a certain locality decided to organize this first Cooperative slaughter-house, they all put their resources behind the loan for its establishment. They agreed, of course, to bring all their animals to this central depot. The slaughter-house paid them the market price and at the end of the year all the profits were divided among the farmers in proportion as they had brought in animals. I said,

"I can see the system, but where did you get the idea?"

"Oh," he said, "we had the Cooperative creameries long before that."

As we talked I looked at the farmer's cattle. They were standing in military formation, equi-distant from each other, all facing the same direction. They were tied to a set of pegs with ropes exactly eight yards long, I learned. There was no rugged individualism about these cattle. There was no wandering absent mindedly out onto the highway as the cows of my acquaintance do occasionally. When the Danish cattle had moved down the grass around them, the farmers would move the pegs forward and the line would advance to a new sector.

"Oh, we had organized our creamery long before the slaughter-house," the farmer explained. "We had to organize our dairy production. The great nations of the world began about fifty years ago to flood the world market with wheat. Denmark was a wheat raising country, but it couldn't compete with countries which had vast tracts of more fertile land. As Bishop Grundtvig said, 'What we lose on the outside, we have to make up on the inside.' We lost the market for our wheat, so we had to become an animal raising country and the Danish farmers hadn't a uniform quality of cattle. The great estates had fine cattle, but the small farmers had a miscellaneous lot of cows. The Cooperative dairies were organized by groups of farmers who put their resources behind a loan for a creamery. They agreed to take their milk to this central depot where they were paid the market price, and at the end of the year the profits were divided among them. But as soon as the farmers had organized their own Cooperative Dairy they found they could afford to hire a scientist to advise

them. No one farmer could afford it, but the whole society could. And the scientist advised that we weigh the milk when it was brought to the creamery. He supplied each farmer with a card and suggested that the farmer weigh the milk given by each cow and that he also measure the amount that each cow ate, so cows which were eating with a good appetite and showing no sense of responsibility, about milk giving, were marked for the slaughter-house. Only the cows which were really cooperating became the mothers of the new herd."

"I can see how once you had begun," I remarked, "you naturally went on organizing Cooperative enterprises."

"Yes," the farmer replied, "the Egg Cooperative came next. The Danish farmers had been selling their eggs in the old-fashioned way, through the middle man. At certain seasons of the year the price of eggs was higher than at others. The middle man used to save the eggs for the advance in price. The farmers attempted to do the same thing. They would save until the price rose, then the middle man would save them again. When the farmer saved the eggs until the prices were high and the middle man saved them again, by the time the consumer got the eggs, the eggs were high. It was a complete cycle. Danish egg was the low-priced egg on the English market. The farmers formed their Egg Cooperatives, just voluntarily in groups. They decided they would send their eggs into a central depot and a scientist was called in to advise them. The scientist said, 'Let us arrange that the Cooperative shall pay for the eggs not by number, but by weight.' The hen laying the heaviest eggs was selected as the mother of the future poultry families. The organization of Denmark's egg export is now so perfect that if in a consignment of eggs sent from Denmark to England there is found one faulty egg, it is possible to trace back and locate the guilty hen. Stamped on each egg is not only the mark of the Cooperative but also the number of the farm from which the egg comes. The Danish egg, from having been the low-priced egg on the market has become the quality egg."

Of course, while these producer cooperatives were increasing in number, the consumer Cooperatives were also springing up. One of the first of these was the Seed Cooperative. There is in another part of Europe a gravel which looks exactly like the seed which the Danish farmer sows in his field, and this gravel continually found its way into the commercial seed packets. The farmers tried in vain to secure unadulterated seed; then, to meet the need, they organized their seed Cooperative. The farmers agreed to buy seed only from their own Cooperative, and when they had organized their buying, they found that they could afford to establish a nursery garden and grow their own seeds. Now when a Danish farmer puts a seed in the ground, either a plant comes out or the responsible party replaces it. The seed comes from the grower's direct representative who certifies his product.

Of course, the Cooperative Stores had begun to dot the country-side. Their retail stores were modeled on the plan of the original Cooperative founded in Rochedale, England, by twenty poor weavers, who conceived the idea of cooperating in their buying, and who could only afford to contribute 4c a week each toward the buying of their first bag of flour. After they had divided the flour among themselves and effected the saving of the difference between wholesale and retail prices, they set to work to raise \$120.00 as capital for their first little store. They could keep it open only two nights a week, but in this modest

#### DEMOCRACY AT WORK IN DENMARK

venture they formulated the pattern followed by the Cooperative stores, now uniting ten million peoples' purchasing power in forty countries of the world. A group of people subscribed for the stock and became joint owners of the Cooperative Store—one man would have one vote, whether he owned one share of stock or twenty. They made rules about the purity of the products to be handled and about the fair treatment of employes. At the end of the year all profits were to be divided among the stock holders in proportion as they had purchased. Small stores planned on this pattern appeared here and there over the country-side in Denmark, and from Germany the plan of the Cooperative Loan Bank was adopted. That became a part of the pattern of Danish living, as well as the Cooperative Insurance Company and the Cooperative Building Companies. In time it came about that the Danish farmer was not a man growing one or two commodities. He was the director in ten to a dozen enterprises. He was a director in a creamery, in a slaughter-house, in an insurance company, in a retail store, in a bank, in a building concern. The average Danish farmer was a man of affairs and when I say that the average farmer, I am not using the word "average" carelessly.

I think sometimes when we are interested in an argument, we use the term "average" as the Pullman car porter used it when the English traveler in our country for the first time asked the porter,

"My good man, what is the average tip you receive?" The porter replied, "About a dollar, sir."

The next day when the traveler left the car he gave the porter a dollar. The porter looked at the dollar with amazement and said,

"You're the first gentleman I've ever met who came up to the average."

The average Danish farmer became the manager of practically every element of their life except the weather. I will admit that the Danish farmers haven't their weather under control, but in all matters of buying, selling, and living they are masters of their destiny. When I looked at that pattern, so complete, with the space between the producer and the consumer reduced to a minimum and the middle man practically eliminated, I began to be uneasy about the eliminated middle man. I had felt sorry for producers for so long a time that I never realized that I would ever come to feel sorry for the middle man. It was like the little girl who was being shown by her mother a picture of Christian martyrs in the arena with the lions approaching. The mother said,

"Isn't that terrible?" And the little girl replied, sympathetically, "Yes, there is one poor little lion that isn't going to get a thing."

I found my sympathies turning toward the middle man, and asked what happened to him when he had suffered such wholesale elimination. I was assured that there were places for him. Each cooperative enterprise has to have a manager. The manager is appointed by the farmers themselves, usually from among their own number. Managers are required for the industries that have sprung up to supply the wholesale cooperative stores. The retail stores are members of a wholesale cooperative and in order to supply the goods at minimum cost the Cooperative had organized factories to make clothing and shoes and rope and soap and other commodities. I was assured that I need not be concerned about the middle man who was absorbed into the management of these various enterprises.

#### THE DAVID LEVY YULEE LECTURE

Viewing the completeness of this Cooperative pattern, I wondered where it was that those farmers in Scandinavia had taken a different turning from the farmers in the rest of Europe. A hundred years ago the peasants of Europe were on the same general level. They were untaught. They had no voice in the government of their countries and they were without hope. Some place this particular group of farmers had turned up a different path, and I decided to try to find out just where that was. When I made my inquiries, I found myself continually meeting the same name. I caught repeated glimpses of the heroic figure of Bishop Grundtvig. No one, I think, gives a more pessimistic picture in Denmark half a century ago than Bishop Grundtvig.

"Even the bookworms have stopped eating the books." He said,

"The thieves haven't energy enough to steal. The plague is responsible for destroying a part of Europe, but lethargy is killing us." He said,

"We are teaching the wrong people and we are teaching them the wrong things. We have been taking a few people and giving them a classical education and we have left the mass of our citizenry without inspiration of any sort."

Because he was afire with the desire to raise the level of the people, he outlined a new system of education and when he planned a new system of education he did not say.

"We need new great buildings" or "We need new text books". He said,

"We need teachers who are so inspired that they need not have a text book at all."

One of the Bishop's teachers said,

"When I tell a pupil something, he remembers it through his life and afterwards." The Bishop said,

"We will gather into farm houses around inspired teachers, groups of people who are old enough to want to learn. Let them be taught the rudiments in their elementary schools, but when they are old enough to want to learn then they may come to the Folk School."

I remember hearing a story about a young girl who was seated at dinner next to an eminent scientist. During the course of the conversation she asked the scientist his profession and when he answered, "I study astronomy," she remarked, "Oh, I finished that last semester." Now the line which Bishop Grundtvig drew runs down directly between the girl and the professor.

He said, "Let them be seventeen years old or more when they come to the Folk School, and meet together around a great teacher. At the beginning of each day the group shall sing."

Bishop Grundtvig did not lay so much stress on the quality of music that was produced. It was the meaning of their songs which mattered, and in order to have songs just as he wanted them, the Bishop wrote the hymns himself. The words of one of Bishop Grundtvig's songs sounds almost like a prophecy for present-day Denmark. The words in translation are these:

"In our hills are no strata of silver and gold
To be mined into wealth beyond telling.
Our treasure, the knowledge that God's daily bread
Is in even the humblest dwelling.
And that in our dear country our progress is such
That few have too little, still fewer have too much."

#### DEMOCRACY AT WORK IN DENMARK

After they had sung together, the professor would begin to teach. Perhaps he would tell them the heroic legends of the Vikings, showing them what a heritage of courage is theirs, or perhaps the lesson would deal with the history of some science. For instance, to teach mathematics, LaCour, the disciple of Grundtvig, planned that the pupil should see how, through the ages, man has tried to learn to weigh and measure the world around him, and how in country after country a little advance was made in the science. He told them how in Greece when a new geometric theorem was discovered, they sacrificed an ox to the Gods in gratitude. LaCour wanted them to see that this tool, mathematics, was a heritage to them from men in every country. He said,

"If they see that, we won't have to teach them mathematics, they'll go out and master the science."

The Folk Schools taught history, not as a succession of dates, not as a list of battles. They taught history as the conquest by man of the world around him, and they let the pupils see how through the centuries man has marched triumphantly forward, conquering the earth and the sea. Bishop Grundtvig said,

"I want the pupils to stand with their feet firmly on the soil of their native land but their eyes must be on the stars."

Above all he was teaching the history of their own race and nation so that the simplest peasant felt a thrill of pride over his own country's government. When the day had ended, the pupils gathered again to sing together a hymn of thanksgiving for the privileges of the day.

When one pictures the affect on a group of earnest students of such a course as that, one can see how easy it was for those farmers to learn to solve their problems together. They had sung in chorus each morning, they had been inspired together, and then together they faced their economic problems. Through Cooperative enterprises they learned two valuable lessons. They learned that liberty is not standing alone: that liberty is knocking off the shackles of circumstance that bind one and that those shackles can often be knocked off by the union of forces between a man and his neighbors. And they learned that while there are problems which no one individual can solve, the cooperative effort of many will generate a mighty strength for the solving of them.

So the Folk School farmers faced the problems of agriculture. They faced them in a country which had no resources except its land, no oil, no minerals, no wood. They had only land, and not very good land. Ingenuity had to supply what nature's niggardliness had denied them.

One generation after those Folk School farmers had learned to work together more than half of the members of the Danish Parliament were old Folk School men and one third of the Cabinet. Those farmers who had neatly solved their individual problems, who had reduced to a fine system all of the ramifications of the business of living, found themselves seated in the Parliament of their Government, looking at a nation's problems. And no matter what Congress or Parliament you enter, the same problems confront you. You look at the anxieties common to all humanity. You feel the weight of those problems on your heart, and you put your whole mind and soul into trying to find a solution for them.

#### THE DAVID LEVY YULEE LECTURE

I think sometimes that our public is not very sympathetic with its legislators. You know the type of story that is told at the expense of the Congressmen and Senators. This one is typical. The little boy asks his father,

"What is the Congressional Prayer that I read about in the papers?"

His father replies, "That is the prayer the Chaplain delivers in Congress every day." The little boy asked,

"Does the Chaplain pray for the Congressmen?"

"The Chaplain stands where he can see the Congressmen," said the father,

"And he prays for the United States."

Now, I never on principle laugh at those jokes, because having sat in the Congress of our country, I realize just what problems the legislator faces and with just what conscientiousness the majority of legislators discharge their duties.

The Danish Cooperating farmers entering Parliament faced the problems of humanity, and I think that if we were to analyze them, we would find them uniform in every land. Mankind is terrified lest unemployment rob the breadwinner of the chance to earn. Mankind fears the cold hand of illness will be laid on one of the family. There is fear of the accident that might mean the incapacitation of a worker and I think most of all mankind is afraid that old age will come with no provision and no security. Now the Cooperating farmer faced these problems of a nation, but I believe that they applied instinctively the same rules that they found effective in the organization of their individual Cooperatives,—that they said "No one person can deal with these problems, but if we all stand together, we can solve them." Take public health, if everyone in the country were to pay a little bit each year into a health fund, then anyone who needed the doctor and the nurse could have them without payment. They voluntarily formed the health insurance clubs which, after operating successfully for a number of years, became a part of the legislative program of the country. Now every citizen of Denmark pays from 45c to 65c a year. depending upon his age, and anyone below a certain income level has the doctor and the nurse and the medicine free. It is not a charity, it is insurance. If you are in the higher income brackets, your payment of 45c or 65c a year is a gift toward the health of the public. You pay the doctor out of your own purse. However, even if you pay the dector, your payments are not heavy as there is state aid to medicine.

I had a personal opportunity to observe the working of the system when a year and a half ago I broke my leg. After I left the hospital certain treatments were necessary. Diathermy was prescribed and I paid \$5.00 for each treatment at the New York hospital. Then when I went to Denmark for the winter, the physician there said, "Yes, you should have diathermy, but there are two additional machines which I'd like to use also," and they looked quite as complicated and as expensive as the diathermy. There was one machine which exercised the muscle so that when a joint was inactive, the muscle would not waste. There was another machine which was designed to exercise the joint itself. When I looked at all three and did some hasty arithmetic, I decided that if one treatment cost \$5.00 I would probably have to pay \$15.00 for the three. The cost to the wife of a Danish subject is 22c for all three treatments combined.

Then I had an experience in hospitalization. I had to go into a Danish hospital for an operation and I will confess that I was a little extravagant. I had a private room, instead of following the accepted custom and going into a room with one or two other patients. I paid \$2.50 for my room and my day and night nurses' care.

One of our American consular officials had an addition to his family during the time we were all serving in Denmark, and the mother of the new baby remarked that she was so glad that they could own the baby from the beginning. Their older child had been born in our own country and it had taken almost a year to pay the hospital bills by installments.

When one looks at this state aid to medicine, one must consider not only the effect on the patients, but on the medical profession, as well. In my opinion both groups benefited by it. In the first place, doctors are called in much more frequently when the costs are not so high. In this country if you have no money at all you can get hospitalization. We provide charity care. If you have a lot of money you do not mind what the costs are. But there is a space in between where a sudden operation, or a long illness is a serious drain on the exchequer. How often if there is a choice to be made, a mother says,

"It would cost several thousand dollars to really restore the action in my knee, and that same sum would put Mary through college.

"I don't mind a little limp. It doesn't bother me very much. Mary's college is much more important."

When the medical costs are low it means that the whole public gets all the care it needs. The doctors in charge of the insured patients recognize that it pays them to keep the patient well, and provide preventive measures which might, under another system, be overlooked. Doctors who wish to have their private practice, quite outside the insurance plan, can do so. I was not able to see any disadvantage to the physician, and it was clear that the public was benefiting tremendously.

If you are going to insure yourself against becoming an invalid you have to pay a little more. It costs about \$2.00 a year to insure you against becoming an invalid and if you are going to insure yourself against unemployment, the system is a little different.

Unemployment insurance is arranged through the workers' own union. The workmen pay their unemployment dues into their own union. Then the government matches the total pool collected with an equal contribution. When a worker, through no fault of his own, loses his job, his union pays out from the fund the unemployment benefit. But there is a very shrewd provision. Near the place where these benefits are paid, there is a government employment and the man is obliged to go there every day and ask for work and to when it is found for him. I think that provides for what we mig weakness of human nature.

There was one provision in the Danish Social Security program which was especially appealing to me. That was the care of the aged. It can be truthfully said that there is not a poverty stricken old man or woman in the Kingdom. When a person reaches the age of 65, if he or she has not an income sufficient to sustain life, the government grants a pension which is not paid as charity. It can be received with as much dignity as the soldier receives his pension. If an

#### THE DAVID LEVY YULEE LECTURE

income exists, but is small, too small for decent living, the government will add enough to bring up the level. They have been very careful about computing the exact amount required. The amount given in the old age pensions is not the same in the city as in the country. An accurate study of the costs of living has been made. It is not an extravagant pension, but it is enough for decent and secure subsistence, and one can see the elderly people going down arm in arm to the City Hall for their pensions each month, and one can look past the flowers blooming on the window sills of a straw-thatched cottage and can see rosy old faces looking out, or one can see pottering among the flower beds—for there are always flowers—old couples living their last years in modest security.

If you will pardon a very personal story I will tell you why this provision appealed so especially to me. When I was about sixteen years old, I decided there was something wrong about the system of prayer. It is interesting the way young people of that age can tell what is wrong with large matters. They can put their finger on the flaws in government and can point out where the management of the family is at fault. I selected prayer for my reforms. I said,

"There's something wrong with the system. When people only pray when they want something, how can prayer be answered?"

Now that we have radios it is so much easier for me to explain what I felt. Intense desire is broadcast by prayer, but that there ought to be receiving sets somewhere this side of heaven. I said to my mother,

"In between the times that I need things myself, I am going to try to hear prayer and answer it."

She accepted this plan with understanding patience. She probably thought that listening for prayer was a harmless occupation for me. I remember the day I came to her and told her I had heard the first prayer. I said, "I think there is something needed at the Conants." Mr. and Mrs. Conant were a couple both well past 70. Mr. Conant was totally blind. They rented a small farm house near us in the country, but there was nothing in the appearance of this elderly lady and gentleman to indicate that they were in need of any help. But on this day I said, "I think that there's a prayer at the Conants." I went over to their house and when I reached the door I was afraid to knock. It is difficult to explain that one is an amateur prayer answerer. I had to pull my courage together and then I knocked, and when Mrs. Conant opened the door, I said, "Is there anything a neighbor could do to help you?" She took my hand and drew me in. I have never seen more stark poverty than I found in that room. They had sold little by little, all their possessions trying to put off the hour when their inco. would no longer provide for them. Mrs. Conant said,

yed all night last night. When we pay our rent, we have almost for food. If we admit we have nothing and are sent to the County to to the women's home and my husband to the men's home. And

we will be separated." Mr. Conant said,

"Afte: I've taken care of her all these years, I couldn't have that happen!" And because he was blind, his wife could make a sign to me that she was really the one who looked after him. I said,

"I am sure that there is some way to solve this problem and we'll work it out together."

When I went back home, I found the beginning of the solution waiting for me. There was a cottage on our place which was without a tenant. My mother said I could have the cottage rent-free if I would furnish it. I hadn't a penny of my own! But in my desperation it occurred to me that there must be in the attics of my friends, furniture that had belonged to their grandparents and been saved out of sentiment. I begun raiding around to find furniture for the cottage, and I not only found all that I needed for the cottage, but it matched. That was the curious thing. Hunting in the attics of my friends I found two comfortable old arm chairs. There was an old-fashioned desk with a bookcase above it. There was a center table with a marble top, and an old reading lamp with a green shade, and there were curtains and rugs. There was furniture for the bedroom, and for the dining room, and even a set of dishes. One friend said, "I have no furniture to give you, but I'll give you chickens if you like." of course chickens were wonderful because they helped the economic situation. Another said, "I can give you potatoes." Another gave me preserves so that by the time a few days had passed everything that was needed for the cottage was in readiness. But one couldn't give to Mr. and Mrs. Conant without great delicacy because of their sensitiveness and pride. I told them that they could have the cottage and that if they would go off for a picnic on Saturday that I would move their belongings into the cottage for them. As soon as they had gone out with their packet of sandwiches, it was the furniture I had been collecting that was moved into the cottage. I will never forget how I worked to make slip-covers for the chairs. I always respect people who can make slip-covers after that experience. After the house was settled as if they had lived in it for fifty years, I had to have the table set and the evening meal ready. The chicken was baked and the kettle just ready to put on so it would be boiling for the tea, and when I saw the Conants walking up the path together toward the cottage, I slipped out the back door, so that they could come into their new home without explanations. When I reached home I was so excited with what had happened that I began to talk to my mother before the door opened. I did not notice the caller who was with her. When I finished my story, the man said,

"What's wrong with Mr. Conant's eyes?"

"It's a cataract," I replied. "He hasn't seen for 25 years." He said,

"Perhaps, then the cataract has reached a stage where it could be removed. That will be my part, I'm a surgeon."

He went down to the cottage the next day and examined Mr. Conant's eyes. "There is a hope that he will see, but I can't promise," the doctor said.

Several days afterwards there came the time when the result of the operation would be known and Mrs. Conant said to me,

"This suspense is too great for me. After all these years, if he could see! I can't bear to be there when the bandages are taken off. Please stay with him and then come to the door and tell me." I have had exciting moments in my life, but I think the most exciting one was when we were waiting for the bandage to be removed. The surgeon lowered the bandage and Mr. Conant turned his eyes toward the light and then his back toward us.

"I wondered what you looked like," he said. "Now I know." I called his wife and saw their joyful meeting. But ever since that time I have wondered

#### THE DAVID LEVY YULEE LECTURE

what would have happened if I hadn't knocked that morning, or what would have happened if I hadn't heard. What happens when no one hears?

The sight of Denmark's contented and happy old people gave me a warm feeling around my heart.

Of course, a Social Security program like Denmark's cannot be carried out without expense. One must recognize that. It is not fair to give only one side of the picture. The taxes are heavier than ours,—5% heavier for moderate incomes,—much heavier in the higher brackets. There are luxuries that the government can not afford. Not long ago, Denmark's passenger steamship line was discontinued because it cost too much to subsidize it. When the Danes travel they must travel on the ships of other nations. Certain personal luxuries are curtailed. An American traveler asked the Governor of Greenland, a senior official in Denmark, what make of car he had, and the Governor replied,

"In this country there are only three classes of people who have cars, rich people, people who need cars in their business, and fools. I belong to none of these classes, so I ride a bicycle." And he did. The Government in its effort to balance exchange actually forbade the importation of certain luxuries and very much curtailed the number of permits for others. Life in many respects has had to be a little more simple, a little more frugal. Denmark has reduced very much the appropriations for army and navy. In the armed camp of Europe it has scarcely adequate defense. They could not care for their people and at the same time afford the extensive armament. One cannot help but feel that they are hoping that the rest of the world will see the vision that they see before the day of danger comes,—that of applying to international problems the same method they had applied successfully to their individual and national problems. They are saying that while there is no one nation that can deal with war, if the nations just stand together they can deal with even war. They are saying,

"If someone today were to steal a watch, we have a policeman to arrest him, we have a judge to judge him, and we have a court to try him, and the whole community stands behind the court, but when today a great nation takes liberty from a little nation we have no police force, we have no law court, and no judge to deal with that criminal, but there is no more reason why the whole world should be thrown into chaos by one lawless nation than that every citizen in the community should be called out to help arrest a burglar."

They are recognizing that there is a force big enough to deal with war and that that force is public opinion. When public opinion says, "We want to settle our international questions with the same decency and order that we apply to the solution of our local problems," we will have substituted arbitration for war. These small nations are seeing a vision which they hope will become the vision of all mankind.

Shortly before I left Denmark I was having the evening meal in one of the Folk Schools. It is still a simple place, the Folk School,—a farm house and there were about thirty pupils there at supper. I remember the meal we had. A bowl of soup made of yellow peas was served with cold meat. You were supposed to have a bit of cold meat, then a sip of the warm soup and then some meat and then some soup. Afterward there was coffee and pastry, but if it was a simple meal, Oh, how the conversation soared. Those Folk School

#### DEMOCRACY AT WORK IN DENMARK

men were talking about the latest deliberations of the League of Nations. They were discussing the most intricate political problems of their own country. At the end of the meal the pupils rose and sang the old hymn of Bishop Grundtvig,

"And in our dear country our progress is such that few have too little, still fewer too much."

Looking from the door I could see an old castle on the distant hill but it was not now the home of a noble family who once owned it. The high taxes in the upper brackets had made it impossible for the castle to remain as it was formerly, a home of great luxury. It had been turned into a public institution. Of course, something beautiful was lost when that old leisured life began to fade, but on the hillside between the castle and the school I could see the little farms, modest, secure, and comfortable, and I thought, "They've paid dearly, but they have gained something real for their people."

A few moments ago I said that we would be brought to the crossroads of civilization. . . . I think the world is standing today at the crossroads. There is one path, the path of the Dictator, and there are nations that are taking that path. There is another road, the road of the beehive government of the Soviet, and that road has its travelers. But, thank God, that there's a third road, the road of pure Democracy, and that road is not a novelty to us who remember the words, "a government of and for and by the people". It is along that middle road of Democracy that those small Scandinavian nations are taking their way. The vision that they see is the vision that our forefathers showed us. They are making a working reality of the word Democracy. We have heard the phrase, "When there is no vision, the people perish", but with vision not only a people but civilization today can survive.

# THE URGE TO KNOW, SOCIAL UNREST AND THE EDUCATIONAL SYSTEM

By Dr. Edward Ellery
National Secretary of the Society of the Sigma Xi

"Why does this magnificent applied Science bring us so little happiness?" Albert Einstein queried recently at the California Institute of Technology. "Because," he continued, "we have not yet learned to make a sensible use of it. In war, it serves that we may poison and mutilate each other. In peace, it has made our lives hurried and uncertain. It has made men into the slaves of machinery."

"Chemistry can and will perhaps destroy our civilization," declared Professor Urey in Ottawa last June (1938) at the summer meeting of the A.A.A.S. "It will destroy people and their material possessions, if people so desire, and destroy the resources of the earth." Note the expression "if people so desire". But a very different result of applied science can be predicted "if people so desire". Chemistry can be applied to produce an as yet unrealized abundance, can expand our knowledge of the universe, our place in it, "if people so desire". It can even emancipate us from superstition, social mistakes, intellectual limitations, "if people so desire".

"The only perpetual motion is the growth of truth." In that terse and striking sentence Dr. W. R. Whitney, vice-president of the General Electric Company in charge of research, epitomizes and explains the age-old restlessness of the human kind. The advancement of knowledge creates new conditions of human life. New conditions of life demand constant readjustments. Readjustments mean restlessness. Back of the growth of truth is the urge to know, irrepressible, irresistible, the supreme quality of the human intelligence, characteristic of man since man began. Adam and Eve wanted to know—at least Eve did. Their acquisition of knowledge resulted in struggle and restlessness. The writer of that age-old story touched a fundamental truth of human life. In the urge to know lies the explanation of the age-old struggles of the human family—of the restlessness that is no more apparent today than it has been through the centuries—religious, political, economic restlessness, accompanying the advancement of knowledge which is the inevitable and universal expression of the urge to know.

Try to imagine a human society in which there is no urge to know. Or, as President Butler of Columbia, once expressed it, "Image a world populated only by totalitarian communities producing from its inchoate mass and by its own lofty intellectual and spiritual power an Abraham, or a Moses, a Socrates or a Plato, a Caesar or a Cicero, a Dante or a Petrarch, a Shakespeare or a Milton, a Goethe, a Schiller, a Washington, a Hamilton, an Edison, a Steinmetz. In a totalitarian state most of these men would be exiled, imprisoned, killed. In some way silenced. In time they would cease to be born. Only the unthinking, the unfeeling, the cowardly, the submissive would survive."

But such complete suppression of the urge to know has never happened. As humanity is made up, it seems impossible that it should happen. If the urge seems to be quiescent in some one generation, the next generation will still want to know. Times change. If resistance to centralization of authority is repressed by the law of a legislature or edict of a dictator in a given period, there is a vigorous reassertion in the succeeding period.

There was a case like that a long time ago of peculiar interest in a world of dictators in 1938. It was about 2000 B.C. Babylon was the acknowledged intellectual and political

center of the then known world. Hammurabi was its ruler, and most scholars agree that he was a benevolent dictator. He had regard for rights of property and rights of person. His code protected the weak and the poor, the widow and the orphan, against injustice from the rich and the powerful. He was in office over forty years—the life time of a generation. The people were well off, comfortable in body and spirit. What happened? Hammurabi passed. Babylon disappeared. But social, political, economic unrest persisted, because the succeeding generation wanted to know.

There is always an oncoming, unsatisfied generation. It is a glorious feature of life that generations overlap—that a generation ready to cease effort to know, desiring rest from restlessness, perhaps uninterested in or made uncomfortable by new knowledge, possibly even longing for the "good old times" when it was young—that such a generation must live with a generation that is about to take its place—that longs for, progresses toward, "good new times". The passing generation must ever remember that it was once the oncoming generation, and had the same urge to know. The college undergraduates of the 1800's were as much of a trial to the wise and experienced men whom they were to succeed in life as are the undergraduates of the 1900's. The undergraduates of former years would dance, go to the theatre, and play cards—three unpardonable sins in the minds of their elders. An undergraduate in 1890 was threatened with severe discipline by the authorities of an institution not far from Union for playing cards one night till half-past ten in a home in the town!

The conflict of the new and the old generation is set forth with keen insight in the clever novel of Ann Bridge, "An Illyrian Spring". The author aptly describes the young people. "It is not alone the fact that they have waded through the Matto Grasso", she writes of them (page 181), "or joggled on buses through China and Africa. It is the use they have made of their experiences—the lively inquiring mind forever checking theory against reality, amused, inquisitive, intelligent, skeptical, ardent—but their irreverent, debunking spirit always surrenders to the genuine." In this contact of two generations, a passing generation learns what it, itself, failed to uncover in knowledge—can find, if it will, profound satisfaction that the urge to know is not dead—not even waning—that knowledge will inevitably "grow from more to more".

The first thirty-seven years of the 20th century are not unique in the experience of the race. You hear our generation expressing a longing sometimes for the good old times; but stop and ask what and when were these "good old times" for which the now passing generation longs? Were they the recent period just before and immediately following the Great War? These were certainly good days. Science had shown how to produce more food, more clothes, more houses, more physical conveniences of life, than mankind could possibly use. Everybody who wanted to could get work at a good wage. A great president of the United States declared, "Poverty is eliminated from the social order". Because of the accomplishments of new knowledge in agriculture and transportation, no one would ever go hungry again. The new knowledge had made times good. Mankind was now completely free—religiously, politically, economically. The millennium had come. Those were the recent "grand old times"—those were comfortable conditions of life.

But the urge to know had led men astray. That is the charge against it. Science had added to the physical conveniences of life, but by that very act science had increased the cost of living. The inventor produced labor saving machines but the inventor threw men out of employment. New knowledge took away from men the very resources out of which men might be able to possess the conveniences which new knowledge had created.

Our increased knowledge brought the world to grief. The problems of peace were not problems of recovery from war, but rather problems of adjustment to new social conditions resulting from expanded knowledge.

But the world of men need not have been deceived into complacency by the unprecedented prosperity of the first quarter of the 20th century. There have been strikingly similar periods preceding and following other wars. England, just before and just after Waterloo, was unusually prosperous. In 1770 Hargreaves brought out his spinning jenny. A year later, Arkwright showed how to replace man power by water power. In eight years Crompton had perfected his spinning mule, followed shortly by the application of Watt's steam engine principle to the process of spinning and weaving cotton. The combined effect of this rapid change in an essential industry trebled the output of cotton in England in four years (1778-1782). In the same time, agriculture became systematic—men learned how to improve their livestock, scientific methods of soil treatment were introduced, and agricultural returns rivalled those of trade. In a little more than a quarter of a century was laid the foundation for industrial prosperity in England, unknown in prior periods. Men followed their nrge to know. They applied the new physical and biological sciences.

But industrial prosperity did not abolish economic restlesseness. On the contrary, it seemed to accentuate it. The new factory system of trade displaced the old domestic system. The introduction of machinery deprived handworkers of their means of livelihood. There was crowding into large cities with the accompanying hardships, social evils, and political upheavals. Price of labor was low. The laborer felt oppressed. Physical suffering was increased, not lessened. In spite of large industrial and agricultural output, England was hard pressed. The victory at Waterloo had brought peace—but problems of peace were problems not simply of recovery from war, but of adjustment to changed economic conditions. Parliament sought to quiet the universal unrest, increased taxes, and accumulated what was for that time an enormous national debt (800,000,000 £). Economic distress was everywhere. Parliament entered the realm of business. It did not limit wheat acreage, nor did it fix the price of wheat. That sort of legislation was left to a later generation in another country. Parliament forbade the importation of corn into England until wheat had reached famine prices. And people were starving. The wisdom of law makers was foolishness in England in the first quarter of the 19th century.

Then labor presented a united front in the economic field. Mills were shut down. There was vast unemployment. There was a nation-wide labor movement against the introduction and use of machinery in industry. Hargreaves was driven from his home in Lancashire because of his invention. Arkwright's property was destroyed by a mob. Crompton prevented attacks on his person and family by concealing his new devices. Wise men said "Society has reached its turning point—society has seen its best days". Those were the "good old times" in England in the sixty years just before and just after Waterloo. New knowledge, new conditions of life, consequent readjustments, widespread restlessness. But the expected and predicted total destruction of civilization in England did not happen.

But England is not the United States, and we are not Englishmen except in blood. Our country was emerging from a war at the turn from the 18th to the 19th century. Here, too, the problem was not simply that of restoration from the ravages of war. Here, too, the problem was one of adjustment to new conditions of life created by changed economic relations, which in turn were associated with new knowledge. In a speech in Congress in 1837, Henry Clay emphasized the widespread economic depression, the vast unemployment, the huge harvests of cereal grains which lay rotting in the fields where they had grown because of poor distribution facilities. That was 100 years ago. Such

were the "good old times" in the years following the Revolutionary War in the United States.

In 1857 Lord Macaulay, writing to his friend Henry S. Randall in New York City. uttered a prophecy about the United States which, in the light of what is now history, is almost uncanny.

"As long as you have a boundless extent of fertile and unoccupied land, your laboring population will be far more at ease than the laboring population of the old world. But the time will come when New England will be as thickly peopled as Old England. Wages will be as low, and will fluctuate as much with you as with us. You will have your Manchesters and Birminghams. And in those Manchesters and Birminghams hundreds and thousands of artisans will assuredly be sometimes out of work.

"I have seen England pass three or four times through critical seasons. Through such seasons the United States will have to pass in the course of the next century, if not of this. But will you pass through them? I heartily wish you a good deliverance. But my reason and my wishes are at war, and I cannot help foreboding the worst. It is quite plain that your government will never be able to restrain a distressed and discontented majority. For with you the majority is the government and has the rich, who are always a minority, absolutely at its mercy. I seriously apprehend that you will, in some season of adversity, do things that will prevent prosperity from returning. There will be, I fear, spoliation. Either some Caesar or Napoleon will seize the reins of government with a strong hand; or your Republic will be as fearfully plundered and laid waste by barbarians in the Twentieth Century as the Roman Empire was in the Fifth; with this difference, that the Huns and Vandals who ravaged the Roman Empire came from without, and that your Huns and Vandals will have been engendered within your country by your own Institutions."

That is Lord Macaulay prophesying about us in the restlessness immediately before our Civil War. Just as England after the Victory of Waterloo, and the United States after Yorktown, were confronted with problems of adjustment to new economic conditions created by the invention of machines, the form which new knowledge took, so the United States after the peace pact of Appomattox in 1865 was face to face with an industrial revolution, for which new knowledge in the form of new machines was held accountable. Twenty years after the Civil War, in 1886, the then United States Commissioner of Labor (Carroll D. Wright) declared in a report to Congress:

"The rapid development and adaptation of machinery in all the activities belonging to production and transportation have brought about what is commonly called over-production. This full supply of economic tools to meet the wants of nearly all branches of commerce and industry is the most important factor in the present industrial depression." That was written fifty years ago. The writer states further that, "the discovery of new processes of manufacture will undoubtedly continue, market prices will remain low, the day of large profits is past"; and then adds a final sorry note, "There may be room for further intensive, but not extensive development of industry in the present era of civilization". That was fifty years ago. Increase of knowledge in response to the eternal urge to know was to blame for that depression—but it had done its worst—it had reached its limit. Therein lay the hope of mankind! Restlessness was at an end.

"The good old times" when there was no restlessness, no strivings, no discontent—there never have been any, because man has never ceased to want to know. There has always been intellectual and social and political and religious unrest, an expression of the unquenchable urge to know, and total calamity to civilization as a whole has never happened.

In reality what is desired in the longing for the "good old times" is a combination of the best of the past with the best of the present, as brightly expressed in a Schenectady news sheet recently,

"Give me the good old days
When life was unhurried and true,
And just as a favor throw in
Some modern improvements too."

What is called for in these days of 1938 is an appreciation and acknowledgment and encouragement on the part of men everywhere of the irrepressible and irresistible urge to know, the eternal characteristic of the human intelligence, always and inevitably pushing on into the unknown.

The urge to know—and social unrest. The two are inseparable. The scientist is impatient with ends. He wants something, sees something beyond. He chafes when his investigations are tested by their utility value for a living generation. He cannot limit his researches by the market of the present day interests of mankind. He works under the profound conviction that the urge to know is the normal characteristic of human intelligence, or as Aristotle expressed it, "There is a desire common to all men to want to know".

Suppose the urge to know could be controlled and were controlled. That is the worst menace of collectivism—a repression of the creative individual mind. Suppose a moratorium could be and were declared in scientific research. Social restlessness might possibly cease for a time—a generation. The loss to humanity would be terrific. Suppose collectivism and dictatorship could kill the urge to know, and the urge were killed, that would be an unspeakable calamity. Physical evolution might not stop, but mental and moral and spiritual evolution would certainly stop. All that there would then be for the human family would be mental and moral and spiritual equality—the average—mediocrity—no superiority—no advance. Such a condition is unthinkable.

The urge to know—it can't be killed. It is nature's characteristic quality of the human mind. It can't be killed. It can be fostered and encouraged—the opposite of collectivism, which in this aspect of it must be relentlessly combated. Where is the aggregation of human being that can best foster it?

Obviously one place is the government. We have not been wholly backward.

The United States government in 1935 appropriated approximately \$51,000,000 in support of socialled research in science—about .3 of 1 per cent of the total budget of Federal expenditures for that year. That is a considerable reduction from the amounts assigned for such purposes in 1930.

But the responsibility of government in the advancement of knowledge is limited, and most of these expenditures are for the accumulation of scientific data and the administration of technical services, rather than to foster the urge to know. In all activities of government there will always arise questions whether there is duplication of effort in the various bureaus, whether the work done meets a public need, whether the economic and social return is commensurate with the hurden imposed on the tax payer. In any event, the workers must be trained in the colleges and universities.

Or the urge to know may be fostered by philanthropic or private foundations. In this respect the United States has not been backward. In dollars and cents this support of the advancement of knowledge amounts to a considerable sum, rivalling that of the government—something over \$50,000,000 annually. As examples, the Carnegie corporation and its scientific agency, the Carnegie Institute of Washington, report an expenditure of approximately one and three quarters million dollars for research; and the Rockefeller Foundation

of four and a half million for the natural and medical sciences and public health. For the most part the beneficiaries of these funds are associated with colleges and universities or research institutions, other than those of business.

The urge to know can be cultivated by the colleges and universities. This is the natural place, since these are institutions of learning, where the inquisitive youth, with a desire and zest for intellectual adventure, congregate to get acquaintance with the new, and for training in methods of discovery.

Fortunately an educational movement that has been in progress for two or three decades is giving an increasing attention to the individuality of the student. It is all the more noteworthy when one considers the increase in enrollment of our colleges and universities—over a million and a quarter of our young people in institutions of higher learning this autumn (1938)—and in an age of mass production in industry and collectivism and regimentation in government. The educational characteristic of our time is away from regimentation to individuality—the individual, not the mass, in the educational unit. Educators are profoundly convinced that the kind of life we live in the United States is not best served by a standardized youth—that it is unfair to youth to try to mold them all in a cast that is shaped by those who are no longer youthful. This emphasis on the individual is a healthy and gratifying and comforting situation. It means not only more effective resistance to propaganda but an increase of inquiring minds.

That college is not an institution of learning which is doing for its undergraduates only what it did for their fathers. Professor Bliss Perry describes such a college in his brilliant reminiscences which he appropriately calls, "And Gladly Teach". "My first Latin lesson in the preface to Livy," he writes, "was, as I discovered later in my Father's diary, exactly the same assignment which he had had in 1848; and it was also precisely what my son had in 1916 as a freshman at the same college. For 68 years at least, and probably much longer, it was the same squirrel in the same cage! One would think that some Professor of Latin, at some time, in an excess of emotional insanity might have altered the assignment, even if he kept the dreadful secret to himself."

It is in colleges and universities that we naturally look for masters of learning, for the encouragement of men to express their urge to know, for free and full announcement of discovery uninfluenced by political conditions, by fear of competition and profit by rivals in the field. It is in our institutions of learning that a combination of pedagogy and advancement of learning becomes a glorious fact, redounding alike to the mental growth of an oncoming and a passing generation, where there is no bunk in process or in product, where the intellect is restless, looks abroad and forward and up.

Our colleges and universities are not backward. In 1935, according to a report from the U. S. Office of Education, 81 publicly controlled universities and colleges, with a total budget of nearly \$82,000,000 reported nine and a half million dollars expended in 47 of them, specifically for the advancement of knowledge. 219 privately controlled educational institutions with aggregate budget of approximately \$58,000,000, reported a million and a half definitely expended in 17 of them for productive study.

Two significant events in the advancement of learning by the educational institutions of the United States occurred recently. One was the Semi-Centennial of the Society of the Sigma Xi, celebrated at Cornell. The other was the Tercentennary of Harvard. These events differed in degree, but not in kind. Both organizations are dedicating their resources to the advancement of knowledge.

The Society of the Sigma Xi is an organization founded to promote scientific research. It has branches in 100 educational and research institutions in the United States and Canada. Its membership of 40,000 men and women is scattered in 55 different countries

of the world. Among its other activities, it encourages and supports financially the urge to know, particularly in the oncoming generation. It signalized the fiftieth anniversary of its founding by awarding two prizes of \$1000 each—one in the physical sciences, and one in the life sciences. The awards were made in support of research in progress rather than for research accomplished, and to young workers; Dr. Richard E. Shope of the Rockefeller Institute for Medical Research in Princeton, for the work he has done on the etiology of swine influenza; and Professor I. I. Rabi of Columbia University, for work he has done on molecular beams and on the magnetic moments of the proton and deuteron. The income of the modest permanent funds of the society will be used for two similar awards periodically hereafter. The society thus definitely encourages an expression of the urge to know in the colleges and universities of the United States.

For a month or more two years ago Harvard University demonstrated to the world the international character of scholarship, and to quote Dr. Conant, "commemorated the extension to this continent of the ancient world of learning". The Tercentennary marked the importance of free inquiry in a time when (again quoting Dr. Conant) "the academic institutions of more than one country have been crippled by persecution" (end of quotation) and where the urge to know is temporarily stifled. Significant as part of this important celebration was the creation of a number of new professorships to be known as university professorships with "roving commissions" among the fields of study, free to carry on investigations in any laboratory and with any of the equipment of the university. These professors have wide latitude—range at will in the branches of knowledge—create their own chairs. National Scholarships were founded as a part of the celebration, to bring to Harvard in the years to come youthful talent of the country who will receive and perpetuate and add to the new knowledge which these university professors will uncover.

Both these events—the Semi-Centennial of a scientific society, devoted to the promotion of research, and the Tercentennary of our first university—were made the occasion for definite dedication of financial resources to the advancement of knowledge, to the encouragement of the urge to know, to the promotion of individualism. That is typical of what is going on in some of our higher educational institutions. We are not entering on a static period in the history of learning. We can look forward with satisfaction to the constant growth of truth, "The only perpetual motion", to ever changing conditions of life, to consequent readjustments, and hence to continued social unrest.

"Who of us hath his desire," wrote Thackeray at the close of his Vanity Fair, "or having it is satisfied?" And he adds, "Vanitas vantatum". Who of us hath his desire, or having it is satisfied? No one. But that does not make life empty. That makes life full.

## UNIVERSITY OF FLORIDA

## OFFICERS OF INSTRUCTION AND RESEARCH

## 1938-1939

JOHN JAMES TIGERT, M.A. (Oxon.), LL.D., Ed.D., D.C.L., D.Litt., L.H.D Language Hall
President of the University
Charles Elliot Abbott, M.S
Professor of Fruits and Vegetables
Ouida Davis Abbott, Ph.D. (Missouri)
Home Economist, Head of Department, Experiment Station
Margaret Frances Allen, M.A
Instructor in Kindergarten Education
ROBERT VERRILL Allison, Ph.D. (Rutgers)
Head Professor of Agronomy, College of Agriculture; Chemist, Head of
Department of Chemistry and Soils, Experiment Station;
Soil Conservationist, Agricultural Extension Service
BURTON WEBER AMES, M.A.E. (On leave 1938-39)
Professor; Head, Correspondence Study Department, General Extension Division
James Nesbitt Anderson, Ph.D. (Johns Hopkins)Language Hall
Dean of the Graduate School and Head Professor of Ancient Languages, Emeritus
Montgomery Drummond Anderson, Ph.D. (Robert Brookings)Language Hall
Professor of Business Statistics and Economics
OLIVER WENDEL ANDERSON, JR., M.S.A
Instructor in Poultry Husbandry, College of Agriculture;
Assistant Poultry Husbandman, Experiment Station
WILLIAM TOBIAS ARNETT, M.A.Arch
Assistant Professor of Architecture
LILLIAN ELEANORE ARNOLD, M.S
Assistant Botanist, Experiment Station
P. T. Dix Arnold, M.S.A
Assistant Professor of Dairy Husbandry, College of Agriculture;
Assistant Dairy Husbandman, Experiment Station
Ernest George Atkin, Ph.D. (Harvard)Buckman Hall
Head Professor of French
ROLLIN SALISBURY ATWOOD, Ph.D. (Clark)Language Hall
Acting Director, Institute of Inter-American Affairs;
Professor of Economic Geography;
Chairman, Comprehensive Course, Man and the Social World
George Ralph Barker, B.S.E.E., Major, Infantry, U.S. ArmyLanguage Hall
Assistant Professor of Military Science and Tactics
*Robert Marlin Barnette, Ph.D. (Rutgers) Experiment Station
Chemist, Experiment Station
CLYDE KENYON BEALE, B.A.J
Assistant Editor, Experiment Station and Agricultural Extension Service
Percy Morris Beard, M.S
Track Coach; Professor of Physical Education
ROBERT COLDER BEATY, M.ALanguage Hall
Dean of Students
Dean of Students

<sup>\*</sup>Deceased October 31, 1938.

JOSEPH RILEY BECKENBACH, Ph.D. (Rutgers)Belle Glade
Associate Horticulturist, Everglades Experiment Station
RAYMOND Brown Becker, Ph.D. (Minnesota)Experiment Station
Professor of Dairy Husbandry and Animal Nutrition, College of Agriculture;
Dairy Husbandman, Experiment Station
JOSEPH CHARLES BEDSOLE, B.S.A. Land Use Planning Offices
Assistant Economist, Farm Management, Agricultural Extension Service
David Miers Beights, C.P.A. (Florida, Illinois), Ph.D. (Illinois)Science Hall
Professor of Accounting
Walter Herman Beisler, D.Sc. (Princeton)Benton Hall
Professor of Chemical Engineering
CLARINE BELCHER, M.S
Charine Bencher, M.S.
Specialist in Clothing and Textiles, Agricultural Extension Service
Charles Edward Bell, Ph.D. (Iowa State College)Experiment Station
Associate Chemist, Experiment Station
George Robert Bentley, M.ALanguage Hall
Instructor in the Social Sciences
TRUMAN C. BIGHAM, Ph.D. (Stanford)
TRUMAN C. DIGHAM, Th.D. (Stanford)
Professor of Economics
ALVIN PERCY BLACK, Ph.D. (Iowa)
Professor of Agricultural Chemistry
RAYMOND WILLIAM BLACKLOCK, B.A
Boys' Club Agent, Agricultural Extension Service
Gulie Hargrove Blackmon, M.S.A
Horticulturist, Head of Department, Experiment Station
Lewis F. Blalock, M.A
Director of Admissions
ROY EMIL BLASER, M.S
Assistant Agronomist, Experiment Station
ARTHUR AARON BLESS, Ph.D. (Cornell)
Professor of Physics
Trolessor of Thysics
Jack Bohannon, M.A
Assistant Professor of Industrial Arts Education
Margaret White Boutelle, M.A. (On leave First Semester, 1938-39). Yonge Building
Assistant Professor of English Education, Laboratory School
VICTOR VIRGIL BOWMAN, M.S.A
Assistant to the Director, Experiment Station
Frederick Tilghman Boyd, Ph.D. (Wisconsin)Belle Glade
Assistant Agronomist, Everglades Experiment Station
HOMER EELLS BRATLEY, M.S.A Horticulture Building
Assistant Entomologist, Experiment Station
THOMAS BREGGER, Ph.D. (Cornell)Belle Glade
Sugarcane Physiologist, Evergaldes Experiment Station
Lucius Moody Bristol, Ph.D. (Harvard)Peabody Hall
Head Professor of Sociology
Albert Nelson Brooks, Ph.D. (Wisconsin)
ALBERT NELSON DROOKS, I II.D. (WISCOISIII)
Plant Pathologist, Strawberry Investigations Laboratory
ARTHUR CAMPBELL BrownSeagle Building
Special Lecturer in Entomology; Grove Inspector, State Plant Board
HAMLIN LYNN BROWN, B.S.A
Dairyman, Agricultural Extension Service

Director of Music
Director of Music
Ruby Brown
Assistant Economist, Home Management, Agricultural Extension Service
WILLIAM STACY BROWNING, (Graduate U.S. Military Academy), Colonel,
Field Artillery, U.S. ArmyLanguage Hall
Commandant of Cadets, Professor of Military Science and Tactics
JOSEPH BRUNET, Ph.D. (Stanford)Buckman Hall
Associate Professor of French
Charles Francis Byers, Ph.D. (Michigan)
Assistant Professor of Biology
JOHN CARLTON CAIN, B.S.A
Assistant Horticulturist, Experiment Station
*Henry Holland Caldwell, M.ALanguage Hall
Associate Professor of English
ARTHUR FORREST CAMP, Ph.D. (Washington University)Lake Alfred
Horticulturist in Charge, Citrus Experiment Station
JOHN PERLIN CAMP, M.S.A
Assistant Agronomist, Experiment Station
ARCHER STUART CAMPBELL, Ph.D. (Virginia)Language Hall
Associate Professor of Public Finance and Foreign Trade;
Director, Bureau of Economic and Business Research
William Graves Carleton, M.A., J.D. (Florida), (On Leave First Semester
1938-39) Peabody Hall
Associate Professor of the Humanities and the Social Sciences
Archie Fairly Carr, Ph.D. (Florida)
Instructor in the Biological Sciences
Richard Alfred Carrigan, B.SSpectroscopic Laboratory
Assistant Chemist, Experiment Station
William Richard Carroll, Ph.D. (Minnesota)Science Hall
Associate Professor of Botany and Bacteriology
Cleva Josephine Carson, M.S
Assistant Professor of Music Education, Laboratory School
William Angus Carver, Ph.D. (Iowa State College)
Associate Agronomist, Experiment Station
WILLIAM STANMORE CAWTHON, M.A
Assistant Professor at History Political Science and Mathematics
James Edward Chace, Jr., M.D.A Peabody Hall Assistant Professor of Economics and Realty Management
Assistant Protessor of Feonemics and Really Management
HARLEY WILLARD CHANDLER, M.SLanguage Hall
Registrar; Chairman, Board of University Examiners
Bernard Victor Christensen, Ph.D. (Wisconsin)
Director, School of Pharmacy; Head Professor of Pharmacognosy and Pharmacology
Washington Augustin Chapt MA
Washington Augustus Clark, M.ALanguage Hall
Assistant Professor of English
BURKETT SALE CLAYTON, B.S.C.E. Belle Glade
Drainage Engineer, Everglades Experiment Station (Cooperation U.S.D.A.)
Harold Gray Clayton, M.S.A Experiment Station
District Agent, Agricultural Extension Service
45

<sup>\*</sup>Deceased September 23, 1938.

ROBERT SPRATT COCKRELL, M.A., LL.B. (Virginia)
Director of Athletics; Head Football Coach; Professor of Physical Education
Madison Derrell Cody, M.A
Head Professor of Botany and Bacteriology M. Ben Cogburn, C.P.A. (Florida), M.S
Assistant Professor of Accounting
James Edmund (ongleton, Ph.D. (North Carolina)Language Hall Instructor in English in the General College
Frederick William Conner, M.ALanguage Hall
Instructor in English
HENRY PHILIP CONSTANS, M.A., LL.B
Head Protessor of Speech
JOHN FRANCIS COOPER, JR., M.S.A
Editor, Experiment Station and Agricultural Extension Service
James Dewberry Copeland, D.Ed. (New York University)
Assistant Professor of Business Education, Laboratory School
Alfred Crago, Ph.D. (Iowa)
Professor of Educational Psychology and Measurements
CLIFFORD WALDORF CRANDALL, B.S., LL.B. (Michigan), LL.D. (Adrian)Law Building
Professor of Law  John Ellis Craps, M.A
John Ellis Craps, M.ABuckman Hall Instructor in German and Spanish
John Thomas Creighton, Ph.D. (Ohio State)
Head Professor of Entomology and Plant Pathology
IDA KEELING CRESAP
Librarian, Experiment Station
Charles Langley Crow, Ph.D. (Goettingen)Language Hall
Professor Emeritus of Modern Languages
RAYMOND MERCHANT CROWN, B.S.AExperiment Station
Assistant Professor of Animal Husbandry, College of Agriculture;
Assistant Animal Husbandman, Experiment Station
JOHN BROWARD CULPEPPER, M.A.E. (On Leave 1938-39)
Assistant Professor of Social Science Education, Laboratory School;
Chairman, P. K. Yonge School Faculty
CARROLL FLEMING CUMBEE, M.A.E
Instructor in Core Curriculum Education, Laboratory School Mabel M. Cunningham
Instructor in Dietetics Education in Charge of Cafeteria, Laboratory School
Jacquelin Daniel, B.S
Assistant Football Coach
Manning Julian Dauer, Ph.D. (Illinois)
Assistant Professor of History and Political Science
Effie Mims Davis, B.S. in L.S. Library
Document Librarian and Assistant in the Circulation Department
Uri Pearl Davis, M.A
James Westbay Day, M.A., J.D. (Florida)Law Building
Professor of Law
JOHN WILLIAM DEBRUYN, M.AAuditorium
Assistant Professor of Music

Efra Franklin DeBusk, B.S
Francis Marion DeGaetani, B.A.EBuckman Hall Instructor in Spanish
Robert Solomon Dennis, B.SExperiment Station
Assistant District Agent, Agricultural Extension Service
RALPH DAVIS DICKEY, B.S.A
Assistant Horticulturist, Experiment Station Sigismond de Rudesheim Diettrich, Ph.D. (Clark), D.Sc. (Budapest) Language Hall
Assistant Professor of Economic Geography
Francis Townsend Dodd, (Graduate U.S. Military Academy), Captain, Field
Artillery, U.S. ArmyLanguage Hall
Assistant Professor of Military Science and Tactics HARWOOD BURROWS DOLBEARE, B.A
Associate Professor of Finance
Rox Hunter Donaldson, Captain, Field Artillery, U.S. ArmyLanguage Half
Assistant Professor of Military Science and Tactics
Bernard Francis Dostal, M.A
Assistant Professor of Mathematics
ELSIE DOUTHETT, B.A
FORREST BANKS DUNCAN
Chier Operator, Radio Station WRUF
Charlotte D. Dunn, B.S. (On Leave 1938-39)
Instructor in Kindergarten Education, Laboratory School
Aubrey Elsworth Dunscombe, M.S.A
Newton Cromwell Ebaugh, M.S., M.E Engineering Building
Head Professor of Mechanical Engineering; Campus Engineer
Auther Hamner Eddins, Ph.D. (Iowa State College)
Plant Pathologist, Potato Investigations Laboratory
HENRIE MAY EDDY, M.S. in L.S. Library Acting Librarian
Edward Macon Edmonson, (Graduate U.S. Military Academy), Captain,
Field Artillery, U.S. ArmyLanguage Hall
Assistant Professor of Military Science and Tactics
William Thomas Edwards, Ph.D. (Ohio State)
Assistant Professor of Elementary School Curriculum, Laboratory School
Winston Wallace Ehrmann, Ph.D. (Yale)Benton Hall
Assistant Professor of the Social and Physical Sciences
John Grady Eldridge, M.A
Professor of Economics
Norman Ellsworth Eliason, Ph.D. (Johns Hopkins)
Eckley Sanderson Ellison
Meteorologist (Cooperation U.S. Weather Bureau)
Elmer Jacob Emig, M.ABuckman Hall
Head Professor of Journalism
Mark Wirth Emmel, D.V.M. (Iowa State College) Experiment Station
Associate Professor of Veterinary Science, College of Agriculture;
Veterinarian, Experiment Station

Hasse Octavius Enwall, Ph.D. (Boston)
Head Professor of Philosophy Silas Kendrick Eshleman, Jr., M.S., M.E., J.D., (Florida)Engineering Building
Assistant Professor of Mechanical Engineering
ROLAND BYERLY EUTSLER, Ph.D. (Pennsylvania)
James Marion Farr, Ph.D. (Johns Hopkins)
Lester Collins Farris, M.ALanguage Hall
Associate Professor of English
MARY SOLTE FAWSETT, B.A.E
Instructor in Home Economics Education, Laboratory School Amy Steen Fetzer, B.A. in L.S Library
Head, Order Department
WILLARD MERTON FIFIELD, M.S
Assistant Horticulturist, Sub-Tropical Experiment Station
WILLIAM WARRICK FINEREN, M.E Engineering Building
Professor of Mechanical Engineering
WILBUR LEONIDAS FLOYD, M.S
Assistant Dean, College of Agriculture and Head Professor of Horticulture, Emeritus
JOHN WESLEY FLY, B.S.B.A
Perry Albert Foote, Ph.D. (Wisconsin)
Professor of Pharmacy
WILLIAM THOMAS FORSEE, JR., Ph.D. (Florida)Belle Glade
Assistant Chemist, Everglades Experiment Station
Edwin Stanton Frash, M.E Engineering Building
Instructor in Mechanical Engineering
Percy Warner Frazer, M.F
Assistant Professor of Forestry ROWLAND BARNES FRENCH, Ph.D. (Iowa)
Associate Chemist, Experiment Station
BONNIE REID FUDGE, Ph.D. (Rutgers)Lake Alfred
Associate Chemist, Citrus Experiment Station
Joseph Richard Fulk, Ph.D. (Nebraska)
Professor of Public School Administration on Special Status
LEONARD WILLIAM GADDUM, Ph.D. (Missouri)
Chairman, Comprehensive Course, Man and the Physical World;
Biochemist, Experiment Station Edward Walter Garris, Ph.D. (Peabody), Sc.D. (Clemson)
Professor of Agricultural Education
Thomas Nicholas Gautier, B.S
Instructor in the Physical Sciences
Frank Dennis Genovar
Assistant in the Department of Required Physical Education; Swimming Coach
Theodore Samuel George, M.A
Hallett Hunt Germond, Ph.D. (Wisconsin)
James David Glunt, Ph.D. (Michigan.)Thomas Hall
Professor of History and Political Science;
Chairman, Comprehensive Course, The Humanities

William Lewis Goette, M.A.E
Assistant Professor of Science Education, Laboratory School
*Carlos Clyde Goff, M.S
Assistant Entomologist, Watermelon Investigations Laboratory  James Calvin Goodwin, M.S
Special Lecturer in Entomology; Nursery Inspector, State Plant Board
KLEIN HARRISON GRAHAMLanguage Hall
Business Manager
JOHN LOUIS ROCHON GRAND, M.A
LEVI OTTO GRATZ, Ph.D. (Cornell)
Plant Pathologist in Charge, North Florida Experiment Station
LESTER LEONARD HALE, M.A
MICHAEL EDMOND HALLORAN, Major, Infantry & U.S. ArmyLanguage Hall
Assistant Professor of Military Science and Tactics
Henry Glenn Hamilton, Ph.D. (Cornell)
Charles Marlowe Hampson, M.S
Agricultural Economist in Farm Management, Agricultural Extension Service
Frederick T. Hannaford, B.A. in Arch
Assistant Professor (Part Time) of Architecture  Lewis Hardage
Assistant Football Coach; Head Baseball Coach; Protessor Physical Education
†Lyman George Haskell, M.D. (Boston)
Professor of Corrective Gymnastics on Special Status William Byron Hathaway, M.A
Associate Professor of Spanish
OLIVER HOWARD HAUPTMANN, Ph.D. (Wisconsin)Buckman Hall
Assistant Protessor of Spanish and German; Acting Head of Department
John Erskine Hawkins, Ph.D. (Pennsylvania)
James Douglas Haygood, Docteur de l'Universite de Paris
Assistant Protessor of Education
Fred Harvey Heath, Ph.D. (Yale)
Professor of Chemistry
Joseph Russell Henderson, M.S.A
Assistant Chemist, Experiment Station
Oscar Edward Heskin, Ph.D. (Minnesota)
Assistant Professor of Economics and Marketing
Marion W. Hester, M.D. (Emory)
Samuel Odom Hill, B.S. Monticello
Assistant Entomologist, Pecan Investigation Laboratory (Cooperation U.S.D.A.)
ELMER DUMOND HINCKLEY, Ph.D. (Chicago)
Head Professor ot Psychology; Director, Bureau of Vocational Guidance and Mental Hygiene
- Contained and French Hygiene

<sup>\*</sup>Deceased January 13, 1939. †Deceased March 18, 1939.

HOMER HIXON, Ph.D. (Iowa State College)
HORTON HOLCOMBE HOBBS, M.S
Instructor (Part Time) in the Biological Sciences
Hollis Howard Holbrook, B.F.A
ETHYL HOLLOWAY, B.S
District Home Demonstration Agent, Agricultural Extension Service
ARTHUR ARIEL HOPKINS, M.A
Associate Professor of Speech
LILLIAN PAGE HOUGH, M.A
Instructor in Elementary Education,
Assigned to the Second Grade, Laboratory School
HOMER HOWARD, M.A. (On Leave 1938-39)
Assistant Professor of Education
RAYMOND HOLT HOWARD, M.S.A
Assistant Agricultural Economist, Agricultural Extension Service
ROBERT P. HOWARD, B.S Land Use Planning Office
Assistant Economist, Farm Management, Agricultural Extension Service
THEODORE HUNTINGTON HUBBELL, Ph.D. (Michigan)
Professor of Biology and Geology
ROY PREWETT HUFF, Captain, Field Artillery, U.S. ArmyLanguage Hall
Assistant Professor of Military Science and Tactics
Fred Harold Hull, Ph.D. (Iowa State College)
Associate Agronomist, Experiment Station
H. HAROLD HUME, M.S., D.Sc. (Clemson)
Dean, College of Agriculture
HUBER CHRISTIAN HURST, M.A., LL.B
Associate Professor of Economics and Business Law
William John Husa, Ph.D. (Iowa)
Head Professor of Pharmacy
Edward Joseph Ireland, Ph.D. (Wisconsin)
Instructor in Pharmacognosy and Pharmacology
Vestus Twiggs Jackson, Ph.D. (Chicago)
Professor of Chemistry
11010bb01 01 Chemistry
Frank Stover Jamison, Ph.D. (Cornell)
Truck Horticulturist, Experiment Station
Chesterfield Howell Janes, M.S.Eng.
(On Leave 1938-39) Engineering Building
Associate Professor of Mechanical Engineering
JOHN HENRY JEFFERIESLake Alfred
Superintendent, Citrus Experiment Station
Elizabeth Thorne Jernigan, B.ALibrary
Head, Catalog Department
JOHN EVANDER JOHNSON, B.D., M.A
Director of Social and Religious Service;
Professor of Bible; Y.M.C.A. Secretary
Richard Sadler Johnson, B.S.PLanguage Hall
Assistant Registrar
OSCAR FREDERICK JONES, B.A. (On Leave Second
Semester 1938-39)Buckman Hall
Instructor in German and Spanish
instructor in derman and opanish

Professor of Forest Economics and Finance

## SENATE COMMITTEES

#### FOR THE YEAR 1938-39

#### ALUMNI

Price, Chairman; Abbott; Dauer; Day; Hinckley; Hurst; Matthews; Robertson; Skaggs; Wright.

#### Buildings and Grounds

Weaver, Chairman; Arnett; Ebaugh; Fraser; Mowry; Price, T. J.; Salt.

#### BULLETIN BOARDS AND SIGNS

CLARK, Chairman; Blalock; Dodd; Quade; Skaggs.

#### Correlation with High Schools

LITTLE, W. W., Chairman; ATWOOD; BLESS; CARLETON; CHANDLER; HINCKLEY; MEAD; PHIPPS; PRICE; REED.

#### Credentials

Leigh, Chairman; Chandler; Matherly; Newell; Norman; Trusler; Weil.

#### DEPARTMENTAL OFFERINGS AND SIZE OF CLASSES

Chandler, Chairman; Hume; Matherly; Norman; Simpson; Weaver; Wilson, W. H.; Dean of the College Involved.

#### Educational Policies

Tigert, Chairman; Anderson, M. D.; Bless; Byers; Chandler; Gaddum; Little, W. W.; Rogers, J. S.

#### Fraternities, Societies and Clubs

Beaty, Chairman; Black; Reed; Wise; Representatives from:

Honor Court—Roy Michael;

Interfraternity Conference—Tiffany Turnbull;

Student Body-Jack Jones.

#### FRESHMAN WEEK

PRICE, Chairman; BEATY; BLALOCK; HINCKLEY; KELLUM; LITTLE, W. W.; MATHERLY.

#### HONORARY DEGREES

Black, Chairman; Crandall; Lyons; Newell; Simpson.

#### LIBRARY

Wilson, W. H., Chairman; Eddy, Secretary; Gaddum; Mead; Simpson; Spivey.

#### MEMORIALS

WILLOUGHBY, Chairman; Carroll; Christensen; Garris; Glunt; Payne; Perry; Roberts; Robertson.

#### MILITARY AFFAIRS

REED, Chairman; Dodd; Heath; Kokomoor; Roberts.

#### MURPHREE ENGINEERING LOAN FUND

REED, Chairman; BEATY; YEATON.

#### Public Debating

HOPKINS, Chairman; Bristol; Dauer; Eldridge; Mosier; TeSelle.

#### Public Functions

Constans, Chairman; Chandler; Graham; Powell; Weil.

#### PUBLICITY

WRIGHT, Chairman; Cooper; Day; Emig; Fineren; Matherly; Riley; Senn.

#### SCHOLARSHIPS AND LOANS

BEATY, Chairman; Chandler; Cockrell; Cody, J. C.; Matherly; Norman; Senn; Simpson; Weil; Wilson, W. H.

#### SELF-HELP

Beaty, Chairman; Black; Chandler; Cody, J. C.; Dauer; Day; Graham; Matherly; Mowry; Norman; Price; Weil.

#### STUDENT HEALTH

TILLMAN, Chairman; Cody, J. C.; Constans; Paschall; Price; Yeaton.

#### STUDENT PUBLICATIONS

Kokomoor, Chairman; Day; Dolbeare; Emig.

#### STUDENT REGULATIONS

PRICE, Chairman; BEATY; CHANDLER; JACKSON; MATHERLY; NORMAN; TESELLE.

#### STUDENT SOCIAL AFFAIRS

Beaty, Chairman; Cody, M. D.; Huff; Williams, O; Representatives from:
Honor Court—Emmett Smith;
Interfraternity Conference—Harold Hobbs;
Student Body—Jack Pinkerton.

#### University Publications

Chandler, Chairman; Dolbeare; Emig; Kusner; Lyons; Moore; Rogers, J. S.

#### Use of Space

Tigert, Chairman; Black; Chandler; Dauer; Little, W. W.; Matherly; Norman; Wise.

#### YULEE LECTURESHIP

Constans, Chairman; Beaty; Leigh.

#### OTHER COMMITTEES AND BOARDS

#### ATHLETICS

SLAGLE, Chairman; Graham; Matherly; Norman; Reed; Rogers, F.; Wilson, W. H.; Alumni Representatives: Ed Larsen; Dan McCarty; Judge H. L. Sebring; Student Representatives: H. H. Graham; Walter Liddell; Fonia Pennington.

#### DISCIPLINE

CRANDALL, Chairman; Browning; Cody, M. D.; Enwall; Teselle.

#### FLORIDA UNION BOARD OF MANAGERS

MATTHEWS, Chairman; BEATY; JOHNSON, J. E.; Wright; Student Members · President of the Student Body—Steve O'Connell; Chancellor of the Honor Court—Richard Tench; President of Florida Blue Key—Robert Barton; Student Body at Large—Donald Lamson.

#### GENERAL COLLEGE ADMINISTRATIVE BOARD

LITTLE, W. W., Chairman; Atwood; Beaty; Black; Chandler; Gaddum; Glunt; Kokomoor; Matherly; Rogers, J. S.; Wilson, W. H..; Wise.

#### GRADUATE COUNCIL

SIMPSON, Chairman; Hume; Leigh; Little, W. W.; Lyons; Rogers, J. S.; Williamson.

#### INTER-AMERICAN AFFAIRS

MATHERLY, Chairman; ATWOOD; DAUER; DEGAETANI; HAUPTMANN; HUME; LITTLE, W. W.; LYONS; POWELL; WEIL.

#### STUDENT APPEALS

Wise, Chairman; Laird; Senn; TeSelle; Yeaton.

#### University Examiners

CHANDLER, Chairman; HINCKLEY; LITTLE, W. W.; MOSIER; PRICE; SIMPSON.

# STUDENT ROLL

## 1938 SUMMER SESSION

The following abbreviations are used to indicate classifications: AG-Agriculture; A-Architecture and Allied Arts; AS-Arts and Sciences; B-Business Administration; ED-Education; E-Engineering; FY-Forestry; GC-General College; G-Graduate School; L-Law; P-Pharmacy; TI-Trade and Industrial Education.

The Terms attended are indicated by 1 for the First Term and 2 for the Second.

Name and Classification	Address	Name and Classification	Address
Aaron, Norman John, TI, 1 & 2	Fulton Georgia	Babers, Mary Gray, GC, 1 & 2	
Abernathy, Wallace B., GC, 1		Badger, Walter Edwin, GC, 1 & 2	Hastings
Adair, Mildred, ED, 2.	Jacksonville	Baessler, Irva B., Ed. 1 & 2	Jacksonville
Adams, James Marion, TI, 2	Jonesboro, Arkansas	Baggott, Mamie Ruth, AS, 1	Panama City
Adams, Julia Ruth, Tl, 1		Baguley, Claire H., Jr., B, 1 & 2	DeLand
Adams, Ruth Cook, ED, 1	LaBelle	Bailes, Martha E., AS&B, 1 & 2 Bailey, Annie B., Ed, 1	Post Tombo City
Adams, Sarah E., AS, 1 & 2	Bonifay	Bailey, Frances Gray, Ed, 1 & 2	St Petersburg
Adams, Toby Olan, GC, 1	West Palm Beach	Bailey, Reginald D., A, 2	
Adkinson, Brady Lea, GC, 1 & 2	DeFuniak Springs	Bailey, Robert Cecil, Ag, 2	Shady Grove
Adler, Jacob N., GC 1 & 2	Daytona Beach	Bailey, Roland L. E. 1	Orlando
Akard, Florence, ED, 1		Bailey, Thomas D., G, 1 & 2	DeFuniak Springs
Akins, Annie Belle, AS, 1 & 2	Brandon	Baker, George Flovd, Ed, 1 & 2	Hawthorn
Albinson, Bernice, AS, 1	Miami	Baker, Gordon Edward, Ed, 1	Pierson
Alford, Ruth V., ED, 2	Bonifay	Baker, Milledge A., G, 2.	
Allen, Alberta, ED, 1 & 2		Baker, Paul Martin, G, 1	Miami
Allen, Charlie O., ED, 1 & 2		Baker, Roxie, G. 2	
Allen, Dorothy Rensley, AS, 1	Jacksonville	Baldwin, Paul A., Tl, 2	.Lexington, Mississippi
Allen, Frank C., GC, 1 & 2	Jacksonville	Bales, Vernon Lanier, B, 2	Moore Haven
Allen, Jessie Louise, ED, 1	Milton	Ball, Fred H., GC, 1	Jacksonville
Allen, Victor, Jr., AS, 1	Fsro	Barber, Emma M., Ed, 1	Milron
Allen, Virginia C., AS, 1 & 2	Brooksville	Barbour, Ralph H., Tl, 1 & 2	Jacksonville
Allison, Sally H., ED, 2	Leesburg	Bare, Bennie Arden, AS, 2	Miami
Altman, Carrie Rouse, G, 1 & 2	Perry	Bare, Bennie Arden, AS, 2	Graceville
Altman, Robert Davis, G, 1 & 2	Sopchoppy	Barfield, Bruce L., L, 1	Perrine
Anderson, Alma C., TI, 2	Miami	Barker, Clara H., Ed, 1	Jacksonville
Anderson, Annie Lou, ED, 1	Der uniak Springs	Barker, Ruth, AS, 1	Glen St. Mary
Anderson, Celia Linkey, G, 1 & 2	Gainesville	Barnes, Archie J, GC, 1 & 2	Lake Alfred
Anderson, Cyrus E., G. 1 & 2	Jacksonville	Barnes, Clarence H., G, 1 & 2	Ft. Myers
Anderson, Cyrus E., G, 1 & 2	DeFuniak Springs	Barnes, Glen F., G, 1	Archer
Anderson, Elizabeth R., G, 2	Myakka City	Barnes, Rose, AS, 1 & 2	Lake Alfred
Anderson, George L., ED, 1	Crystal River	Barnes, Ruth, Ed, 1 Barnhart, Sarah Jane, TI, 2	Tampa
Anderson, Helen M., Ed. 1		Barnhill, Eubanks, GC, 1	1 oungstown, Onto
Anderson, Lucretia S., Ed, 1	Gainesville	Barnhill, James B., GC, 1	Baker
Anderson, Orval B., GC, 1		Barr, Thomas Raymond, G, 1 & 2	Ft. Pierce
Anderson, Thelma F., Ed, 1		Barrett, Allan C., TI, 1	Diffee, Georgia
Andrews, Charles L., G, 1		Barrineau, James A., G, 1	
Andrews, Ella Lou, Ed, 1		Barrineau, Reba Powell, Ed, 1	
Andrews, J. L., Ed, 1	Darlington	Barrington, Burness A., AS, 2	
Andrews, Leah Estelle, TI, 2	Westwille	Barron, Carol Evadne, ED, 1	Fr Myers
Anger, Alma Isabel, Ed, 1º	St. James City	Barrow, Frances Louise, ED, 1	
Anthony Hilda Tl 1	Augusta Georgia	Barry, Abert Dean, ED, 1 & 2	Clearwater
Argo, Mary Emma, Ed, 1	Ocoee	Barry, William N., AS, 1	Newberry
Armstrong, Gladys Mae, Ed. 2	[acksonville	Barshell, Fred, G, 1 & 2	Jupiter
Armstrong, Lillian B., Ed. 1.	Bradenton	Bartlett, Burnett, Ag, 1	Gainesville
Armstrong, Wallace F., E&G, 1 & 2 Arnett, Hettie, Ed, 2	Longwood	Barton, Rohert M., L, 1.	St Petersburg
Arnold, Eva C., Ed, 1 & 2	Perry	Barton, Rodger H., B, 1 & 2	Lake Worth
Arneld, Wm. Wilson, L, 1	Groveland	D A-1 I A 2	W7.12
Arthur, F. F., B, 1	Bradenton	Bass, Helen Virginia, AS, 1	
Arthur, James P., B, 2	Bradenton	Bassett, H. Burt, AS, 2	Monticello
Ash, Albert Lynn, G, 1	St. Petersburg	Batcheldor, Virginia M., ED, 1 & 2	St. Petersburg
Ashford, Roberta R., TI, 1 & 2	Sopchoppy	Battaile, E. Marie, ED, 1	
Ashmore, Wayne V., Ed, 1	DeFuniak Springs	Bass, Andrew J., Ag. 2 Bass, Helen Virginia, AS, 1 Bassett, H. Burt, AS, 2 Batcheldor, Virginia M., ED, 1 & 2 Bateman, Danie Stanfill, ED, 1 Pattaile, E. Marie, ED, 1 Batterton, Barbara, Tl, 1 Batterton, Barbara, Tl, 1	Winter Haven
Askew, Harry Lee, Jr., AS, 1	Lakeland	padilisten, mitenen, oc, i	Lake City
Athey, John Murrell, B, 1	St. Augustine	Baxter, F. Shelton, L, 1	
Atkins, Thomas M., GC, 1 & 2	Miami	Baxter, Martha Ruth, AS, 1	
Austin, Maurice H., GC, 1		Baynard, Henry T., GC, 1 & 2 Beall, Egbert R., B, 1	Bradenton

(Education; Psychology)
Thesis: "A Study of the Official and Community Relationship of the Florida Supervising Principal."
*Henry C. Fox, B.A. in Education, University of Florida, 1935
(Education; Spanish)
Thesis: "Physical Education in the Elementary Schools of Dade County."
Charles J. Gantt, B.S. in Education, University of Florida, 1936
(Education; Psychology)
Tendencies Among Elementary School Children of the P. K. Yonge
Laboratory School."
Lafayette Golden, Bachelor of Arts, Mercer University, 1912
(Education; Philosophy)
Athletics: Proposed Regulations for Their Simplification and Solution."
*Leon A. Gray, B.A. in Education, University of Florida, 1922
(Education; Psychology)
THESIS: "Some Adjustment Problems of Seventh and Eighth Grade Pupils."  *Phi Kappa Phi

*Robert E. Harris, Bachelor of Arts, Ogden College, 1923
(Education; Spanish)
J. Clarence Hill, B.C.S., New York University, 1931
(Education; English and Economics)
High School."
N. Broward Lovell, B.A. in Education, University of Florida, 1930 (Education; English and Sociology)
HORACE F. MITCHELL, B.S. in Education, University of Florida, 1931 (Education; English)
*Bessie A. Norton, B.A. in Education, University of Florida, 1930 (Education; Philosophy and Psychology)
Eugene G. Raborn, B.S. in Education, University of Florida, 1934 (Education; Mathematics, Political Science, and Psychology)
*Mamie L. Rencher, B.A. in Education, University of Florida, 1933 (Education; Mathematics and Psychology)
H. Jennings Rou, Bachelor of Arts, Florida Southern College, 1931 (Education; History)
Carl P. Schiller, B.A. in Education, University of Florida, 1930 (Education; English and Political Science)
B. Donald Stewart, Bachelor of Arts, Ohio Wesleyan University, 1932 (Education; History)
GLOVER E. TULLY, B.S. in Education, University of Florida, 1936 (Education; Political Science)
DWIGHT L. WILSON, B.S. in Education, University of Florida, 1933 (Education; Sociology)

<sup>\*</sup>Phi Kappa Phi.

# MASTER OF ARTS

*Charles C. Bernard, Bachelor of Arts, University of Florida, 1937 (History; Political Science)
Thesis: "Our 'Quasi-War with France': The Story of an Undeclared War."
Isham P. Byron, Jr., B.A. in Education, University of Florida, 1937 (English; Philosophy)
Thesis: "The Rise and Growth of the Elizabethan Dumb-Show as a Factor Contributing to an Interpretation of Shakespeare's Hamlet."
Frederick E. Cook, Bachelor of Arts, University of Florida, 1930 (Psychology; Education)
Thesis: "Influence of a Special Training Period on Individual Differences in Arithmetic Ability."
